BOND LISTINGS

BOND TENDERS INVITED.

Additional Bell Telephone Fives Listed—Calgary's
Financing—Bond Notes

The Bell Telephone have listed \$1,750,000 additional 5 per cent. bonds.

Canadian Northern \$587,671 sterling first mortgage fours, Port Arthur \$112,500 sterling fours and halves have been listed on the London Stock Exchange.

Applications have been made to list city of Calgary £500,000 4½ per cent.'s, Canadian Northern £1,438,356 4 per cent.'s, city of New Westminster £103,300 4½ per cent.'s, Standard Chemical, Iron and Lumber Company, \$250,000 7 per cent. stock on the London Stock Exchange.

Calgary School Debentures

The debentures of the Calgary Public School Board have not yet been sold and it has been arranged with the Imperial Bank to carry the board for the balance of the year paying six per cent. The overdraft at present is \$471,000, and the monthly expenditure on buildings is about \$100,000. An offer of 96 for some of the school bonds had been cabled, but as it was only an option the board did not take any action. In the meantime, the boards will be held to see if there is any improvement in the market.

Mr. J. O. McDonald, Toronto, and New York associates, propose to build an hotel at London, Ontario, if the city will raise or guarantee about \$200,000.

The over-drafts of the city of Ottawa on July 31st amounted to \$54,000.

Bank Helps Calgary.

The Bank of Montreal has undertaken to advance \$1,500,000 to the city of Calgary, for work now in hand on improvements, and for which the bonds have not been sold. This with the carrying by the banks of some contractors who have jobs, as might be done on progress estimate will leave the city commissioners fairly free to complete the works now undertaken.

For the \$10,000 5½ per cent. 20-year debentures of Prairie Rural Municipality, Sask., six bids were received, four from Toronto and two from Regina bond houses. As previously noted, the offer of Messrs. Brent, Noxon and Company, Toronto, was accepted.

An application has been made to the board of grain commissioners at Fort William, by the Dominion Millers' Association of Toronto, to have the rates for elevation and storage of grain at terminal elevators reduced.

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

(Continued from Page 327.)

Newmarket, Ont.—Up to August 28th for \$28,000 5 per cent. 30-year debentures. J. E. Hughes, clerk, Newmarket.

Imperial, Sask.—Tenders are called for \$15,000 6 per cent. 15-year waterworks debentures. J. G. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

NOTICE TO SUBSCRIBERS

When changing your mailing instructions be sure and give your old address in full as well as your new address.

DIRECTORS MUST DIRECT

There may not always be directors who do not direct. Whatever the cause of their inactivity, they have hitherto usually escaped responsibility when trouble has come to their institutions. Last month, in London, the responsibility of directors was nailed to the mast of precedent in no uncertain manner by Judge Darling. The verdict given was striking and the case of the greatest importance. The jury reported in favor of the plaintiff in an action for misrepresentation brought against the directors of the Law, Car and General insurance company. Apparently the main facts of the case were not in dispute, the doubtful point being whether the defendants could obtain a favorable verdict on the ground that they had been misled by their manager, and had published as facts statements which they had every reason to believe. Originally a charge of fraud was part of the plaintiff's case, but the accusation was dropped in favor of the broader charge of negligence.

The history of the company is given by the London Economist as follows: In 1906 a new non-tariff company was started by a group of men, of whom the moving spirit was a man called Fowler, the most important financier, a barrister named Mr. Wells, and the chairman, Sir Henry Cotton, formerly a distinguished Indian Civil servant, and at that time M.P. for Nottingham. Apart from Fowler, none of the directors had a personal knowledge of insurance, and when Fowler told his fellow-directors that he had a knowledge of insurance from A to Z, they accepted his word, and followed his authority. In point of fact, that one boast of his was enough to stamp him as a charlatan. Nobody un-

derstands insurance from A to Z, and it is astonishing that men of the world could take him so easily at his own valuation. The company, however, was floated, and began business in a pushing, enterprising spirit. Risks of every kind except life were taken; a large account in very heavy employers' liability risks was begun; a big marine re-insurance contract was written by a man who had once been an underwriter's clerk; and, as the rates in every department were remarkably low, business rolled in quickly. At the end of the first year the premium income had risen to £68,000; at the end of the second year it was £191,000, and by the third year £367,000. In view of this "rapidly increasing" business it soon became necessary to issue fresh capital, and in 1909 250,000 shares were offered to the public, 5s. being paid up and 15s. remaining uncalled. Later on the directors decided to take up life insurance, and in 1910 a fresh issue was made of 60,000 shares at a premium of 10s. per share. A glowing prospectus was issued, which described as flourishing a concern that was tottering to bankruptcy, and induced a number of harmless investors to take up a lot of worthless shares. It has been decided this week that the prospectuses were misleading, and that the directors can be forced to make good the losses suffered by the subscribers; unless, therefore, the decision is reversed on appeal the bill that they will have to pay will be little less than £60,000.

Commenting on the decision, the Economist says: "The history of this lamentable case raises once again the old problem of directors' morals. Are directors justified in sitting on the boards of companies that they do not understand, and accepting fees for work that they cannot efficiently carry through? It would not be reasonable to expect detailed technical knowledge from every member of a board. Indeed, the common theory

of a director is that he acts more or less like the head of a Government Department, bringing a sound general knowledge of business to the conduct of a particular concern, taking the advice of permanent officials, but deciding broad questions of policy for himself. The theory as it stands is not a bad one, but it is easily overdone, and there is still a feeling that directorships call for no particular skill or knowledge, and that anyone with a reasonable amount of application may fill a seat at a board with credit and respectability. The real truth is that a good director is almost as rare as a good Cabinet Minister. He must have an assimilative mind; he must have high business capacity, and above all he must have the courage to stand up to his expert advisers. If he is incapable of sound general judgment, or has not strength of mind enough to resist his subordinates on matters of principle, then he may find himself led as the Law Car directors were led by Fowler, and no one can lay the blame anywhere but on his shoulders. Directors are not paid for nothing. They are paid to take very heavy responsibility, and that responsibility they overlook at their own peril."

With almost watering mouth, *The Wall Street Journal* exclaims: "What would not this country give for only a few verdicts like that? The more respectable a director is, the more is he bound, for the sake of his honor and credit, to see that he, a trustee of the stockholders, is not deceived. Our laws give him ample opportunity to do so. Do they equally protect stockholders when he accepts the position as a dummy, or as a tribute to his commercial standing, accepting also the director's fees and perquisites—and yet fails to direct?"

Many Canadian financial disasters have involved directors who failed to direct. Every crash raises a stronger storm of protesting public opinion. That protest will eventually become so insistent that men will fear to take office, and incidentally fees, as directors unless they intend to assume the heavy responsibility and necessary, intimate knowledge of the outer and inner workings of the institutions they direct. Directors should guard the interests of the stockholders who are the financing and trustful factor. An endless performance of directorial inability and a continuous chain of legal decisions exempting the directors from responsibility will not forever satisfy the Canadian shareholder. Neither is it likely that the irresponsible director will always be able to wiggle through the meshes of the legal net. Immediately a man consents to become a director, he accepts responsibility. He cannot afford, and in due time will not be allowed, to place a company directorship in the same class as patronage of a village bazaar. Fortunately, we have in Canada many men who stand prominent as directors of the best type, and which many others may well emulate.

EAST AND WEST

The more that can be done to cement the ties of East and West, the better will it be for the Dominion. The interests of the countries on either side of Fort William and Port Arthur to some extent vary. Broadly, the West is the agricultural producer, while the East is the manufacturer. The one cannot buy necessities unless the prices received for his products are satisfactory and the markets adequate. The other cannot sell his wares unless the farmer has purchasing power. Similarly, in many other ways, we are interdependent. Our governments of whatever political hue should have as one of their chief aims, the harmonizing and solving of eastern and western ideas, ambitions, desires and problems. That cannot be done without sacrifices by both sides and all concerned.

One of the most logical and broad-minded utterances on this question was the recent speech of Mr. J. S. Willison, the Toronto editor, at the Winnipeg

Canadian Club. While admitting the existence of misunderstanding, and perhaps imperfect confidence between older and newer Canada, he declared himself assured of their ultimate hearty co-operation and solidarity. One by one, he took up the matters of variance, endeavoring to show that no real ground for internal strife exists.

Discussing the question of freight rates, Mr. Willison said: "If freight rates in the West are unduly high as compared with those that prevail in Eastern Canada, and if they hamper the progress of the country, the fact should be established and the remedy applied by the Railway Commission. But if these charges are excessive, they are not obtained at the demand or in the interest of the older provinces.

"In so far as they reduce the volume of trade between east and west they lessen the amount of labor employed, reduce the earnings of workmen, and limit the market for eastern manufactures by encouraging imports from the United States and other countries. In the reduction of these charges, therefore, east and west, farmer and manufacturer, have a common interest, and if there is any ground for quarrel it is with the carrying corporations, who exercise the power of taxation alike over the newer and the older provinces.

"Nothing, to my mind, is of more vital importance to Canada than that capital invested in railways and other great public enterprises should be fairly treated. Even yet this country is only upon the threshold of its development. For half a century we will be a heavy borrower in the money markets. It is essential, therefore, that investments should yield a fair return, and that public contracts should be faithfully observed. But it should be possible for the federal railway commission or the department of trade and commerce to produce an authoritative report on relative railway charges in the eastern and western provinces and in the United States, where similar conditions prevail, and to establish equal treatment for all sections of the country, while aside altogether from the compulsion of legislation the railway corporations must recognize that if trade is to run in east and west courses, and if they are to perform the great national function for which they were created and endowed out of the public treasury they must deserve the advantages which they enjoy under the commercial policy which still commands the support of a majority of the people."

Mr. Willison's treatment of the fiscal problem was equally as fair. "Without protection," he said, "no nation ever achieved any considerable industrial supremacy. It may be that free trade is the true faith for a perfect world, but either the faith is weakly held or the world is still very imperfect. I submit that protectionist duties were not imposed in Canada and have not been maintained for the special or exclusive benefit of manufacturers. Protection was established for a great national object just as certainly as the Canadian Pacific Railway was constructed for a great national object.

"By no force of logic, or effort of persuasion, or act of parliament can you induce a whole people, or even all the members of a single family, to follow agricultural pursuits. In every family of three sons two will devote themselves to commercial or industrial conditions.

"Under the conditions which obtain in Canada with modern protectionist duties, industries will follow population as under free trade Canadians would go to the industries of the neighboring country. It is only by a judicious system of protection that we can conserve our own natural resources, which, under sound policies of legislation and administration, become chief sources of public revenue and the support of great industrial communities. Eventually, there will be a decline in immigration, in land trading, and in all the activities which arise from rapid increase of population.

"Eventually the cities, towns and villages of the West will require industries to give employment to their workmen, to provide trade for their merchants, to stimulate their various local activities, and to ensure their progress and maintain their prosperity. Do you believe

that the industries of older Canada could thrive if they were exposed to the unobstructed competition of the highly specialized and heavily capitalized industries of the United States, manufacturing for a protected market of ninety millions of people, or do you believe that against such competition any considerable number of industries could be established in the West in this generation?

"In the United States for nearly half a century the chief agricultural States have been protectionist strongholds because they desired that their sons should have ample choice of a vocation and employment in their own country, because they believed that grain prices for exports were determined by the markets of Europe, and because they believed that any burden imposed by protection was offset by the higher prices of local markets, that local markets were essential to profitable general farming, and that farming devoted to a single staple product could never be a permanent condition.

"This may or may not have been sound reasoning, but if it was influential with United States farmers under a very high tariff, it may have significance for Canadian farmers under a very moderate tariff, and particularly for Western farmers, whose prosperity will increase with the increase of home demand and expansion of home markets.

"Is it conceivable that by legislation you could create a separate free trade area in the United States, and maintain its population and prosperity at the level prevailing in the surrounding protectionist country, or that the Canadian West can have wide diversity of interests, a thrifty and independent agriculture, eager local markets, busy factories and well-paid mechanics, and prosperous merchants if we deliberately determine that it shall be an industrial dependency of the Republic?"

Some will take issue with certain of Mr. Willison's statements, but we quote them freely, for, as a whole, they are a fair exposition of the case and of the desire for the closest relations between Eastern and Western Canada. The day will probably come when agricultural production in this country, after satisfying the rapidly expanding home markets and their purchasing power, will need larger markets. Eastern Canada should not stand in the way. On the other hand, if those larger markets are in the United States, a very carefully prepared bargain should be made by Canada with the Republic, which has again recently demonstrated a surprising code of international ethics for the sake of business at any price for their countrymen.

MANITOBA'S PROTECTIVE ACT

When a new bill regulating the sale of stocks and bonds became law in Manitoba, there was considerable fluttering in financial dove-cotes. At first glance the new legislation looked like a narrow gate for any who sought to sell shares in that Western province. A public utilities commissioner has been appointed to administer the law, and representatives of the Bankers' Association and the Winnipeg Stock Exchange conferred with him recently with a view to receiving light on the exact significance of the law. Varieties of stocks and bonds affected by the Act, and the various classes of companies exempted were discussed. These included those reported under the Manitoba insurance act, the act respecting the licensing of extra provincial corporations, or those subject to taxation under the taxation of corporations act, or railway taxation act. The securities excluded from the operation of the act are bonds or other securities of the Dominion or any province, or of any foreign country, or of any county, city, town or village, municipality, school district or local improvement district of any province of Canada, or of any stock, bonds, debentures, or other securities authorized by the Commission to be dealt in or listed on any stock exchange

which has been approved for the purpose by the Commissioner.

It was suggested that of stocks not coming within the above exception, the Commission might approve of certain of them to be sold upon the Winnipeg Stock Exchange, the effect of this being that such stocks might be sold anywhere and not be limited to the Exchange. Within this class would be included stocks and bonds whose well-known merit is common knowledge, and little or no formality would be required in procuring the approval of the Commissioner. Omitting the above, leaves only stocks and bonds of companies incorporated out of the province, of unknown and untried merit, and it is in respect of this class of stocks that protection for the public is sought by the Act. In short, the new law is patrolling as a legislative policeman, looking very fierce, but only interfering when anything really shady comes along.

SMALL CHANGE

Business men might do worse than consider life insurance as the next investment.

* * * *

President Taft has signed the Panama Canal Bill—a poor use for the last few drops of this particular presidential ink.

* * * *

In Chicago it is said that the telephone trust may be prosecuted. When the time comes, undoubtedly the answer will be, "Line busy."

* * * *

An English visitor says that Toronto's hotels are the worst in the world. Now a Scotch visitor says he never struck a city so lax and so out of date as Montreal. These are the penalties we pay for being a new country.

* * * *

The National Exhibition at Toronto is in full swing this week. Year by year it fulfils its splendid educative mission, and has now grown to be one of the most important fairs of the American continent. Its merits alone will probably attract a million people during the two weeks. The visitors from all parts of the world are its patrons. The Toronto exhibition is one of this world's goods which the rain cannot spoil.

* * * *

During the course of correspondence with Senator Le Roy Percy, of Mississippi, *The Monetary Times* has received the following comment of the Senator in regard to the much-discussed Panama Canal bill: "I regret to say that the result shows that the Jingoism joined hands with the ship interests, and for a very paltry consideration (the entire tolls of the coastwise trade would be a million and a quarter dollars annually) placed our government in a position where at least its honesty in carrying out its treaty obligations can be questioned."

* * * *

The Monetary Times recently criticized the remarks of a Captain J. Roy Saunders respecting the merits of Canadian securities. The Captain is said to have stated that he was associated with a London daily paper, and proposed to write a series of articles on the value of Canadian investments, a series which, it was intimated, would create the biggest sensation of the time. The newspaper with which the captain was supposed to be associated denies that he was in Canada as their representative, and asks, "Who is Captain Roy Saunders?" This is but another example of our bad Canadian habit of accepting and treating hospitably any Tom, Dick or Harry coming from a distance with a glint of business in his eye. We are all willing to entertain our visitors and to give them every possible opportunity to learn of the progress and development of the Dominion, but it is only right that they should first present proper credentials.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

VII.—WESTERN CANADA, WHEAT, AND THE CANAL

The shipment of the Western Canadian wheat crop has become a more acute problem every year. This is because the size and the facilities of our eastern outlet could not possibly keep abreast of the increased acreage under cultivation and the larger yield from season to season. The time has come for another exit for Canadian wheat, and most opportunely, the Panama Canal will afford it. The shipment eastward of the entire Western crop is a laborious enterprise, and economically wasteful. The Canal should enable a large share of the prairie products to go to the Pacific Coast. The Hudson Bay Railway may or may not act as further relief; that remains to be proved. There is doubt as to the navigation facilities of Hudson Bay. For several months of the year, the waters are not navigable. There is no doubt as to the navigation facilities of Vancouver, Victoria, Prince Rupert and our Pacific Coast generally. The waters there are navigable throughout the year.

Rapid Expansion of Crop.

Before discussing the western shipment of the prairie crops, it is useful to recall the writer's estimate of the probable crop for 1920, based on the actual production and increases during the past ten years. This appears in the volume, "Capital Investments in Canada," recently published by *The Monetary Times*. The increase in wheat area in Manitoba is naturally not as great as in the other provinces, it having been the first to enjoy any considerable agricultural settlement in the West. The increase in Manitoba wheat area in ten years was 968,000 acres, or 48 per cent.; in Saskatchewan, 4,235,000, or 903 per cent.; in Alberta, 1,582,000 acres, or 4,647 per cent., and in the total wheat area of the Western provinces 6,784,000 acres, or 269 per cent.

Some Remarkable Increases.

In making comparison between the yields of 1900 and any other year, it must be remembered that the census records of 1900 were exceptionally low, owing to drought. It will be fairer to calculate the increase in wheat production since 1901. The gain in Manitoba since that date has been 10,000,000 bushels, or 20 per cent.; in Saskatchewan, 86,000,000 bushels, or 781 per cent.; in Alberta, 35,286,000 bushels, or 4,117 per cent.; and in the total Western production 117,000,000 bushels, or 185 per cent. These are remarkable increases. If the increase in the Western wheat area in the past ten years has been 269 per cent. and the gain in production 185 per cent., what will be the wheat area and production at the end of the next decade?

In estimating the probable increase, there are many important factors of which cognizance must be taken. In the old portion of Manitoba there are about 47,000,000 acres of land, with 33,000,000 acres of good arable land. The area under cultivation is only 6,500,000 acres.

Saskatchewan and Alberta.

Saskatchewan has a land area of 242,332 square miles, or 155,092,480 acres, and a water area of 8,318 square miles. South of township 64, which is practically the middle of Saskatchewan, the province has been divided for statistical purposes into nine crop districts, as nearly as possible uniform in size. The area of these districts is 86,826,240 acres, and the crop area in them in 1911 was 8,602,455, or 9.8 per cent. of their total area.

The area of arable land in the nine crop districts is estimated to be not less than 57,884,160 acres. The total area under cultivation is 13,169,235, or 15.16 per cent. of the area of the districts referred to.

In Alberta there are approximately 100,000,000 acres of arable land, and of this area about 2,250,000 acres are under cultivation and occupied by farm buildings. These are the official figures of the three Western provinces.

Big Crop Eight Years Hence.

In 1914, we shall have two more transcontinental railways, which will open much new land for settlement. The improvement in farming implements will mean the tilling of greater acreage in less time. These factors should compensate somewhat for the probability that mixed farming in the West will be engaged in more than hitherto, with consequently less attention to wheat, and for the fact that constant wheat-growing makes the soil poorer. Assuming, after allowing for these factors, that the ratio of increase in the next ten years will be as great as in the past ten years, there will be in 1920 in the three Western provinces wheat acreage of 34,321,000 acres and a wheat crop of 513,000,000 bushels. This allows a yield of 15 bushels per acre. The average wheat yield per acre in the West during the past four years was 19.71 bushels. Accepting that figure as the yield of 1920, the 34,321,000 acres should yield 675,466,910 bushels.

Need Every Possible Outlet.

That is a crop which will require every possible outlet and every available market. The Panama Canal some years before then will have made an indelible mark upon the world's commerce. Western Canadian shipments via our Pacific Coast and the Canal will before that time have become a permanent factor.

The difference in distances by shipping east and west is seen in the following typical figures:—

	Miles.
Calgary to Fort William	1,260
Calgary to Vancouver	644
Saving by shipping westward.....	616
Moose Jaw to St. John.....	2,393
Mosse Jaw to Vancouver	1,085
Saving by shipping westward	1,308

The distance from Edmonton to Fort William is 1,451 miles and to Vancouver 735 miles. The gateway to the Peace River country is, therefore, 716 miles nearer the Pacific Coast than to the head of the Lakes.

Distances and Rates.

The question of rates is vitally important, and has a direct bearing on the savings in distances. Until our railroads define their position and publish new rates, few definite and comparative figures of value can be given. It costs approximately 24.40 cents to ship a bushel of wheat from Calgary over the summer route of the Great Lakes to Liverpool. In the winter by the Eastern route, via St. John, it costs 34.40 cents, and 34 cents to ship it by Vancouver and the Tehuantepec Railway. When the Panama Canal is opened it is estimated that, including tolls, it will cost 24.40 cents to send a bushel of wheat from Calgary to Liverpool via Vancouver.

On the other hand, it costs 11.70 cents per bushel to ship grain from Calgary to the Pacific Coast and 15 cents to the head of the Lakes. Shortly after the Canal is opened, we shall have three transcontinental railroads, and that fact will naturally create keen competition for shipments east and west.

Help for the Prairie West

Aside from wheat and grain shipments via the western route, the new waterway should provide for every Western Canadian farmer, rancher fruit-grower, canner, and lumberman within a thousand miles of any Pacific Coast export centres, a cheap means of transportation.

The Canal route to Europe will have the advantage of being an all-the-year-round route, whereas the combined rail and vessel route across the continent has to contend against frozen waterways that for five months in the year are useless. As has been truly said: "Whatever affects the transportation facilities of the Middle West touches its economic life at the very centre."

(To be continued.)

WESTERN WHEAT AND THE CANAL

It appears that the statement of Mr. E. J. Chamberlin, president of the Grand Trunk Railway, regarding Western wheat and the Panama Canal, was misquoted by ultra-vigorous Montreal newspaper men. It was said that the railroad president thought little change would occur in the eastern shipment of the wheat from the Canadian prairies despite the opening of the new waterway. Mr. Chamberlin, being on the Pacific Coast recently, was bombarded with enquiries and protests. He then thought it well to issue a written statement. Here it is in full:—

"The Montreal reports which were copied in Pacific Coast papers were not a correct outline of my interview; that is, it was not a full report, and in some cases I was misquoted. My statement that I did not consider the Canadian railways would be interested in putting on boat lines via the Panama Canal is quite correct, but I remarked to the reporter that for transcontinental railway lines to put on steamboat lines from Halifax or St. John to Vancouver or Prince Rupert would be simply putting on lines to compete with the all-rail lines across the continent. This explanation, you will note, was not included in the report.

"Furthermore, I did not say that, in my opinion, very little grain would go via the Pacific Coast; on the other hand, I did say that I thought a very large amount of grain would go via that route, but before such an arrangement could be brought about there would have to be a radical change in the manner of handling grain on the prairies. This was more as a warning to the farmers and others. The farmers now make no provision whatever for handling their grain, but desire to thresh almost immediately after cutting is performed, and load direct from thresher into the railway car, without any regard as to the condition of the grain, and in a season like last year, where a large proportion of the grain had to be dried before it could even be put into an elevator, it would stand very little chance for a long sea voyage, either on the Atlantic or the Pacific.

THE ARROWS SHOW THE ROUTES OF WESTERN CANADIAN GRAIN AFTER THE OPENING OF THE PANAMA CANAL.
INTERESTING MAPS PREPARED BY MR. J. COGGSWELL, OF CALGARY, AND PRINTED IN THE MONETARY TIMES BY SPECIAL ARRANGEMENT WITH HIM.

THE ARROWS SHOW THE PRESENT ROUTE OF WESTERN CANADIAN GRAIN.

"I also stated that I did not think the East needed to fear the Panama Canal, but in the rest of that article I was misquoted, as I stated there would always be sufficient grain tributary to the East to take care of all the facilities which the East could furnish. Manitoba and Southern Saskatchewan will within the next two years block Montreal with grain unless very large improvements are made in facilities for forwarding grain East from Montreal.

"You can very well imagine that the reporter of a Montreal paper would not go out of his way to enlarge on Pacific Coast facilities as against those via Montreal. There is no doubt whatever but what a very large

amount of grain would go out by the way of Vancouver and Prince Rupert if proper facilities were provided and proper care taken in preparing grain for each shipment."

This is a version very different to that circulated from Montreal. The only criticism we would offer is that Mr. Chamberlin did not issue this statement several weeks ago.

BONDS OR MORTGAGES?

Interesting Discussion as to Their Relative Merits—Essential Considerations of a Good Investment

The relative merits of bonds and mortgages are frequently the basis of discussion. Investors are often met who will consider nothing but mortgages. By these they mean mortgages upon improved real estate, such as dwellings, office property, etc. Mortgages have been considered among the safest investments for centuries and rightly. Putting the greater faith in bonds, the Royal Securities Corporation, of Montreal, in an interesting comparison recently published, states that present conditions, business and financial, prohibit large manufacturing companies from mortgaging their property for a sum well up in the millions of dollars, and placing such a mortgage with an individual investor. Business enterprises to-day need large sums of money for the development of their properties, and to further this development they are usually compelled to borrow large sums. This is done by mortgaging the property to a trustee—usually a trust company—and issuing bonds of different denominations against this mortgage.

"The mortgage investor," continues the argument, "will admit that he does not buy a mortgage. What he buys is a bond secured by a mortgage. In the real estate business this bond and mortgage are very often contained in one document, but quite frequently there are two separate documents. Instead of executing one single bond for a large amount, corporations issue a number of smaller bonds, sufficient in the aggregate to amount to the principal sum borrowed and secured by one mortgage.

Five Essential Considerations.

"Before attempting to discuss the relative values of bonds and mortgages for investment, it is well to consider the qualities which are characteristic of any first-class investment.

"The five most essential considerations which render a security attractive in the eyes of an investor are:—

- "(1) Security of principal.
- "(2) Security of income.
- "(3) Saleability.
- "(4) Fair rate of income.
- "(5) Reasonable chance of appreciation in value.

"Sufficient proof can be adduced to show that carefully-selected bonds, especially industrial bonds, are to-day quite as secure, with respect to principal and income, as any other form of investment. The enormous development in Canada during recent years has resulted in an increasing demand for the products of Canadian industries. This development has only commenced—it will surely grow for many years to come. In order to meet the demand new companies are being formed, and existing companies reorganized or expanded. To accomplish this, additional capital is required, and is usually secured through a bond issue. These bonds are almost invariably secured by a mortgage on real estate and assets, largely in excess of the sum borrowed. Many of these reorganized companies are safeguarded against dangerous competition by the cost of establishing the business itself, and by the impossibility of duplicating the strategic position occupied by the company.

Saleability of Bonds.

"It is easy to prove that the value of the property pledged as security for the bonds of these companies is largely in excess of the ratio usually demanded as security for an ordinary mortgage, while the established earnings are large enough to enable the company to meet the interest on its bonded indebtedness many times over. The payment of interest on a mortgage usually depends on the health and success of an individual.

"So far as the third prominent characteristic mentioned above is concerned, viz.: saleability, bonds have a decided advantage over most other forms of investment, and certainly over mortgages.

"At prevailing prices, industrial bonds yield a fair rate of interest, indeed a liberal rate, considering the degree of security they offer.

"Most bonds of the better class are distributed over large territories—sometimes international. This, together with the fact that frequent reports of the conditions of the company are widely published, makes the bond well known among investors. It is a well known fact that investors favor a security known to themselves and their neighbors. When a person is looking for an investment he is most like-

ly to invest in a security he knows about, either through previous investment or by information gleaned from the daily press. This buying, increasing as the bond becomes better known, is almost certain to cause an appreciation in market value. It is the simple rule of supply and demand. The same reason that impels a person to buy a bond, will cause one who already holds the bond to wish to retain it.

As to Relative Advantages.

"The arguments in favor of the purchase of bonds in general, and industrial bonds in particular, are perhaps best illustrated by a comparison of the relative advantages of industrial bonds and real estate mortgages.

"Until recent years, institutions such as banks and insurance companies invested a large part of their surplus in real estate mortgages. Since industrial conditions have improved in Canada and various industries have become firmly established, financial institutions have looked with more favor upon the bonds of such companies. To-day, practically every financial institution in Canada has a considerable block of industrial bonds among its investments.

"Under the influence of prosperity, investors witness the constant increase in value of all property, and naturally favor that form of investment which will appreciate in value in sympathy with the increase in value of the property on which the investment is based. This is especially true of industrial bonds. Not only does the real property of the company increase in value, but the general assets usually increase as well. The earnings to which investors must look to meet the interest payments increase with prosperity. All these conditions increase the demand for the bonds of the particular industry. Increased demand for anything—eggs or bonds—means increased prices.

Question of Income.

"Real estate mortgages do not hold out such attractions. Owing to their short duration, they do not appreciate. On the other hand, the income from mortgages never fluctuates. This is probably the strongest argument the mortgage investor has. Bonds, if purchased at high prices, yield less income than when purchased at lower prices. It is our business to find bonds for our customers that will not only yield a good income, but have a reasonable appreciation in market price.

"To bring out the decided advantages bonds have over mortgages, we have worked out in parallel the same arguments applied to each. In making this comparison, we have tried to maintain an unbiased attitude toward real estate mortgages. For the arguments for and against each class of investment, it will be seen that bonds certainly present the most favorable opportunities for investment."

OUR RAIL MILLS CAN HANDLE THE BUSINESS

A despatch from Ottawa stated that importations of rails from the United States have been heavy and that Canadian mills could not cope with the demand. Mr. J. H. Plummer, president of the Dominion Steel and Coal Corporation, thinks otherwise. Interviewed at Sydney, he admitted an increased demand, but stated that if it had come to stay, the mills are well on the way to take care of it. It is not clear that the demand is permanent, he thinks. "There is a factor in the case naturally not known to the public. Rail contracts are made each fall for the whole of next season's requirements. The steel companies then proceed to make contracts for the balance of their output of steel. The present shortage represents demands which the railways did not foresee last fall, and it is useless to blame the rail mills. They could not afford to enter on the season's business with any considerable amount of steel unsold, and would be unable to take large extra orders for rails whatever their rail mill capacity might be.

"It is true that we are passing through a period of active railway building but that has been our condition for some years. The present output of 4,000,000 tons would lay over 3,000 miles of railway, and even in these days that represents great growth. In any case, so far from the steel companies being held up as having failed to keep pace with the requirements of the country, they are entitled to credit for having in the face of enormous and sudden growth in the demand for rails, been able to supply 90 per cent. of the consumption."

RECORD YEAR FOR CANADIAN PACIFIC

Annual Report Shows Substantial Surplus—Many Railway Leases Submitted to Shareholders—Important Announcements Made

Gross earnings, \$123,319,541.

Working expenses, \$80,021,298.

Net earnings, \$43,298,242.

Net surplus, \$17,560,518.

Total mileage of the Canadian Pacific system is 16,944.

The Kettle Valley Railway Company, 275 miles is to be leased.

Four per cent. preference stock totalling £1,976,390 created and sold.

Net earnings amounted to 35.11 per cent., as compared with 35.23 per cent. in 1911.

Orders were placed for locomotives and cars representing an expenditure of \$25,750,000.

Four per cent. consolidated debenture stock, totalling £2,252,516 was created and sold.

Working expenses amounted to 64.89 per cent. of gross earnings as compared with 64.77 in 1911.

During the year 669,639 acres of agricultural land was sold for \$10,710,143, being an average of \$15.99 per acre.

The directors asked sanction to issue 4 per cent. consolidated debenture stock for extension of Western branch lines.

For enlargement of terminals, additional buildings, shops and other improvements, an expenditure of \$30,000,000 was authorized.

The New Brunswick Coal and Railway Company is to be leased for a term of 999 years at a rental of 50 per cent. of the net earnings of the railway.

The Kingston and Pembroke Railway of 107.5 miles; Alberta Central Railway, 65 miles; St. Mary's and Western Ontario Railway, are to be leased.

Authority will be asked to acquire a portion or all of the debenture stock of the Dominion Atlantic Railway by an issue of Canadian Pacific 4 per cent. consolidated debenture stock.

Agreement to be made with Georgian Bay and Seaboard Railway Company to increase limit of that company's bond issue, the construction of the road having proved more expensive than anticipated.

Land in British Columbia secured by construction of Columbian and Western and British Columbia Southern Railways became subject to taxation. The Canadian Pacific Railway Company has decided to reconvey to the British Columbia government the unsold portion of these lands with the exception of 543,496 acres.

The above are some of the important points noted in the thirty-first annual report of the directors of the Canadian Pacific Railway Company for the year ended June 30th, 1912. The accounts of the company for the year ended June 30th, 1912, show the following results:—Gross earnings, \$123,319,541; working expenses, \$80,021,298; net earnings, \$43,298,242; net earnings of steamships in excess of amount included in monthly reports, \$1,404,448; total, \$44,402,691; deduct fixed charges, \$10,524,937; surplus, \$33,877,754; deduct amount transferred to steamship replacement account, \$1,000,000; contribution to pension fund, \$125,000; total, \$1,125,000; grand total, \$32,752,754. From this there has been charged a half-yearly dividend on preference stock of 2 per cent., paid April 1st, 1912, \$1,258,333; and three quarterly dividends on ordinary stock of 1½ per cent. each, paid January 2nd, 1912, April 1st, 1912, and June 20th, 1912, \$9,450,000; total, \$10,708,333; grand total, \$22,044,420. From this there has been declared a second half-yearly dividend on preference stock, payable October 1st, 1912, \$1,333,901; and a fourth quarterly dividend on ordinary stock of 1½ per cent., payable October 1st, 1912, \$3,150,000; total, \$4,483,901; leaving net surplus for the year, \$17,560,518.

In addition to the above dividends on ordinary stock three per cent. was paid from special income.

Details of Special Income.

The following are the details of special income for year ended June 30th, 1912:—Balance at June 30th, 1911, \$2,702,205; interest on cash proceeds and on deferred payments for land sold, \$1,817,774; interest on deposits and loans, \$865,140; interest on Canadian Pacific Railway 1st mortgage bonds acquired, \$61,612; interest from Minneapolis, St. Paul

& Sault Ste. Marie Railway bonds, \$159,720; interest from Duluth, South Shore and Atlantic Railway bonds, \$100,000; interest from Mineral Range Railway bonds, \$50,160; interest from Toronto, Hamilton & Buffalo Railway bonds, \$10,840; interest from Kingston and Pembroke Railway bonds, \$13,320; interest from Dominion Government bonds, \$182,500; interest from Ontario Government bonds, \$48,000; interest from British consols, \$114,569; interest from Montreal and Atlantic Railway bonds, and on other securities, \$174,311; dividend on St. John Bridge and Railway Extension Company stock, \$50,000; dividends on Dominion Express Company stock, \$160,000; dividends on Minneapolis, St. Paul and Sault Ste. Marie Railway common stock, \$890,645; dividends on Minneapolis, St. Paul and Sault Ste. Marie Railway preferred stock, \$445,326; dividends on Alberta Railway and Irrigation Company stock, \$245,241; dividend on West Kootenay Power and Light Company common stock, \$27,500; dividends on West Kootenay Power and Light Company preferred stock, \$1,925; total, \$7,860,790.

Less—Payments to shareholders in dividends:—September 30th, 1911; January 2nd, 1912; April 1st, 1912, and June 29th, 1912, \$5,400,000; total, \$2,460,790. From this a dividend has been declared, payable October 1st, 1912, \$1,350,000; leaving net surplus carried forward, \$1,110,790.

The working expenses for the year amounted to 64.89 per cent. of the gross earnings, and the net earnings to 35.11 per cent., as compared with 64.77 and 35.23 per cent., respectively, in 1911.

Stock Created and Sold.

Four per cent. consolidated debenture stock to the amount of £2,252,516 was created and sold, and of the proceeds the sum of £1,481,592 was applied to the construction of authorized branch lines; £300,000 was used for acquisition of steamships for Pacific Coast service, as authorized; £5,000 was used to acquire a like amount of your company's first mortgage 5 per cent. bonds, and the balance, £465,924, was devoted to the acquisition of the bonds of other railway companies whose lines constitute a portion of your system, the interest on which had, with, your sanction, been guaranteed by your company.

Four per cent. preference stock to the amount of £1,976,390 was created and sold, the proceeds being used to meet capital expenditures that had your previous sanction.

The report further stated:—

"Your guarantee of interest was endorsed on 4 per cent. consolidated bonds of the Minneapolis, St. Paul and Sault Ste. Marie Railway Company to the amount of \$1,520,000, issued and sold to cover the cost of 76 miles of railway added to that company's railway system.

Sale of Irrigated and Other Lands.

"During the year 669,639 acres of agricultural land were sold for \$10,710,143, being an average of \$15.99 per acre. Included in this area there were 3,270 acres of irrigated land, which brought \$44.25 per acre, so that the average price of the balance was \$15.85 per acre.

"Your directors consider it desirable to extend the following branch lines of railway in Manitoba, Saskatchewan and Alberta, and will ask you to sanction the issue of the requisite amount of 4 per cent. consolidated debenture stock to meet the expenditures, namely, Boissevain to Lauder, 37 miles; Weyburn-Lethbridge branch, 125 miles; Kerrobert Northeasterly branch, 11 miles; Wilkie Anglia branch, 4 miles; Swift Current Northwesterly branch, 80 miles; Suffield Southwesterly branch, 55 miles.

Many Leases Were Submitted.

"There will be submitted for your consideration and approval a lease of the Kingston and Pembroke Railway, extending from Renfrew, on the company's main line west of Ottawa, to Kingston, on the St. Lawrence River, and from the village of Godfrey to Zanesville Mine, in the Province of Ontario, a total distance of 107.5 miles; a lease of the Alberta Central Railway, extending from Red Deer to Rocky Mountain House, in the Province of Alberta, a distance of 65 miles; an agreement with the St. Mary's and Western Ontario Railway Company cancelling existing arrangements and substituting a lease of their property for a period of 999 years at a rental equivalent to 4 per cent. per annum on bonds issued or to be issued by that company with your consent, to an amount not exceeding \$25,000 per mile of their railway; and a deed of conveyance of the Cap de la Madeleine Railway, about four miles in length, connecting your railway near Three Rivers, in the province of Quebec, with Cap de la Madeleine, on the St. Lawrence River, and with the Wayagamack Pulp and Paper Company's works.

"An indenture of lease from the Government of the Province of New Brunswick, as lessor, to this company, as lessee, of the New Brunswick Coal and Railway for a term of 999 years at a rental of 50 per cent. of the net earnings of the said railway, as defined and calculated in the said proposed lease, will be submitted for your sanction. This railway extends from a point in the vicinity of Minto, in the county of Sun-

bury, to a point of junction with the Intercolonial Railway, near Norton, in the county of Kings, in the Province of New Brunswick, a distance of approximately 58 miles, and will form a portion of a connection between your railway and a coal mine in the Province of New Brunswick, now in process of development.

Friendly Connections with Boston Road.

"For the purpose of securing a shorter and more expeditious route between Quebec and points in New England, served by your friendly connection the Boston and Maine Railroad, your directors thought it advisable to lease the Quebec Central Railway, forming the connection between Sherbrooke and Levis, together with branch lines from Beauce Junction to St. Sabine, and from Tring to Megantic, all in the Province of Quebec, making a total of about 253.5 miles of railway, at a rental based upon the interest on the outstanding 1st, 2nd and 3rd mortgage bonds of the Quebec Central Railway Company, and a dividend on the outstanding capital stock of that company at four per cent. per annum for four years from July 1st, 1912, and thereafter at the rate of five per cent. per annum, and you will be asked to confirm the action of your directors and sanction the agreement of lease between your company and the Quebec Central Railway Company.

Developments in British Columbia.

"The Shuswap and Okanagan Railway, 51 miles in length, extending from Sicamous Junction, on your main line in British Columbia, to the head of Okanagan Lake, was leased to your company on its completion in 1892 for a period of 25 years, and it was a condition of the lease that the company should pay by way of rental forty per cent. of the gross earnings of the line, as defined in the lease, in quarterly amounts. The interest on the bonds issued by the Shuswap and Okanagan Railway Company for the construction of the line, amounting to £10,000 per annum, was unconditionally guaranteed by the Province of British Columbia. Until within the last two years the rental was insufficient to meet the annual interest charge, with the result that the Province of British Columbia had a deferred claim against the Shuswap and Okanagan Railway Company for the deficiency in interest amounting to about £80,000 at the end of last fiscal year. As the principal of the bonds will mature July 1st, 1915, and it is manifestly desirable that your company should retain possession of the line, a lease of the property for a period of 999 years has been arranged and will be submitted for your approval. The rental to be paid by your company is an amount equivalent to four per cent. per annum on the outstanding bonds of the company and on any that may hereafter be issued with your consent. Upon being subrogated in the rights of the province your company has undertaken to make good to the province the deficiency in interest, to which reference has been made.

As to British Columbia Lands.

"Your land in British Columbia secured by the construction of the Columbia and Western, and British Columbia Southern Railways had, by lapse of time and judgment of the court, become subject to taxation. Of the lands in these grants 434,696 acres were sold during the past twelve years at an average net price of \$1.77 per acre. As these constituted the most accessible of the lands, and the remainder were so situated that they would necessarily be very slow of sale, your directors decided after negotiations covering a considerable period to reconvey to the Government of the Province of British Columbia the unsold portion of these two land grants, excepting an area of 543,496 acres, reserved by the company to meet its timber and tie requirements, at the price of 40 cents per acre. This will enable the provincial authorities to encourage settlers to take up on very easy terms such of the lands as may be of use, and the company will be relieved from the cost of administration and from the payment of rather heavy annual taxes. Your directors are of opinion that the transaction, which was not completed until after the close of the fiscal year, will prove advantageous to both the Province of British Columbia and to your company, and they hope that their action will meet with your approval.

Esquimalt and Nanaimo Railway.

"In 1905, when your company acquired the Esquimalt and Nanaimo Railway, you also purchased the unsold lands on Vancouver Island belonging to that Company, about 1,400,000 acres in area, at the price of \$1,330,000. Thus far 250,000 acres have been sold, yielding \$3,364,000, and the remaining area is of great value, although some portions of it are so situated that they cannot well be utilized. There was the possibility that these lands might be subject to taxation if segregated from the Esquimalt and Nanaimo Railway, and, therefore, they have never been taken into your accounts, but an agreement about taxes has been made with the Government of the Province of British Columbia and hereafter the figures relating to them will appear in your annual statements.

"The Georgian Bay and Seaboard Railway, recently built under the auspices of your company between Victoria Harbor, on Georgian Bay, and Bethany, Ontario, to provide a shorter and more economical lake and rail route between Western Canada and the Atlantic Seaboard, has proved more expensive than was anticipated, due to the character of the line that it was finally determined to construct and to other conditions.

"The power conferred by Parliament on the Georgian Bay and Seaboard Railway Company to issue bonds for the purposes of its undertaking was originally limited to \$30,000 per mile, but at the last session of Parliament this amount was increased to \$55,000 per mile, and your directors will ask your authority to enter into a supplementary agreement with the Georgian Bay and Seaboard Railway Company to increase the limit of that company's bond issue, upon which this company has, by virtue of the lease approved October 3rd, 1906, agreed to pay interest by way of rental, from \$30,000 to an amount not exceeding \$55,000 per mile of railway.

North Shore of Lake Ontario.

"Instead of continuing the double track from Glen Tay to Agincourt, on the Ontario and Quebec Railway between Montreal and Toronto, your directors have decided, if you approve, to secure a line between these two points that will serve the territory further south, and will reach several important towns on the North Shore of Lake Ontario. An agreement has, therefore, been made with the Campbellford, Lake Ontario and Western Railway Company for the construction, under your company's supervision and control, of that company's railway, 184 miles in length, between Glen Tay and Agincourt, both in the Province of Ontario, and for the lease of the railway when completed to your company for a period of 999 years, at a rental equivalent to four per cent. per annum on the bonds of the Campbellford, Lake Ontario and Western Railway Company, issued with your consent.

Kootenay and Boundary Creek.

"Your present route between points in the Kootenay and Boundary Creek Districts, of British Columbia, and the Pacific Coast is long and expensive, and the best means of securing a more direct route has engaged the attention of your directors for some time past. The Kettle Valley Railway Company, having a Dominion charter, covering the territory between Midway, the terminus of your Boundary Creek Line, and Merritt, on your Nicola Line, undertook to build the railway between these points, under the advice and to the satisfaction of your directors, upon condition that your company would lease the line, approximately 270 miles in length, and the branch line along the North Fork of the Kettle River, 24 miles in length, whenever and as soon as the Kettle Valley Railway Company is competent to make a lease, paying by way of rental the interest at four per cent. per annum on the bonds of the Kettle Valley Railway Company, issued with your consent, any subsidy received from the Dominion or Provincial Government, or from any other source, to be applied on an agreed basis towards the cost of the construction of the railway and a corresponding reduction in the amount of bonds to be issued. This line will give you access to a large and important section of the Province in which development should quickly follow railway facilities. Your directors will suggest that they be clothed with power to make an agreement of lease when the requisite legal formalities have been complied with.

Heavy Expenditure on Improvements and Stock.

"The amounts appropriated for new works, exclusive of railway construction, were abnormally large in the year under review. For the enlargement of terminals, additional buildings, shops, second tracks, sidings and improvements of every variety calculated to improve the efficiency of your railway system, and to facilitate the movement of your large and increasing traffic, the amount of \$30,000,000 was authorized to be expended and orders for locomotives and cars, representing an expenditure of \$25,750,000, were placed. Many of these works cannot be completed within the season with the limited amount of labor available, but your directors are sparing no effort to meet the convenience of the public and to strengthen your own position. Canadian manufacturers of freight cars are very much behind in their deliveries, but they promise to do better, and there is little doubt that all of the equipment ordered abroad will be forwarded according to contract.

Dominion Atlantic Railway.

"At a special general meeting of the shareholders held on May 11th, 1892, called for the purpose of giving effect to the Act of 1892, a resolution was adopted authorizing the company to create and issue from time to time consolidated debenture stock payable in sterling money of Great Britain and bearing interest not exceeding four per cent. per annum for the purpose of satisfying or acquiring mortgage bonds of any other railway company, the principal or interest of which the company shall have already guaranteed. The Dominion Atlantic Railway Company, whose railway you have leased, provided its money requirements by an issue of three classes of debenture stock, upon which your company has guaranteed the

payment of the annual interest as a consideration for the lease of the property. It is quite likely that in the future it will be found desirable to acquire a portion, or all, of this debenture stock by an issue of your own four per cent. consolidated debenture stock, and, in order to comply strictly with the provisions of the Act of 1892, it will be necessary to have an issue of consolidated debenture stock for that purpose approved by the shareholders at the special general meeting duly called for the purpose immediately after the annual general meeting.

"The undermentioned directors will retire from office at the approaching annual meeting. They are eligible for re-election: Mr. Wilmot D. Matthews, Sir Sanford Fleming, K.C.M.G., Mr. Adam R. Creelman, K.C., and Sir William Whyte.

Of the Balance Sheet.

"The condensed balance sheet gives the financial position of the company as follows:—

Cr.—Railway and equipment, \$382,829,051; ocean, lake and river steamships, \$21,338,974; acquired securities (cost) \$80,525,353; properties held in trust for the company, \$6,378,358; deferred payments on land and town site sales, \$41,468,821; advances to lines under construction, \$16,654,401; advances and investments, \$12,360,997; material and supplies on hand, \$13,017,431. Current Assets—Agents' and conductors' balances, \$4,805,132; miscellaneous accounts receivable, \$5,023,469; total, \$9,828,601; temporarily invested in government securities, \$10,088,734; cash in hand, \$33,628,819; total, \$628,119,545.

Dr.—Capital stock, \$180,000,000; payments on subscription to new issue capital stock (\$18,000,000), \$16,806,621; four per cent. preference stock, \$66,695,097; four per cent. consolidated debenture stock, \$153,823,706. Mortgage bonds—First mortgage 5 per cent., \$34,998,633; Algoma branch first mortgage, \$3,650,000; total, \$38,648,633. Current liabilities—Audited vouchers, \$11,361,277; pay rolls, \$5,621,929; net traffic balances, \$290,366; miscellaneous accounts payable, \$6,271,762; total, \$23,545,335. Interest on funded debt and rental of leased lines—Coupons due July 1, 1912, and including coupons overdue not presented, \$1,207,274; accrued fixed charges, \$184,428; total, \$1,391,702; equipment obligations, \$1,040,000; equipment replacement fund, \$2,103,993; steamship replacement fund, \$5,721,852; appropriation for additions and improvements, \$3,535,712; reserve fund for contingencies, \$4,382,617; lands and town sites sales, \$57,538,307; surplus, \$72,885,966; total, \$628,119,545.

"The expenditure during the year on additions and improvements amounted to \$14,967,264 on and in connection with the company's owned properties, and \$3,732,509 on leased and acquired lines.

Earnings and Expenses.

"The statement of earnings for the year ended June 30, 1912, shows:—From passengers, \$31,812,207; from freight, \$79,833,734; from mails, \$859,557; from sleeping cars, express, telegraph and miscellaneous, \$10,814,041; total, \$123,319,541. The statement of working expenses for the year ended June 30, 1912, shows:—Transportation expenses, \$38,923,050; maintenance of way and structures, \$17,719,795; maintenance of equipment, \$13,608,708; traffic expenses, \$2,880,800; parlor and sleeping car expenses, \$944,594; expenses of lake and river steamers, \$1,064,011; general expenses, \$3,444,394; commercial telegraph, \$1,435,944; total, \$80,021,298.

Description of Freight.

"The description of freight forwarded is as follows:—

	1911.	1912.
Flour, barrels	8,469,744	8,499,850
Grain, bushels	111,160,982	151,731,691
Live stock, head	1,567,665	1,663,315
Lumber, feet	2,441,007,107	2,806,735,006
Firewood, cords	298,345	305,079
Manufactured articles, tons....	5,759,344	7,196,225
All other articles, tons	8,971,037	9,092,821

Freight Traffic.

	1911.	1912.
Tons carried	22,536,214	25,940,238
Tons carried one mile	8,062,102.013	10,391,650.965
Earnings per ton per mile	0.81 cts.	0.77 cts.

Passenger Traffic.

	1911.	1912.
Passengers carried	12,080,150	13,751,516
Passengers carried one mile ...	1,457,332.032	1,626,577.067
Earnings per passenger per mile	1.93 cts.	1.96 cts.

Summary of Road and Equipment.

"The summary statement of the length of the road is as follows:—

Mileage included in Canadian Pacific Railway traffic returns	10,983
Mileage of other lines worked	319
Mileage under construction	1,246
	12,548
Mileage of Minneapolis, St. Paul and Sault Ste. Marie Railway	3,773
Mileage of Duluth, South Shore and Atlantic Railway	623
	4,396

"The statement of equipment at 30th June, 1912, shows:—

Locomotives	1,820
First and second class passenger cars, baggage cars and colonist sleeping cars	1,841
First class sleeping, dining and cafe cars	369
Parlor cars, official and paymasters' cars	75
Freight and cattle cars (all kinds)	61,446
Conductors' vans	1,065
Boarding, tool and auxiliary cars and steam shovels....	4,254

BRITISH TRADE WITH CANADA

The accounts relating to the trade and navigation of the United Kingdom for June show that the values of the merchandise imported into and exported from the United Kingdom during the first six months of the year were as follows:—Imports, \$1,722,187,000; exports of United Kingdom produce \$1,096,148,000; exports of foreign and colonial produce, \$281,361,000. Compared with the figures for the first half of 1911—the highest previously recorded—these totals show the following increases:—Imports, \$96,678,000, or 5.9 per cent.; exports of United Kingdom produce, \$8,002,000, or 0.7 per cent.; exports of foreign and colonial produce, \$14,334,000, or 5.4 per cent.

Regard being had to the adverse influence, during the half year, of serious labor troubles, notably the coal strike and the strike of London transport workers, these figures indicate a satisfactory expansion in trade.

The foregoing totals relate to merchandise only. The total values of gold and silver, bullion and specie, imported and exported during the six months were as follows:—Imports, \$156.3 millions; exports, \$128.4 millions.

The values of the imports from Canada, and of the exports and re-exports to the Dominion, during the first six months of each of the years 1911 and 1912, were as follows:—Imports, in 1911, \$41,260,000; in 1912, \$50,992,000; exports of United Kingdom produce in 1911, \$46,043,000; in 1912, \$50,338,000; re-exports, in 1911, \$7,189,000; in 1912, \$8,576,000. Thus all branches of the trade show substantial increases.

Among the principal articles were the following:—

Imports from Canada in the first half of 1912: Wheat, \$19,334,000; wheat meal and flour, \$5,098,000; bacon and hams, \$3,312,000; cheese, \$3,926,000; canned salmon, \$2,899,000; wood, sawn or split, planed or dressed, \$4,275,000.

Exports of United Kingdom produce to Canada: Iron and steel and manufactures thereof (so far as distinguished in the monthly accounts), \$2,668,000; cotton piece goods, \$3,780,000; woolen and worsted tissues (including carpets and carpet bags), \$8,316,000; apparel, \$1,699,000.

DEBENTURES AWARDED

Estevan S.D., Sask.—\$16,000 30-year 5 per cent. debentures, to Messrs. Curran Brothers, Regina.

Wynyard S. D., Sask.—\$16,000 30-year 5 per cent. debentures, to Messrs. Curran Brothers, Regina.

Rural Municipality of Reford, Sask.—\$3,000 10-year 6 per cent. debentures, to Messrs. Curran Brothers, Regina.

Bredenbury, Sask.—\$5,000 7 per cent. 10-year sidewalks debentures, to the Great West Life Assurance Company, Winnipeg.

The Canadian Bank of Commerce has opened a branch at the corner of Superior and Huron Street, Sault Ste. Marie, under the supervision of the Sault Ste. Marie manager.

The Winnipeg Fire Insurance Company, with assets of over \$100,000, has been absorbed by the Nova Scotia Fire Insurance Company, a premium being paid for the stock and outstanding contracts being guaranteed by the Maritime concern. More capital will be introduced and the new company will be operated as a separate concern under a Dominion charter. At the annual meeting of the Winnipeg Fire Insurance Company the president, R. L. Richardson, and other directors retired, and the following board were elected:—President, Messrs. Andrew Mackinlay, Halifax; vice-president and managing director, Arthur G. Baillie. Mr. J. O. Miller, Winnipeg, was appointed secretary.

WIDER MARKET FOR CANADIAN WHEAT

Scotland Will Be Up to Buy—Millers Want Reduced Terminal Storage Rates—Montreal Grain Shipments

In the course of his latest report to the department of trade and commerce, Mr. J. T. Lithgow, Canadian trade commissioner at Glasgow, predicts an increased demand for wheat and flour from Canada. He says:

"If Canada has a crop of 250,000,000 bushels, of course it will have far more to export, and Scotland will be up to buy if it can compete with other countries. At the present time there is only one point in regard to flour. If, as reported, the state of Kansas is to have 50,000,000 bushels more than last year, it will have far more flour to export than it had during 1911.

Wants of Glasgow Market.

"Kansas flour has always been a great favorite in Glasgow, and owing to the poor condition that Manitoba wheat was in the crop of 1911, bakers and importers here are most anxious to get into the Kansas flour again.

"Already some new crop of Kansas flour has been offered and sold to Glasgow at relatively cheaper prices than any other flour from Manitoba can be worked at. But if Manitoba this year should have a big crop of spring wheat in good condition, as it usually is, it will be one of the sources of supply most sought after in Great Britain, and naturally over Europe."

Work has been started on the new Government elevator at Fort William. The building will be completed by September 29, 1913, in time to assist in the moving of next year's grain crop. Work is to be proceeded with throughout the winter.

Millers Request Lower Rates.

An application has been made to the Board of Grain Commissioners at Fort William by the Dominion Millers' Association of Toronto to have the rates for elevation and storage of grain at terminal elevators reduced. The Board of Grain Commissioners have fixed Friday, September 13, as the date upon which they will deal with this application. The session will be held in the offices of the Grain Commission at Fort William, beginning at 10 a.m. All parties interested will be heard directly or through their counsel.

Mr. E. J. Chamberlin, president of the Grand Trunk Railway, wires from the West that the close of the season will see a serious grain blockade caused by inability of Montreal bottoms to make shipments. This will induce suspension of shipment from Port Arthur and Fort William and a grain pile up at this head of the lake. He declares that the Grand Trunk Pacific has 16,000 cars available, but not half of them will be required.

Notes of Grain Rates.

The outlook for a large crop this season may have the effect of raising the grain-carrying rates on the great lakes. Already grain brokers are offering as high as two cents a bushel, and in some cases as much as 2¼ cents per bushel. By the end of September it will probably have reached 2½ cents, with a possibility of a straight three-cent rate. At the beginning of the season the rate was 1¾ cents, but dropped to 1½ cents about July 1st.

Whether Canadian railway companies intend to raise their rates for carrying grain to the Atlantic seaboard from 22 cents per 100 pounds or 6.80 cents per bushel from Fort William to St. John, to the filed tariff rate of 25 cents per 100 pounds, is as yet not known. Vice-President Bosworth, of the Canadian Pacific Railway, said he was not yet in a position to answer questions. Some exporters are inclined to think that 23 cents rate to St. John will be kept in force this year, because of crops being even greater than last year.

The question of a free pier for tramp grain boats will be considered by the grain exporters and the Montreal Harbor Commission.

The prospectus is published in London of the Canadian Middle West Trust, Limited, with a capital of £500,000. The company was formed primarily for advancing money on the security of real estate in Western Canada.

The tenth annual meeting of the Dominion Association of Chartered Accountants, of which all the members of the seven provincial institutes are ipso facto members, will be held in Toronto on September 24th and 25th. In addition to the transaction of business affecting the welfare and education of public accountants, papers dealing with subjects of professional interest will be read and discussed. The social side of the convention will not be overlooked, and the convention will terminate in a banquet.

WILL REPRESENT INSURANCE COMPANY AT WINNIPEG

Messrs. Voorheis and Lewis, Winnipeg, have been appointed city agents for the American Insurance Company of Newark, New Jersey, and are prepared to write fire insurance of all kinds. This company has nearly \$10,000,000 assets, has taken a Dominion license and made the necessary deposit with the Dominion Government. Messrs. Voorheis and Lewis are also general agents for the United States Fidelity and Guaranty Company, of Baltimore, Maryland, for accident and health, automobile, elevator, plate glass and employers' liability insurance. They have facilities also for direct placing of live stock and motor boat insurance, fidelity bonds and life insurance.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION

The shareholders of the Employers' Liability Assurance Corporation, Limited, of London, England, one of the strongest and most substantial of the companies in this class, recently received the thirty-first annual report, together with the audited accounts to December 31st, 1911. The premiums for the year were \$6,837,722, as against \$6,082,282 for the previous year. The revenue account in addition shows an item of \$320,422 representing interest and rent, \$20,029 was the profit made on exchange. The realized profits on investments totalled \$18,904. With several small items, the total revenue amounted to \$7,108,405.

Considering the volume of business transacted, the management expenses were small, being only \$585,124. Commissions totalled \$1,750,019. Losses paid and outstanding aggregated \$3,877,339. The balance of the revenue account was \$6,564,837. The balance sheet gives some interesting details of the company's investments, which are evidently all high grade. They may be summarized as follows:

British and colonial government securities	\$ 396,744.88
Foreign government securities	1,374,283.06
Foreign and colonial municipal securities	1,956,495.71
Railway and other debentures, and debenture stocks	3,897,631.47
Preference and ordinary stocks and shares ...	166,585.41

The Employers' Liability Assurance Corporation enjoys an excellent reputation in Canada, as it does elsewhere. This fact, together with the enterprise of the managers for Canada—Mr. Griffin, at Montreal, and Mr. Woodland, at Toronto, are securing a good share of Canadian business for the company. Its deposit with the Canadian government is \$825,000.

The corporation, which has branches in many parts of the world, has a strong directorate, as will be seen by the following names:—Lord Claud Hamilton, M.P., chairman; Sir William B. Forwood (director, Cunard Steamship Company, Limited); S. J. G. Hoare, Esq., M.P. (director, Economic Life Assurance Society); E. H. Llewellyn (director, Great Western Railway Company); W. H. Maudslay; Henry W. Maynard (director, Union-Castle Mail Steamship Company, Limited); Joseph Orrell; Leopold Salomons; Sir Philip H. Waterlow, Bart. (chairman, Waterlow and Sons, Limited).

One and two-dollar bills have been making their appearance at several points in Western Canada. These bills have been circulated freely in some of the Western cities. They are apparently of the same make as those in circulation throughout Eastern Canada a few weeks ago, and are said to be a poor imitation.

Speaking at an Ottawa luncheon, Mr. Arthur Grenfell, of London, Eng., who is conducting a party of British financiers in Canada, said that bankers in the Old Country had been so anxious to get a hand in Canada flotations that they had let Canadian cities have money too cheaply in the past, and he thought this would have to be remedied in the future.

When the Grain Commission meets at Calgary, it will consider among other things the necessity for a survey board to rule on appeals from the inspectors' grading. Terminals on the Pacific Coast to provide for the grain traffic going that way in added volume when the Panama Canal is open will have the attention of the Commission at the instance of local grain men.

The following companies have obtained licenses to carry on the business of fire insurance in Saskatchewan: North British and Mercantile Insurance Company, of Edinburgh; Alliance Assurance Company, Limited, of London, England; Canada National Insurance Company, of Saskatoon; Security National Insurance Company of Canada, of Winnipeg; Imperial Underwriters Corporation, of Vernon, B.C.; Ontario Fire Insurance Company, of St. John, N.B.; Continental Insurance Company, of Winnipeg; Sovereign Fire Insurance Company, of Toronto.

CROP REPORTS

Views of Average Field—Alberta's Wheat Production
—Conditions in Ontario

Mr. Wm. Black, vice-president of the Ogilvie Flour Mills Company, after a trip to Winnipeg, says that the Western crops, while generally favorable, will not yield on the average per acre so well as they did last year. "We expect," he adds, "that the grain will be of an all-round better quality. There has been progress in harvesting in Manitoba, and in portions of Saskatchewan a good start has been made. Another week of good, warm weather will see the entire crop ready for the binder." Mr. Black intimated that there is danger of frost if the grain does not come on rapidly. "We should like to see the grain ripening faster than it is."

Alberta and Saskatchewan.

The Canadian Pacific crop report says that in Alberta and Saskatchewan the average yield is expected to be 25 to 30 bushels per acre. Twenty-five per cent. of the crop has been cut on the Medicine Hat sub-division, 20 per cent. on the Lethbridge, 5 per cent. on the Calgary, 30 per cent. on the Langdon, 4 per cent. on the Irricana, and 25 per cent. on the Crow's Nest. There is urgent need for more help for the harvest.

That Alberta will produce a total of 64,416,960 bushels of grain from 2,554,775 acres under cultivation in 1912 is the estimate prepared by Superintendent A. McKenney, of the seed and weed branch, Alberta Department of Agriculture at Edmonton. The provincial department's figures for 1911 gave a total of all kinds of grain at 57,150,000 bushels, so that the estimate for this year exceeds 1911 by 7,226,460 bushels.

Another Alberta Estimate.

Manager L. P. Strong, of the Alberta Pacific Elevator Company, considered the estimate for 1912 very conservative. Based on the reports of correspondents of that company, the estimated yield for Alberta for 1912 is about 70,000,000 bushels in round numbers, 20 million bushels for wheat, 40 millions for oats and 10 million for barley, flax and rye.

Superintendent McKenney's estimate of the yield for 1912 is divided as follows: Winter wheat, 2,607,600 bushels; Spring wheat, 18,040,500 bushels; oats, 35,880,000; barley, 6,958,600; flax, 576,300 bushels, and rye, 354,500 bushels.

"The 1912 estimate is well within the mark," thinks Mr. W. J. Tregillus, president of the United Farmers of Alberta. "We know that there was a lot of land which could not be prepared this year, but we thought that there would be enough new land broken to more than exceed the total acreage under cultivation in 1911."

Ontario Crop Conditions.

The following statistics of the principal field crops of Ontario for 1912 show the acreage as compiled from individual returns made by farmers to the Ontario Bureau of Industries and the yields as estimated by a large and experienced staff of correspondents, who give probable yields according to conditions on August 10th, 1912:—

Fall Wheat—759,888 acres will produce 14,688,495 bushels, or 19.3 per acre, as against 837,492 acres, 17,926,586 bushels and 21.4 in 1911. The annual average for 30 years was 17,879,855 bushels and 21.0

Spring Wheat—123,080 acres, 2,310,571 bushels, or 18.8 per acre, as against 133,711 acres, 2,295,534 bushels and 17.2 in 1911. Average, 15.9.

Barley—647,382 acres, 18,938,489 bushels, or 29.3 per acre, as against 616,977 acres, 16,248,129 bushels and 26.3 in 1911. Average, 27.7.

Oats—2,601,735 acres, 96,115,110 bushels, or 36.9 per acre, as against 2,699,230 acres, 84,829,232 bushels and 31.4 in 1911. Average, 35.5.

Rye—105,949 acres, 1,861,575 bushels, or 17.6 per acre, as against 98,652 acres, 1,562,971 bushels and 15.8 in 1911. Average, 16.4.

Peas—221,524 acres, 4,108,883 bushels, or 18.5 per acre, as against 304,491 acres, 4,462,182 bushels and 14.7 in 1911. Average, 19.3.

Beans—69,703 acres, 1,203,420 bushels, or 17.3 per acre, as against 51,508 acres, 898,212 bushels and 17.4 in 1911. Average 17.2.

Hay and Clover—3,177,410 acres, 4,760,502 tons, or 1.50 per acre, as against 3,301,468 acres 4,238,362 tons and 1.28 in 1911. Average, 1.46. Area in 1911 included alfalfa.

Acreages in Mixed Crops.

The acreages in other crops for which no estimates as to yield have been made at this date are as follows: Buckwheat, 205,893 against 180,039 in 1911; corn for husking, 301,251 and 308,350; corn for silo, 377,082 and 335,935; potatoes, 158,888 and 162,457; mangel-wurzels, 60,103 and 64,855; sugar beets, 21,054 and 24,664; carrots, 2,742 and 3,207; turnips, 101,529 and 100,593; mixed grains, 448,402 and 486,112; alfalfa, 189,059 (included in 1911 with hay clover).

SPLENDID APPLE CROP ASSURED

Official Report is Optimistic—Many Orchards Now
Giving Annual Instead of Biennial Crops

The Department of Agriculture fruit crop report says: No marked change has taken place in the prospects for the apple crop. The weather upon the whole has been favorable, except in so far as the damp weather has induced fungus. Nearly all correspondents report the growth as excellent, larger indeed than usual. There does not appear to be any exceptional complaint with reference to insects. The general average for the Dominion stands at 69 per cent. for early apples, 65 per cent. for fall apples and 61 per cent. for winter apples. The average for the Dominion would be 65. A number of correspondents report that their orchards, which have received good attention for a number of years, are giving annual crops instead of the usual biennial crop. That the weather is not the sole cause of alternate years of bearing receives confirmation by one correspondent having a large orchard, practically uniform throughout, but one-half of which bears heavily one year and the other half the next, with scarcely any year a failure.

Valleys of British Columbia.

In the inland valleys of British Columbia, pears are likely to be a good crop. The only disease much in evidence is blight. The size and color appear to be good. The crop on Vancouver Island and on the coast is not quite so good. The varieties showing up best in British Columbia are the Clapp, Bartlett and Anjou, though the Clargeau and Flemish Beauty are well loaded. In Eastern Canada pears are, on the whole, rather light. The large commercial orchards of District 1 have only about half a full crop. The Bartlett, Bosc and Winter Nelis make the best showing. The Kieffers appear to be rather a short crop. The pear crop in Annapolis Valley is a good average one and fairly clean. Correspondents report considerably higher percentages for this month.

British Columbia Peaches.

The number of peach trees in British Columbia is not large and the industry has had a severe set-back in the matter of winter killing. Wherever the trees withstood the winter, they are well loaded, a full crop being reported in nearly all varieties. The crop in Western Canada is only medium or somewhat less, especially in the late varieties. District 1 is the only section having a crop that will more than meet the needs of the local market. The competition of the canners will materially affect the amount of fruit placed on the general market. The shortage of canned goods make it probable that the canneries will use a much larger portion of the crop than usual.

Prospects in Europe.

The prospects for Europe generally are below the average. Although England and Germany are the two large apple receiving countries, so much fruit in normal years is exported from other European countries that the fruit crop of the continent generally is of interest to Canadian apple growers.

INVESTMENTS IN MANITOBA

The Manitoba Government has issued its report of the amount of money invested in that province at the close of 1911 by trust, loan and insurance companies. The total is over one hundred millions, compared with \$86,320,000 the year before, an increase of close upon 16 per cent. The figures by classes are as follows:—

	1912.	1911.
Trust companies	\$ 16,750,000	\$14,650,000
Loan companies	44,658,626	32,309,000
Life insurance	31,609,320	26,040,840
Fire insurance	7,652,872	6,068,870
Miscel. insurance	132,090	151,330
Totals	\$100,852,916	\$86,220,044

The Dominion Government has made preparation to extinguish outright the loan of £1,235,000, which matures on October 1st next. The money to meet it has been forwarded to London to the Bank of Montreal, the financial agents of the government. What renders this circumstance the more favorable is the fact that there are no temporary loans of any kind outstanding. This state of affairs is due to the successful handling of the £5,000,000 loan which fell due on May 1st last. Provision was made for this during the winter.

QUEBEC RAILWAY SURPRISE

Four French Directors Have Resigned—Labrador Pulp and Paper Company

The statement that four of the Paris directors of the Quebec Railway, Light, Heat and Power Company have resigned from the board, has recalled the adage that chickens come home to roost.

The retirement of these directors—namely, Messrs. Maxime Beauvisage, Antony Thierree, Louis Galliard and Charles Michel, all of Paris—is stated by Sir Rodolphe Forget as having taken place without any reason being given. It is generally assumed here, however, that the reason is connected with the payment of a dividend of 4 per cent. per annum on the stock of the company when it was not being earned, the result being that it eventually had to be passed.

The directors referred to doubtless took part in the distribution of the stock in France and it is possible that a considerable proportion of it was issued at fairly high levels. Quebec sold up as high as 66 and during all last year was well above the fifties. At present the stock is around twenty-five. Under the circumstances, it is not surprising that the purchasers of the stock are somewhat indignant.

It is considered in Montreal that the Quebec Railway incident has been a most unfortunate one, while the over-capitalization might be a error of judgment, it would be difficult to explain the maintenance of a quarterly dividend, when it was not being earned. The forecast of earnings for the past year was encouraging, and was analyzed in a recent issue of *The Monetary Times*. In the absence of unfavorable developments, it would have justified higher prices were they verified at the annual meeting on Thursday.

Montreal has not participated recently in the trading in either the common stock or the bonds of the railway, thinking that it would be better to wait till after the Thursday anyway, in case there is another announcement forthcoming.

The bonds have shown considerable weakness of late. Some explain this as due to the fears of the offerings of bonds and stock held in France. Others think that a further influence against the strength of the bonds is the responsibility incurred by the company in connection with the Quebec and Saguenay Railway. This railway is being built from Quebec along the north shore of the River St. Lawrence, and as rock cuttings are numerous and the cost of construction heavy, it is felt that many problems will have to be overcome before success is attained.

Should the annual report prove as encouraging as its forecast, and should there be no further unfavorable developments, it is felt that Quebec stock may do a little better. It is not widely distributed in Montreal. Sir Rodolphe Forget's office some six months ago or so apparently having practically every share in sight, as was demonstrated upon one occasion when those who had sold the market short were compelled to go there and settle on his terms.

Monetary Times Office,
Montreal, August 28th.

A story recently appeared in a Quebec paper concerning the doings and intentions of the Labrador Pulp and Paper Company, which concern has extensive holdings in the vicinity of Hamilton Inlet, Labrador.

The report credited the company with the intention to proceed with the increase of its capital from the present \$3,000,000 to \$15,000,000, with the development of 50,000 horsepower at Muskrat Falls, and the construction of two large pulp and paper mills, with a combined capacity of 150,000 tons per annum, or 500 per day. It was also stated the company would build a railway to connect its mills with a railway line to the proposed extension of the Quebec and Lake St. John Railway, or the Quebec and Saguenay Railway, or whatever line may be most convenient.

Reported Large Holdings.

The pulp and paper company would seem to have a large section of territory in Labrador, along the Hamilton River, it being said to possess 40,000 square miles of limits, most of which are well wooded, while 1,500,000 horse-power is reported to be flowing to waste at certain times of the year over the company's waterfalls on the Hamilton River.

This is the company over which there was litigation in Montreal a few years ago. Mr. John McMartin, one of the first owners of the La Rose Mine, and later of the Hollinger, and principal owner of the Motherlode, Sheep Creek, became interested in the property, and is at present its president. On the directorate, also, is his brother, Mr. Duncan McMartin, who is interested with him in the other projects mentioned. Mr. Robert H. Reid, of Montreal, is vice-president.

This week a steamer was chartered by the company for the purpose of paying a trip to the property. The president and vice-president, accompanied by Mr. G. A. Massey, who is connected with the Harvester and Standard Oil companies, as well as Mr. Leigh Stanton, who represents Mr. Mortimer Foster, hydraulic engineer and pulp expert, were among the party which sailed.

Mills Not in Operation.

The Quebec report that contracts have already been made for the sale of the output of the mills and that most of it would be shipped either across the Atlantic or to Bangor, Boston or New York—somewhere along the Atlantic seaboard.

It would appear a little early to talk of contracting for the sale of the output of mills which are presumably not yet in operation which will have to be operated by power from falls upon which little if any work has yet been done. It is stated that five hundred men are engaged upon the construction of the mills, but this certainly was not understood to be the case by some of those connected with the undertaking in Montreal.

All that is known here is that the association of the McMartins with the project give an element of substantiality to what lumbermen had regarded as too big a matter to be taken up by anyone save moneyed men, and that investigations and examinations which Mr. McMartin had caused to be made establish the statement that the company possesses natural resources of some value.

Iron and Steel Industry.

Some trepidation has been expressed here as to the effect upon Canadian industries of the lowering of the duties on iron and steel and other products in the United States. Some think that only the United States companies need have any concern over the situation, and that the only effect will be that the offerings from abroad may compel the relative lowering of prices at home. Others offer the view that the general effect will be to lower the cost of production all round, and that this will put the mills of the country in better position to compete with imports, and at the same time to export to Canada and other countries which are now able to hold imports by means of protective tariff.

Mr. Thomas Cantley, of the Nova Scotia Steel and Coal Company being interrogated on this point, said:—

"We are rather at a loss to understand how a reduction in the United States tariff will enable the manufacturers of that country to manufacture more cheaply than they do at present. We doubt if for some considerable time we will see United States prices as low as those at which they have slaughtered iron and steel products in Canada during the past twelve or fifteen months. Prices are now hardening considerably. In addition, it is expected that the tariff revision undertaken by the Government this autumn will put the iron and steel manufacturers in a better position than they have occupied for some time past, or since the expiration of the bounties."

RAILROAD EARNINGS

The following are the railroad earnings for the week ended August 21st:—

	1911.	1912.	Increase or decrease.
C. P. R.	\$2,267,000	\$2,694,000	+ \$427,000
G. T. R.	993,677	1,097,364	+ 103,717
C. N. R.	307,500	372,900	+ 65,400
T. & N. O.	37,499	31,899	— 5,600
Halifax Electric	5,706	6,308	+ 602

The gross earnings of the Canadian Pacific Railway for July, 1912, amounted to \$12,052,399, the working expenses were \$7,604,222, leaving as net profits \$4,448,177. In July, 1911, the net profits were \$3,703,028. The increase in net profits over the same period last year is therefore \$745,149.

The statement of earnings and operating expenses of the Canadian Northern Railway Company for July shows an increase in net earnings over July, 1911, of \$133,000:—

	July, 1912.	July, 1911.	Inc.
Gross earnings	\$1,829,700	\$1,475,900	\$353,800
Expenses	1,335,100	1,114,300	220,800
Net earnings	494,600	361,600	133,000
Mileage in operation ..	4,297	3,711	586

Colonel A. G. Seyfot, American consul in Owen Sound, Ont., has resigned.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Chatham, Ont.—August 25.—Several barns destroyed by lightning.

London, Ont.—August 25.—Barn of P. Christensen destroyed by lightning.

Blenheim, Ont.—August 25.—Mr. Pickering's barn destroyed by lightning.

Makinak, Man.—Canadian Northern Railway mail and baggage car destroyed.

Howard, Ont.—August 25.—Barn owned by William Knight destroyed by lightning.

Scotland, Ont.—August 25.—Box factory of James Elliott totally destroyed. Cause, lightning.

Marden, Ont.—August 26.—Barn of Thomas Card destroyed by lightning, also hay and grain.

Branchton, Ont.—August 25.—Barn and contents, owned by John Reid, destroyed. Cause, lightning.

Palmerston, Ont.—August 24.—Box-car of Grand Trunk damaged. Supposed cause, incendiarism.

Virden, Man.—August 22.—Farm house of Edward Blake-man, and contents, totally destroyed. Loss, \$4,000.

North Woolwich, Ont.—August 26.—Barn of Jacob Gingerich destroyed by lightning. Partly insured.

Courtright, Ont.—August 26.—Cooper shop of Port Huron Salt Company totally destroyed. Cause, lightning.

Kingston, Ont.—August 16.—Steam barge Norseman totally destroyed at Collin's Bay. Cause, lightning.

Ridgetown, Ont.—August 25.—William Therald's two barns and contents destroyed by lightning; partly insured.

Fredericton, N.B.—August 21.—Risteon woodworking factory slightly damaged. Blaze started on roof near chimney.

Calgary, Alta.—August 21.—Granaries in connection with plant of P. Burns & Company, in East Calgary. Damage, \$1,000.

Glennvale, Ont.—August 26.—Residence and woodshed of John A. Carruthers destroyed; insured. Fire started in chimney.

New Liskeard, Ont.—August 26.—Residence of Alex. Montgomery, on Hailebury Road, partially destroyed. Cause, lightning.

Mount Hope, Ont.—August 26.—Frank Smith's three barns and contents completely destroyed by lightning. Loss, \$5,000; insured.

Woodstock, Ont.—August 26.—Barn of John Todd, East Zorra; also two cows, and machinery, totally destroyed. Cause, lightning.

Petrolea, Ont.—August 26.—John Douglas' barn, 40 tons hay, 25 load wheat and oats. Loss, \$2,500; insurance, \$1,500. Cause, lightning.

St. Lambert, Que.—August 21.—Mr. P. Roy's barn. Loss and origin unknown. Mr. J. Beatty's house. Loss, \$6,000. Origin, unknown.

Paris, Ont.—August 25.—Five barns owned by George L. Telfer and Robert Peart totally destroyed, with season's crops. Cause, lightning.

Belleisle Station, N.B.—August 23.—Barn and two pigs, owned by G. G. Scovil, and 25 tons of hay owned by Roy Farren. Cause, lightning.

Winnipeg, Man.—August 21.—Small fire in basement of Donald block, 324 Donald Street. Cause, burning rubbish in basement. Damage, \$100.

August 19.—\$2,000 damage to premises at 189 Portage Avenue East, lower portion being occupied by Ye Yuan as restaurant. Fully insured. Cause, smoking in bed.

Wrigley's Corners, Ont.—August 25.—John White's barn, containing hay, harness, buggies and implements, totally destroyed. Cause, lightning. Insured.

Medicine Hat, Alta.—August 22.—Shed behind Graham's fruit store, South Railway Street, slightly damaged. Mr. Irvine's residence, Montreal Street; \$50 damage.

Stratford, Ont.—August 25.—Stable of Duggan and Gray Company. Damage on stock, \$700; on building, \$700. No insurance on stock, and \$300 on buildings in Perth Mutual.

North Toronto.—August 28.—Unoccupied house on Glebe Manor property, Yonge Street, totally destroyed. Owner, Mr. Brennan. Loss, \$600. Supposed cause, incendiarism.

Parrsboro, N.S.—August 22.—Newville Mill, contents, 150,000 feet lumber, and a million laths; also one flat car on siding of Cumberland Railway and Coal Company. Loss, \$20,000; partly insured.

Vancouver, B.C.—Sterling H., speed boat, damaged. Supposed cause, spontaneous combustion in tool box.

August 18.—Small fire in chimney of Victoria private hospital, 919 Vancouver Street.

St. Paul L'Hermitte, Montreal.—August 22.—J. Verroneau, dwelling house, \$1,000, insured; Notary A. Seguin, dwelling, \$4,000, insured; Fabrique property, \$3,000, insured; Ovila Leveille, \$1,500; Edmond Robillard, \$3,000, insured; Euclide Lebeau, \$400, insured. Fire started in J. Verroneau's house.

Montreal.—August 23.—Carpenter shop in rear of Hotel Dieu, damaged. Cause, spontaneous combustion.

August 27.—\$20,000 damage to warehouses of Alaska Feather and Down Company, St. Ambrose Street; also three cars of lumber, on railroad siding, destroyed. Cause, spontaneous combustion.

Toronto.—August 26.—\$500 damage to Scarboro Beach power house. Cause, lightning. Building corner Front and George Streets damaged; loss, \$10. \$500 damage to building and \$100 to contents of 185 Bathurst Street.

August 27.—Gasoline launch foot of Frederick Street, owned by Mr. Smith. Damage, \$150.

August 20.—Six freight cars burned near York station.

St. John, N.B.—August 21.—Automobile owned by Mr. Chalsant, of New York, damaged.

August 22.—Maynes and Riley's grist mill, city road, slightly damaged.

August 26.—Woodshed owned by Harry Baker, Lancaster Avenue. Supposed cause, incendiarism. Wilson foundry, owned by Hon. J. E. Wilson, M.P.P.; Canada Brush Company's factory, two large private houses and a barn destroyed. Damage, \$100,000.

Victoria, B.C.—August 21.—Premises of British Columbia Market Company, 1239 Government Street. Damage, small. Cause, overheated stovepipe.

August 20.—Rear portion of premises of Victoria Dye Works, 844 Fort Street, and adjoining cottage occupied by C. Runcannan, owned by Max Leiser. Loss to dyeworks, \$600; to cottage, \$100. Cause, spontaneous combustion.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Fort William, Ont.—August 18.—Dwelling and furniture of Mrs. E. Biggar. Damage on contents, \$65; on building, \$15; insured for \$2,500. Cause, children playing with matches.

Kingston, Ont.—August 25.—Frame residence, 133 Alfred Street, occupied by John Waters; owned by Mrs. Bawden. Latimer, Ont. Damage on contents, \$100; on building, \$100: \$2,000 insurance on building in Northern Assurance; none on contents. Cause, unknown.

Hamilton, Ont.—August 12.—Floors and stone of building at 34 Picton Street West, occupied by P. Cullen, and owned by C. Walters, J. Markham, and J. W. Lamoreaux. Damage on contents, \$21.60; on building, \$57. Insured in North America, London & Lancashire, Fire Exchange, London Mutual, Hand-in-Hand, London and Globe. Cause, overheated range.

August 15.—Building and household furniture of A. B. Johnston, 295 Emerald Street North. Damage on contents, \$153; on building, \$227. Insurance on contents, \$1,000; on building, \$1,000, with Liverpool, London and Globe. Cause, unknown.

Hamilton, Ont.—August 20.—George Bootland's grocery, 119 John Street South. Damage on stock, \$10; on buildings, \$32. Building insured in Home Insurance Company; no insurance on stock. Cause, gas arc lamp.

August 21.—Mrs. Mary MacNamara's hat repair store, 240 King Street East. Damage on stock, \$75; on building, none. No insurance. Cause, curtains caught from stove.

August 22.—Dwelling occupied by Beir Gleick, 22 Hunter Street East; owned by Toronto, Hamilton and Buffalo Railway. Damage on contents, \$30; on building, \$26. Insured in Home Insurance Company and Wellington Mutual. Cause, gas explosion.

Toronto.—August 18.—Frame dwelling at 13 Grove Avenue occupied by I. Secours, owned by R. Young, 20 Grove Avenue. Damage to building \$100. Cause, overheated gas stove. Office building at 168 King Street West, occupied by S. M. Downard, owned by F. O. Weighart, 1514 King Street West. Damage on stock \$500; on building \$200. Building insured for \$10,000. Cause, unknown.

August 20.—House at 330 Bathurst Street, occupied by Mrs. E. Long; owner, A. Beddow, 130 Grange Avenue. Damage to contents, \$10; to building, \$25. Cause, lamp upset.

August 21.—Automobile owned by J. S. Symons, 266 Yonge Street. Loss, \$500; insurance, \$1,000. Store at 141 King Street East, occupied by E. A. Hall; owner, J. A. Simmers, 143 King Street East. Damage to stock, \$3,000; building, \$150. Insurance on stock, \$6,600; on building, \$4,400. Cause, torch ignited gasoline.

August 23.—Brick dwelling occupied by J. Wright, 936 Keel Street; owned by A. Heydon, 1214 Davenport Road. Damage to building, \$10; insurance, \$2,000. Dwelling occupied by McM. Kerklands, 8 Sultan Street; owner, Copeland & Fairbairn. Damage to building, \$25; insurance, \$2,500. Cause, leak in gas pipe.

August 24.—Store at 343 Yonge Street, occupied by P. A. McBride, owned by Bank of Hamilton, 341 Yonge Street. Damage on stock, \$250. Cause, spark from motor.

NATURAL RESOURCES OF NEW BRUNSWICK

Experts Prospecting for Coal and Salt — Pulp and Paper Industry

(Special correspondence.)

St. John, N.B., August 27th.

There has been so much wet weather during August that the farmers have not been able to harvest their hay in as good condition as usual, and that in low lands will be in bad condition, if it is harvested at all. All kinds of farm produce are bringing high prices for this season of the year.

Wholesale trade in the province continues active. Nearly 3,000 men from the Maritime Provinces went west on the harvest excursions, making the local labor market more difficult to supply. There is an active demand for builders' supplies of all kinds, not only in St. John but through the province generally.

English and Canadian Capitalists Interested.

Montreal parties have an expert with a boring outfit searching for a coal seam near Sussex, in Kings County, where there are out-croppings of coal of good quality, and near Sussex where there are salt springs, an English expert representing English capital is boring in the hope of locating the salt beds, which, if found, will be treated as is done with those in Ontario. An excellent quality of salt is produced from the springs, but the business has not paid, hence the effort to locate the salt beds. The Maritime Oil Fields, Limited, have erected a drilling plant at Upper Dorchester and expect to strike natural gas wells to supply Dorchester, Sackville and Amherst. An expert from the geological department in Ottawa has reported favorably upon the extensive clay deposits in Queens County, which, it is claimed, will produce vitrified brick of a quality equal to those now being imported from Ohio for street paving purposes in St. John.

Prohibiting Pulp Wood Exports.

The act prohibiting the export of pulp wood from the crown lands of New Brunswick went into effect August 1st, and is expected to give a boost to the pulp and paper industry. The Grand Falls Company, of which Sir William Van Horne is president, has eminent hydraulic engineers preparing plans, and will, it is announced, spend between \$5,000,000 and \$7,000,000 in developing the power and erecting great pulp and paper mills at Grand Falls.

It is estimated that the receipts from stumpage on crown lands in the province this year will amount to about \$325,000 compared with \$376,000 last year. It is estimated that stumpage will be collected this year on about 281,000,000 feet of logs.

Industrial Proposals and Schemes.

The Dominion Coal Company will double the capacity of its plant at St. John so that it can handle 600 tons of coal per hour. This is rendered necessary by increasing business.

Another 50,000 bushel of grain has arrived for summer shipment from St. John to London. This experiment has proved entirely successful.

The chairman and president of the Grand Trunk Pacific recently informed Honorable Wm. Pugsley that work would soon begin on the terminals at St. John, and they favored making connection with the St. John Valley Railway in western New Brunswick, so that freight might come direct to St. John instead of going around by way of Moncton.

The St. John city council and board of trade are considering a proposition to reclaim 90 acres from the tide at the south end of the city, to be used as a site for large industries. One suggestion is that the work, which it is estimated will cost over one million dollars, be done by the federal government and the city, the government getting 1,500 feet of additional wharf frontage. Another is that the city float a loan and do the work, and another is that it be taken up by private enterprise, and in the latter connection it is said the Norton Griffiths Company would consider it, as after the sea wall had been built, the area could be filled in with material dredged out of Courtenay Bay. It is a big project, but would provide an ideal site for industries with both water and rail connection.

The Calgary Board of Trade, United Farmers of Alberta and members of the Grain Exchange will urge before the Grain Commission next that Calgary should be made a terminal with grain doctoring facilities.

Six tenders have been submitted to the Public Works Department, Ottawa, for the docking facilities and landing piers at Quebec. The contract, which will amount to about two million dollars, will not be awarded till the tenders are reported on by the departmental officers.

PERSONAL NOTES

Mr. J. Fraser, secretary of the Dominion Securities Corporation, Toronto, leaves early next month for a business trip in the Eastern States.

Dr. H. J. Meiklejohn, managing director of the Sovereign Life Assurance Company, of Canada, has been on a trip to the Pacific coast.

Sir George Armstrong and Morrison Bell, M.P., both of whom are prominent in tariff reform circles in the old land, are accompanying Right Hon. Walter H. Long on his trip through Canada.

Hon. Rupert Guinness, M.P., and Lord and Lady Onslow are in British Columbia, their visit being for the purpose of looking into some investments and to organize a game hunting expedition.

Mr. G. M. Heath, late general manager of the Listman Mill Company, of La Crosse, Wis., has been appointed general superintendent of the Ogilvie Flour Mills Company, Limited, to succeed Mr. F. H. Anson.

Mr. R. H. Coats, of the Department of Labor, Ottawa, will represent Canada at the conference to be held in Washington, in October, to arrange for the projected world-wide investigation of the high cost of living.

Mr. W. J. Laite, of Cape Town, South Africa, editor of "South African Commerce" and secretary of the South African Manufacturers' Association, was among the visitors to The Monetary Times head office this week.

Mr. J. J. Roberts, president of the Vancouver Association of Life Underwriters, is in Eastern Canada to attend the annual meeting of the Canadian Life Underwriters and also a meeting of Equitable Life managers in New York.

Mr. W. R. Wadsworth, after forty years' continuous service in the Bank of Toronto, at Toronto, is retiring. Mr. J. Stewart Skeaff, of the head office, has been appointed his successor. Mr. Wadsworth was born in Weston over sixty years ago, and has been a resident of Toronto ever since.

Mr. J. B. Lyon will represent Messrs. N. W. Harris & Company, the well-known Boston financial house, in their new London office. Mr. Lyon was a visitor to Canadian cities this week. His firm recently purchased a block of Halifax municipal bonds and are interested heavily in Montreal Tramways securities.

Mr. H. S. K. Hemming, of Messrs. A. N. Macfee & Company, bond investment brokers, of London, England, who was on the Pacific coast recently, stated that his trip is in connection with the organization of an English and Canadian investment company, with headquarters in Canada. It will begin business this year with a paid-up capital of \$2,000,000.

Sir George Askwith, chairman of the Industrial Commission, and Isaac Mitchell, senior staff officer of the Imperial Board of Trade, have arrived in Canada, for the purpose of inquiring, on behalf of the British Government, into the workings of the Industrial Disputes Act. The investigation is to be made with a view to introducing similar legislation in England.

Sir George Doughty, M.P., for Grimsby, England, accompanied by Lady Doughty, are in British Columbia. Sir George, who is president of the British Columbian Fisheries Company, Limited, stated that he is out here in connection with that enterprise. The company owns and operates several canneries on Vancouver Island, and propose establishing others on Queen Charlotte Islands. The fishing fleet will also be greatly augmented.

Mr. F. Wyld, a pioneer and well-known Toronto business man, died this week. Born in West Lothian, Scotland, in 1832, and educated at Irving Academy, he came to Canada in 1854, after serving a five years' apprenticeship with Craig Brothers, of Edinburgh, who are still engaged in the wholesale woolen business. The firm of Wyld & Darling, wholesale dry goods merchants, of Hamilton, was the result of his early business activities in Canada. The junior member of the firm was Henry W. Darling, now treasurer of the General Electrical Company, of Schenectady, N.Y. In 1872 the firm moved to Toronto, and became Wyld, Brock & Darling. This firm dissolved in 1878 and became Wyld, Grasett & Darling. Ten years later Mr. Grasett retired, and the old name of Wyld & Darling was revived, Mr. Andrew Darling being Mr. Wyld's partner. At the date of his retirement from business Mr. Wyld was a director of the Canada Permanent Mortgage Corporation, the Toronto General Trusts Corporation and the King Edward Hotel Company. He was also president of the Fire Insurance Exchange and vice-president of the Standard Bank and the Confederation Life Association.

CANADA'S LIFE UNDERWRITERS AT MONTREAL

Important Gathering Evokes Considerable Interest—Minister of Finance Addressed the Insurance Men—Relations of the Public and the Insurance Companies—Benefits of Life Insurance—Report of Convention by Staff Writers of *The Monetary Times*.

INVESTMENT OPPORTUNITIES IN CANADA

Finance Minister White Thinks They Were Never Better—Gives Reasons for Diminishing Value of High Grade Securities

The feature of the banquet given to the life underwriters of Canada at Montreal last week was an interesting address by Hon. W. T. White, the Minister of Finance. He knew the desire of the underwriters was for sound insurance. They had used their influence in the past largely for that purpose. He thought they would be even more influential in the future. The funds of life insurance companies should be as sacred as trust funds. The beneficiaries of the policies of the various companies were those who were least able to take care of themselves.

The question of prolonging life was one of great importance and one to which the life insurance men of the Do-

HON. W. T. WHITE,

Minister of Finance, who told Canadian Life Underwriters at Montreal last week that Canada offers a splendid field for Life Insurance Funds.

minion should give their best attention. The entire community was responsible for the health of the public. Many diseases were cured with comparative ease if sufficient effort was made. Typhoid was a preventable disease. Our business men might well pay less attention to the art of money getting and more to the art of healthy living.

Expansion of Life Insurance.

Conditions were never more favorable in Canada for the expansion of life insurance, or as a matter of fact, for the expansion of any business. The Dominion was at an extremely interesting stage of its career. Immigration at the rate of 1,000 souls a day and a stream of gold reported by *The Monetary Times* as approximating about \$200,000,000 a year, were important factors in national growth. The credit of the country was excellent. Life underwriters had a staple article to sell, and with this increase of population and of wealth, there were great prospects of expansion. Opportunities for investment were certainly never better than to-day. Insurance and other companies had been able to make safe investments by observing only ordinary, sound business judgment.

High-class securities used to sell on a 2½ per cent basis. That rate had greatly increased. Many factors had

contributed to this world-wide phenomenon. One reason for the decline in the value of high-grade securities, thought Mr. White, was the great demand for them. Canada had required enormous sums for development and other countries had made similar calls. World-wide prosperity and development had meant a world-wide demand for money and consequently an increase in the rate of interest.

Cost of Living as a Factor.

Interest at one time had been confined largely to investments in Dominion and provincial government securities. A wider selection was now being made. Much more patronage was bestowed on public utilities and industrial securities. That fact had also had its effect on interest rates. Yet another factor was the increase in the cost of living. A number of people who lived upon their income from investments had to cast around to increase their income from that source. The result was a tendency for interest rates to harden.

Canada offered a splendid field for the investment of life insurance funds. Life companies were among the first to recognize the claims of the Western mortgage, which had turned out most satisfactorily.

Mr. H. S. Ross, K.C., in proposing the toast of "Our country," stated that in however many respects the stories of returning Canadians from England differed, they all agreed on one point—that John Bull had a little money left for good Canadian securities. Mr. Ross recalled the fact that there were yet left in Canada 150,000,000 acres of free land. In Saskatchewan alone there were 155,000,000 acres of uncultivated land. He predicted a splendid future for the Dominion, but thought that Canadians should pay more attention to the development of our society, our institutions, our laws. He advocated a study of the problems existing between employers and employees.

Men Will Seek Life Insurance.

Lieutenant-Colonel Smart, M.P.P., was of opinion that the finances of Canada were never in better position than to-day. Bank deposits showed the prosperous condition of the people. One of the few bad results of prosperity was the exploitation of our credit by the unscrupulous both at home and abroad.

Mr. Smart was such a believer in life insurance that he never had to be chased for it. He thought the day was not far distant when men would seek the insurance company rather than the company the men. Life insurance companies had something good to offer. The profession to-day was on a higher plane than it ever was.

The Hon. Jeremie Decarie, provincial secretary, described to the visitors the attractions of Quebec and made a plea for a large view of things. "Let us have one aim and object only," he said, "and that is the prosperity, strength and glory of those who live under the glorious British flag." The conclusion of the Provincial Secretary's remarks was followed by the Quebec delegates singing "O Canada, mon pays, mes amours."

Framed the Act, Now Works Under It.

The Hon. George P. Graham, ex-minister of railways, speaking for "Our Business," referring to the presence of United States delegates, remarked that the Lord had given the two countries too much grey matter to allow them ever to have any serious row hereafter. Speaking as one connected with insurance, the Hon. Mr. Graham caused laughter by saying that a few years ago he had helped to frame an insurance bill which to-day he was trying to work under. "I find it has its restrictions," he said, "but I submit to you that on the whole the insurance act, as we have it, is working in the interests of the insured and is not injuring the companies operating under it." Every municipality, said the speaker, was under a debt to the insurance companies for saving them from having to provide for many who would have been thrown on the community but for the insurance companies.

Messrs. Somerville and Bissett responded to this toast. The president, Mr. A. Homer Vipond, was the recipient during the evening of a handsome pearl brooch as an expression of appreciation of his services. There were about 250 guests present.

MAKE KNOWN LIFE INSURANCE BENEFITS

Underwriters Think That Publicity Campaign Should be Initiated—Essay of Mr. George E. Williams

The life underwriters do not think that the benefits of life insurance are sufficiently well known. The profession in Canada has reached a high standard, but there is room for extending the business to the uninsured. This situation led to the offering of a cup by the Dominion Life Underwriters' Association for a prize essay on a practical plan of co-operative publicity of life insurance. The attractive essay of Mr. George E. Williams, Montreal, won the prize. Mr. Williams recalled the picture, as given in the report of the New York Superintendent of Insurance in 1874, of the jealousies then existing in the business of life insurance. Their main result was to disgust the public with the whole practice of life insurance. "Great improvement," said Mr. Williams' essay, "has taken place in the last ten or fifteen years."

The officers of the various companies have learned that they can co-operate in many ways and do joint constructive work for the good of the business. The agents, largely through the influence of the Life Underwriters' Association, have learned some ethic or two with regard to their dealing with competitors.

Publicity is on Old Basis.

"But when we come to the matter of insurance publicity, we find matters still largely upon the old basis. The com-

HON. C. P. GRAHAM.

He related at the Underwriters' banquet how he had helped to frame an Insurance Bill which to-day he was trying to work under.

pany advertises itself, not the business. The best, largest, strongest, safest, and other superlatives are used—columns and pages of figures are given which are interesting to insurance and financial men, but which mean little or nothing to the general public.

"This public, be it remembered, is both ignorant and prejudiced on the subject of life insurance. A certain amount of individual company information there must be, but the public needs enlightening vastly more on other lines. What is required is to daily instil into men's minds the *raison d'être* of life insurance, the absolutely sure foundation on which the structure is built, the wisdom and need of men joining together to bear the financial loss coming upon the community through the cutting off of the income-earning power of its constituent members. The duty of every man to protect his dependents could be made to appear so strong, that even if he were personally unwilling, public opinion would force him to take the necessary step.

"The public need reiterated information in an attractive form on such points as these:—

"The money value of human life. The irrevocableness of its loss. The part that life insurance plays in public economy. The scientific exactitude of actuarial knowledge. The use made of each premium received. The varieties of insurance contracts and their particular adaptations. The good and the evil of insurance legislation.

"In other words, the public should be taken into complete confidence regarding the whole methods and principles of the business. If this were done, these, among other,

benefits would result:—Prejudice against life insurance and life insurance men (caused by ignorance) would disappear. It would be easier to get good men to enter the ranks. The cost of securing business would be decreased. Through education and the removal of prejudice it would be easier to write business and the law of supply and demand would effect a lowering of the rate of commission.

Taxation of Life Premiums.

"Adverse legislation would be impossible, as the public would understand that it would be their interests alone which would be affected. The taxation of life premiums would be done away. At present legislators and the people generally think that these taxes come out of the chests of big corporations. When they understand that it is simply reducing the rate of interest earned by over one per cent., they would no more stand for it than they would for the taxation of savings and deposits or any similar form of thrift.

"The first word of the title is coming last. Having dealt with the need of co-operation and the tremendous importance of publicity, let us suggest briefly a plan that we venture to call "practical." It is not a new discovery that such publicity should be effected. Presidents and managers have thought and spoken of it. But they have been afraid of acting independently lest other companies should reap advantage from their action. If any joint action has ever been proposed it is apparent that the indifference or hostility of some short-sighted individual companies must have stifled it. But we believe that the matter has now reached a stage where action is imperative. Short-sight must be provided with binoculars and hostility must be overridden for the general good.

Suggests Advertising Campaign.

"We suggest, therefore, that a bureau or board of publicity be constituted (either as a department of the Life Officers Association or as an independent body) of representatives of the various companies entering into the agreement. Let a first-class publicity man be employed by the bureau to direct the campaign. Such a manager would need to be honorable, a good writer, and a man well acquainted with life insurance from every standpoint. To get the right man it would be necessary to pay a good salary. Let contracts be made with every newspaper in Canada. For 150 lines twice a week in every daily and a similar space each week in every weekly in Canada, and allowing a good sum for the salary and expenses of the manager, the cost would not exceed \$65,000 per annum. This is just half what the companies are now spending in Canada for advertising, and is about one-sixth of one per cent. of the premium income. It cannot, therefore, be said to be impractical from the standpoint of cost. Nor can it be dismissed as impractical by the statement that the companies will not co-operate. The growers of oranges find it practical and advantageous to carry on a continent-wide campaign of education regarding the eating of oranges. The manufacturers of automobiles, in addition to their large individual advertising appropriations, conduct a joint bureau of publicity.

Get Together and Do It.

"If these and other industries in which there is so much rivalry for the marketing of their product find it possible to co-operate for the good of all, surely the managements of the life companies would find no great difficulty if they addressed themselves resolutely to the task. In addition to the standing space, the copy for which should be constantly changed, there should be frequent readable articles of greater length placed in various newspapers and magazines.

"To give the plan a good chance of success the agreement for this co-operative plan should be made for three or five years. The finding of a basis on which the expense should be met would not be difficult. It might be done on the basis of premium income or of new business for the previous year, or on any just basis which commended itself to the companies' representatives. The way to accomplish this object, desired by all ranks of insurance men, and needed by the insuring public, is to get together and do it."

"I never saw such a crowd for applauding," said a visitor from the United States.

The underwriters maintained their reputation for poetical, biblical, historical, philosophical, and oratorical bombardment.

Hon. W. T. White thought the life of a cabinet minister could not be considered a good insurance risk, especially in England.

There was a strange lacking of good anecdotes, usually a feature of these conventions. Possibly it was caused by the serious atmosphere of Montreal.

With the taps of the flow of oratory turned on fully, it was difficult to realize sometimes that life insurance men are in the business chiefly for their bread and butter.

Retiring President Vipond's address expressed the hope that next year there would be twenty essays at least, "even if ten came from Sherbrooke." One can almost imagine the graceful bow of Mr. T. J. Parkes.

LIFE INSURANCE AND THE PUBLIC

What the People Should Know—Canvassing Agent Should be Well Instructed—Insurance as an Investment

"The public to-day undoubtedly have a much better conception of the nature of our business than they had a few years ago," said Mr. Arthur B. Wood, the well-known actuary of the Sun Life Assurance Company, in his address of welcome to the delegates of the Life Underwriters' Association at Montreal. "But there is ample scope," he continued, "for further instruction both in the fundamental principles of insurance and the nature of the security behind a life assurance policy. The noted mathematician DeMorgan has said, 'There is nothing in the commercial world which approaches even remotely the security of a well-established life insurance office.' This is a thought which should be driven home on every occasion, and it can be illustrated by a reference to the history of Canadian Life Assurance, for it is a significant fact that no Canadian Life Assurance Company has ever failed. True, some few in the struggle to establish themselves have seen fit to go out of business, but in every instance they have had sufficient assets to effect the transfer of their full liabilities to some thoroughly established company, and the policyholders have thus been absolutely secured under their contracts. Of what other business can the same be said?"

"It is not merely the great army of uninsured who are lacking in insurance knowledge, but instances constantly come before our notice which show that many even of those who are already policyholders have but a crude idea of the main features of the policies they have purchased. The inference is that in such cases the business has not been intelligently placed by the agent, and it clearly suggests the thought that the local canvassing agent himself may in many instances be in need of proper instruction. Much of the unwarranted criticism of our business in former years, now happily a thing of the past, has been caused by wrong impressions conveyed by agents, who, though their intentions may have been perfectly honest, have been sent out to canvass before they were properly qualified to carry a rate-book.

Agents Should be Instructed.

"Agency managers should bear in mind that their first duty to the public is to thoroughly instruct the men in their employ. They should at the outset be taught the main fundamental principles of the business, and the essential features of policy contracts and plans of assurance, so that when a policy has been delivered all reasonable precautions will have been taken to provide that the policyholder has an intelligent idea of the benefits accruing under his contract. This is a duty to the new agent as well. To-day many men give up lucrative positions to engage in field work and the chief reason why many do not succeed is not because they are unfitted for the business but because through lack of instruction they have not been given half a chance.

"The first step in the dissemination of the knowledge of insurance principles among the people is then to properly educate the ordinary canvassing agent, for after all he will continue to be in the future as he has been in the past, the chief medium by which the knowledge of insurance will be conveyed to the people and a body of well-informed and satisfied policyholders will, of themselves, do much to help on this work of education. The system of canvassing in vogue for many years past, has tended to relegate to a secondary position the main idea of protection and almost undue prominence has been given to the investment feature. Many agents as well as policyholders do not as yet fully grasp such an elementary fact as this, that if a man is insured for any period, be that long or short and does not die, it has nevertheless cost the company money to carry the risk, just as it costs a fire insurance company money to insure a building which does not burn. The premiums of all policyholders must be drawn upon to pay the losses of the few. Only by making due allowance for the cost of carrying the risk can the value of life assurance as an investment be properly ascertained.

Nothing Magical about the Business.

"There is nothing magical about the life insurance business which warrants the expectation of unusually large results from the investment standpoint, results which would not be expected for one moment in any other legitimate business. If the value of the protection enjoyed is properly appreciated and allowed for, a maturing policy can easily be shown to have yielded a splendid return and it will be an unreasonable man who is not willing to admit that the life assurance companies of the country are faithfully discharging the trust reposed in them.

"Life insurance is also entitled to the best consideration of the public because of the assistance it is rendering in the campaign to prolong human life. In their efforts to reduce

the cost of insurance to the public the companies individually and collectively are constantly at work studying the causes of death and the effects of various factors upon longevity. Several companies have already instituted a campaign of education amongst their policyholders and the public in general, to instruct them how to reduce to a minimum the risk of contracting many diseases such as tuberculosis, typhoid and others, which cause such ravages among the community, and add so enormously to the death rate of life insurance companies.

"At present, the most extensive mortality investigation ever undertaken in any country is being conducted jointly by the Medical Directors' Association and the Actuarial Society of America. Over 150 different classes of lives are being studied, embracing various occupations, medical impairments, and so forth. To this investigation all of the leading companies on the Continent have contributed their data and this also serves to illustrate in a striking manner the benefit of co-operation through the medium of our societies. Little could be accomplished by individual and independent effort. A general mortality table is also being prepared to be used as a standard for measuring the expected deaths in the several special classes. That table has already been practically completed, and it clearly indicates that a notable reduction in the general death rate has been effected in recent years. It is observed, however, that this improvement has taken place chiefly in the early half of life and is due to the general reduction in the mortality from such diseases as I have referred to, and to which public attention has thus far been chiefly

HARRY H. KAY, MONTREAL.

President Montreal Life Underwriters' Association, who did much to make the success of the recent Dominion Association's Convention.

directed, not only by the life assurance companies but by such organizations as the tuberculosis institutes and other societies organized in the interests of the public welfare.

No Improvement in Mortality.

"It is equally striking, to find that there has been no improvement in the mortality during the latter half of life, but on the contrary, it appears that the loss of life from diseases of the heart, blood vessels and kidneys, and others which affect chiefly men past middle life, has steadily increased. The time, therefore, appears to be ripe to start a campaign against such diseases as well, for undoubtedly, many of these also can be prevented, or at least postponed by educating the people how to live properly. This mortality investigation will furnish a vast fund of information which can be, and, no doubt, will be used in educating the public along these lines. It will also result in a wider extension of the benefits of life insurance. Reliable information will be at hand regarding the effect upon longevity of family history and of various medical impairments, and consequently many classes of under-average lives which heretofore have found difficulty in obtaining insurance, will be more readily accepted at a cost commensurate with the risk involved, and, here again, a public service will have been rendered, for these lives by very reason of their being under-average are even more in need of insurance than the so-called gilt-edged risk."

Is there any kind of experience which has ever been experienced that a life insurance company has not experienced?
Hon. J. A. De Boer.

HOW THE PUBLIC IS SERVED

By the Canadian Life Underwriters Association—The Organization Has Raised the Insurance Business to a High Standard

The cup offered by Mr. R. J. Stuart, Toronto, of the Sun Life, for a prize essay on the service rendered by the Life Underwriters Association to the public and its members, was won by Mr. William McBride, a popular past president of the association. The essay was an excellent piece of work. Mr. McBride described the objects of the association and detailed its services.

"The association movement," he said, "has improved the moral code among the field forces; created a demand for clean, honorable methods; made agents more self-respecting, wiser and better men, imbued with a sense of the sacred trust reposed in them, conscious of their heavy responsibilities, and more conscientious in the discharge of their duties. It has also made insurance and insurance agents more appreciated and respected by the public, now that agents largely confine themselves to showing the superior points of their own companies, rather than the weakness of their competitors. The public confidence thus begotten by constructive rather than destructive methods has benefited many communities by more comfort and relief being imparted to hearts and homes enshrouded in the darkness of be-

W. McBRIDE, WINNIPEG.

A Past President of the Dominion Association and Winner of Two Essay Prizes at this year's Convention.

reavement. The increasing volume of business, and consequent increased benefits, afforded the public, have largely resulted from the cohesive concentration of influences for the elimination of abuses brought about by association movements, which have wrought a revolution in insurance methods; turned chaos into cosmos, and raised the dignity of the business to such an extent, that the intelligent public and the intelligent agent now realize that there is no calling more dignified, more beneficent, or more philanthropic, than that followed by the conscientious insurance agent imbued with a high estimate of the value of his ministrations, and the altruistic spirit of his profession.

Betterment of the Business.

"Our uniting in a common endeavor for the betterment of the business has been a turning-point towards better days. Our cultivating the spirit of a true and honorable brotherhood among agents has strewn the insurance shores with derelict hulks of skyrocketers, misrepresenters, rebaters, and twisters, whose meteoric career has been brought to a timely end.

"By being brought together in association fellowship, where we study men and methods, pleasant and profitable friendships have been established, mainly because ours is not a secret organization for the purpose of establishing any monopoly, inasmuch as no business is more open to unlimited competition than that of life insurance.

"As a result of the dissemination of knowledge through our training schools, viz., the associations, conditions have never been better, or prospects more promising to the live

agent who realizes that he stands in the advance guard of modern social (if not socialistic) business forces.

"Through the ministrations of our associations, we have created a healthy public sentiment, and by disseminating a knowledge of the basic principles of insurance, and of the honorable methods of obtaining it, we have moulded public ideas, and so educated and influenced political opinion that, after understanding the main fundamental reasons and principles of insurance as taught them by our underwriters and Life Officers Associations, they some time ago crystallized their thoughts into actions, and placed on the statute-books of our Dominion a code of insurance laws, which, though not perfect, reflects great credit on the statesmanship of our parliamentary representatives. The ancestor of every action is thought, and thought once awakened does not again slumber. To our associations is due the credit for having engendered those thoughts, and, with the aid of the press, of having silently and forcibly moulded public thought and shaped political opinion till they were condensed into actions and parliamentary acts, which we hope will be found 'intra vires,' and thus concede uniform federal control of insurance affairs. If our Supreme Court gives the necessary statutory support to wise legislation, then agents hitherto guilty of only so-called moral delinquencies will be criminals in the eyes of the law, and the Herculean task of cleaning out the Augean stables will be minimized.

"It redounds to the credit of our associations that they have to a large extent been able to minimize taxation burdens and unjust administration restrictions, and that they succeeded in completely thwarting the iniquitous legislation asked for by the Royal Commission, which evidently utterly misunderstood the economic correlation of insurance and legislation.

Municipal Taxes on Insurance Companies.

"In several municipalities, proposals to impose license taxes on insurance companies and their agents have been thwarted through the combined efforts of association members in educating local politicians so that they saw they were proposing a tax on thrift, and that the proposed additional burdens came out of policyholders' pockets, and not from those of the stockholders.

"By similar exertions on the part of our associations, some provincial governments have been induced to forego proposed taxes on investments, which would have been a most iniquitous imposition when superimposed on already existing income taxation. This conservation of policyholders' funds means to the insured increased dividends, and is proof of the service rendered by our self-sacrificing associations to the insuring public, who now begin to realize that we have their best interests at heart, and are straining every point to safeguard the same.

"A thankful public usually shows its appreciation by increasing its insurance, and thereby rendering a service to itself and its posterity as well as to our association members."

The contest committee appointed to arrange subjects and terms for prize essay competition succeeded in arousing greater interest in this feature of the convention, there being eleven essays entered for the competition. The hearty thanks of the association were tendered on the following gentlemen who were willing to act as judges:—Messrs. T. K. Dickinson, A. P. Earle, C. C. McPhee, J. G. Pelton, W. M. Lothead, W. B. Campbell, J. R. Reid, T. B. Parkinson, John A. Tory. Hearty thanks were also given to the donors of the prizes, Mr. Geo. H. Allen, and Mr. R. J. Stuart.

"You do not yet appear to have devised a remedy to prevent the 'twisting' of business, a most pernicious practice, injurious to the companies and the policyholders alike. Your local associations should take a similar stand here as you have done in the case of rebating, with which the practice is so closely allied. Instances that it is being carried on by some agents are constantly coming before the notice of head office officials and generally after the damage has been done, for like the rebater the twister works in the dark. The agent who resorts to this practice is actuated solely by the desire to secure his commission, and has not a proper conception of his duty to the public. He must know, or if he does not he should be brought to realize, that if he persuades a policyholder to cancel an existing policy in any first-class company and substitute a new one in another, he is causing the policyholder to sustain some financial loss. This practice tends to shake the policyholder's confidence in the interests of the business in life assurance, and it should be effectually stamped out. You should continue to work unceasingly in the endeavor to eliminate from the business all methods of unfair competition. By all means let the agent use every legitimate argument to obtain the business for his own company, but let him also be fair to his rivals, be willing to admit that there is much good in others, and above all let him be absolutely honest in his dealings with the public."—Arthur B. Wood.

HOW TO BUILD AN AGENCY

Experienced Underwriter Gives Some Good Advice as to Constructing a Sound and Productive Field Force

Well besprinkled with poetical quotations, biblical references, and splashes of French, Mr. William McBride, of Winnipeg, presented his views as to the way to build a life insurance agency. His essay brought to him another award.

"If obtainable," he said, "get for general agent a man who has risen from the ranks and won his spurs by tact and persistence. While his duties are not so much the writing of business himself as getting others to do it, yet, from his previous personal success, he should be able to show his subordinates how to 'work the oracle' and unostentatiously impress upon them that his practical experience is a valuable asset, and is at their disposal when they need assistance. He should never be so busy with his own personal canvass that he cannot assist his district agents, who might otherwise be too much left to their immature devices and develop along erroneous lines. Though he may personally be a good producer, he must not forget that he is the organizer, and that it is more his bounden duty to secure desirable new agents and train them than it is to personally secure applications for insurance.

No Specified Amounts of Personal Business.

"Companies should not require general agents to write specified amounts of personal business, since in so doing they deprive sub-agents of attention, to the full benefit of which they are entitled. Every general agent should be given what is known as an understudy, so that when he is indisposed or on vacation the volume of business may not fall off to any perceptible extent. Companies in their own interests should make some allotment for this expenditure.

"After a company has secured for chief agent a man as above described, they should give him a suitable salary with an overriding commission interest in the success of the business. To a general agent on pure commission contract there is ever presented the irresistible temptation to demand half the commission where he co-operates with a district agent. This makes his subordinates only half-hearted in their work, and in consequence they put him up against doubtful propositions, steering him studiously and sedulously clear of eligible prospects whom they perhaps foolishly fancy they can close themselves without dividing commissions. If the general agent is on salary, his subordinates will subordinate their own personalities for the general welfare of the business and heartily co-operate with him, thus enabling him to get from the locality perhaps four times the number of risks that would be obtained if the local agents had to split profits with him.

As to Expert Management.

"Having laid the foundation of this agency-building; having secured for general agent a man with the necessary qualifications; having made with him an agreement which gives him a financial incentive to become a successful organizer, and having given him sufficient latitude to deal fairly and liberally with his employees, we here cease advising the company and presume now to counsel the general agent on the expert management of his territory.

"First and foremost do not begin by stealing agents from other companies. His present company has weighed him in the balance, knows his merits and demerits, and, rather than part with him, will give him all his services are worth, and they are worth more to the company that broke him in than they probably will be to you.

"Be ever on the look-out for agents among bright, intelligent, and, if possible, educated young men who are good salesmen in other lines of business. Get the first mortgage on their insurance affections, give them their initial training, and present to them a contract in which merit, persistence and efficiency will receive financial recognition, and they will generally prove as true to you as the needle to the magnetic pole. Imbue them with the fact that in entering upon insurance they not only give themselves greater scope in widening their financial sphere of usefulness, but that they become factors in bettering human conditions through a scientific mercantile philanthropy full of altruistic beneficence, but shorn of its sting, since a widow does not have to sacrifice either pride or prestige when she accepts, not as a gift, but as her legal right, the face value of her husband's policy.

Use of Women Agents.

"In your quest for agents seek out women of vigorous personality, not too assertive. Most intelligent women know by intuition what men learn by experience. They are better students of human nature than we, and know how to humor applicants' whims or hobbies. A stable-minded woman, who makes a man forget that she is a woman and he a man

when she is talking business to him, is often accorded a courteous hearing when an agent of the male persuasion might be told to go where ice is at a premium.

"In all walks of life women have held their own with the sterner sex. In the United States some of the best insurance producers are women, and in my field they got good business where I failed. We have a large clientele who could be successfully canvassed only by their own sex. If you secure a sprinkling of sensible women canvassers you will contribute much towards building up your agency.

What to Impress Upon Agent.

"In appointing agents, impress upon them the necessity of perfect truthfulness and absolute honesty. By that I do not mean commercial honesty, which is only a modified solution consisting of observing the rules of the game within legal limitations. Size up what with ordinary effort your locals should produce, then offer them a bonus on their total business if they exceed their allotment, intimating that their names will appear in the honor roll. These additional incentives in the shape of praise and concrete remuneration will be endless inspirations to your subordinates and stimulate a healthy, friendly rivalry which will materially enhance the productiveness of your territory.

"Offer also some special prize for the one securing the largest business beyond his allotment. Agents are human, sentimental, and possess an inborn desire to be advertised as

J. T. WILSON,

Who was Elected First Vice-President of the Dominion Association for the Current Year.

leaders. Fan into flame this ambition for recognition and applause. Many agents have learned their own prowess and developed confidence in their own ability when stimulated by a determination to win a coveted prize and the accompanying éclat. This affords agents valid excuses for urging the procrastinating prospects among their friends to decide immediately. The little additional argument, "Your application now will aid in securing the prize," may be the last straw in breaking the back of a prospect's indifference.

"Difficulties and discouragements continually confront your agents, therefore assemble them in convention semi-annually, encourage free discussions, show them how to overcome their difficulties, how to turn defeat into victory."

"If the United States with 92,000,000 people will grow this year 600,000,000 bushels of wheat, and Canada with 8,000,000 people will grow this year 200,000,000 bushels of wheat, when Canada has 92,000,000 people, how many bushels of wheat will it grow?" Problem submitted by Mr. H. S. Ross, K.C., at underwriters' banquet.

When Mr. A. H. Vipond, attended the convention of life underwriters in the Maritime Provinces recently; a wide-awake industrial insurance agent discovered that he was the happy possessor of a young son twelve months old. At the station, the agent extended one hand to say good-bye; with the other, he held out an application form for industrial insurance for Vipond Junior. Vipond Senior signed the application.

PROGRESSIVE PRINCIPLES OF LIFE INSURANCE

Co-Operation is the Basic Fact Underlying the Entire Business of Insurance—Address of Mr. W. C. Johnson

An interesting address was given to the convention by Mr. W. C. Johnson, of Boston, on the progressive principles of life insurance. Mr. Johnson, who is vice-president of the Columbian National Insurance Company, recalled the recent United States and Canadian investigations, stating that from them had come progress. "We find," he said, "on both sides of the border, greater confidence in the stability of life insurance; a fuller acknowledgment of its usefulness; better laws, and a clearer recognition of the fact that officers, directors and agents of life insurance companies are trustees of the public welfare—responsible to the public for the disinterested and economical administration of the business. You not only have procured a code of laws which should be adequate to control the business for the next quarter of a century, but the spirit of co-operation has been aroused among the officers and the agents of the various companies; in matters affecting the

G. A. SOMERVILLE, TORONTO

Well-known Life Insurance Manager who spoke at the Montreal banquet.

general welfare you can act with force and promptness; better understandings have been cultivated; you are ready for more efficient service, and insurance men of all classes have been educated to the true view, that in the conduct of their semi-private and yet semi-public business, they occupy a trust relation toward the community and must discharge that trust not merely honorably but efficiently.

Honor and Welfare of Life Insurance.

"You as individuals, and this association, together with the company managers as individuals, and the life officers' association, are the custodians of the honor and the welfare of the business of life insurance in Canada. We sometimes hear people speak impatiently of the discussion of the evils which have touched our business. We should speak of them, but only to guard against them and make clear why they are evils, and so emphasize the basic principles which should guide our activities and our service to the business. It should be remembered that our private service, if efficiently performed, partakes of the nature of public service; that the welfare of our business as a whole should take precedence over individual selfishness; that there should be fair play for all companies and equality of opportunity for all agents; and that, specifically, in dealing with the problems of the agency field, no individual or group of individuals should act, or be permitted to act, in a manner injurious to the welfare of the business, or the people.

"Every life insurance man, whether in the home office or in the agency field, who worthily fills his place in the business or in the community in which he works, is engaged in rebuilding and conserving the institution of life insurance. The man who makes any pretense of serving the cause of insurance and indulges in improper practices such as, for instance, twisting, excludes himself from the ranks of those

who work worthily, for the twister is the reverse of the conservator or the builder, and is one whose end can be attained only as he may be successful in tearing down and destroying.

Twisting Is Economic Waste.

"Let us clearly understand the reason:—Twisting represents economic waste. A company spends money, its agent energy, ability and time, in first educating a man to the need of life insurance and then inducing him to take it; it examines and inspects the risk, writes the policy, and through its delivery completes a piece of constructive work; the man is insured; a new adherent to the principle of protection and thrift has been secured. The man or company which comes along, and, making no new convert to the cause, creating no new insurance, merely seeks to transfer the policy from one company to another, at the cost of another examination fee and another commission, would be a brigand and an economic parasite, even if the success of the effort to twist did not involve—as is usually the case—unjustified attacks upon the company or the agent which originally created the desire for insurance and converted that desire into a policy.

"I speak of twisting merely as an illustration—the principle is the same as to other evils. If this association is to perform its full service, then gradually, through education and the teaching of sound principles, all such evils must be eliminated to maintain a fair field and advance the general cause. Where so much has been gained, my plea to the lukewarm or indifferent, if there be such, is that they shake themselves out of their attitude of selfish isolation and help.

Co-Operation is Basic Fact.

"Co-operation is the basic fact underlying the entire business of insurance and all methods for its extension. We must as individuals realize that the greatest obligation we owe to ourselves is the performance of our duty towards others; that the greatest chance, the greatest gift that can come to any man is the opportunity to do something which counts in the interest of the common good. Here is your mission. As an organization you must realize that sound principles of efficiency and service to the public are the only ones which will lead to progress; and that as the custodians of the honor and welfare of the business of life insurance in Canada, a business which is playing the leading part in the great world movement that is emphasizing the responsibility of man toward his fellows, your association, in co-operation with the life officers' association should drive out the forces of evil, and as evil makes its last stand against the progress of just practices and sound methods, these two associations should be found conscious of the great cause they are serving, clear in their purposes and in the reasons for the faith they hold, guarding the vantage ground of righteousness, battling to repulse all of selfishness, and to procure the greatest possible extension, along lines of sound efficiency, of the service our business renders in conserving the welfare of individuals and advancing the interests of the state."

RELATIONS OF LIFE OFFICERS AND AGENTS

The report of the executive committee of the Dominion Life Underwriters Association reviewed much important work of the year. It referred, among numerous other matters, to the question of co-operation with the Life Officers' Association. During the past year there have been several conferences with individual members of the Life Officers' Association, and shortly after the Winnipeg convention the Dominion Life Underwriters Association, through former President McBride and the chairman of the executive committee, had some correspondence with the secretary of the Life Officers' Association with a view to co-operation on matters of importance to the life insurance business. The Life Underwriters' Association had also had the active assistance of prominent members of the Life Officers' Association in various ways, notably the valuable advice and appearance at their meetings of Mr. L. Goldman, president; Mr. G. A. Somerville, vice-president, and Col. W. C. Macdonald, the last-named of whom was good enough to appear in person before the Eastern Canada Passenger Association on the underwriters' behalf in connection with the matter of transportation privileges. There is every reason to hope for the most cordial relations between the managers' association and the agents' association in the near future. There must, however, be adequate recognition on the agents' part that they have yet much to accomplish amongst their own membership and amongst life insurance agents in general before they can expect the life managers to institute any sweeping reforms. The life officers' association has for its ideal the betterment of the business, and it is reasonable to suppose that whenever they can facilitate that work they will be quite willing to do so. It is the duty of the life insurance agents, however, to also do their part, and thus further prove to those in authority that their association can be made even more useful to the life insurance business as a whole.

DIVIDE ASSOCIATION'S FIELD OF WORK

Into Three Divisions—Retiring President Vipond Had Some Interesting Suggestions in His Report

A splendid report was presented to the convention by Mr. A. Homer Vipond, who shortly afterwards passed the presidential reins to Mr. John A. Tory. Mr. Vipond surveyed the work of the year and paid a tribute to the labors of the two vice-presidents, the secretary-treasurer, Messrs. H. C. Cox, F. P. Stanford, J. F. Weston, W. E. Nugent, T. B. Parkinson, John R. Reid, J. C. Tory and others. Mr. N. T. Truell, he reported, as Western vice-president, paid a visit to ten associations west of the Great Lakes, and formed a new association at Prince Albert, which is now in a flourishing condition. Mr. John A. Tory visited several associations and represented the Life Underwriters Association of Canada at the fifth annual congress of the Association of Life Insurance Presidents held in New York City. Mr. Vipond stated that he had visited twenty local associations, as well as the conventions of the National Association of Life Underwriters at Chicago, and the Life Underwriters of the Maritime Provinces at Halifax.

Mr. Vipond drew attention to the apathy which existed in certain local associations in Canada. He found that the fault was largely due to the lack of interest taken by the local officers, because when they fail in their work, it is hardly to be expected the rank and file of the membership can co-operate and overcome this lack of generalship. "I cannot urge too strongly upon the local association," said Mr. Vipond, "the absolute necessity of electing good live officers, particularly a president and secretary. The very existence of your association depends upon it. There is a tendency far too prevalent to always look for a man of prominence to fill these positions, and in many cases, these men are so loaded down with their own work that they either have no time to give the association or they are totally indifferent as to the duties they are called upon to perform. This system must be changed."

Should Prepare Attractive Programme.

Mr. Vipond suggested that an attractive programme of meetings would keep the association members interested. As an example he recalled the fact that before the Montreal association Dr. Adami, of McGill University, who is president of the anti-tuberculosis league delivered an address on the subject of tuberculosis and its relationship to insurance. To every member, that address was well worth the price of a year's membership and Dr. Adami so convinced his hearers of the desirability and practicability of the life insurance companies co-operating with the anti-tuberculosis league in a campaign of education along hygienic lines and the prevention of disease with the individual policyholders and the public generally, that the strongest possible resolution was drawn up and moved by ex-president Machum that this address be forwarded to the life officers association that they might be able to take cognizance of the same and adopt some plan of co-operation. On another occasion, the Hon. Judge Hotchkiss, ex-superintendent of New York State Insurance Department, delivered an address before the Montreal Association dealing largely with the subject of State Insurance. He showed its undesirability both from a practical as well as from an economic standpoint.

Suggested Division of Field.

Mr. Vipond suggested the dividing of the association's field of work in three divisions:—All associations in Ontario, east of Toronto, but not including Toronto, together with Quebec and the Maritime Provinces, constitutes one district. This would include 13 associations. Toronto and all points west in Ontario, comprising 11 associations in all, to constitute another division, and lastly, all the territory west of the Great Lakes to the Pacific Coast, containing at present 11 associations to make up the third section.

"With this division made," continued Mr. Vipond, "it would be well as far as possible to have one of the three executive officers above referred to, elected from each district, so that the distance to travel would be minimized, and as a result, every association would be within fairly close proximity of an executive head who would be fully in touch with all the doings and requirements of his own particular section. This arrangement would not in any way lessen the importance of the president's office as he would naturally have supervision of all work undertaken, and the same privilege of visiting where and when he desired.

Would Stimulate Healthy Rivalry.

"It would also result in the ground being more thoroughly covered and in many cases where an association required more attention than one official visit, it could be more easily given and with less personal sacrifice. I also think there would be a certain amount of helpful rivalry stimulated between the different officers in charge to make the best possible

showing of the work assigned to them in their respective divisions. It would also lead to the education of trained and tried men as candidates for the position of chief executive who could do very much more effective work by reason of the experience thus acquired."

A. HOMER VIPOND.

Immediate Past President of the Dominion Association. Mr. Vipond fully maintained the Association's good record of labor.

A retiring president also suggested the appointment of a grievance committee, before whom local associations could lay for investigation any charges or complaints. The appointment of a permanent secretary and the establishment of an association journal were other suggestions.

PREDICTS DEVELOPMENT OF CORPORATION INSURANCE

One of the most attractive addresses delivered during the convention was that of Hon. J. A. De Boer, a practical insurance man, and president of the National Life Insurance Company, of Montpelier, Vermont. Some of the oldest policies on the books of his company, he said, were those of Montreal citizens still living. In an interesting way, and punctuated with droll stories, Mr. De Boer traced the history of the insurance policy. While the cost of living had been going up, he stated, life insurance had become more substantial and more serviceable to its buyers and at a reduced cost—a matter of no small economic and financial importance.

Life insurance agents were the interpreters of their companies to their companies' clients. The standing of the insurance field man had greatly improved during the past few years. They should go frequently to their home office, which would be glad to open everything to the agents in order to instruct them as to the company's standing, its policies and its conduct.

It is the business of life insurance companies, said Mr. De Boer, to see that only clean money is received. Reputable companies could not afford to receive tainted cash. If clean insurance were given for foul money, there would be contamination at some time or another. The speaker placed emphasis upon the importance of the initial selection by the field man. It had a vital bearing, too, on the character of the agent.

Mr. De Boer thought that there would be development in corporation insurance. That form of underwriting had come to stay. A special form of policy, however, would have to be provided. The hazard of corporation insurance would always have to be critically examined. Despite that development, he would not like to see an inhuman beneficiary substituted for the old-fashioned beneficiary of old-fashioned life insurance.

As usual, the arrangements for the Montreal Convention, were left in the hands of a committee, and the association is under great obligation to the following gentlemen in Montreal who were responsible for the excellent preparations:—Press committee—Chairman, R. B. Foster; J. P. Oram, T. P. Bourgeois. Entertainment—W. O. H. Percy, chairman; G. P. Carreau, W. O. H. Dodds, J. A. Saucier. Banquet—J. A. Bucknell, chairman; E. H. Brown. Hotel—G. A. Carr, chairman; A. B. Haycock. Reception—President, H. H. Kay and whole executive committee.

PREPARE A PROGRAMME

That is the Suggestion of Retiring Secretary Williams —How to Maintain Interest in the Local Associations

An interesting report, reflecting only in a small measure the heavy duties which were performed by the secretary during the past twelve months, was presented by Mr. G. E. Williams, who handed over to Mr. F. T. Stanford last week a clean secretarial slate.

Mr. Williams reported that there are now thirty-five local associations, an increase of one. The baby of the year

G. E. WILLIAMS, MONTREAL,

Retiring Secretary of the Dominion Association and present Montreal member of the Executive. The essay of Mr. Williams, despite his heavy secretarial duties, brought a prize to him.

is the Prince Albert Association and a healthy one it seems to be. Its organization is chiefly due to the work of Mr. N. T. Truell, of Regina. Several small associations which were in a dormant state have been revived by Past President Vipond, and others.

Experience seems to show, he reported, that it is difficult to maintain an association in towns where there are not ten or a dozen life agents to form its membership. It is probable, therefore, that additions to the number of associations will not be many from year to year in the future.

How the Associations Fared.

A similar reason may operate against a large growth in the total membership. As the number of members of a local association approximates to the total number of men engaged in the business in that town, the opportunity to increase the membership is lessened. This is no excuse for slackness on the part of those associations which have not yet enrolled one-half of the possible material in their cities.

Of the total number of associations, viz., 35, nearly one-half show increases of membership for the year. These are Regina, Ottawa, Saskatoon, Calgary, Cape Breton, Peterboro, Moose Jaw, Brandon, Edmonton, Halifax, Hamilton, Niagara, Waterloo and Vancouver. Some of these points are worthy of special mention. Regina has grown from 50 to 74. The latter figure must represent a large proportion of the available material. Ottawa has grown from 19 to 36. Sydney, C.B. has shown a good growth to 21. Vancouver has had an increase of 24. Quebec City, in spite of an increase of their membership fee to \$5, shows a gain of 9.

Where There Were Decreases.

As an offset to these and other gains, the following large associations show a considerable decline:—St. John, N.B., from 43 to 25; London, from 62 to 40; Toronto, from 187 to 116; Montreal, from 182 to 152; Winnipeg, from 160 to 74. All calculations for membership are on a paid-for basis. The total membership for the year is 1,101 as compared with 1,195 last year.

A somewhat intimate touch with the associations shows that those whose local officers have planned for educative

meetings for the benefits of their members, and have had their meetings well reported for the information of the interested public, have been the most successful associations.

Should Prepare a Syllabus.

In a number of places addresses were given by ministers, lawyers, doctors, politicians, insurance experts, newspaper men and men of affairs on matters directly bearing on our work. There are attractive and new topics opening for us. Life insurance as an instrument for social service; the relation of life insurance to public, hygiene; the new adaptations of insurance to business purposes. Many of the older subjects treated from new standpoints by men outside our ranks are of great educative value.

Probably there is no association but could arrange to have local or neighboring professional men give them such addresses. Mr. Williams strongly urged that every association arrange for at least half a dozen meetings during the fall and winter, and not be easily turned aside from carrying out its plans. The example of some of the associations—notably Brandon—in preparing a syllabus at the beginning of the season, is a good one to follow.

PENSION SCHEME FOR LIFE AGENTS

A discussion which evoked considerable interest was that in charge of Mr. W. G. Keddie, of Ottawa, the subject being, "Is a pension for long service desirable?" and "What are the best means of retaining agents with the company?" Mr. Keddie delivered an interesting address on this subject. Mr. Burrows, of Belleville, thought that a pension scheme for life insurance agents would benefit the companies considerably. It would, he said, increase the loyalty of their agents, and ensure their permanency, which is a very valuable asset to any company. "In fact, a strong organization of loyal, faithful, permanent agents is one of its best assets, and cannot be measured by dollars and cents, but thousands of dollars in my judgment, would be saved annually that are now spent in filling vacant territories that agents have left, that perhaps would have remained with their companies, had some reward been given for long service.

"Permanency of the agency force means fewer lapses, for if the business has been properly done in the first place, no one can husband it, and keep it in force as well as the man who originally did it. It also gives the insured greater con-

Who Conducted Interesting Discussion Respecting a Pension Scheme for Life Insurance Agents. He is President of the Ottawa Association.

fidence in the company every time he pays his premium to the man who insured him, and very probably increases his insurance with the same man and puts his boys with him also. if he has any, all of which means money for the company."

Others who took part in this discussion were Messrs. N. T. Truell, W. Gaden, and A. H. Vipond.

The discussion on insurance literature and advertising in charge of Mr. E. R. Machum, of St. John, was taken part in by Messrs. John R. Reid, McCuish, G. E. Williams, J. T. Wilson, W. G. Keddie, F. T. Stanford, J. A. Tory and William McBride. The consensus of opinion was in favor of a concerted campaign of advertising.

CONSERVATION OF LIFE AND HEALTH

What Various Companies Have Done and Are Doing —Metropolitan Life Insurance Has Unique Position

Life insurance has become so widespread among the people and has accumulated such enormous funds that it is natural that those who are working for social welfare should appeal to it for help, said Mr. Haley Fiske, vice-president of the Metropolitan Life Insurance Company, in an address delivered before the Life Underwriters Association of Canada at its annual meeting in Montreal.

In February, 1909, the Association of Life Insurance Presidents, representing 15 or 20 United States and Canadian companies, held a conference on public health and cognate subjects. It was addressed by Professor Irving Fisher, of Yale College; and various social workers, physicians and actuaries were profuse in their appeals to the companies to undertake a campaign for the prevention of disease, especial-

G. H. ALLEN, MONTREAL

Who donated a handsome prize in the Essay Competitions.

ly tuberculosis, and the lengthening of human life. Toward the end of the discussion the present speaker asked that the practical side of the subject should be considered: namely, the corporate powers of the companies under the law and their strict supervision.

What are Their Powers?

He announced that the Metropolitan Life Insurance Company would be willing to spend \$100,000 a year to stamp out tuberculosis if it could be shown that it had the power. It could well afford to. The company pays out 23 millions a year in death claims, of which 17½ millions are on industrial policies, and eighteen per cent. of the claims on these policies is caused by tuberculosis. It is curious that that announcement of the willingness to spend that amount of money furnished most of the headlines in the press reports of the meeting. But my question was not answered. That question still faces well-disposed life insurance officers—What are their powers?

There is no doubt that the construction to be placed upon laws and the latitude allowed by supervising officials are largely affected by public opinion. It seemed to us that if we approached the solution of the problem academically we should probably not get anywhere. Life insurance companies are organized to issue contracts for the payment of endowments and death claims. The premiums are the consideration. A large part of these premiums goes for expenses; another large part and most of the interest earned are held for legal reserve; another for the payment of claims; a small part may be held for security surplus. What is to be done with the balance? Participating contracts call for its distribution among policy-holders. Expenses recognized by the law are for the getting and maintenance of the business. Where is the money for a campaign to lengthen life? It is obvious that the amount to be spent is small and that the expenditure must be for the general benefit of all the policy-holders of the particular company. The companies

which issue only non-participating policies are very few in number and the premiums are much less in amount. Stockholders may spend their own money as they please; but they may well ask why should they spend more for the general welfare than any other capitalists.

You see that the problem is not an easy one.

Establishment of an Health Bureau.

One of the fraternal orders began as far back as 1905 to fight against tuberculosis by building a sanatorium for its members; and others followed. But fraternal orders were very little restricted by law or supervision. The case is different. Dr. Eugene L. Fisk, of the Provident Savings Life Assurance Society began as early as 1907 to urge upon his officers the establishment of a health bureau, and when Mr. Rittenhouse became president in 1909 it was established; and its work is continued under the direction of Dr. Fisk, in the Postal Life Insurance Company, with which the Provident was merged. The work of the bureau is for the general welfare of all the policy-holders. It consists of the publication of health bulletins; of annual free medical examinations of the insured, with communication of the results to the physicians of the insured (fifty per cent. of the discovered impairments were unknown to the insured), and advice by correspondence regarding matters affecting the health and the prevention of disease; of co-operation with health officials within obvious limits, and the compiling and publishing of statistical information.

Other Good Efforts.

When Mr. Rittenhouse became connected with the Equitable he organized a bureau in that company, which publishes an excellent periodical, issues bulletins, sends out monographs and pamphlets, all devoted to the problems of prevention of sickness and the lengthening of human life; and the bureau co-operates with and assists by advice health authorities, not only generally, but in particular localities where disease centres or unsanitary conditions are found. The company has not yet begun the post-insurance examination of policy-holders, but invites correspondence concerning the health of the insured. The Equitable has established a bureau for assistance by mortgage loans, protected by insurance, in the building of homes for men of moderate means. These two companies whose work I have described are participating companies.

The Association of Life Insurance Presidents has held public meetings addressed by health and welfare experts; has addressed letters to about 900 health officers covering every State and city in the United States of over 5,000 population; has had replies from 250, and received many reports and bulletins, with a good deal of interesting correspondence; and has begun an analysis and classification of State health laws on the card index system, which will be available for all companies which are members of the association.

Metropolitan Differs From Other Companies.

The Metropolitan Life Insurance Company is in a position which differs from all other companies in many respects, and which gives it a more free hand in conservation work. It is a stock company whose stock dividends are limited to seven per cent., and it issues no participating policies—in fact, has none on its books except such as are kept in special classes, whose dividends are dependent upon a lower mortality than was assumed in the tentative construction of premiums adapted to those special classes. It has over twelve millions of policies in force, over eleven millions being industrial policies. It has never issued any participating industrial policies. This responsibility is fourfold: first, to the 11,000 agents who get and conserve the business; second, to the 3,800 head office employees who take care of it; third, to the industrial policy-holders; fourth, to the working classes in general.

Care of Its Agents.

The company for many years has taken a good deal of care of its agents when sick or permanently disabled. It does not believe in a pension system: First, because the benefits are postponed. The usual period of service required is 20 or 25 years. That is a long period of service to be a prerequisite to obtaining help, and means nothing at all to a large majority. Second, because when an agent is sick he needs help irrespective of long service. Third, a pension system requires the putting up of a reserve. Pensions are annuities and the contingency of length of service is a calculable one. The setting aside of a reserve diminishes the ability of the company to afford help, for it increases the liabilities. Fourth, a pension is a sum certain which may be too much or too little to meet the requirements. Our system is one of allowances made to fit the individual cases. The allowance is sometimes full pay for a period; sometimes hospital or medical help; sometimes part pay for long or short periods; sometimes allowances for the whole of the current year in case of retirement, the amount dependent upon what the recipient has done for the company; the length of

service, the necessities of the case. Nothing is promised beyond the current year. All allowances are revocable for cause. The company spent about \$170,000 in these allowances in 1911 on 363 sick, disabled and inactive employees.

Sanatorium Will be Model One.

A sanatorium is being built on Mount McGregor, near Saratoga, for the treatment and cure of tubercular employees. It is beautifully located in a plot of 420 acres, 1,200 feet above sea level; it faces south, is well wooded, perfectly drained, and has a bountiful supply of water from lake and springs. A farm is connected with it which will supply its products to the sanatorium, and may be used for healthful occupation by the patients. Every like institution has been studied by the architect, and it will be in every respect a model. It combines the advantages of the comfort and independence of the cottage and the grouping and economies of the shack system. It is fireproof. Its equipment will be most complete. It will accommodate 75 patients to begin with, and when complete will accommodate 200. It will serve the general public in one way, for it will withdraw patients from infection of neighborhoods and will afford the best facilities for the study of the disease, its prevention and cure. It will keep abreast of the latest discoveries and methods, and will be of assistance in suggestions to other institutions.

A savings fund has been established by the company for the employees and is available for the administrative force as well as the field force. Then many other advantages are provided for their mental and physical development and general comfort.

Various Services Rendered to Policy-Holders.

The most important work of the company for the policy-holders is the nursing service. Cards are furnished to policy-holders to forward to the district office in case of sickness. The agents, on their calls for premiums, look out for cases of sickness. The nurses visit the offices, receive the cards, interview the agents, and calls are promptly made.

Emergency relief has been afforded policy-holders in numerous cases; the last following the tornado in Regina, where our policy-holders were taken care of by cash gifts.

Our co-operation with health authorities and social agencies has been very extensive and some of it very interesting. For instance, in 1909 a referendum was made to the voters of the city of Chicago for authority to build a municipal sanatorium. Our agents distributed 500,000 ballots to our policy-holders. We were told that this had a great effect on the result, which was an overwhelming vote in favor of the sanatorium, the total vote being about 200,000, the measure being carried four to one. In 1910, we were appealed to by the municipal authorities of the city of Cleveland to assist at a city election whereat authority was asked of the voters to the issue of bonds for a tuberculosis sanatorium. Our agents distributed ballots and the general superintendent of the department of public safety wrote us that he was sure that much was accomplished by our men. The vote was in favor of granting the authority.

Providing Homes on Easy Payments.

After a careful study of the systems in force in Belgium and Germany, the company has made arrangements with a realty company to erect homes in a suburban part of the borough of Brooklyn under a system by which the company loans about 60 per cent. of the cost on first mortgage, the realty company loans most of the balance on second mortgage and pays for term insurance on the life of the borrower for an annually decreasing amount equal to the outstanding mortgages. The result of the arrangement is that the purchaser obtains a home on easy payments and is protected against death by insurance at the lowest cost.

Here is a story of the Hon. J. A. De Boer: An automobile was about to leave the offices of the National Life, of Montpelier, Vermont, with two of the best business producers of the company. Said the president to the chauffeur: "Remember, you are insured for \$1,000. The two men behind you are insured to the limit. They bring our company two and a quarter millions of new business every year, and"—with a dramatic pause—"for pity's sake be a good chauffeur."

Mr. Arthur B. Wood, the well known actuary of the Sun Life Assurance Company of Canada, delivered an interesting address of welcome to the delegates. He emphasized the importance of these annual gatherings, where the leading men engaged in the field work of life assurance throughout the Dominion and representing practically every company transacting business in Canada, meet together on a common ground, to interchange their views, to discuss means for bettering the conditions of the field-man's work, and generally to consider the most effective measures for extending the benefits of life insurance throughout the community.

COMPANY, MANAGER AND AGENT

Important Relations of Three Life Insurance Factors— Address of Mr. L. Brackett Bishop, of Chicago

There is something about the business of life insurance that sets it apart from other kinds of business. Twenty-four years' observation has led me to believe that the presidents and officers and managers of life insurance companies stand in a class by themselves as business men, for the business calls to men of high motives and readily creates, too, men of high motives, stated Mr. L. Brackett Bishop, president of the National Association of Life Underwriters, in his address on Thursday at the convention of the Life Underwriters' Association of Canada, held at Montreal. Confidence is felt by the public in "their" life insurance companies. (The word "their" is used advisably because in the last analysis, the companies belong to the people and they are builded with the people's money.) The chief factors in the work of conserving the home, the staunchest opponents of improvidence, are the officials and the field workers of life insurance.

An Englishman has said: "Life assurance makes a scientific adjustment between the possibilities and the probabilities, the accidents and averages of life. It enables the individual to merge his constant liability to death in the average longevity of the race, and to share in the produc-

L. BRACKETT BISHOP, CHICAGO.

Mr. Bishop, who is President of the National Life Underwriters' Association of the United States, addressed the Montreal Convention on the relations of the Life Insurance Company, its manager and its agents.

tiveness of life in general, whatever may be his own fate. It discounts probability and gives certainty. In its adaptations to practical life and finance, life assurance enlists the cumulative power of small investments through long periods of time, and utilizes the far-off interest of prudence for present needs. It applies scientific methods to those impulses of generosity which would otherwise encourage improvidence, and provides for the needs of all through the love of each for his own. It gives affection a place to stand, and a lever with which to work. It transforms forethought and goodwill into practical helpfulness and well-being. It enables us to realize for our loved ones the hopes we cherish for their future, which might otherwise be blighted by death."

Have Realized Responsibility to Public.

It would seem as if the builders of the great life insurance companies must have realized in a large measure their responsibility to the people. These companies are not the result of accident. The officers, managers and agents of the past have served their generation well by putting their labors of a lifetime into the careful guarding of the public's interests and officers and managers and agents of the present are giving of their best to the same end. There is so much publicity given to the conduct of home office affairs, their

investments, etc., that not much need be said upon the management of companies except that it requires ability of a high order to properly and safely invest the assets and to secure the required amount of new business at a moderate cost.

To secure an effective agency force requires the expenditure of money carefully, but not parsimoniously. A strong agency force is one of the most valuable assets a company has, and is not easily built up. New companies should be particularly careful not to attempt to build up their forces too quickly and thus secure too much business at first, because an agency organization is an investment of the highest order, and, like other investments, to be limited by the investing powers of the company. A constant source of danger to new companies is an ambition for too rapid growth leading to extravagance and failure. The management of all companies should be a proper mixture of enterprise, progressiveness and conservatism. The policies of life insurance companies are being constantly changed for the better and the home officers, in order to be up-to-date, must put these new privileges in their policies as soon as their value is demonstrated so, as speedily as possible, to give to their agents and managers the selling advantages of new points. At the same time, great care must be taken not to introduce freak privileges which will later have to be eliminated.

Appointment of Managers.

The appointment of managers by the home office is a work requiring great judgment. As far as possible, there should be a working agreement between the companies not to take away from other companies their managers, agents and business. Many new companies make the mistake of endeavoring to get their managers by securing them from other companies, and do not often succeed in getting desirable men, as the best men will very rarely leave. New companies particularly need the good-will of those already existing; when in search of managers they should first look carefully among their own agents, thus obtaining men familiar with their methods of doing business. No company can become great unless it sets great store by its managers and gives them liberal contracts and substantial financial backing. The home officials should not keep their managers and agents at arm's length, but show great cordiality and friendship to them, thus developing esprit de corps, without which no great agency system can be maintained. The managers and agents should be informed verbally and frequent letters that officials regard with approval all good work done. If a reproof is necessary it should be given as courteously as possible. An agents' bulletin published at the home office each month commending by name managers, agents and agencies for specific work done is a strong factor in welding the forces together.

Securing and Developing Agents.

The manager has his problems as well as the home office. Perhaps the greatest is securing and developing new agents. The reason more new agents are not secured is because the managers do not go after them with the vigor they go after new applications for insurance. Old policyholders make good agents. Agents can be secured from among teachers, superintendents of schools, traveling men, doctors, ministers, retail salesmen and young college men. Mr. A. T. Stewart, the New York drygoods merchant, had much success in securing for his business men who had failed in business for themselves, but who, under his wise direction, became valuable men. Managers, like the home officers, should leave the agents of other companies alone. Any manager who has the right idea of things will be glad to render any service, financial or otherwise, to an agent who he knows has capacity as a salesman and is doing his best. The development of a force of agents is a work requiring tact, judgment and patience. Someone has said: "There are four qualities, of which any successful manager must have at least two, initiative, tenacity, judgment and sympathy, and if he wishes to be up-to-date he must read the insurance journals and be a member of his local life underwriters' association, and, in this and other ways, learn the new phases which the life insurance business, like all other growing and developing business, is going through.

Those Who Actually Sell the Policies.

First, there is the home officers, then the managers, and last but not least the agents who meet the people and actually sell the policies and make possible the great life insurance companies with their wonderful accumulations of capital. The modern life insurance agent needs no introduction. He is everywhere, and is more appreciated as the public sees the splendid beneficial results of his labors. The life insurance agent of the present day must be a man of ability and honor, it is no easy work and the men who win large incomes from it earn every dollar they get. The necessity of meeting and favorably impressing people develops men in a manner that years of other lines of business would not do. Life insurance agents are not confined in

offices, but can be much in the open. If the agents are real salesmen they can make large sums of money and if they have managerial ability they can aspire and reach the management. The income of the manager of a moderate sized agency is not large, but some of the managers of very large agencies receive and fully earn incomes of \$25,000, \$50,000, and in a few instances \$100,000 or more yearly.

F. T. STANFORD, TORONTO.

Upon Mr. Stanford's Willing and Capable Shoulders will Fall the Duties of Secretary-Treasurer of the Dominion Association this Year.

But it is not only the financial rewards which make the business of life insurance so attractive to high-minded men, but the fact that it is getting to be more and more esteemed as a business conducted according to the highest code of ethics and for the good of the people.

MANY PRESENTATIONS

The cup of Mr. J. R. Reid, of Ottawa, to the association showing the largest percentage of increase in membership was won by the Ottawa Life Underwriters Association, on whose behalf it was received by Mr. W. G. Keddie, the president of that association. Mr. R. J. Stuart, Toronto, made the presentation.

Mr. W. J. Walton, of Regina, was the winner of the gold fob presented by Mr. Vipond to the member proposing the largest number of new members. Mr. George H. Allen, of Montreal, made the presentation.

Mr. J. F. Weston, Toronto, made the presentation of the cup offered by Mr. R. J. Stuart, Toronto, for the prize essay on "The Service Rendered by the Life Underwriters Association to the public and its Members." The winner was Mr. William McBride, Winnipeg.

Mr. G. E. Williams, Montreal, was the successful competitor in the prize essay competition, the subject being "A practical plan of co-operation publicity." Mr. John R. Reid, of Ottawa, handed the cup to Mr. Williams.

Mr. George H. Allen's handsome prize for the best essay on building a life insurance agency, was won by Mr. William McBride, of Winnipeg.

A FIVE MILLION POLICY.

According to The Berlin Tageblatt, the Czar is insured in an English company for nearly \$5,000,000. The insurance was taken out when he was a boy, and the annual premium of \$80,000 has been paid regularly ever since.

King Victor Emmanuel III. of Italy is insured for \$2,500,000, while the late King Humbert carried double that amount.

The late King Edward was insured for \$4,500,000 during the last two years of his life.

MODERN ADAPTATIONS OF LIFE INSURANCE

New Forms Are a Necessity—Group Policies—Will Canada Follow Example of the United States?

The part that life assurance has taken in recent years in business affairs has given rise to a large field of endeavor in corporation and partnership insurance, said Mr.

E. W. OWEN, CALGARY.

Who took charge of the discussion on "Probable Innovations in Life Insurance Policies." Through the vigorous campaigning of Mr. Owen and his colleagues, the Dominion Association will probably hold their convention in Calgary in 1914.

E. W. Owen, of Calgary, who was in charge of five-minute discussion on "How best to increase our business by adopting new forms." Life insurance in this manner has been broadened out to perform certain functions undreamed of a decade ago. Corporations have found in it a safe and expedient means to set aside a sinking fund to take care of the maturity of bond issues.

They have also found it necessary to protect themselves against the loss of individuals who occupy executive positions in the corporation—in other words, they insure against loss of brain power. You can readily understand that a definite property value is placed upon the ability of the president or managing director of a corporation, and it is probable that death might come at a time when his brain power is considered its most valuable asset, and hence it is important that he be insured so that the corporation may be immune from financial loss which would probably occur on account of the loss of his ability at such a critical period.

Another advantage of business insurance is that it can be used to acquire the interest of a deceased member of a corporation.

A firm in Vancouver in which there are four principals, each having an equal amount of stock, are individually insured up to the value of their interest in the business, the firm paying the premium, so that in the event of the death of any member the insurance is paid to his heirs and the stock remains with the company.

A rather unique idea for the use of an insurance policy was that of a man who had secured a divorce from his wife and had consented to pay alimony of a certain amount. He said: I know that I can fulfil the conditions imposed upon me by court while I am alive, but if I should die I want to be sure that my divorced wife has sufficient income to provide for my little daughter, and this is the only way I can provide the funds for that purpose.

As to Income Insurance.

Another variation from the usual forms of life insurance that has become popular in the last decade is income insurance.

An earlier form of instalment insurance was the reversionary or survivorship annuity providing that if the insured die before the beneficiary, a life annuity immediately becomes payable during the subsequent life of the beneficiary. If, however, the beneficiary die first the insurance is at an end, and all premiums paid are fully earned.

This form has always been favored by the experts on life insurance, but never by the public, because of the uncertainty whether the beneficiary will survive to realize much, and also because of the possibility that nothing at all would be realized by reason of the beneficiary dying before the insured.

It was disclosed, however, that when the late Mr. Sheperd Homans left the Mutual Life of New York, the only insurance he carried was a large policy of this character, and at the present time Actuary Emory McClintock shows his preference for this form of protection in a like manner.

There are, however, two other forms of income insurance, viz., ordinary instalment and continuous instalment. Of the two, continuous instalment is the most practical, it provides an annuity for the beneficiary for life and a promise to pay for twenty years whether the beneficiary lives or not, but the plan which is called ordinary instalment will provide for twenty annual instalments, and the beneficiary may outlive the instalment period and be left without income in old age when it is most needed.

Development of Group Policies.

One of the newest phases of the life insurance business is group life insurance. This is being developed by one of the big American companies. The idea is to permit the insurance of a larger number of lives that preserve the averages required for in selected life insurance under one general policy or blanket contract.

As far as known no Canadian Company is adopting this form, but it is reasonable to hope that Canada will not be far behind our American friends, and some enterprising agent may go out and insure the whole Montreal police force or the staff of one of the large manufacturing plants.

We can increase our business four-fold if we will step aside from the beaten track and adopt new forms. Life insurance men cannot afford to be behind the times, and we are now in the beginning of a new era in life insurance salesmanship.

How Life Insurance has Evolved.

Mr. W. S. Armstrong, Calgary, thought that the principle of evolution is as noticeable in the life insurance business as in any other profession. Consequently the agent had a very large part to do with the different relations occasioned by this constant change.

"Corporation or partnership insurance," he reminded his audience, "is not by any means a new feature to the life insurance business, but is a feature that has not been held before field men in their every-day canvass as prominently as other plans of insurance, therefore not so familiar. There is a great future to this class of business, and already a perceptible demand for it, which, if courted by producers, will mean a marked increase in their income, to say nothing of a solid and desirable list of policyholders."

W. LYLE REID, OTTAWA.

Who contributed to the discussion on Modern Adaptations of Life Insurance Policies.

"Men who are reached by a proposition of this class are, as a rule, the business men of our cities and towns, who form the nucleus of society and the stability of trade relations, so that by giving partnership or corporation insurance a little more attention, a dual benefit will be done the agent, i.e., an increase in his income, and a clientele built up, the influence of which will assist him greatly in furthering his business, while life insurance companies will be the richer by having a calibre of policyholders who, by virtue of their positions, form the cream of the country."

Mr. C. K. Ives stated that when he first entered upon insurance work a few years ago, there was a phrase very frequently encountered in salesmanship literature, viz., selling points, and the strength of his canvass was cunningly devised arguments and figures to demonstrate that his own goods were the best on the market. "But, with increased experience," said Mr. Ives, "the great truth of the essential beneficence and pressing universal need of life insurance gradually forced itself into my consciousness and I was converted from salesman to missionary, and my whole energy is now directed towards convincing a man to the need of life insurance or more life insurance and that he wants it now. When this truth is brought home to a man he is not going to delay action in order to find out if some other company may not have a superior policy, contract, etc., etc.

"Knowledge of our goods is essential (including partnership insurance and guaranteed income policies) and should be the necessary equipment of every man before he takes the field as an agent. But after a certain point, which should be reached early in an agent's career, increased efficiency can be gained by directing our attention to the problem of developing our own dynamic or magnetic personal force rather than increasing our knowledge, although the latter should not be wholly neglected."

County and City Territories.

"Will new forms increase an agency's business?" asked Mr. J. Lyle Reid, of Ottawa. "Yes, if the field that is being canvassed affords scope for them. In our larger centres you can present them with reasonable hope of success, because in these centres are found the necessary conditions.

ARTHUR B. WOOD, MONTREAL.

Well-known Actuary who welcomed the Life Insurance men to Montreal and delivered an instructive address.

What are some of these conditions? (a) A realization of the fact that the brain power of the active head of a big business enterprise constitutes its most important asset; (b) the possible disturbance of a firm's financial arrangements by the withdrawal of a deceased partner's interest; (c) the bank credit required at times in order to open the way for contemplated industrial expansion. These emergencies can be provided for at the cheapest possible cost through the medium of life assurance.

"No, if the territory you are covering is, to a great extent, a rural one. Under such circumstances the largest possible return is to be obtained by adhering, in the main, to those time-tested contracts regarding which there is no room for misunderstanding in the mind of the man who has not acquired the faculty of analyzing new terms and phrases on the spur of the moment. We make a mistake if we assume that there is no place for these new ideas outside of the big centres. During the present week our agency has received four joint endowment applications on the lives of married couples. This is the country agent's partnership field.

"As regards income insurance, it must be looked upon, especially when written on the life plan, as giving the maximum of protection for the minimum of cost, besides guard-

ing against the possibility of loss, through poor judgment on the part of the assured's heirs, by making the company the executor of this portion of his estate. Therefore, in so far as it is concerned, the field is the world.

"The best way of obtaining desired increase in business involves three things: (a) An intelligent survey of one's field. The directory, the telephone book, the trade paper,

HON. J. A. DE BOER.

President of the National Life Insurance Company, of Montpelier Vermont. Mr. De Boer delivered one of the most attractive addresses at the Canadian

Life Underwriters' Convention.

the census returns and the reports of public institutions are valuable aids in this connection. Such data gives an agent his bearings. (b) After that, a fertile imagination. (c) And, finally, disciplined concentration."

W. C. JOHNSON,

Vice-President of the Columbian National Insurance Company, of Boston. Mr. Johnson's interesting address to the Underwriters is reported on page 370 of this issue.

The Bank of England rate was raised on Thursday from 3 to 4 per cent.

There have been listed on the London Stock Exchange City of Calgary £500,000 four and halves.

BRITISH COLUMBIA

FIRE PREVENTION BOARDS

Canadian Northern Railway and Vancouver—Development of Cheakmus River Power—British Columbia Electric Railway

Nova Scotia Municipalities Want Provincial Government to Act—Standardization of Hose and Couplings

(Staff correspondence.)

Vancouver, August 26th.

New rules promulgated by the government of British Columbia will mean that the British Columbia Electric Railway Company will have to invest considerable money in new cars before the first of 1911. The principal regulation is in regard to overcrowding. In Vancouver, particularly, all cars are filled not only in rush hours but also in the early morning. With the new law in force, not only will the company be liable if this continues, but also those who crowd the car after it has its maximum number of passengers according to law. To carry the passengers offering, the number of cars will have to be almost double what it is now. If passengers are not taken care of, there is a provision in the agreement with the city to be invoked.

After a fight of several months' duration, it looks as if Point Grey will come to the British Columbia Electric. The by-law passed by the ratepayers last January was quashed, and since then no cars have been running in Point Grey. There has been complaint from many ratepayers. Now it is proposed to re-submit the by-law to the ratepayers with the necessary alterations, and on September 7th, the voting will take place. With no cars running, building has not been so active in Point Grey as was anticipated early in the year, though the sections reached by the city cars have gone rapidly ahead.

Canadian Northern Railway's Plans.

The Canadian Northern and the city of Vancouver are still negotiating about a location on False Creek, and it is probable that an agreement will be reached, for the railway wants to get a site for terminals and the city wants the railway. The railway is willing to recoup the city for the \$600,000 necessary to extinguish certain riparian rights, the borrowing of which money was approved by the ratepayers two weeks ago. In addition, it proposes certain improvements. On the other hand, some of the aldermen favor a rental basis, suggesting \$120,000 per annum, this being reached by a valuation of \$20,000 an acre.

After a long rest, the canal project between the head of Burrard Inlet and Pitt River has been revived. This would give the world-famed Coquitlam a sort of direct water connection with the sea.

Want to Develop Power.

Messrs. Bloedel, Stewart and Welch, Limited, are applying for permission to develop a valuable water-power on the Cheakmus River, which empties into Howe Sound. The enterprise will be one of the largest of its kind in the province and if carried out will mean the expenditure of several million dollars. Messrs. Stewart and Welch are well known in Canada, being railway contractors, and the proposed power is located close to the route of the Pacific Great Eastern Railway, which will extend from Howe Sound to the north. Sufficient electrical energy may be generated to operate a large section of the railway and also for lighting and power purposes all through the district at the head of Howe Sound.

Notice is being sent out by the Manufacturers' Products List Company, Montreal, announcing their revised edition of the Industrial Blue Book Buyers' Guide, to come out in December. This will be the Canadian edition, published in Montreal for eighteen years, the edition being international. The publishers have a few copies of this international edition, which they are offering, delivery charges prepaid, for two dollars. It is one of the best buyers' guides published in Canada.

Since the report is renewed that the Alberta Pacific Railway will pass through the "foothills" of Calgary on its way from the international boundary north to the Peace River country, the Calgary land office has recorded many claims on coal and copper locations west of the city. Coal lands may be leased at the rate of \$1 per acre per year for twenty-one years, with five cents per ton royalty on all coal mined. The largest area to any one person or company cannot exceed 2,500 acres, and the mine must also supply coal to bonafide settlers for \$1.75 per ton at the pit-head. Gold, silver, lead and zinc may be staked in 1,600 feet square blocks for \$5 each. On each claim \$100 must be spent yearly for five years. Then the claim may be purchased for \$5 per acre and 2½ per cent. royalty on the output. The regulations governing iron and copper are similar, except that 160 acres may be located.

At the recent convention of the Union of Nova Scotia Municipalities, Mr. Franklin H. Wentworth, of Boston, secretary of the National Fire Protective Association, addressed the convention on "Fire Fighting and Fire Protection." Mr. Wentworth contrasted the fire loss of America with that of Europe, the latter being about 33 cents per capita, while the former reaches three dollars per capita. In what the speaker termed "created resources" the loss in the United States annually reaches fifty million dollars, while in Canada and the United States the loss in natural resources from fire during the past ten years is computed at 250 million dollars. The economic waste caused by forest fires is being gradually recognized, and greater efforts are being made towards its prevention.

The National Fire Association of Boston was formed twenty-five years ago on account of the disastrous fires which so frequently took place in many of the New England towns. In textile and manufacturing establishments the risk was so great that no insurance company would insure. The prevention of conditions causing fire became the work of the association, and was achieved by the segregation of machinery and material causing fire, the division of floor areas so as to prevent fire spreading, and horizontal division of buildings to prevent the spread of fire from top to bottom, and the use of extinguishers in buildings were among the principal means to prevent or lessen the danger of fires.

Due to Gross Carelessness.

The speaker referred to the gross carelessness of individuals in ignoring elementary precautions against fire. Loss by fire means an indirect tax on each and every individual of the state. The insurance companies are the collectors and distributors of the tax. There should be created a sense of individual responsibility, and it is necessary to carry on a campaign of education showing the great economic loss entailed by fire, and that care greatly lessens the danger.

Mr. Wentworth also spoke at some length on the necessity of standardizing hose and couplings, which would result in a great saving and permit of co-operation by fire departments of neighboring towns and cities.

Fire Prevention Boards Wanted.

Among others, the following resolutions were passed by the convention: "Resolved, that the executive be requested to prepare and submit to the Government of Nova Scotia at the next session of the Legislature such draft legislation as it may be desirable for the establishment in each town, city and municipality in the Province of a fire prevention board, fully empowered to make and enforce its regulations."

"Resolved, that this convention desires most urgently to impress upon the municipalities of Nova Scotia the vital importance and ultimately using only standard hose coupling and hydrant fittings in connection with their fire departments, and as a preliminary step the use of standard couplings adaptors."

The following executive was appointed for the coming year: President, A. D. Gunn, mayor of Sydney; vice-president, F. W. W. Doane, Halifax; secretary-treasurer, Arthur Roberts. Executive committee—R. V. Harris, Halifax; Mayor Stewart, Truro; Mayor Kinlay, Lunenburg; H. L. Dennison, Digby; W. K. Dimock, Windsor; J. W. McKay, Pictou; D. J. McLeod, Amherst; Parker Archibald, Halifax; A. S. McMillan, warden, Antigonish.

The Plymouth Cordage Company shipped 600,000 pounds of binder twine on a through train last week, to run on practically a passenger schedule, from North Plymouth, U.S.A., to Winnipeg.

Lord Strathcona, interviewed on the question of the Panama Canal, deprecated too much public discussion pending further developments. "If, as was intended by the treaty, every nation had free and unrestricted use of the Canal, it would be of great benefit to every country. Trade with the west coast would be facilitated, and it would cheapen the transport of passengers and of light goods, which form so large a proportion of the traffic of the railways. If these discriminating provisions, however, in favor of the United States should come into operation, they would seriously hamper other nations which carry so much of the overseas trade. We look upon it as an absolute wrong, especially to Great Britain, that this interpretation should have been put upon the treaty. The Foreign Office will doubtless put the matter before the American people in its proper light, and we have the assurance that a very large body of American opinion is not satisfied that it should be left as it now stands."

General Accident Assurance Co.,
Continental Life Building,
Toronto.

Dear Sirs:

- Re Claim Policy 7485 R. A. Smith deceased -

We beg to acknowledge with thanks the receipt of your letter with cheque for \$10,000, in settlement of the above claim.

Mrs. Smith desires us to thank you for the prompt payment immediately upon the completion of the claim papers.

Yours truly,

AYLESWORTH, WRIGHT, MOSS & THOMPSON

The above letter refers to claim of Robt. A. Smith, of the firm of Osler & Hammond, Financial Brokers, Toronto, who was killed in an Automobile accident on July 17, 1912.

The claim papers (consisting of certificate of Dr. M. M. Crawford and declaration of the beneficiary) were received on the morning of August 21st and cheque mailed before noon of the same day.

Had Mr. Smith been insured under our new form—"Ideal" or "Premier" policy—the claim would have been for \$28,000, and as promptly met.

Get particulars of Policies from our Representatives.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Watrous, Sask.—Until September 9th for \$83,000 40-year 5½ per cent. debentures. J. Gaye, secretary-treasurer.

Dominion, N.S.—Until September 15th for \$20,000 5 per cent. 30-year water debentures. J. S. Liscombe, town clerk and treasurer.

Dauphin, Man.—By-laws to borrow \$75,000 for sewerage purposes and \$25,000 for general expenses are to be voted on shortly.

Coldstream S.D., No. 435, Man.—Until September 1st for \$1,500 6 per cent. 10-year debentures. D. McCurdy, secretary-treasurer, Franklin.

Wrenford Rural Municipality, No. 379, Sask.—\$3,000 will be borrowed for permanent improvements. E. R. Dunnett, secretary-treasurer, Coblenz.

Consolidated S.D. of Snowflake, No. 1111, Man.—On September 7th a by-law will be voted on to raise \$3,000. W. Cranston, clerk, Clearwater.

Francis Rural Municipality, No. 127, Sask.—The municipality will borrow \$12,000 for permanent improvements. C. Wells, secretary-treasurer, Francis.

Wellington Rural Municipality, No. 97, Sask.—The municipality will borrow \$5,000 for permanent improvements. C. Bierma, secretary-treasurer, McTaggart.

Coleman, Alta.—Three by-laws providing for \$1,200 for fire appliances, \$800 for cemetery fence, and \$1,500 for sidewalks, respectively, have been passed.

Berlin, Ont.—The following debenture by-laws will be voted on:—\$15,000 for sanatorium; \$5,000 for public slaughterhouse; and \$17,000 for new street cars.

Northumberland County, N.B.—Until September 9th for \$35,000 20-year 5 per cent. bonds. E. P. Williston, secretary-treasurer Northumberland County, Newcastle, N.B.

Imperial, Sask.—Until September 15 for \$15,000 6 per cent. 15-year waterworks debentures. J. G. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

Melita, Man.—Until September 10th for \$6,000 5 per cent. 20-year debentures for school purposes. R. Love, secretary-treasurer. (Official advertisement appears on another page.)

Springfield Rural Municipality, No. 4, Man.—A by-law will be voted on September 9th to issue \$3,000 20-year debentures. C. Christopherson, secretary-treasurer, Oakbank.

Antelope Park Rural Municipality No. 322, Sask.—Until September 14th for \$6,000 5½ per cent. 20-year road improvement debentures. O. F. Sale, secretary-treasurer, Dewar Lake.

North Vancouver.—The council may submit to the ratepayers a by-law to borrow \$50,000, to be applied to the purchase of stock in the Burrard Inlet Bridge and Tunnel Company.

Stonehenge Rural Municipality, No. 73, Sask.—The municipality has authority to borrow \$12,000 for permanent improvements. E. A. Craddock, secretary-treasurer, Stonehenge.

Prince Albert, Sask.—Until September 14th for \$100,000 5 per cent 30-year school debentures. C. O. Davidson, secretary-treasurer. (Official advertisement appears on another page.)

Olds S.D., No. 235, Alta.—Tenders are called for \$30,000 5 per cent. 30-year school debentures. J. F. Grant, secretary-treasurer, Olds, Alta. (Official advertisement appears on another page.)

Stornaway Station, Sask.—Until September 10th for \$4,000 20-year 6 per cent. school debentures. F. Thomson, secretary-treasurer. (Official advertisement appears on another page.)

Lennox S. D., No. 317, Man.—A by-law will be voted on to borrow \$4,500 at 6 per cent interest. D. Livingston, secretary-treasurer, Winchester Rural Municipality, Deloraine, Man.

Bassano, Alta.—Up to September 16th for \$150,000 5 per cent. 30-year water and sewer debentures. Geo. B. R. Bond, secretary-treasurer, Bassano. (Official advertisement appears on another page.)

St. Andrews Rural Municipality, Man.—On September 3rd the ratepayers will vote on by-laws to issue \$50,000 and \$18,000 debentures, for road improvements. J. D. Forster, secretary-treasurer, Clandebove.

Kamloops, B.C.—The following money by-laws will be introduced for recommendation by the city council:—\$250,000 for hydro-electric power plant; \$90,000 for waterworks extensions; and \$65,000 electric light extensions.

Duncan, B.C.—Four money loan by-laws will come before the voters August 28. They are electric light and power by-law, \$65,000; waterworks by-law, \$25,000; school by-law, \$15,000; and street improvement by-law, \$10,000.

Welland, Ont.—Until September 9th for \$75,000 waterworks, 30-year debentures, and \$29,598.63 sewers and walks 10-year debentures; interest 4½ per cent. J. H. Burgar, town treasurer. (Official advertisement appears on another page.)

Montreal, Que.—Up to September 12th for \$500,000 4 per cent. 30-year bonds of Montreal city Protestant board of school commissioners. C. J. Binmore, secretary-treasurer, Montreal. (Official advertisement appears on another page.)

Tilbury, Ont.—The by-law to grant a loan to the Imperial Rubber Company to assist in establishing a factory to manufacture rubberized cloth was carried. The amount of the loan is \$5,000, which is repayable in ten years without interest.

Pembroke, Ont.—The by-law to bonus the Canadian Northern Railway to the extent of \$25,000 and grant free water and exemption from certain taxes in return for which Pembroke is to be made a divisional point with shops has been carried.

Chilliwack, B.C.—Up to September 3rd for following 5 per cent. 40-year debentures: Waterworks, \$100,000; high school, \$25,000; macadamizing, \$30,500; drainage, \$3,500; city hall, \$2,500; fire hall, \$1,000. D. E. Carleton, city clerk, Chilliwack.

Hamilton.—At the next municipal election in January the ratepayers will be asked to vote on by-laws providing for the expenditure of a quarter of a million dollars. The Parks Board have also recommended that a by-law be submitted asking for \$125,000 to purchase property along the mountain front.

Saskatchewan.—The following villages have been empowered to borrow money for permanent improvements. The particulars are given in order of village, amount and secretary-treasurer:—**Maldstone.**—\$1,000 A. C. Elliott, secretary-treasurer. **Semans.**—\$3,000, W. Stewart, secretary-treasurer. **Laird.**—\$3,200, I. I. Penner, secretary-treasurer. **Midale.**—\$5,000, J. V. Flury, secretary-treasurer. **Crayson.**—\$3,000, W. B. Thomson, secretary-treasurer. **Montmartre.**—\$3,000, A. J. Bengier, secretary-treasurer. **Churchbridge.**—\$2,500, C. Hall, secretary-treasurer. **Blenfalt.**—\$3,500, A. J. Milligan, secretary-treasurer.

Canada Branch—Offices : MONTREAL, TORONTO

GRIFFIN & WOODLAND, Managers for Canada.

PULPWOOD PRODUCTION

Average Price Has Increased—Quebec's Extensive Spruce and Balsam Fir Forests Gives the Province Premier Place

Pulpwood exported in the raw state during 1911 amounted to 847,939 cords, and fifty-four firms reporting to the forestry branch of the department of the interior used 672,288 cords, making a total cut of 1,520,227 cords valued at \$9,678,616. This is 21,401 cords less than was cut in 1910, but the quantity manufactured in Canada was larger, states Mr. H. R. MacMillan, B.S.A., M.T., in an interesting bulletin just issued. Over 95 per cent. of Canadian mills cut the pulpwood used by them from their own limits and consequently rose the wood themselves. Altogether 73,801 cords of wood (i.e., 12.3 per cent.) more were used in 1911 than in 1910. The average price of the wood also increased, so that the value of the domestic pulpwood industry was greater in 1911 by \$752,870, or 21 per cent. The average price per cord was \$6.07 in 1908; \$5.57 in 1909; \$6 in 1910; and \$6.45 in 1911. Only 22,229 tons more of pulp were produced in Canada in 1911 than in 1910.

There was a decrease of 93 pounds in the amount of pulp produced per cord of wood; it is difficult, however, to secure trustworthy data as to the output of pulp, since many firms do not give the air-dry weight.

Fifty-eight Per Cent. Produced in Quebec.

Quebec is the premier pulpwood province of Canada, because of its extensive spruce and balsam fir forests fit for pulpwood, its abundant and cheap water-power and its plentiful supply of labor. The 28 mills in Quebec reported a consumption of 58 per cent. of the total for Canada, or 47,671 cords more than in 1910. The quantity used was 13.9 per cent. more than in 1910, and the value 33.9 per cent. greater. Ontario, although suffering from the flooding of one mill, increased the amount consumed in its fourteen pulp-mills by 3,115 cords, and used nearly one third of the total production. New Brunswick is recovering from the depression of 1910, and contributed 45,824 cords, or 6.8 per cent. of the total. In 1909 it used 88,450 cords, being 14.2 per cent. of the total, so the recovery is still incomplete. In Nova Scotia, where one large mill was burned early in the year, the consumption has increased by 115 cords as compared with 1910. Low water prevented the mills of New Brunswick from manufacturing at full capacity during 1911. The province of British Columbia is still experimenting in pulpwood manufacture, and the negligible amount reported from this province is manufactured for test purposes only.

Pulpwood Cheaper in Ontario.

In Ontario the price of pulpwood was less by 21 cents in 1911 than in 1910. The increase in the price of wood throughout Canada is due almost entirely to Quebec, where the price increased 97 cents per cord. Of all the provinces Nova Scotia shows the lowest average price for pulpwood, namely, \$5.00 per cord.

The increase in the quantity of pulpwood used in 1911 was practically confined to spruce—78,046 cords more of this species being used than in 1910. Poplar increased by 578 cords, regaining third place among pulp woods, while hemlock and balsam fir decreased, the former by 2,140 cords, the latter by 3,075 cords. Most of these changes took place in the province of Quebec, which used 52,446 cords more of spruce, 3,718 cords less of balsam fir, 2,096 cords less of hemlock, and 641 cords more of poplar. New Brunswick also showed a large increase in the spruce used.

Proportion of Balsam Fir Used.

Although the reports furnished from the mills do not indicate it, the proportion of balsam fir used is yearly increasing. Balsam fir and spruce are used in mixture in the manufacture of news print. A few years ago it was thought that if the proportion of fir was increased above twenty-five per cent. an inferior paper would result. Greater skill in papermaking has shown that the proportion of fir may be increased to forty per cent. or over. This is now being done by some mills and the resulting paper has proved satisfactory. In various parts of Eastern Canada, particularly in Quebec, balsam fir forms from twenty to fifty per cent. of the forest. The practice of the companies now operating is to take spruce and balsam as they occur in the forest. On account of the prejudice still existing against balsam fir, it has not been expedient for the mills to keep track of or report the exact proportion of balsam fir used. Hemlock, which was third in 1910, has retired to fourth place in 1911. Although it has fallen off nearly 60 per cent. since 1910 more than twice as much of it was used as in 1909. There is reason to suppose that a larger export of hemlock took place. While more poplar manufactured in 1911 than in 1910,

it is still below the amount for 1909. Jack pine has not been reported as a pulp wood since 1908. Before that time it was used considerably by two large mills, but has proved unsatisfactory. Arrangements are now being made by mills in Ontario and Quebec for a further use of jack pine.

Items Which Add to Cost.

The average price of the different species used is the cost to the mill-owner, and so includes varying logging expenses and a wide difference in transportation charges. Maximum and minimum prices for a species in a single province may differ by 100 per cent. The great majority of pulp-mill owners have their own timber limits, and to them the cost of their pulp logs is merely the cost of carrying the limit and the operating charges. Other operators buy in the open market and add transportation charges. Thus the prices quoted are the purchase prices under different conditions, and do not show the relative value of the different woods for pulp manufacture.

The effect of an excessive hauling distance is demonstrated in Ontario, where the prices of spruce and balsam fir were \$6.75 and \$7.46 respectively. The high price paid for balsam fir and the sustained demand for this species proves its suitability for manufacture into pulpwood. Over the whole of Canada spruce was the most expensive species at \$6.47 or 42 cents more than in 1910. Balsam fir is at \$6.40, having risen 60 cents since 1910. Hemlock, though still the cheapest species, advanced 75 cents per cord, its average price in 1911 being \$5.18. Poplar has advanced 25 cents over 1910, the price last year being \$6.17. The cheapest pulpwood bought was a small quantity of poplar in Nova Scotia, which cost \$3 per cord. A small quantity of hemlock in British Columbia at \$7.60 was the most expensive wood, on the average, used in Canada for pulping; but as much as \$10 per cord was paid for spruce in some cases.

Should Practice Economy and Utilize Waste.

During 1911, no slabs or saw-mill waste were reported as being converted into wood-pulp in Canada, but from the reports made to the forestry branch by saw-mill operators it would appear that a very small quantity of mill waste is so utilized by three companies operating saw-mills and pulp mills under the same ownership. This is an economy practised to a greater extent in other countries, and by neglecting it Canada is losing greatly. It has been conservatively estimated that if all useful logs left in the bush by lumbermen, large-sized branches, slabs and other mill waste from the lumber industry in Canada, had been converted into pulpwood in 1911, the annual output of pulpwood would have been increased and not a single acre need have been cut over for logs to make wood-pulp only. During 1910, in the United States, six and a half per cent. of the total consumption was from slabs and mill waste. If economy had been practised to the same extent in Canada during the year 1911, as much pulp might have been produced, without cutting one additional pulp log, as is manufactured from over 43,000 cords of wood. This is almost as much pulp as New Brunswick produced in 1911. The sooner such practical economy and utilization of waste commences, the longer will Canada have an adequate supply of pulpwood.

CALGARY FOSTERS ECONOMY

A succession of defeats has met three money by-laws at Calgary to the extent of \$587,000, which were rejected by the property owners. Each of these apparently had a good fighting chance to be passed, for little criticism was turned upon them, yet the ratepayers seem determined upon a course of economy, and though the vote was small comparatively it was very much larger than any similar vote taken this year. The city hospital wanted \$150,000 for a new wing to relieve the pressure and accommodate the continually increasing demand; a small parcel of land for corporation storage purposes could be purchased for \$32,000; and the filtration plant together with the waterworks extension required \$405,000. But none of these would the ratepayers have.

The National Concrete Manufacturing Company has been reorganized with increased capital stock, and will henceforth be known by the above name, with the word "Limited" added. The incorporators are Howard Victor, dentist; Wm. McIlroy Flavell, gentleman; Albert Edward Maybee, electrician; John Carew, lumberman, and Thomas Hubert Stinson, barrister-at-law, all of Lindsay. The reorganized firm will carry on the same line of business as at present, the manufacture of cement, drain tile, roofing tile, concrete sewer pipes, building blocks, chimney blocks, window sills, and all lines of cement and concrete articles. The capital stock is \$75,000, divided into shares of \$100 each, the headquarters are at Lindsay, and the provisional directors are Messrs. Pogue, Maybee and Carew, above mentioned.

The ANGLO-CANADIAN Mortgage Investment Corporation Limited

MOOSE JAW, Sask.

Incorporated under the Companies Act of Saskatchewan.

Authorized Capital - \$500,000.00

In 10,000 shares of \$50.00—of which 8,000 are now offered for subscription at a premium of 5%, payable as follows—\$7.50 upon application and \$45.00 in calls of not more than \$5.00 each and not oftener than every six months at call of the Directors.

Among other things this corporation has for its objects the purchase of agreements for sale and mortgages; to buy and sell real estate as agents for private investors; to operate and manage any property acquired by the company in the course of its business. Its primary object is, however, the investing of its funds in Canada at higher rates of interest than can be obtained by the single investor, and to provide a safe channel through which English and Eastern capital may be safely invested.

AS AN INVESTMENT

The stock of the Anglo-Canadian Mortgage Investment Corporation, Limited, ensures safety and profit. Managed by directors of high financial standing, it offers the highest possible security for all funds and business which may be entrusted to its care.

Complete prospectus, forms of application for stock, &c., may be secured from H. DAVISON PICKETT, Sec.-Treasurer

The Anglo-Canadian Mortgage Investment Corporation, Limited
MOOSE JAW, Sask.

The highest or any tender not necessarily accepted.

J. H. BURGAR,
Town Treasurer,
Welland, Ont.

SCHOOL BONDS FOR SALE.

Tenders addressed to the undersigned will be received up to nine o'clock a.m. of Thursday, September 12th, for the purchase of \$500,000 of 4 per cent. thirty-year bonds of the Protestant Board of School Commissioners of the City of Montreal.

Full particulars will be given upon application.

C. J. BINMORE,
Secretary-Treasurer,
197 Peel Street, Montreal.

The American Insurance Company and the Westchester Fire Insurance Company have been registered in Saskatchewan.

The property owners of Nelson, B.C., defeated a by-law for the purchase for \$75,000 of the plant of the Nelson Coke and Gas Company.

The Blatchford-Davies Company, Toronto, will establish a boot and shoe factory in Vancouver, according to the statement of Mr. G. A. Davies, vice-president and general manager.

The Natural Resources Securities Company is transferring its head office from Vancouver to Fort George, now that postal, telegraphic and transportation facilities have improved in that section of British Columbia.

Fire Chief Smart, of Calgary, opposed the idea of allowing skyscrapers, and wants city buildings kept down to eight stories in height. The council overruled the proposal denying children in arms admission to theatres and moving picture shows during evening performances.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. Directors and officials of the Union Bank are touring Alberta investigating conditions. President Galt expressed his agreeable surprise at the wonderful development and prosperity everywhere evident.

Remission of half the duty on cement has resulted in an increase in importations from the United States. The July importations were 935,920 hundredweights, valued at \$338,165, as compared with 95,602 hundredweights, valued at \$36,436, in July last year. This is an increase of about 900 per cent. In June the increase was about 200 per cent. The term of duty remission expires on October 31st.

Representatives of twenty-three organizations, including councils, boards of trade and transportation companies, met at Mission, B.C., and established the Fraser Valley Municipal Information Bureau. The object of the organization is mainly to divert settlement so as to develop the lands of the Fraser Valley. The following officers were elected: Mr. J. D. Taylor, M.P., honorary president; Reeve Weart, Burnaby, president; Mr. E. H. Heaps, Ruskin, first vice-president; Reeve Dick, Mission, second vice-president; Mr. T. B. Brown, Huntingdon, third vice-president.

Great Northwest Investments, Limited, aim to be classed as the most conservative advisers to investors in western real estate, and to make absolutely no statements which are not based strictly upon ascertained facts. This Company's Service Department is prepared to act, without charge, in any advisory capacity to investors in western property.

Our booklet on "Real Estate Investments in the Canadian West" is sent free on request.

BIG PARTY OF BRITISH FINANCIERS IN CANADA

There left Montreal this week a party of prominent British financiers and business men for a trip to Ottawa, to the Algoma Steel Company's plant at Sault Ste. Marie, and also to Alberta. Most of the visitors are financially interested in the well-known steel corporation and in the Southern Alberta Land Company. The following are members of the party:—

Right Honorable Earl Stanhope, late captain Grenadier Guards, member of the London county council and associated with many imperial institutions; Earl Winterton, M.P., director of the Royal Exchange, member for West Horsham; Sir William Garstin, G.C.M.G., British government director of Suez Canal, inspector-general of irrigation in Egypt, late under-secretary of state for public works; Sir Charles Hunter, Bart., M.P., late Rifle Brigade, M.P. for Bath; Honorable Sir Arthur Lawley, governor of Madras 1906-1912, formerly private secretary to the late Duke of Westminster, administrator of Matabele Land, lieutenant-governor of the Transvaal, and governor of Western Australia.

General Sir Ronald Lane, equerry to H.R.H. the Duke of Connaught, at one time commander of garrison at Malta, Alexandria, military secretary of the war office, lieutenant-governor of Chelsea Royal hospital, chairman of the Southern Alberta Land Company, and associated with other important Canadian companies; Honorable Jasper Ridley, brother of Lord Ridley, the large Northumberland land owner, the chairman of Tariff Reform league; J. W. Hills, M.P., member for Durham city since 1906; S. Hill Wood, M.P., deputy lieutenant for Derbyshire and M.P. for High Peak division; Charles Buchanan, senior partner in largest stock-broking firm in Scotland; A. Buckley, partner of Mr.

Illingworth; Leon Clerc, leading French financier; J. S. Crone, large provincial stock broker.

S. Catlow, vice-chairman of the Bank of Liverpool; H. Hamilton Fyfe, special correspondent of the Daily Mail; A. M. Grenfell, chairman of The Canadian Agency, director of British Bank of Northern Commerce, director of Chaplin Milne Grenfell and Company; R. N. Grenfell, director of the Canadian Agency, Limited; C. Goschen, member of the well-known banking family, partner in Cohen, Laming and Goschen; W. Illingworth, leading stock broker in Manchester, and a director of Southern Alberta Land Company; L. Jones, barrister; G. Marsden, large shareholder in Canadian enterprises; F. B. Newett, leading stock broker in Belfast, Ireland; G. Parker, large shareholder in Canadian enterprises.

G. Rhodes, K.C., well-known barrister and King's counsel; H. Smalley, large cotton manufacturer; Major Malcolm Murray, C.B., C.V.O., comptroller of the household to H.R. H. the Duke of Connaught and equerry to H.R.H. the Duke of Connaught; A. M. Sing, leading Liverpool broker; J. Sturgis, member of the well-known firm of Kitchen and Company; J. Tuke, London manager of British Linen Bank; H. Vivian, chairman of Co-partnership Tennants, Limited, ex-M.P. for Birkenhead; J. M. Watkins, editorial staff of the Statist, financial weekly paper; Major W. Walker, large shareholder in Canadian enterprises; and W. E. Wimpenny, prominent North country stock broker.

Mr. Watkins, of the editorial staff of the London Statist, says there is not such a glut of Canadian securities on the London market as is generally supposed, and that good propositions are readily taken up. Mr. Watkins is out here to study industrial conditions and investments for British capitalists.

MUNICIPAL BONDS

Civic Authorities Are Feeling the Pinch of the London Money Market—Prince Rupert By-laws Quashed

Three by-laws which were passed by the voters of Prince Rupert several months ago for the raising of money by debenture issues for the improvement of the electric light and telephone services and for the cost of the new city hall, have been quashed by Mr. Justice Murphy in Supreme Court Chambers. Altogether a total sum of \$121,000 is involved in the quashing of the by-laws. The Bank of Montreal, which had been making advances to the previous councils against a forthcoming debenture issue, refused to make any more loans for new works. The council then brought forward the three money by-laws to raise \$66,000 for electric light purposes, \$20,000 for telephone extensions, and \$35,000 to pay for the new hall which has recently been erected.

The by-laws were passed but numerous technical objections were taken.

West Vancouver and Montreal.

Owing to the difficulties of the fiscal agents of West Vancouver in disposing of its municipal debentures, the council have decided that the board of works and the engineer should let no more contracts till the money is forthcoming.

The temporary loan of £750,000 netted Montreal, after commissions, stamp duties, and six months' interest was paid, \$3,565,893.57. The commissions, interests, and stamps totalled £18,326 3s. 4d., or about \$90,000, states Mr. C. Arnoldi, city treasurer, in a report to the board of control.

In reference to the required funds for sewer construction at Victoria, city engineer Rust believed it would pay the city to borrow the money at a high rate of interest rather than cease work on the sewer.

For the \$5,000 7 per cent. 10-year sidewalks debentures of Bredenbury, Sask., three bids were received. The offer of the Great West Life Assurance Company, Winnipeg, was accepted.

Finances of Calgary.

Work done under various Calgary by-laws has cost about \$1,144,372. To pay for necessary work that can be completed this year, a further sum of \$2,000,000 will likely be required. Calgary bonds are selling below par and for that reason, and in view of the city's financial position, the following recommendations have been made:—

"1. That the council pass no more preliminary local improvement by-laws this year under which work must be done in 1912.

"2. That no more contracts for local improvement work than are at present in existence be entered into this year.

"3. That all contracts already entered into for local improvement work be carried out.

"4. That, if insufficient money cannot be borrowed from the Bank of Montreal to complete these contracts and finish the work necessary to be done under local improvement by-laws this year, namely, the sum of \$2,000,000, that arrangements be made forthwith with the contractors to assist them to finance with their own banks on the city estimate until such time that the 1912 work can be sold.

Dispose of Calgary By-Laws.

"5. That the necessary steps to be taken forthwith to dispose of the remainder of the general by-laws.

"It is the duty of the finance committee and the council to get there and get this money for the treasurer on these by-laws, either by selling the bonds or borrowing on them.

"Immediately I am notified that money cannot be had either by borrowing or selling, I will stop all work at once on all these general by-laws. I would advise, however, that a try at least should first be made to realize on them, as they are all recent by-laws, and not much work as yet has been done under them. I consider all our general by-laws to be in excellent shape; far better than in any previous years. The treasurer's embarrassment has not been caused by the general by-laws.

"I have not the power to stop work under by-laws where bonds have been sold. This would have to be done by the commissioners and council, and if they did stop the work they could not use the money for any purpose other than that mentioned in the by-law."

South Vancouver's Position.

In reply to an inquiry of the South Vancouver council concerning the sale of debentures for the municipal loan a cable was read from the fiscal agents, Messrs. Wood, Gundy and Company, of Toronto, at a meeting of the board of works, stating that owing to the congested state of the market the sales have been slow, but were being effected as speedily as possible. Municipal Clerk Springford stated that there is still \$110,000 in the bank, but that \$200,000 is wanted for the present needs of the municipality. Up to the present \$1,000,000 worth of debentures have been sold, but there remains about \$500,000 worth more to be sold.

Property exemption in Montreal will amount to \$141,000,000 this year. The increase in the exemptions for the current year will be over \$20,000,000. The figures which follow show how largely the exemptions have increased during the past five years: 1906, \$53,904,490; 1907, \$55,914,313; 1908, \$64,387,513; 1909, \$68,445,182; 1910, \$109,192,490; 1911, \$120,119,417; estimated, 1912, \$141,000,000.

OUR CANAL TRAFFIC

In discussing freight traffic through the canals of Canada in 1911, a Wall Street contemporary, usually accurate in its figures and conclusions, has misunderstood the information published in that connection by the Department of Railways and Canals at Ottawa. The official figures do not warrant our contemporary's statement "that for every ton of capacity there were carried something over two tons of freight." It will be interesting to glance at the figures themselves before analyzing that remark. Here is a comparative statement of traffic of all the canals in Canada for the years 1910 and 1911:—

The registered tonnage of vessels aggregated 27,403,814 and the tons of freight 38,030,353. That would represent 1.39 tons of freight for every ton of registered capacity. As Mr. J. L. Payne, comptroller of statistics of the Dominion Department of Railways and Canals, points out, the load which a vessel may safely carry is often two and three times her registered tonnage, and it is not an unusual thing to have ships report cargoes in even greater proportion. On the contrary, the actual weight of cargo is always much in excess of the registered tonnage when a vessel is loaded to her full capacity. It would not, therefore, have been at all out of the way if Canada's canal statistics for 1911 had shown that for every ton of so-called capacity—meaning registered tonnage—over two tons of freight had been carried, but, as a matter of fact, the proportion of freight in 1911 was not quite 39 per cent. in excess of the registered tonnage.

The conclusion which the New York writer seems to have drawn from even his own statement of the facts was unwarranted. There was no adding together of both departures and arrivals as suggested. Take the Soo Canal as a test. The vessel tonnage for the Soo was given as having been 19,361,220, and the freight tonnage as having been 30,951,709. Those figures do not contain duplication in any degree or form. They are absolutely correct. There were 30,951,709 distinct and separate tons of freight passed through the canal, and they were carried in vessels having a registration of 19,361,220 tons—equal to slightly less than 1.6 tons of freight to each ton of registered capacity. The same situation is true of all the other canals.

The unsound conclusions drawn by our contemporary were evidently based upon a misunderstanding of the vessel tonnage reported in 1911, and the assumption that the actual carrying capacity of a vessel can be no greater than her registered tonnage.

HUDSON BAY ROUTE

Preliminary reports from the Hudson Bay survey parties on board the Government steamers which are investigating the ice and navigation conditions in Hudson Bay and the Straits this summer in connection with the proposed Hudson Bay Railway are not very encouraging as to the safety and feasibility of the route, so it is reported. The ice conditions, especially in the Straits, have been found to be unusually bad, exposing vessels to both serious danger and delay. While the desire for another outlet for Western wheat and another ocean route to Europe, is natural, *The Monetary Times* still thinks that the Hudson Bay route is entirely impracticable. Navigation would be hazardous, and for only a short period of the year. Even the St. Lawrence route, with all its recent improvements, cannot obtain sufficiently low insurance rates. What rates could be obtained, then, on the Hudson Bay route?

Would it not be better for the Dominion government to concentrate its efforts upon the development of ports and routes which have already proved their merits? Montreal, for instance, cannot cope with the enormous business going that way. The present facilities there are not equal to the business offering, despite the energy and enterprise of the Harbor Commission. Montreal has every right to be considered one of, if not the leading of our national ports. If immediate steps are not taken to keep pace with the business, it will drift to foreign channels. The fact that many large grain boats were kept waiting there so long, that the owners were compelled to take their vessels off that route, is a serious matter, and but an indication of the more serious consequences which might easily follow. Our winter ports, too, should be improved materially.

Little has been done to make Vancouver the great ocean port it should, and must be, if it is to gain materially from the opening of the Panama Canal. The claims of Vancouver and British Columbia generally in that direction, are discussed elsewhere in this issue. Mr. Monk, the Minister of Public Works, was, unfortunately, correct when he stated that we are a quarter of a century behind in our port development. This is a matter for earnest consideration. *The Monetary Times* suggests that the Hudson Bay scheme be abandoned by the Government, with a frank statement that the proposed route is too hazardous and quite impracticable.

THE BANK FIGHT AND FRENCH CAPITAL

The first annual meeting of the International Bank of Canada, held at Montreal on Tuesday, will not help the cause of French investments in this country. The heavy investments of French capitalists in the stock of the bank were understood to be only the beginning of a greater flow of money from that source. Instead of that, this week's happenings appear to be the beginning of the end of such investments from that particular quarter at least.

The meeting of the bank was held behind closed doors, and official statements do not chronicle the story of the trouble. The outcome was the retirement of the French directors. Sir Rodolphe Forget tells *The Monetary Times* that the French directors did not resign, but were not re-elected. It appears that the legality of the proxies of the French interests was questioned, and that they were precluded from voting. The opinion of a Montreal judge was said to have been read, declaring that the foreign proxies had not been regularly executed. There may be phases of this affair which have not yet been made public, but we feel that sympathy generally will be with the retiring directors. The French interests have considerable money at stake in the bank. It was not morally right, even if legally correct, to squelch their voting power on account of a technicality.

The action of Mr. J. N. Greenshields, K.C., a director who declined to allow his name to be proposed for re-election, stands out prominently, and adds considerably to Mr. Greenshields' reputation and sense of honor. That gentleman, after the meeting, said: "The majority of the shares of the bank are held in Paris, and the foreign shareholders sent their representatives to the meeting with proxies to vote these shares. There was a difference of opinion between the foreign and local interests as to how the board should be constituted.

"The proxies from the foreign shareholders were adjudged to be illegal and irregular, and the foreign interests were thus unable to record their votes, which required that the board had to be elected upon the votes of the local interests, only representing a majority of the shareholders. I, therefore, requested that my name should not be proposed for election, as I did not wish to be elected to a board of which all the members did not have the support of the majority of the shareholders."

Sir Rodolphe Forget has won this directorial fight, but his victory means also the introduction of bitterness into the camp of French capital, which has been looking favorably towards Canadian investments. There may be good reasons for the turn which events were given, but they are not yet apparent. It is a bad start for the Banque Internationale du Canada.

PANAMA AND SUEZ

The revived announcement that the Suez Canal directorate has decided to reduce the rates through that waterway, was seen by enterprising press correspondents as the beginning of a rate war, "which might involve all the maritime nations of the world, and which would revolve about the Suez and Panama Canals." As a matter of fact, the policy of the directors of the Suez Canal has been consistent in the periodical reduction of rates. In order that no misunderstanding should arise, the company has authorized the following statement: "For many years the Suez Canal Company has pursued a policy by which every time its dividends have increased the tolls have been reduced. It was in accordance with this traditional policy that the stockholders were advised at the general meeting last June that a reduction of dues would be granted. The directors of the company have in no way considered the hypothesis of measures of reprisal."

The reduction in tolls granted by the Suez Canal Company to become effective with the beginning of next year amounts to 50 centimes, 10 cents per ton.

The number of vessels that passed through the Suez Canal in the years 1909, 1910 and 1911, respectively, were 4,239, 4,533 and 4,969; their gross tonnage was 21,500,847, 23,054,901, and 25,417,853 tons, the net tonnage 15,407,527, 16,581,898, and 18,324,749 tons, and the transit receipts \$23,800,000, \$25,830,000 and \$26,680,000. The gross receipts for 1911 were the highest ever recorded. The number of British ships which passed through the Canal last year was 3,089 as compared with 2,778 in 1910 and 2,561 in the year before.

The directors of the Suez Canal recognize that the cheaper they make the tolls the more traffic they are likely to obtain. Those at present guiding the destinies of the Panama Canal have much to learn respecting such a policy.

ALLAN HAYNES, OF SPOKANE, EDMONTON AND LONDON

The Monetary Times understands that Mr. Allan Haynes, formerly of Edmonton, Alberta, and prior to that of Spokane, Washington, is now in London, England. His notepaper is headed, "Allan Haynes, Limited, Organizations, 3 Princes Street, London, E.C." These facts are of interest because Mr. Haynes, with a company of a similar title, was engaged in Edmonton not long ago in organizing a cement company. They are of interest also because Mr. Haynes, we contend, has not proved himself a successful organizer.

The Monetary Times criticized the prospectus of the Edmonton Portland Cement Company, which was presumably drafted by Mr. Haynes. It contained considerable verbiage, while much essential information was missing. A large number of prominent Edmonton citizens became interested in this company, which advertised its stock in dramatic language throughout Canada. The estimated cost of the production of cement by the company was a question discussed in correspondence by *The Monetary Times* with Mr. Haynes, who stated that he would take this matter up "at once" with his engineers and write as to the results "as soon as possible, which should be in about a week." That was in

January. The report as to results has not yet been received by *The Monetary Times*. Mr. Haynes appears now to have but little connection with the cement company—a matter for explanation by him, by the company's shareholders and the present management.

This optimistic gentleman was also the promoter of a daily paper in Spokane, Washington. On January 23rd, 1911, application for a receiver and sale of the properties of the Allan Haynes Publishing Company, publishers of the Inland Herald, was made at Spokane by a creditor of the publishing company. The total loss on this enterprise is admitted by Mr. Haynes to have been about \$250,000 to bondholders and general creditors. He informed *The Monetary Times* that he was not personally responsible for any of this, although in March, 1911, he issued a circular letter to the bondholders and creditors stating he expected to re-engage in business, and would voluntarily assume all of that large obligation.

Mr. B. F. O'Neil, who was president of the State Bank of Commerce, backed Mr. Allan Haynes' newspaper enterprise extensively, we understand. The State Bank of Commerce closed its doors on May 12th, 1911. The failure was apparently caused by loans made to a lumber company and to the bank's president. To the end of last year, the bank had paid only 25 per cent. to the depositors.

About December, 1911, O'Neil was arrested at Vancouver on a charge in connection with a bank failure, but extradition proceedings were not successful. In May last, Justice Murphy, of the Supreme Court, Vancouver, delivered a written judgment ordering O'Neil to be remanded for extradition to Idaho to stand trial on charges of signing false balance sheets of the bank, of embezzling sums of money from the bank, and accepting deposits from customers at a time when he knew the bank was insolvent.

The Monetary Times thinks these facts should be known to its readers in the United Kingdom now that Mr. Allan Haynes is doing business in London, England. We do not suggest that Mr. Haynes was in any way responsible for the bank failure, but we think it only fair to the investing public to record the fact that the president of the defunct bank financially backed Mr. Haynes' Spokane newspaper enterprise. Mr. Haynes failed to make a success of that, and he also failed to make a success of the Edmonton Portland Cement Company. Those two facts are sufficient to justify the assertion that up to date his organizing and promoting ability, from the shareholders' and the commercial points of view, has been sadly lacking.

SMALL CHANGE

The paths of forgery lead but to the jail.

* * * *

Anyway, the Panama Canal is getting a lot of free advertising.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

VIII.—BRITISH COLUMBIA'S CLAIMS FOR CANADA'S HELP

The maximum effect of the Panama Canal will probably be felt on the Pacific Coast of North America, and particularly of British North America. Professor Emory R. Johnson, who has exhaustively examined the Canal question for the United States government, thinks that the general effect of the Canal upon the people of the Pacific coast will be that of enabling them to buy cheaper and sell dearer, and to carry on a larger trade with the people of their own and foreign countries. Should this prediction be realized, the Canadian Pacific Coast and its ports will, indeed, reap great advantages as a result of the Canal. These benefits, however, will be minimized unless our port authorities prepare for the opening of the new waterway. Vancouver, Victoria, New Westminster, Prince Rupert, must make their facilities attractive to the Canal, and commerce and shipping in general. We have already noted savings in distance which will be effected by the new route.

Around Cape Horn.

At present, a considerable tonnage of freight from Eastern Canada is loaded on sailing vessels at our Atlantic ports and sent around Cape Horn to ports in British Columbia. Eastern Canadian products also are in some cases sent from our Atlantic ports on steamships running to Mexican ports on the Atlantic, where the cargoes are transhipped by rail to a Pacific port in the same country, whence the merchandise is carried by steamship up the Pacific to a British Columbia port. With the Panama Canal in operation, there will be excellent direct steamship service between our Atlantic and Pacific ports. In addition—and this should prove a development factor of the greatest value—our foreign trade through British Columbia ports will be considerably stimulated.

Exports and Traffic Charges.

It should be possible for British Columbia, Alberta and other sections of Western Canada to get low enough freight rates to make profitable the exportation of various commodities that will not now bear the traffic charges for transportation by rail. For heavy freight, such as steel rails, the opening of the Panama route will halve the haulage cost, and put Sydney into comparatively close touch with Vancouver, New Westminster, Victoria and Prince Rupert.

The advantages to be derived from the Canal by British Columbia and Western Canada generally are sufficiently defined to make it clear that Canadians on the Pacific Coast must labor continuously to make their ports the best on that coast.

Magnet of Finest Quality.

The British Columbia provincial government and the Dominion authorities will be sadly negligent of duty if they do not co-operate with the people of British Columbia in giving every assistance, financial and otherwise, in order to make our Pacific Coast a commercial magnet of the finest quality. Some observers think, for instance, that Vancouver will need within the next two years, five times the existing harbor facilities, and that estimate does not appear wide of the mark. Preparations on our Pacific Coast for the Canal opening should properly have commenced several years ago.

Sectional jealousy in Eastern Canada must not be allowed to prejudice the existing opportunities of, and the necessary assistance for, British Columbia. This is one of the few occasions when Canada can give its Pacific Coast province a national impetus towards greater expansion. The importance and the trade volume

of our Atlantic ports will not suffer from the enlargement of the Pacific ports. The development of Vancouver, Victoria, New Westminster and Prince Rupert, as Pacific ports, is simply a natural result of the rapid growth of the country.

In considering expenditures on public works, harbors, bridges, etc., on the Pacific, Eastern Canada should recognize, as Mr. H. Cuthbert, of Vancouver, has reminded us, that British Columbia embraces the whole of the Pacific seaboard of Canada, while in the east there are four seaboard provinces.

It is not fair to the west to compare the expenditure in the one province with any one province of the east. The comparison should be made with all four eastern provinces.

Must Hook the Trade.

The opening of the Panama Canal is the psychological moment for Western Canada and its Pacific outlets to throw their grappling-hooks into the trade and shipping which will patronize the new waterway. It is a time when many ports under different flags have equal opportunities. Only the far-sighted and enter-

UNLOADING STEEL AT PRINCE RUPERT FOR THE GRAND TRUNK PACIFIC RAILWAY.

Much of this was shipped from Eastern Canada on the long journey around Cape Horn. With the opening of the Panama Canal these vessels will change their route and use the new waterway.

prising will secure the traffic. Trade channels once made by rivals are difficult to deflect. Trade channels once turned into our own ports are not easy for rivals to change to their advantage. In discussing the export question in Panama Canal traffic before an United States Government committee, an expert was asked whether it would be possible, in the matter of lumber and grain shipments, for Seattle to compete with Vancouver. The expert asked to be allowed to postpone that subject, merely stating that he thought Seattle could do so. Had he known exactly what policy Vancouver and our other ports had framed to meet the Panama Canal half-way, he would probably have given a more definite answer.

(To be continued.)

THE HAY-PAUNCEFOTE TREATY

Here, in full, is the text of the much-discussed Hay-Pauncefote treaty, a "treaty between the United Kingdom and the United States of America relative to the establishment of a communication by ship canal between the Atlantic and Pacific oceans." It was signed at Washington on November 18th, 1901, and ratifications were exchanged at Washington on February 21st, 1902:—

"His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, and Emperor of

India, and the United States of America, being desirous to facilitate the construction of a ship-canal to connect the Atlantic and Pacific oceans, by whatever route may be considered expedient, and to that end to remove any objection which may arise out of the Convention of the 19th April, 1850, commonly called the Clayton-Bulwer Treaty, to the construction of such canal under the auspices of the Government of the United States, without impairing the general principle of neutralization established in Article VIII. of that Convention, have for that purpose appointed as their Plenipotentiaries:—

"His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, and Emperor of India, the Right Honorable Lord Pauncefote, G.C.B., G.C.M.G., His Majesty's Ambassador Extraordinary and Plenipotentiary to the United States; and

"The President of the United States, John Hay, Secretary of State of the United States of America;

"Who, having communicated to each other their full powers, which were found to be in due and proper form, have agreed upon the following Articles:—

Article I.

"The High Contracting Parties agree that the present Treaty shall supersede the aforementioned Convention of the 19th April, 1850.

Article II.

"It is agreed that the canal may be constructed under the auspices of the Government of the United States, either directly at its own cost, or by gift or loan of money to individuals of corporations, or through subscription to or purchase of stock or shares, and that, subject to the provisions of the present Treaty, the said Government shall have and enjoy all the rights incident to such construction, as well as the exclusive right of providing for the regulation and management of the canal.

Article III.

"The United States adopts, as the basis of the neutralization of such ship-canal, the following Rules, substantially as embodied in the Convention of Constantinople, signed the 28th October, 1888, for the free navigation of the Suez Canal, that is to say:—

"1. The canal shall be free and open to the vessels of commerce and of war of all nations observing these Rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise. Such conditions and charges of traffic shall be just and equitable.

"2. The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

"3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay in accordance with the Regulations in force, and with only such intermission as may result from the necessities of the service.

"Prizes shall be in all respects subject to the same Rules as vessels of war of the belligerents.

"4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible despatch.

"5. The provisions of this Article shall apply to waters adjacent to the canal, within three marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than twenty-four hours at any one time, except in case of distress, and in such

case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent.

"6. The plant, establishments, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof, for the purposes of this Treaty, and in time of war, as in time of peace, shall enjoy complete immunity from attack or injury by belligerents, and from acts calculated to impair their usefulness as part of the canal.

Article IV.

"It is agreed that no change of territorial sovereignty or of the international relations of the country or countries traversed by the before-mentioned canal shall affect the general principle of neutralization or the obligation of the High Contracting Parties under the present Treaty.

Article V.

"The present Treaty shall be ratified by His Britannic Majesty, and by the President of the United States, by and with the advice and consent of the Senate thereof; and the ratifications shall be exchanged at Washington or at London at the earliest possible time within six months from the date hereof.

"In faith whereof the respective Plenipotentiaries have signed this Treaty and thereunto affixed their seals.

"Done in duplicate at Washington, the 18th day of November, in the year of our Lord one thousand nine hundred and one.

[Seal.]	(Signed)	PAUNCEFOTE.
[Seal.]	(Signed)	JOHN HAY."

PANAMA CANAL EXCAVATION

The estimates of excavation remaining to be done after July 1st, 1912, in order to complete the Panama Canal, according to the Canal Record, show an increase of 16,903,000 cubic yards over the estimate of July 1st, 1911.

In the Atlantic Division, the increase is 295,000 cubic yards, chiefly to provide for silting in the finished channel not covered by the estimate of July 1st, 1911.

In the Central Division, an increase of 4,615,000 cubic yards is made to provide for an extension of slides and changes in the Obispo Division.

The Pacific Division has an increase of 11,993,000 cubic yards, of which 3,199,000 cubic yards are to cover excavation in the Canal prism, in the locks and dams, and silting in the finished channel, which has become necessary since the estimate of July 1st, 1911. The remainder—8,794,000 cubic yards—is for the newly begun excavation for the drydock, coaling station, and terminal at Balboa.

The Canadian Pacific Railway has placed an order for 1,500 freight cars with the National Car Company, of Hamilton.

Farmers around Brandon report little or no damage by frost or hail. In the lighter soils to the north-east and the south-east the harvest is well advanced and the yield splendid.

A large real estate deal was consummated a few days ago when The Simington Block, corner of Main and Baye Streets, Moose Jaw, with a frontage of 54 feet has been purchased by the Northern Crown Bank for \$110,000.

Calgary's building permits for the month of August numbered 357 aggregating a total of \$1,799,280, as against \$627,540 last year. The total for this year to date is \$11,590,866 and up to the same period in 1911 it was \$6,057,768.

The Scottish Union and National Insurance Company, has been licensed to transact throughout Canada, marine insurance, in addition to fire insurance for which it is already licensed. Messrs. Eseinhart and Evans, Montreal, are the company's chief agents in Canada.

ACCOUNTANCY IN CANADA

History of the Profession—Its Rapid Strides in the Dominion—Coming Convention of Chartered Accountants at Toronto

Accountancy as it is known to-day dates back to 1340 when the accounts of the stewards to the local authority of Genoa, Italy, were first kept by double entry—the only accepted science of bookkeeping. This system was afterwards known as the system of Venice for although, as stated, it originated in Genoa, it became earlier in general use amongst the merchants in Venice. A century and a half after, the first book published on bookkeeping was written by Lucia Paciolo, a monk of the Order of St. Francis, which was issued in Venice in 1494. This was translated from Italian to English in 1543 by Hugh Oldcastle, a teacher of arithmetic.

Accountancy flourished in Venice and Florence when they were of the leading commercial cities of the world and records show that accountants employed did not receive regular fees, but were paid a percentage on the amount of errors which they discovered. Italy was not only the birthplace of the science of accountancy, but was the home of the first association of accountants. The College of Accountants was founded in Venice in 1581. The college became very powerful and by 1669 no one was permitted to practise as an accountant in the city without being a member of this college. The standard required was a high one. The candidate had first to obtain a certificate from a magistrate as to his fitness, he then had to serve for six years in the office of a public accountant before his examination. At the examination he had to draw by lot two of the questions which had been prepared. These questions he had to answer to the satisfaction of two-thirds of the examiners. A similar college was founded at Milan in 1739 and subsequently in other Italian states.

Early English Audits.

The earliest English reference to auditing is on the records of the city of London when in 1298 auditors of the Chamberlain's accounts were appointed and records of medieval times contain constant references to auditors and audits. Shakespeare makes Hamlet say with reference to his father's abrupt and assisted departure from this world, "And how his audit stands, who knows, save Heaven?"

The first record of an investigation and report, was that made by Charles Snell, accountant of London, in 1720, under the instructions of a committee of investigation appointed by parliament to enquire into the affairs of the directors of the South Sea Bubble.

The first society of accountants in Great Britain, incorporated by Royal Charter, was the Society of Accountants in Edinburgh in 1854—the members were the first chartered accountants. The Institute of Accountants and Actuaries in Glasgow received a Royal Charter in 1855, and the Society of Accountants in Aberdeen in 1867. These societies had but a small membership and were only known and appreciated locally, and moreover were largely both stockbrokers and accountants. It was not until the Institute of Chartered Accountants in England and Wales was incorporated by Royal Charter in 1880 that the profession was generally recognized as such and made its influence felt.

This institute, the premier accountancy body in the world, has now 5,000 members, all of whom, with the exception of a few survivors of the original members, have served a five years' apprenticeship to prove their practical fitness, and passed examinations to prove their theoretical qualifications. Its members are to be found all over the world, following and guarding ubiquitous British capital. Advertising their services as accountants is forbidden and the council strike from the rolls those proved guilty of improper and unprofessional conduct. Their exceptional standard of qualifications and their high professional status have raised them to a position of universal respect and esteem in financial and commercial circles.

In the United States.

In the United States, although the American Association of Public Accountants was incorporated under the laws of the State of New York in 1887, public accountancy was very slow in making progress and receiving recognition as a profession, and for some time much of the important work was in the hands of English chartered accountants. In the last few years, twenty-five States have organized accountancy bodies, granting the degree of C.P.A.—Certified Public Accountants, a representative of each State societies or associations being a vice-president of the American Association of Public Accountants. The Journal of Accountancy is the organ of the professional accountants of the United States and takes a

high place in the accountancy literature of the world from the quality of the articles written.

In Australia there is a Federal Institute of Accountants with headquarters in Melbourne, and divisions in other States; Victoria, Western Australia and Southern Australia have Societies of Accountants. New Zealand also has its Institute of Public Accountants, and in South Africa societies have been formed in the last few years.

Montreal in the Eighties.

In 1880 the Association of Accountants was formed in Montreal and three years after that saw the birth of the Institute of Chartered Accountants in Ontario. The Chartered Accountants' Association in Manitoba followed in 1886. The Institute of Chartered Accountants in Nova Scotia in 1900, British Columbia in 1905, Saskatchewan in 1908 and Alberta in 1910. These seven provincial institutes although managing their own affairs—educating their students, conducting their examinations and disciplining their members—have a central association called the Dominion Association of Chartered Accountants, of which all chartered accountants holding provincial certificates are ipso facto members.

They hold an annual convention for the interchange of ideas, for general regulation of the profession and for the reading and discussion of papers on technical subjects. The 1912 convention will be held in Toronto on September 24th and 25th, when the principal subjects for discussion and consideration are uniformity of examinations throughout the Dominion and interchange of membership. Ontario and British Columbia now issue certificates to members of other provincial institutes who may come and practise the profession in these provinces. It is anticipated that other institutes will follow suit, although it is thought by some that because of the law, varying in different provinces, an examination in legal subjects should be required. Expert accountants from every large city in Canada will participate in this convention and although Ontario, being the home province and having the largest number of members, will naturally predominate, the contingent from the Royal City of Montreal will be a good second, and representatives will foregather from Halifax, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria. Public accountancy has been long in the melting pot but is now being rapidly hammered into shape by keen enthusiasts who are determined that the profession of accountancy in Canada shall be second to none in efficiency, organization and good repute.

The representatives of Ontario on the council of the Dominion Association are three Toronto chartered accountants:—Mr. George Edwards, Mr. W. T. Kernahan and Mr. G. U. Stiff. Mr. Brian Pontifex is the chairman of the publicity committee.

SASKATCHEWAN CO-OPERATIVE ELEVATOR COMPANY.

A successful year's trading on the part of the Saskatchewan Co-operative Elevator Company during their first season's operation was disclosed at the annual meeting of the company held at Regina.

The net profit for the year shown by the balance sheet submitted by the directors to shareholders, amounted to \$52,461. Of this amount the directors recommended using \$3,662 for the payment of maximum dividends of six per cent. permitted by the act of the incorporation, leaving a balance of \$48,799. Of this amount, under the act, fifty per cent., or \$24,399, was placed to the elevator reserve fund, the remaining \$24,399 being placed to the credit of the fund to be known as the "trading reserve fund," which is to be built up to enable the company to trade in those commodities required by the farmers in their agricultural operations.

The steady growth of the company is shown in the total subscribed capital which now stands at \$1,177,200, the shares being held by 8,962 farmers.

At the conclusion of this year's building operations the company will possess 140 elevators, representing an approximate capital outlay of \$1,117,000. The directors' report, in reviewing the work of the year, referred to the establishment of a sales and commission department with offices in Winnipeg, though under the supervision of the head office in Regina, this department superseding the Grain Growers' Grain Company, as selling agent for the Saskatchewan concern.

Up to the end of the financial year on July 31, the company, though handicapped by an exceptionally difficult season, and great delay in getting their forty-six elevators built last fall, had handled 3,261,000 bushels of grain, 1,474,645 bushels of which were purchased by the company, and 1,786,355 bushels special-binned for the farmers.

MANUFACTURING INTERESTS

Minister of Trade and Commerce Gives Them Some Good Advice—Study Real Factors Before Criticizing

The necessity of a broader outlook was emphasized by Hon. G. E. Foster, Minister of Trade and Commerce, speaking to a gathering of manufacturers at Toronto last week. The men engaged in any particular vocation, he said, had no right to shut themselves up inside of it, thus seeing things only as they were benefited themselves. They should keep in touch with other vocations, and this extension of their sympathies would prove a great gain to them. The manufacturers stood midway between the producer and the consumer, and it was their duty to keep in touch with these two great branches of the nation, so that there might be no misunderstandings between them. The farming industry should not be segregated from the industrial community. They depended on one another, and accordingly should work together. Mr. Foster said that criticism was often launched without proper understanding of the situation. A farmer might criticize a manufacturer because of the high cost of some implement, when it might be the cost of raw material, transportation or sale commission that was to blame. A careful study of the real factors in the situation would frequently guard against unjust and dangerous criticism.

Duties Imposed by Tariff.

The manufacturers not only owed a duty to themselves, but also to their country. They could not sit down and feel content because they happened to be doing a fine business. The tariff created the business, and it also imposed a responsibility. It was the duty of the manufacturers to supply all the demand inside the protecting lines. No person should be left looking outside for necessary goods. The tariff also imposed another duty. The manufacturers had to expand until they strengthened the trade and commerce of the nation.

Mr. N. Curry, president of the Canadian Manufacturers' Association, said if they could not meet the demand at present time it was because of the tremendous expansion of Canada in the past ten years. It had left behind not only the manufacturer, but also the railroads, the steamship lines and also the warehouse facilities. The manufacturer was doing his best to meet the increased demand, and that he had made progress was shown by the fact that the capital in business and the output of the factories had increased about fourfold in the past ten years.

Tariff for Farmer and Manufacturer.

The tariff was a bone of contention in some parts of Canada, but Mr. Curry believed that it was as beneficial to the farmer as to the manufacturer. He thought that many agriculturists appreciated this fact. The tariff was more popular than ever, and he foretold that even the Western Provinces, which now considered themselves free traders, would be protectionists in a few years. He looked forward to the day when the West would have as great manufacturing plants as the East.

Mr. R. S. Gourlay said that the manufacturer was expanding as quickly as possible, though he was frequently handicapped because he did not care to ally himself with the capitalists, thus largely losing the control of the business which he had built up. Mr. Gourlay thought that Ontario was the leading agricultural province because the farmers worked in such a manner as to do away with the necessity of middlemen to handle their goods. He added that the manufacturer had another reason for not always being able to meet the demands of the country. The draft of help for the harvest fields of the West constantly left them short-handed, and frequently made it impossible for them to fill their orders.

Hon. A. E. Kemp advocated the establishment of manufacturing in the West, and thought it would end the misunderstandings regarding the tariff.

ENGLISH ESTIMATE OF CANADA'S CROPS

Writing of the world's crops, Messrs. H. N. Bathgate and Company, of Bristol, England, estimate a crop for Canada rather less than last year, or rather less than the outside figures for 1911, as "we are not quite sure that those outside figures were fully warranted. However, it is certain that Canada's yield last season was phenomenal as to quantity, though quality was deficient. Those who have followed our reports will find that we have not expected this year's result to be so large as that of last season; and we are advised that the quantity raised in the north-western provinces will be at least 3,000,000 quarters less than in 1911, we regard our estimate of 26,000,000 quarters as fully liberal, especially when we consider that there was a considerable deficiency on winter wheat in the Maritime Provinces."

PUBLIC UTILITIES AND REGULATION

Private Ownership and Operation, With Proper Regulation, is in Best Interest of Community, Says Halifax Man

From its very nature the operation of a public utility, both from the standpoint of the public and of the utility corporation, must be a monopoly. Operation by two or more companies means additional poles, wires, tracks, or pipe main in the streets and while competition may for a brief time mean lower rates, such lower rates mean a poorer service until finally one, or all, of the corporations are forced to the wall, or the weaker company is merged in the stronger with inconvenience to the community and loss to the investor.

These opinions were expressed by ex-Mayor MacIlreith, of Halifax, at the recent convention of municipalities.

"But to most people," he continued, "the words corporation and monopoly signify the necessity of girding on armor for immediate warfare in order to obtain even a semblance of public rights. Therefore, at the outset, it behooves the public utility corporation to show to the community within whose bounds it operates, by actions, not promises, that a good service at reasonable cost is furnished and that sufficient capital is provided from time to time, to expand or extend the service as the fair claims of the community for such expansion or extension arise. By acting thus, the natural prejudices of the public against the corporation ought to be very largely removed and fair treatment should be accorded the corporation by the community evidenced by a willingness to pay a fair and reasonable price for the service accorded."

Then No Need of Regulations.

"If these ideal relations could be established, there would be no need for regulations, but perhaps, while not possible of absolute establishment, they can be approached unto, and the necessity of recourse to the regulating body rendered unnecessary in most cases."

"The right of the state to set up bodies to regulate public utility companies is undoubted, and the duties and powers of such bodies are, of course, contained in the acts of the legislature creating such utility boards. After such a board has been created, the fear of the public of the monopoly largely vanishes. Under all utility commission acts, it is the duty of the board to see that the corporation renders good service at a fair cost, allowing the legitimate investor a fair return for the money he has invested."

Of the Nova Scotia Act.

"In our province the Act creating the public utilities board is chapter 1, of the Acts of 1909. At the last session of the legislature an Act (chapter 64), amending the above Act, was passed to come into force when proclaimed by the Governor-in-Council. As these Acts are available to all it becomes practically unnecessary for me to do more than mention a few main points."

"In the first place every public utility is required to furnish reasonably adequate service and facilities, and the charge made for such service shall be reasonable and just, and every unjust or unreasonable charge for such service is prohibited and declared unlawful."

"Secondly all rates must be filed with the board and there must be no discrimination. And thirdly, the board is empowered to value the property of public utilities and regulate the issue of stock."

Simple Procedure in Hearing Complaints.

"The method and procedure for the hearing of complaints is made as simple as possible. In order that personal or imaginary grievances may not be made the pretext for hearings the Act provides that the complaint must be made by a municipal corporation or by any five persons, firms or corporations. Our Act, like other utility Acts, is designed to safeguard the rights of the public and at the same time to only require the utility corporation to do what is fair and reasonable and in filing rates and charges to have in view a fair return to the investor."

"While as a rule the public sees only its own side it must be remembered that there are two sides to every question, and it is for the regulating body to weigh these carefully and dispassionately, and while having in view the reasonable demands of the community, they must treat the corporation with fairness."

Mr. J. D. O'Brien, who has been head of the Winnipeg brokerage firm of Messrs. O'Brien & Martin since its inception, is retiring at the end of the month, and his place in the firm is being taken by Mr. S. P. Clark, of the Northern Elevator Company, who will be the active manager of the new firm, which will be known as Clark & Martin.

BANQUE INTERNATIONALE REPORT

French Directors Were Not Re-elected—Figures of the First Year's Operations

At the annual meeting of La Banque Internationale du Canada, the French directors were not re-elected. The following directorate was elected:—Sir Rodolphe Forget, president; Robert Bickerdike, vice-president; Treffe Bastien, J. M. Fortier, Paul Galibert, Sir George Garneau, Col. A. E. Labelle, D. O. Lesperance, M.P., and Hon. L. O. Taillon.

Of these directors, Messrs. Bastien, Fortier, Galibert, Col. Labelle and Lesperance, of Quebec, are new on the board, replacing the following gentlemen, of Paris:—St. Victor Chomereau Lamotte, R. Sautter, Stanislas Badel, and Georges Martin.

Figures of the Statement.

The following is the financial statement of the first year's operations:—

Assets:—Gold and silver coin, \$15,230.69; Dominion Government notes, \$297,131; deposit with Dominion Government for security of note circulation, \$5,000; notes of and cheques on other banks, \$288,015.09; balance due from other banks in Canada, \$375,783.66; balance due from agents in the United Kingdom, \$296,505.43; balance due from agents in foreign countries, \$482,545.89; call and short loans on stocks and bonds in Canada, \$418,320; call and short loans on stocks and bonds elsewhere than in Canada, \$14,048.90; other current loans, discounts and advances, \$1,238,647.34; bank equipment, including safes, vaults, office furniture, etc., at head office and branches, \$83,800; total, \$3,515,028.

Liabilities:—Notes of the bank in circulation, \$778,865; deposits not bearing interest, \$455,140.76; deposits bearing interest, \$947,536.68; deposits by other banks in foreign countries, \$10,405.17; capital paid up, \$1,322,918; profit and loss account balance carried forward, \$162.39; total, \$3,515,028.

Sir Rodolphe Forget, at the meeting said:—"On the occasion of this first general meeting of the shareholders we consider that you are to be congratulated upon the general progress and the comparatively large amount of business acquired by the bank in the short period since it opened its doors to the public, as shown by the statements submitted.

"Branches were opened at the following points:—Montreal, Transportation Building; Bonaventure, 583 St. James Street; Bonsecours, 131 St. Paul Street; Cartierville, Cartier-ville, Province Quebec; Hochelaga, 2145 Ontario Street East; Mont-Royal, Mont-Royal and Papineau; Murray Bay, Murray Bay, Province Quebec; Papineau Square, Papineau Square; Quebec, Quebec, Province Quebec; St. Denis, 478 St. Denis Street; Verdun, 1318 Wellington Street, Verdun; Three Rivers, Three Rivers, Province Quebec.

"The total number of depositors was 3,458, and the total number of borrowers, 359. There are 285 Canadian shareholders and 193 foreign.

"On July 31st, the deposits were \$1,506,072.31, the loans and discounts, \$1,938,051.45, and the circulation \$1,017,095.

"The profit and loss and general statements as on May 31st, the date on which the bank's financial year ends, covers the period of about seven and a half months. It will be fully appreciated by the shareholders that both before and after the bank opened its doors for business there were numerous and heavy expenses to be met, and the acquiring of a paying amount of business invariably necessitates the exercise of a great deal of care and also takes a considerable amount of time.

"With these facts in mind it appears to us that the results of the bank's operations as set forth in the statements should be regarded as very satisfactory and indicative of future success and expansion in the several departments of the bank's business."

Stock Held by Retiring Directors.

According to the list of shareholders of the bank on December 30th, 1911, considerable of the stock is held in France. At that date, Mr. Georges Martin, one of the retired directors, had subscribed for \$30,000 stock, on which \$4,000 had been paid. Badel, Freres & Cie, of which firm presumably Mr. S. Badel is a member, held \$90,000, and had paid \$9,000. Mr. R. Sautter, another director who was not re-elected, was a shareholder to the extent of \$30,000, \$4,000 of which has been paid. Mr. C. Lamotte also had \$30,000, \$4,000 being paid. These four directors therefore held between them \$180,000. Mr. Greenshields who refused to allow his name to go forward for re-election, held \$230,100, on which \$23,010 had been paid.

Stock Held by New Directors.

Four of the five new directors, on December 30th, 1911, held the following stock:—

J. M. Fortier, Montreal	\$100,000
P. Galibert, Montreal	25,000
Colonel Labelle, Montreal	10,000
D. O. Lesperance, Quebec	30,000
Mr. T. Bastien has apparently acquired stock some time	

this year. Sir Rodolphe Forget holds \$220,500. Other large shareholders of the bank are:—

Aynard, J. H., Paris	\$300,000
Banque Commerciale de Bale, Bale, Switz... ..	200,000
Belleau, N., Quebec	80,000
Bickerdike, R., Montreal	50,000
Bignon, P., Paris	80,000
Bristol, E., Toronto	50,000
Chedville, D., Paris	100,000
Cherrier, E. M., Paris	100,000
Dabadie & Company, Paris	100,000
d'Aoust, Madame E. B., Paris	250,000
d'Aoust, O. B., Paris	1,799,000
Dimpault, G., Paris	200,000
Duboin de la Chapelle & Company, Paris.. ..	150,000
Ephrussi, M., Paris	100,000
Fressange, Cte. S. de la, Paris	100,000
Galliard, Frank & Cie, Paris	120,000
Garcia, Feliciano, Paris	100,000
Goulden & Cie, Pierre, Paris	300,000
Greenshields, J. N., Montreal	230,000
Hirtz, Frederic, Paris	280,000
Laurette, Vve. Emillie L., Neuilly, France.. ..	100,000
Laurette, Marcel, Becon les Bruyeres, F....	200,000
Louiseau, Eug., Paris	100,000
Lucas, A. A. A., Lille, France	80,000
Morand, Phillippe, Paris	100,000
Morhet, Hubert, Paris	100,000
Stern & Cie, A. J., Paris	100,000
Talou, Alexandre, Paris	91,100

On Thursday, the French shareholders applied for a writ of quo warranto, which was granted by the Superior Court at Montreal. This will mean that the election of the new directorate will be discussed in the Superior Court.

PERSONAL NOTES

Messrs. R. H. Smith & Company, of Moose Jaw, have issued an attractive booklet descriptive of Moose Jaw.

Mr. H. A. Richardson, Toronto, general manager of the Bank of Nova Scotia, and Mr. G. Hunt, manager of the Montreal branch of that bank, were recently in British Columbia.

Mr. R. W. Breadner, tariff expert of the Canadian Manufacturers' Association, has been appointed Dominion appraiser by the Government at Ottawa. He previously held this position three years ago.

Mr. T. F. Conrod, formerly superintendent of agencies of the Great-West Life, is in charge of the organization of the Premier Life Insurance Company, which received a Dominion charter last session, with head office at Calgary, Alberta.

Mr. Blair Robertson, formerly manager of the Bank of Nova Scotia at Hamilton, will succeed in Winnipeg, Mr. G. H. Easson, who after 25 years of service in that bank retires shortly to assume the general management of the Bank of New Brunswick.

Mr. E. Strachan Cox, the well-known Toronto stock-broker, died this week. He commenced his business career with the Merchants Bank, afterwards joining the banking firm of Hamilton & Cassels, and later going into business on his own account. He was born in 1849.

Mr. C. Tilt, Winnipeg manager for the James Carruther and Company, grain exporters, has been elected president for the ensuing year of the Lake Shippers Clearance Association. The other officers and directors elected are: Vice-president, Messrs. H. T. Swart, Zenith Grain Company; treasurer, John Fleming, A. McFee Company; secretary, A. C. Ruttan, of James Richardson & Company; and director, A. K. Godfrey, Canadian Elevator Company.

Mr. W. Molson Macpherson, president of The Molsons Bank, after returning from a visit to Western Canada, where his bank is represented, is impressed with the need in the West of increased transportation facilities. He is also convinced that Montreal in addition to all that has been done in the harbor needs to do far more to cope with the ever-increasing business of the West will send down to it from year to year.

The first actual survey for the entrance of the Southern New England Railway into Boston is now in progress. Two gangs of engineers, under Mr. Geo. N. Thompson, are at work towards the Northern entrance into Boston, and will soon take up the Southern entrance into Providence.

TAXATION IN ALBERTA

LAURENTIDE COMPANY'S REPORT

**Personal Property and Improvement Are Exempt from
Taxation, While Taxes Are Levied on the Land,
According to its Actual Cash Value Without
Regard to the Value of Improvements
Placed Thereon**

At the Convention of the Union of Canadian Municipalities held in Windsor last week, the following explanation of the system of taxation in Alberta was given by Mr. John Perrie, deputy minister of municipal affairs for that province.

"At the last session of the legislature of Alberta," he said, "great progress was made towards the doing away with taxation on personal property and improvements.

"This question of taxation may be dealt with under four heads, as affecting rural municipalities, villages, towns and cities. Up to this year we had no provision in our province for the establishment of rural municipalities. We had certain local organizations known as local improvement districts. Their powers were, however, limited entirely to collecting a small tax on acreage basis and expending the money so raised on local improvements. Under the rural municipality act passed at the last session of our legislature, rural municipalities may be established throughout the province and when established they are required by this act to levy taxes on lands only, personal property and improvements being exempt from taxation and taxes levied on the land according to its actual cash value without regard to the value of the improvements placed upon these lands by the expenditure of capital or labor. Any movement to make personal property or improvements subject to assessment in our rural communities would be strongly opposed.

Amended Village Act.

"Our villages carry on business under what is known as our village act. Before the last session of our legislature, villages were required to levy taxes on lands, improvements, and personal property, but there was provision whereby any village might petition for authority to levy taxes on lands only. Quite a large number of our villages had petitioned and obtained the authority to do this. A number of them had been assessing in this way for many years and in no case had they reverted to the other system of assessment. Under the provisions of our village act, as it has now been amended, all villages are required to levy their taxes on lands only, personal property and improvements being entirely exempt from taxation. This amendment is, I think, giving very good results and there are, of course, many of our villages that are not affected in any way by it as they were already using this system.

Personal Property and Improvements.

"Prior to the current year practically all the towns in the province levied taxes on lands, improvements and personal property. By the town act passed at the last session of the legislature, personal property and improvements are entirely exempt from taxation and taxes are required to be levied on lands only. This act came into force on February 16th last and the assessment for the current year in all towns in our province, which come under the act, was levied on lands only. The land is required to be assessed at its actual cash value and the rate of taxation is limited to twenty mills on the dollar exclusive of debenture rates, school rates and local improvement rates. The new act is working out quite satisfactorily. The only towns experiencing any difficulty being towns that may have been rather extravagant in the past, towns that have miscalculated the extent of their growth, and therefore found it necessary for the assessment previously levied on personal property, improvements and lands to be levied according to the full value of all such property. Where this was done and where lands have not increased very much in value since last year there has been a shortage in revenue, but this is a matter which they will, no doubt, be able to adjust in a short time.

Three Towns May Enter.

"Three towns in our province did not come under the provisions of our town act when it came into force because these towns had been established by special charters. These towns may come under the provisions of our town act by making application. One of them has already done so.

"We have as yet no city act. All our cities are incorporated and carry on business under charters granted by the legislature. The cities may, therefore, have different systems of taxation. The city of Edmonton levies taxes on lands only. The other cities in the province are changing their system of assessment with the intention that in a few years no taxes will be levied on personal property or improvements."

**Analysis of Year's Finances—Profit and Loss Account
—Statement is Satisfactory**

Monetary Times Office,
Montreal, August 4th.

The annual meeting of the Laurentide Company, Limited—formerly the Laurentide Paper Company, Limited—was held in Montreal on Tuesday. The financial statement for the past twelve months showed a satisfactory condition of affairs. The profits for the year, after deducting \$152,098 for bond interest and other charges, and \$102,880 for betterments to plant, amounted to \$753,573. Out of this was paid one dividend of \$108,000 and three of \$144,000, while \$20,000 was set aside for depreciation, leaving a surplus for the year of \$193,573, or equal to about 2.7% on the capital stock of \$7,200,000.

It is evident, therefore, that the company is earning 10.7% over and above all charges, save dividends, 8% having been paid during the year in dividends.

Organization of New Company.

It may be remembered that last year the Laurentide Company was formed for the purpose of taking over the Laurentide Paper Company, and that two shares of the new company were exchanged for one share of the old, this, in effect, amounting to nothing more or less than a stock bonus of 100%. In the organization of the new company, the authorized stock was placed at \$10,000,000, the subscribed amounting to \$7,200,000. The dividends on the \$3,408,800 stock of the Laurentide Paper Company were at the rate of 8% per annum, and after the exchange for new stock was effected, the dividend was reduced to 6%. This accounts for the fact that the first payment in the financial statement shows but \$108,000 paid out in dividends. After paying at the rate of 6% for one quarter, the dividend was placed back on the former basis of 8% per annum. Naturally the surplus was not so great as it was the previous year, the dividends absorbing a very much larger amount. The profits for the year, however, exceeded those of the previous year by \$40,000.

Comparison of Profit and Loss Account.

Following is a comparison of the profit and loss account for the two years ending June 30th:

	1911.	1912.
Net profits from ground wood, sulphite pulp, paper and cardboard	\$831,507	\$ 910,846
Profits from lumber, &c	78,075	89,705
	\$909,582	\$1,000,551
Bond interest and other charges	196,042	\$152,098
Betterments to plant...		103,880
		255,979
Profits for the year ..	\$713,540	\$ 753,572
Dividends on common stock	\$303,514	\$540,000
Dividends on preference	27,854	
	\$331,368	\$540,000
Depreciation and reserve	\$ 20,000	\$ 20,000
	\$351,368	\$ 560,000
Surplus for year	\$362,172	\$ 193,572
Surplus from previous year	619,745	
Total	\$981,917	\$ 193,572

It will be observed that the surplus for the year ending June the 30th, 1912, was not increased by the addition of the surplus of \$981,917, shown at the close of the previous year. This is explained by the reorganization, in which the 100% bonus stock given to shareholders, through the exchange for new stock, absorbed also the surplus shown at the end of June, 1911.

We are anxious to obtain a number of copies of The Monetary Times dated August 17th, 1912. Any subscriber sending in a copy of this issue will have his subscription extended one month without further charge. Address to Circulation Department, The Monetary Times, 62 Church Street, Toronto.

CANAL TRAFFIC WAS LARGE

Since Opening of Navigation, Much More Freight Than Last Year Has Been Carried

Canadian canal traffic from the opening of navigation until July 31 of this year has exceeded by approximately 3,000,000 tons the traffic for the corresponding period of last year, as shown by statistics just issued from the department of railways and canals. The increase is about 16 per cent. The total tonnage through Canadian canals for the period mentioned this year is 20,116,188 tons, as compared with 17,154,111 tons for a similar period last year. The increase in correct figures is 2,962,077 tons.

Soo Canal Leads Others.

The Soo canal, leading all others in volume of traffic, shows the largest increase, being 2,793,682 tons, or almost equal to the total increase throughout all the canals, a decrease in the volume of tonnage through the Chambly, Rideau, St. Peters, Murray, and Trent considerably offsetting in the totals what would otherwise have been an enormous increase over last year.

As against the decrease in those above mentioned, large increases are shown in the volume passing through the Welland, St. Lawrence and Ottawa, while St. Andrews locks on the Red River above Winnipeg shows probably the highest proportionate increase of all, the volume having jumped from 11,241 tons last year to 50,063 this year, or an increase of 38,822 tons.

Details of all Canals.

The statistics for the various canals are as follows:

Canal—	1911.	1912.	Increase.
Soo	14,028,453	16,823,135	2,794,682
Welland	1,138,284	1,201,588	63,304
St. Lawrence .	1,339,766	1,417,731	77,965
Chambly	273,356	257,374	*15,982
Ottawa	134,990	173,563	38,573
Rideau	80,439	76,243	*4,196
St. Peters ...	29,473	24,860	*4,613
Murray	86,206	68,475	*17,731
Trent	30,993	23,156	*7,747
St. Andrews .	11,241	50,063	38,822
Totals	17,153,111	20,116,188	2,963,077

*Decrease.

The large increase at the Soo is chiefly made up from the tremendous volume of iron ore passing through, this being partly American traffic handled by American vessels. There has also been a large increase in the volume of Canadian wheat conveyed.

Large Percentage of United States Traffic.

Of the total traffic passing through the Soo, over 82 per cent. was purely United States' traffic.

The statistical branch of the department of railways and canals is this year collecting figures showing comparative rates by water on the canals, as compared with those by rail and are requiring all shippers to supply a statement of rates. It is purposed that the scheme be elaborated next year so that these figures will be analyzed according to canals and also commodities.

ARGENTINA'S WHEAT PRODUCTION

A correspondent desires to know how the wheat production of the Argentine Republic compares with that of Canada. Here is a table showing Argentina's production during the past five years:—

Harvested.	Bushels.	P.C. of World's Wheat Crop.
1911	145,981,000	4.77
1910	131,010,000	4.32
1909	156,162,000	5.01
1908	192,480,000	6.63
1907	155,993,000	5.48

Argentina is now regarded as one of the regular export sources of supply for 100,000,000 bushels or more.

Mr. William R. Arnold, managing director, Dominion Trust Company, Limited, Vancouver, has made the following changes in the offices of the company: Mr. E. P. Miller, for some years secretary and treasurer of the company, is appointed general manager; Mr. A. C. Brydone-Jack is promoted from the position of assistant manager to manager of the Vancouver branch; Mr. A. H. Bain, previously assistant secretary, is appointed secretary; Mr. E. L. McArthur, of the debenture department, is made treasurer.

ASSESSMENT SOCIETIES ARE DISAPPEARING.

The following extract from a recent issue of the Life Insurance Education, gives the experience of the past twenty years in the life of the 77 fraternal assessment orders which were flourishing like a green bay tree in 1892. The basis is the Pocket Register issued in 1893:—"Glancing over the list of assessment associations we find that only four of those in operation in 1892 were in existence twenty years later, on the first of January, 1912. These four are to-day in a dying condition and without a change of plan cannot possibly exist more than a few years longer. One other organization, classed as an assessment association in 1892, but which increased its assessments each year with the advancing age of the member, is still in existence and prosperous. Its system is what is known as yearly renewable term insurance, or the step-rate plan, as adopted in recent years by a few fraternal orders."

In the same Pocket Register of 1893 there appeared the names of 115 assessment societies professing to be conducted on a business basis. That is, the members did not need to belong to any fraternal society. Concerning these the same paper says:—"Of the 115 business societies, eight subsequently changed to the legal reserve plan and are now successful old line companies. The rest of the group, 107 in all, failed utterly, passing out of existence one after another. The lesson of inadequate rates has been learned and the more prominent fraternal societies now in existence, including those organized since 1892, have united with the insurance commissioners of the several states in the formulation of a uniform bill to be enacted by the different legislatures, providing for the accumulation of mathematical reserves. This law has been enacted by fifteen states, and although some opposition has developed recently, it is not doubted that the reform will be permanently established, and that within a few years the assessment fallacy will be a thing of the past."

MONEY MARKETS

The raising of the call money rate in Montreal to 5½ per cent. is an indication that crop requirements will make money more scarce than it has been during the past few months.

According to the July bank statement, note circulation was only \$5,000,000 below the amount which could have been issued legally. On the basis of the July figures, the total amount of note circulation which may be issued after September 1st would be about \$140,000,000.

Call loans out of Canada at the end of July totalled \$117,961,000, compared with \$120,569,000 in the previous month. There is likely to be a steady drain on this account, which is placed largely in New York, during the next few weeks. The feature of the New York money market last week was the "sudden calling of outstanding demand loans by Canadian banks in this market," says a New York contemporary. "New York funds have been ruling at a considerable discount in Montreal for several weeks, so that heretofore there has evidently been a quiet withdrawal going on." Last week the banks required gold, and shipments of the precious metal aggregating \$2,600,000 were made to Canada. An additional movement took place this week. Canadian banks have also been selling sterling finance bills in the New York market, evidently drawing on their London deposits. With the Canadian demand as a new factor in the situation, and with continued demand from the United States interior sections, the action of Wall Street interests in transferring speculative accounts to London and of Stock Exchange commission houses in borrowing in London, is taken to indicate an intelligent appreciation of existing monetary conditions in the New York market.

The advance of the Bank of England rate from 3 to 4 per cent. last week, occurring as it did in August, has generally been read as an indication that money is likely to be tight for the rest of the year. The only occasions since 1893 on which the rate has been increased in August, were in 1900, when the Boer war was being financed by the British government, and in 1907, when the rate had been 4 per cent. all the summer and was advanced to 4½ per cent. on August 15th.

Messrs. A. P. Cameron & Company is the name of a firm which has just been organized to conduct a general brokerage and financial business in Winnipeg, with offices at the northeast corner of Main Street and Portage Avenue. He has been associated with the Winnipeg Stock Exchange since its inception, first as assistant secretary, and latterly as floor member for the firm of W. Sanford Evans and Company. With Mr. Cameron are associated Mr. F. W. Stoneham, who has had several years' experience in business and Mr. Samuel McClelland, general ticket agent of the Cunard lines.

UNITED STATES AUTOS TO CANADA

More Than Six Thousand Were Sold Here Last Year, and Over Five Thousand in the United Kingdom

Thirty million dollars' worth of United States automobiles found markets abroad last year, against less than one million dollars' worth ten years ago. Figures just completed by the Division of Statistics of the Bureau of Foreign and Domestic Commerce show that the exports of automobiles to foreign countries in the fiscal year 1912, were valued at 21½ million dollars, and of parts thereof, including tires, 6¼ million dollars. If to this were added the shipments to Hawaii and Porto Rico, we get for the year's sales of United States automobiles outside of continental United States a round thirty million dollars, since the value of automobiles and parts thereof sent to Porto Rico was nearly 1 million dollars and to the Hawaiian Islands a little over 1 million dollars. The total number of machines exported to foreign countries was 21,757, valued at \$21,550,139, averaging slightly less than \$1,000 each; while those to the noncontiguous territory were higher, averaging \$1,600 each.

As to Export Price.

The export price of United States' automobiles in 1912 averaged less than in any earlier year in the history of the export trade. The average for 1912, dividing the total number of machines exported into stated value, was \$990 each, against \$1,100 in 1911, \$1,380 in 1910, \$1,700 in 1909, and \$1,880 in 1908.

On the import side, the automobiles imported last year amounted to but about 2 million dollars in value, against more than 4 million in 1907. The average import value of the automobiles brought into the country last year was \$2,216 each, against \$2,138 in 1911, \$1,936 in 1910, \$1,788 in 1909, and \$2,392 in 1908. Thus the export price of American machines has fallen from \$1,880 in 1908 to \$990 in 1912, while the import price of foreign automobiles entering the country has only fallen from \$2,392 in 1908 to \$2,216 in 1912, the reduction in price on the export side being 47 per cent., and on the import side but 8 per cent.

Is Now a Big Industry.

Even the remarkable growth in the exports of United States automobiles noted above has not kept pace with the growth in production at home, since the census of 1900 showed the value of automobiles manufactured in the United States in 1899 at \$4,748,000, while that of 1910 showed \$249,202,000 as the value manufactured in 1909. The wages paid in the automobile industry, as shown by the census report, aggregated \$1,321,000 in 1899 and \$48,694,000 in 1909; the capital employed in the industry in 1899, \$5,769,000; and in 1909, \$173,837,000; and the number of wage-earners employed, in 1899, 2,241, and in 1909, 75,721.

English-speaking people are the chief purchasers of United States automobiles. Of the 21,757 exported in 1912, 6,288 went to Canada, 5,716 to the United Kingdom, and 3,625 to Australia and New Zealand; the next largest number, 1,611, being credited to South America, while European countries other than the United Kingdom took 2,296.

Of the 963 automobiles imported into the country in the fiscal year 1912, 401 were from France, 188 from the United Kingdom, 131 from Italy, 116 from Germany, and 127 from all other countries.

FIRE INSURANCE RATES IN HALIFAX

The following memorandum has been issued by the Nova Scotia Board of Fire Underwriters relative to fire insurance rates in the city of Halifax.

"The Nova Scotia Board of Fire Underwriters, having decided to prepare a new specific rate for the city of Halifax, will make changes in the rates on schedule rated mercantile risks and proportionately to rates on risks endangered by such.

"These charges will be added to the final rates of such risks, and in the event of civic authorities carrying out the improvement called for, to the satisfaction of this board, an allowance or deduction will be made in the rates on such stated risks corresponding to the charge made for specific item which may have been satisfactorily improved.

"That until an independent report is secured by the city on the water supply system and its recommendations carried out, 25 cents.

"That until an 80-foot turntable aerial truck is obtained and a ladder division of 8 men (call men), provided, 5 cents.

"Until the engineers of steam fire engines are permanently employed (sleeping in the engine houses) twenty more men added to the strength of the department, and the fire department horses are utilized for fire department purposes only, and under the control of the fire chief, ten cents."

CROPS AND TRANSPORTATION

Calgary's Board of Trade Report—Consumer and Cost of Living—New Developments of Gas Company

(Special correspondence.)

Calgary, September 2nd.

Cool and wet days prevailing during the week delayed harvesting operations, but otherwise than this, to ripening grain, no loss is reported. Central and Northern Alberta require some days of fine weather without frost to assure a full return. Southern Alberta is fairly safe on the cutting, with good yields generally ready for the threshers. Any possible shortage of binder twine has passed with the idle days giving opportunity to replenish depleted stocks. Nor is there any outcry for much labor though this will doubtless be resumed when the weather clears.

The Calgary board of trade committee's report on grain car distribution for the crop year of 1911, up to July 31st, 1912, shows that 172,845 cars were inspected as follows:

	Man.	Sask.	Alta.
C. P. R.	32,444	46,577	21,160
C. N. R.	22,208	20,369	1,450
G. T. P.	2,568	8,816	761
G. N. R.	4,830	2,662	
	62,050	87,424	23,371

For three months ending November 13, 1911 (the close of the navigation season), the following cars were inspected:

	Man.	Sask.	Alta.
C. P. R.	16,296	13,583	4,262
C. N. R.	11,010	8,657	177
G. T. P.	1,220	3,690	138
G. N. R.	1,798	27	
	30,324	25,963	4,577

Cars distributed by the Canadian Pacific Railway alone were in the proportion of 35% to Manitoba, 45% to Saskatchewan and 20% to Alberta. From Alberta up to July 10th the Canadian Pacific Railway alone had shipped 24,253,000 bushels.

Possibility of Blockade Reduced to Minimum.

The possibility of a grain blockade throughout Alberta is reduced to a minimum, the report says, owing to the fact that 25% more cars are available than last year, the elevators are empty, and the harvest is two weeks earlier. No time is being lost in bringing home to every one concerned the importance of all uniting in the effort to dispatch as much grain as possible before the close of navigation. The railway is urged to furnish cars and to maintain, after the close of navigation, the full capacity for removing grain.

The acting secretary of the United Farmers of Alberta says that the grain blockade is due to the fact that farmers' promissory notes fall due too early in the season. If the grain growers were less pressed for time they would neither be so anxious to cut, thresh, or ship their grain to the not infrequent damage and loss, to say nothing of pouring a deluge on the transportation facilities which should be more evenly distributed.

Affecting Consumers' Interests.

In Calgary the cost of living topic is to the fore owing to the proposed association of retail grocers which they assert is to keep the wholesalers in their proper sphere. Then at the market place a farmers' organization offers produce direct to the consumers, and a co-operative society is in process of formation.

Some transfers and options affecting business property in the most select area of the city have given rise to the report that English capital is to be invested.

The Canadian Western Natural Gas, Light, Heat and Power Company has another location for wells from which it is now preparing to cover another big portion of Alberta with distributing pipe lines.

COBALT ORE SHIPMENTS

The following are the shipments in Cobalt ore, in pounds, for the week ended August 30th:—McKinley-Daragh, 65,000; Kerr Lake, 40,004; Colonial, 48,002; Cobalt Lake, 64,000; Chambers-Ferland, 61,880; City of Cobalt, 65,474; Nipissing, 104,070; Cobalt Townsite, 118,000; La Rose, 240,620; Beaver, 78,602; total, 801,332 pounds or 445 tons. The total shipments since January 1st are now 29,259,081 pounds or 14,620 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 14,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Iron and Steel Corporation.—The company's new No. 8 blast furnace has started operations. A cable from London says that a block of 13,000 shares, which has recently been overhanging the market, has been taken up by a strong English syndicate.

Wettlaufer Lorrain Silver Mining Company.—The directors of the Wettlaufer Lorrain Silver Mining Company have declared the regular dividend payable October 20th. The company has paid quarterly dividends of 5 per cent. continuously since March, 1911.

Canadian Locomotive Company, Limited.—The first annual general meeting of the shareholders of the Canadian Locomotive Company, Limited, will be held at the head offices of the company, Kingston, Ont., September 18th, to receive the report of the directors for the year ending June 30th, and for the election of directors for the ensuing year, etc.

Canada Tea Company.—The Canada Tea Company has declared an initial quarterly dividend of 1½ per cent. on the preferred stock, payable September 1, and a dividend of 1½ per cent. on the common, payable at the same time. The preferred stock of the Canada Tea Company was issued three months ago at par, with a bonus of 25 per cent. common stock.

Western Canada Power Company.—Mr. C. H. Cahan, president, announces the sale of 40,000 horsepower to interests associated with the British Columbia Electric Company. Mr. R. F. Hayward, general manager of the company, who has been conducting these negotiations in London, is on his way home to submit to his board of directors a draft contract, which, it is understood, has been approved by him.

Nova Scotia Car Works.—The Canadian Pacific Railway have placed an order for 500 steel frame box cars with the Nova Scotia Car Works. The delivery of this order will take place during the early part of the coming year. Mr. F. M. Brown, general manager of the Nova Scotia Car Works states that the order now in the hands of the steel car department of the company will be booked well into the coming year.

Quebec Light, Heat and Power Company.—Sir Rodolphe Forget, when seen this week regarding the stoppage of the work of construction on the St. Joachim and Murray Bay section of the Quebec & Saguenay Railway, stated that it was quite true work had been suspended on the line for the present. Sir Rodolphe said the trouble between the shareholders had been going on for some time, and it was finally decided to suspend operations.

International Milling Company.—The International Milling Company, (Minn.), during the past few months has extended its facilities in the West very materially, by acquiring the Calgary Milling Company, which includes milling plant and grain storage at Calgary, several elevators in Alberta, and a large distributing warehouse in Vancouver. The Calgary mill was built four years ago, and last year there were completed storage and working elevators, of the capacity of 260,000 bushels. The company is now increasing the capacity of the Calgary mill. The Moose Jaw mill, destroyed by fire last December, has been replaced by a new plant on a larger scale.

Quebec Central Railway Company.—Payment of the full interest of 7 per cent. on the income bonds of the Quebec Central Railway Company is announced in respect of the fiscal year ended June 30th last. The agreement for leasing the line to the Canadian Pacific does not come into force until January 1st, 1913, when the seven per cent. income bonds, now dependent for their interest upon earnings, will be converted into a five per cent. bond, payable in 50 years at par, such payment, together with the half-yearly interest, being guaranteed by the Canadian Pacific Railway Company, and as compensation to the converting bondholders for reduction of interest a 10 per cent. cash bonus is to be given.

Shawinigan Water and Power Company.—Shawinigan Water & Power Company shareholders have decided to issue \$5,000,000 of new stock. The stock will be issued at such time as the directors deem it advisable.

The directors at their meeting, which immediately followed, authorized the issue of one million of the five million dollars of new stock to the present shareholders at a price of \$120 per share.

The authorized capital of the Shawinigan Water & Power Company is \$20,000,000, of which \$10,000,000 is subscribed

and paid-up. The allotment of \$1,000,000 of new stock to shareholders at \$120 will be in the ratio of one share for every ten shares now held.

British Canadian Lumber Corporation.—The British Canadian Lumber Corporation, of which Mr. G. F. Johnston, of Montreal, is president, has just opened at New Westminster the largest electrically equipped mill on the American continent. Mr. Johnston states that the minimum cut of the new mill will be 250,000 feet of lumber per day of 10 hours, but that with the double shift, which the company intends putting on within a short time, the output will be 500,000. The annual cut for the year, it is expected, will exceed two hundred millions. The lumber industry in British Columbia is very active, and wholesale prices have recently advanced \$1 per thousand. The result of the recent lawsuit at Ottawa to prevent American mills using Canada as a dumping ground for their outputs has had, he says, a good effect on the general situation.

Consolidated Mining & Smelting Company, Limited.—The Consolidated Mining & Smelting Company of Canada, Limited, ore receipts at Trail smelter for the week ending August 15th, and from July 1 to date, in tons:—

	Week end	July
	Aug. 15.	to Date.
Centre Star	3,500	22,503
Le Roie	853	6,267
Sullivan	275	3,627
Molly Gibson	119	528
St. Eugene	32	160
No. 1		129
Richmond-Eureka	61	183
Other mines	884	7,968
Totals	5,733	41,365

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Belleisle Station, N.B.—Mr. R. McFarland's barn and contents. Loss, \$650; no insurance. Origin, lightning.

Morden, Ont.—Mr. T. Card's barn. Loss, stock, \$1,155; building, \$2,500. Insurance, \$1,800, Guelph Insurance Company. Origin, lightning.

Ridgetown, Ont.—Mr. W. Thorold's two barns. Loss, \$2,000. Insured with Havard Mutual Company. Origin, lightning.

Montreal, Que.—Alaska Feather and Down Company's car-loading warehouse. Loss, stock, \$10,000; buildings, \$12,000; fully insured. Origin unknown.

St. Lambert, Que.—Mr. S. H. Grove's residence. Loss, building, \$3,800; furniture, \$3,000. Insurance, building, \$2,300, Rochester German Insurance Company; furniture, \$2,500. Origin, unknown.

St. John, N.B.—Wilson Foundry fire.—The following are amounts of insurance in force: Mr. John E. Wilson—London and Lancashire, \$1,000; Aetna, \$1,000; North British and Mercantile, \$1,000. Canada Brush Company—Factory Underwriters, \$6,000; London Mutual, \$4,500; Provence, \$1,800; Northern, \$3,000; elsewhere, \$1,500. Mr. Malcolm E. Dunham—Hudson Bay, \$100. Mr. Michael J. McGrath—Property, \$1,000; National Benefit, \$1,000. Mr. Walter Marley—Montreal, Canada, \$300. Mrs. McCullough—Montreal, Canada, \$300. Mr. Alex. Tobin—National Benefit, \$300. The American Cloak Company, which had \$3,400 insurance, was not burned, but may have some stock damage.

Glenvale, Ont.—August 20.—Mr. J. A. Carruthers' residence. Origin, sparks. Loss, \$1,600; insurance British America Fire Insurance Company, \$700.

Executors' and Administrators' Trust Company.—Capital \$1,000,000. Par value of shares, \$100. Offering of shares at par.

REPORT OF THE DAIRY AND COLD STORAGE COMMISSIONER

The branch of the Department of Agriculture, at Ottawa, supervised by the Dairy and Cold Storage Commissioner, embraces four divisions which deal with dairying, fruit, extension of markets and cold storage. Each division embodies a far reaching service calculated to foster and assist the industries concerned and now requires the services of about one hundred employees including many technical and semi-technical officials.

During the past year, a number of new features have been commenced. In connection with the cow testing service, a number of dairy record centres have been established for the purpose of assisting and encouraging the improvement of milking herds. Then in two districts model factories are being established for experimental and demonstration purposes. A special inquiry was made into the fruit growing industry of the Dominion. The report of the officials doing this work is promised at an early date.

The extension of markets division gives considerable attention, among other things, to the work of compiling wholesale prices in different markets for animal and agricultural products. Through the services of this division the commissioner, Mr. J. A. Ruddick, is in a position to give reliable and intelligent advice to Canadian shippers seeking new markets, or to others looking for such products as Canada has to dispose of. The whole work of the branch for the year ending March 31st, 1912, is reviewed in the annual report of the Dairy and Cold Storage Commissioner just out. Copies will be sent on application to the Publications Branch of the Department of Agriculture at Ottawa.

VANCOUVER'S GROWTH BRINGS PROBLEMS

Protection for Banks—Public and British Columbia Electric Railway—Shaughnessy Heights

(Staff Correspondence).

Vancouver, September 2nd.

With a large and increasing population, and with many foreigners, Vancouver has a people now who are not altogether observant of the law. Following several robberies in the past, the Cedar Cottage branch of the Bank of Hamilton was held up last Saturday night by five men, believed to be Italians, and \$400 taken. If the robbers had not been amateurs, a larger sum might have been secured. It has been declared since that some sort of protection would be demanded by the banks doing business in South Vancouver. It is in that section that nearly all of the bold hold-ups have taken place. After the branch of the Royal Bank in the suburbs was robbed some months ago, the officials took prompt measures to prevent any repetition. They have a man stationed in each of their branches who carries a Winchester. The fact that such a watchman is on duty daily is sufficient to deter would-be robbers. The Canadian Bank of Commerce has adopted similar measures in some of its offices. If the Bank of Hamilton had done the same, the deal of last Saturday night would not have occurred in regular hours. This is early in the season for such robberies to take place, but it will serve as a warning, so that when the dark and foggy days come institutions will be prepared with some sort of defence.

Consolidation of Street Car Franchises.

During the past few weeks there has been quite a change in public opinion in respect to the British Columbia Electric Railway Company. For many weeks past, a Greater Vancouver committee has been at work trying to effect a consolidation of the street car franchises of the various surrounding municipalities. This city has the option of buying the system in the city proper in 1918, this will not give control of the franchises in outside places, where they extend for varying terms of years. Some of the aldermen think that because they have the option of buying that they have the street railway market cornered, and are standing firm. On the other hand, ratepayers are now taking up the matter, and at a meeting in Fairview voted against this attitude and suggested that the people be given a chance to express an opinion in the matter. Even those who stand for municipal ownership, confess that civic ownership of public utilities might obtain in instances, create irritation and that these franchise entanglements would be quite an incubus. It is realized that while the principle of civic ownership of public utilities might obtain in instances, this principle is subject to qualifications and the laws of general expediency. At first it was thought a twenty-five year term was too long for a general consolidation, but it is recognized by many that such a period is not out of the way if extensive enlargements are to be constantly carried on, for money cannot be had at a satisfactory price with a shorter term. Business men recently returned from the Old Country report that investors there are looking for a better rate of interest than formerly. That being the case, a short-term franchise would be of little use to the British Columbia Electric, which will need much money. With the feeling now obtaining, it is not improbable that the company and the city will be able to get together and agree to some mutual proposition, especially in view of the fact that at Point Grey there is a strong desire to have the street cars running once more.

Development of Greater Vancouver.

When Hon. Mr. Monk visits the coast next month he is to be the guest at a banquet at Eburne. This portion of Greater Vancouver is the central point between South Vancouver and Point Grey, both of which municipalities are mutually doing what they can for the development of the north arm of the Fraser River. They expect to get some definite statement from Mr. Monk. Municipalities bordering on the north arm of the Fraser are trying more than ever to get the channel improved so that industries will be attracted in that direction.

Shaughnessy Heights, now a part of Point Grey municipality, is seeking to secede and form a municipality. The point has not yet been brought out, but if this object was attained, the situation would be peculiar. It is stated that those who occupy property on Shaughnessy Heights do not own it outright, only on agreement of sale, and that deeds will not be forthcoming for ten years from the time of purchase. Moreover, development of this part of the city was furthered by the Canadian Pacific Railway by its lending up to two-thirds of the value of the house and lot. It means if a separate municipality were formed, it would be under the control of the Canadian Pacific Railway. The position would be unique,

for the railway company would control this little district practically in the heart of Vancouver, and the proposal is meeting considerable opposition.

Probable Sale of Brewing Concern.

The interests of the British Columbia Breweries, Limited, may be sold. This firm owns brewing establishments in Mount Pleasant and Kitsilano, in Nanaimo and Cumberland, and controls the leases of several hotels in Vancouver, and has a large amount of money out on loan to hotels. Representatives of Price, Waterhouse and Company, accountants, Seattle, have looked over the books of the company to verify statements. Mr. C. M. Marpole, of Messrs. Macdonald, Marpole & Company, is acting for the purchasers. It has been suggested that the Canadian Pacific Railway is doing the buying, and in support of this it is pointed out that this would give it much freight, since malt is imported from Winnipeg every year that gives the railways a business of between \$50,000 and \$75,000 in freight. Besides, the railway company uses much beer at its various hotels, and a great saving would be affected if it manufactured its own supply. Even if the company is behind the purchase, it is not probable that it would figure publicly in the deal.

NEW WESTERN RULE REGARDING ANNEXES

The Western Canada Fire Underwriters' Association has issued the following rule with regard to underwriters' agencies: It is proposed and recommended that (a) Each member may maintain and operate not more than one underwriters' agency, such agency to have no vote in the association, and the parent company or companies to be responsible in every way for the due observance on the part of the subsidiary of all the association rules and regulations. (b) A member who does not maintain an underwriters' agency may appoint one additional agent at each outside town (i.e., not more than two at any one place), and one additional representative at Winnipeg. The privilege shall not extend to a company or companies jointly maintaining an underwriters' agency. (c) It shall be the duty of the secretary to prepare a schedule of charges for extra sets of rating material, and extra plans, and each member requiring such additional supplies, either for a second agent or for an underwriters' agency, shall pay for the same in accordance with such schedule.

INSURANCE COMPANIES AND DOMINION LICENSE

The short report of the Dominion superintendent of insurance issued last month shows that the following companies have received or have applied for a Dominion license since January 1, 1912:—

Providence Washington Insurance Company (fire); Germania Fire Insurance Company (fire); North-West Fire Insurance Company (fire); British-Northwestern Fire Insurance Company (fire); Insurance Company of the State of Pennsylvania (fire); Palatine Insurance Company (fire); Firemen's Insurance Company of Newark, N.J., (fire); Westchester Fire Insurance Company (fire); British Colonial Fire Insurance Company (fire); American Insurance Company (fire).

Capital Life Assurance Company (life); Guardian Accident and Guarantee Company (burglary, guarantee and plate glass); British and Foreign Marine (inland transportation); Insurance Company of North America (automobile—restricted); Norwich Union Fire (accident, sickness and plate glass); Travelers' Indemnity Company (Hartford), (accident, sickness, steam boiler, fly-wheel and automobile); Northwestern National Insurance Company (fire, tornado and hail, in five provinces).

Middlewest Fire Insurance Company (fire, in three provinces); Delaware Insurance Company (fire); Nord-Deutsche Insurance Company (fire); Niagara Fire Insurance Company (fire); Liverpool-Manitoba Assurance Company (fire); General Fire of Paris (fire); Mount Royal Assurance Company (fire and plate glass); United Commercial Travellers of America (accident); Western Canada Accident and Guarantee Company (accident and guarantee).

Loyal Protective Insurance Company (accident and sickness, in five provinces); Mutual Life and Citizens Assurance Company, of Sydney, New South Wales (life); La Sauvegard Life Assurance Company (life); Detroit Life Insurance Company (life, in two provinces); Beneficial Life Insurance Company (life).

The following companies have given notice of intention to apply for Dominion incorporation:—Western Union Fire Insurance Company, Vancouver; Retail Merchants' Fire Insurance Company desire incorporation under the name of the Security National Insurance Company of Canada. (Head Office, Winnipeg); Provident Accident & Guarantee Company, Montreal; Imperial Underwriters' Corporation, Vernon, B.C.

NEW INCORPORATIONS.

Many New Companies—Guaranty Appraisement Company Chartered—Many Small Corporations

Company incorporations continue. Fifty-nine new companies obtained either Dominion or provincial charters, with an aggregate authorized capitalization of \$8,402,000 this week. Twenty-four of those new concerns will have their head office in Saskatchewan, 17 in Ontario, 10 in Quebec, 7 in Alberta, and 1 in Manitoba. Among the million dollar companies are the William Neilson, Limited, of Toronto, and the International Moving Picture Manufacturing Company, of Montreal.

The Dominion Guaranty Appraisement Company, Limited, of Ottawa, has been granted letters of incorporation. Senator Belcourt and a number of Ottawa capitalists are reported to be backing the company, which business, so far as Canada is concerned, proposes to investigate and report upon business ventures of various kinds, industries, real estate, etc., and to guarantee such reports. The company will guarantee, for example, that a contract will be carried out as between another vendor and purchaser, the company, if necessary, fulfilling the obligations of the vendor. Lands will be guaranteed a certain future value at which the company, if called upon, will take them over. The company will probably have offices in England and report upon Canadian investments for British investors.

A new electric company has obtained letters patent from the provincial government of Quebec. It will be called the Beauharnois Electric Company, Limited. The new company will have powers in the city of Montreal, and in the counties of Laval, Jacques Cartier, Hochelaga, Laprairie, Chateauguay, Beauharnois, Two Mountains, Argenteuil, Soulanges, Vaudreuil, Terrebonne, L'Assomption, Chambly, Huntingdon, Napierville, St. Jean and Iberville. They intend to construct large power houses and electric plants at different places.

The Beauharnois Electric Company, Limited, is an independent company and they declare they will never consent to join any trust or combine of companies. The first generating station will likely be constructed at Beauharnois and the power will be taken from the rapids in that locality.

A new corporation, the Lock Tie Brick Company, of British Columbia, capitalized at \$100,000, has been organized by Vancouver business men to take over from the Canadian Lock Tie Holdings, Limited, the rights to manufacture and sell in British Columbia Lock Tie brick. The head of the company is Mr. Louis A. Rostein, of the United Canadian Securities Agencies, and among the directors are Mr. J. B. Miller, general manager of the Clayburn Company, Limited, brick manufacturers; Mr. A. L. Russell, general manager, Evans, Coleman and Evans, Limited, and Mr. H. J. N. Hastings, of the United Canadian Agencies.

The following is a list of charters granted during the past two weeks in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Grouard, Alta.**—G. Butler, \$50,000.
Killam, Alta.—Killam Curling Club, \$1,500.
Melville, Sask.—Castle Hall Company, \$20,000.
Nokomis, Sask.—Nokomis Driving Club, \$10,000.
Morse, Sask.—Morse Elevator Company, \$30,000.
Rosetown, Sask.—Leader Manufacturing Company, \$200,000.
Moosomin, Sask.—Moosomin Realty and Securities Company, \$50,000.
Plenty, Sask.—Wiggins Wheat and Flax Growers' Association, \$20,000.
Weyburn, Sask.—Assiniboia Brokerage and Investment Company, \$50,000.
Sarnia, Ont.—Regal Fence Company, \$100,000. A. J. Chester, C. Simmons, M. Simmons.
Renfrew, Ont.—Renfrew Textile Company, \$50,000. J. E. H. Barnet, A. Francis, J. M. Austin.
Edmonton, Alta.—Standard Motor Company, \$15,000. McDermid Engraving Company, \$25,000.
Rothsay, N.B.—Provincial Lumber Company, \$10,000. G. McKean, G. R. McKean, W. E. Golding.
Sherbrooke, Que.—Canada Tire Filler Company, \$150,000. L. F. G. Codere, L. E. Codere, E. Dauphinais.
Coaticook, Que.—Sleeper and Akhurst, \$49,000. Mrs. F. A. Akhurst, E. A. Akhurst, C. E. Christie.
Sudbury, Ont.—Haight and Dickson Lumber Company, \$40,000. C. McCrea, G. J. Valin, A. J. Manley.
Peterborough, Ont.—Peterboro Oil & Gas Company, \$40,000. A. J. R. Melville, L. Sinclair, M. R. Edgar.

Guelph, Ont.—International Malleable Iron Company, \$250,000. C. H. Ivey, E. C. Mitchell, G. E. Rowed.

Hamilton, Ont.—Harper-Presnail Cigar Company, \$100,000. W. W. Presnail, W. R. Harper, J. L. Porteous.

Sussex, N.B.—R. D. Robinson Publishing Company, \$49,000. H. P. Robinson, A. S. Moore, M. A. McLeod.

St. Laurent, Que.—Parc Mille Isles, \$95,000. A. Jasmin, Lachine; H. Gohier, St. Laurent; J. Bigras, Montreal.

Owen Sound, Ont.—Ionic Cement and Stone Company, \$40,000. W. P. Telford, Sr., P. W. Sabiston, T. L. Dates.

Minto, N.B.—Minto Coal Company, \$400,000. T. Tait, Montreal; A. R. Slipp, Fredericton; R. B. Hanson, Montreal.

Lindsay, Ont.—National Concrete Manufacturing Company, \$75,000. H. V. Pogue, W. M. Flavelle, A. E. Maybee.

Ottawa, Ont.—Dominion Guaranty Appraisement Company, \$1,000,000. J. A. Ritchie, E. R. E. Chevrier, O. Sauve.

Moncton, N.B.—Moucton Black Foxes, \$30,000. J. E. Masters, Moncton; J. D. Irving, Buctouche; F. N. Hall, Moncton.

Bathurst, N.B.—Bathurst Brick Company, \$49,000. F. Deschesnes, Lamartine; A. Lacaillade, L'Islet; T. Rochette, Quebec.

Hawkesbury, Ont.—Modern Pilot Headlights Company, \$50,000. F. McArthur, H. M. G. Bellew, Montreal; H. Lampard, Westmount.

Chatham, N.B.—Maritime Foundry and Machine Works, \$49,000. J. C. Miller, Millerton; J. Miller, Chatham; J. W. McLennan, Woodstock.

Brantford, Ont.—Kitchen Overall and Shirt Company, \$40,000. S. G. Kitchen, South Dumfries Township; J. F. Kitchen, C. E. Kitchen, Brantford.

Cardwell, N.B.—Canadian Mineral Development Company, \$100,000. P. H. McGann, Elizabeth, N.J.; D. Collyer, Elizabeth; C. A. Young, St. John.

St. John, N.B.—Forest Home Fishing and Hunting Club, \$500,000. A. D. G. Vanwart, D. H. Nase, D. J. Purdy. J. S. Gray, \$35,000. F. W. Parker, J. S. Gray, J. E. Cowan.

Calgary, Alta.—Archer and Robertson, \$100,000. Western Co-operative Grain Company, \$50,000. Calgary Jockey Club, \$500,000. D. N. Hunt, W. R. Collings, M. A. Taylor.

Winnipeg, Man.—Hilson's, \$150,000. E. G. Trick, J. T. Beaubien, T. McGivern. Hallet & Carey Company, \$50,000. F. A. Hallet, F. L. Carey, Minneapolis; W. Hunter, Winnipeg.

Prince Albert, Sask.—Bowman Supply Company, \$50,000. H. E. Miles and Company, \$100,000. Prince Albert and District Property Purchase Company, \$7,000. Star Theatre Company, \$50,000.

Stratford, Ont.—Stratford Bridge and Iron Works Company, \$100,000. T. Holliday, Jr., Stratford; B. D. Dean, Seattle; W. H. Dean, Hamilton. Perth Realty Company, \$40,000. W. Miller, F. J. Scarff, D. A. McLachlan.

Moose Jaw, Sask.—Moose Jaw Stores, \$250,000. Industrial Developers, \$100,000. Western Canadian Realty Corporation, \$50,000. Rogers Lumber Yards, \$2,000,000. A. R. Rogers, G. H. Rogers, J. J. Rogers, Minneapolis.

Regina, Sask.—Saskatchewan Security Purchasers, \$100,000. Moose Temple Company, of Regina, \$200,000. Saskatchewan Stove and Hardware Company, \$100,000. Regina Securities Company, \$55,000. Qu'Appelle Navigation and Transfer Company, \$20,000.

Baril, J. Ledoux, J. O. Benoit. La Compagnie d'Immeubles de Chambly Bassin, \$20,000. A. Gravel, R. Trudeau, St. Lambert; A. Raymond, Montreal.

AUGUST FIRE LOSSES

One Hundred and Ninety Fires Reported Involving Waste of Over One Million Dollars and Sixteen Lives

The Monetary Times' estimate of Canada's fire loss during August amounted to \$1,164,760, compared with July loss of \$1,741,371 and \$920,000 for the corresponding period last year. The following is the estimate of August losses:—

Fires exceeding \$10,000	\$878,900
Small fires	133,935
Estimates for unreported fires	151,925

Total\$1,164,760

The following are the monthly totals of the losses by fire in Canada compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$1,275,246	\$2,250,550	\$3,002,650
February	750,625	941,045	1,640,153
March	1,076,253	852,380	2,261,414

Nineteen Large Fires.

The fires at which loss was estimated at \$10,000 and over were as follows:—

Louisville, Que.	Lumber mill	\$ 76,600
Amherst, N.S.	Engineering works	20,000
Irvine, Alta.	Hotel	20,000
Vancouver, B.C.	Furniture store	70,000
Montreal, Que.	Abattoirs	200,000
Sydney, N.S.	Church	10,000
Valleyfield, Que.	Stables, &c.	17,800
Belleville, Ont.	Sash and door factory	18,000
Granby, Que.	Box factory	100,000
Vancouver, B.C.	Sash and door factory	45,000
Union Bay, B.C.	Sawmill and collieries	30,000
St. Paul L'Hermite, Q..	Conflagration	12,500
Montreal, Que.	Warehouse	22,000
St. John, N.B.	Foundry, &c.	100,000
Montreal, Que.	Sash and door factory	50,000
Winona, Ont.	Stables, &c.	50,000
Toronto, Ont.	Roofing warehouse	10,000
St. Sebastien, Que.	Store	14,000
Newville, N.S.	Lumber mill	13,000

Interesting Analysis of Fires.

The structures damaged and destroyed were 52 residences, 30 barns, 18 stores, 5 each hotels, factories, sawmills, 4 each sheds, sash and door factories, stables, 3 each garages, restaurants, warehouses, 2 each hospitals, boat houses, box factories, markets, 1 each engineering works, school, abattoir, church, armory, ironworks, roofing factory, laundry, cooperage, granary, gristmill, power house, elevator, foundry, dyeworks, office building, post office, pavilion. There were 1,000,000 laths destroyed, 150,000 feet lumber, 340 tons hay, 25 loads of wheat, 18 pigs, 8 freight cars, 3 each automobiles, horses, gasoline launches, 1 each sleeping

car, mail and baggage car, steam barge, buggy, boat, threshing machine, mower.

Of the presumed causes 23 were attributed to lightning, 10 each gasoline, electrical defects, 9 incendiary, 6 sparks, 5 each gas defects, smoking, spontaneous combustion, 4 each defective chimneys, burning ashes, matches, 3 upset lamps, 1 each hot journal, spilled boiling wax, lighted candle, open fire, overheated stove, overheated stovepipe, oil stove, wood alcohol.

Fatalities are More Numerous.

The number of deaths from fire is 16, making 126 for the first eight months of 1912.

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	27	27	27
February	15	12	11
March	20	18	24
April	37	20	15
May	15	28	18
June	52	13	6
July	15	110	9
August	11	22	16
September	10	13	..
October	16	17	..
November	19	20	..
December	19	17	..

Total 256 317 126

The fires at which fatalities occurred were as follows:—

Montreal, Que.	Thrown lighted match	1
Montreal, Que.	Playing with matches	1
St. Thomas, Ont.	Overturned lamp	1
Hamilton	Oil set alight	1
Nelson, B.C.	Burning building	1
Lacombe, Alta.	Burning building	1
Sarnia, Ont.	Automobile set alight	1
Brandon, Man.	Gasoline explosion	1
Elgin, Ont.	Burning building	4
Victoria, B.C.	Burning building	1
Burmes, B.C.	Burning building	1
Montreal, Que.	Oil stove explosion	1
Montreal, Que.	Oil stove explosion	1

16

The Weyburn Security Bank has opened a branch at Leeville, Sask.

The first edition of the Teller, edited by the staff of the Sterling Bank, embraces news items regarding the different members of the staff and a short sketch of the General Manager, Mr. F. W. Broughall, and several articles of interest to bankers in general.

Work has begun in North Dakota on a railroad extension that will connect the Great Northern with the Grand Trunk Pacific on the Canadian side of the border. The extension, which is twenty-two miles long, begins at Niobe, Ward County, N.D., and will join the terminus of the southern extension of the Grand Trunk twelve miles west of North Portal, Sask.

RECENT FIRES

Monetary Times' Weekly Register of rare Losses and Insurance

Ingersoll, Ont.—August 31.—Morrow Works. Loss and origin unknown.

Melbourne, Ont.—Sept. 2.—Mr. A. Holmes' barn destroyed by lightning.

Paris, Ont.—Sept. 1.—Royal Hotel stables. Loss, \$3,000. Origin, unknown.

Blyth, Ont.—Sept. 3.—Bank of Hamilton premises. Loss and origin unknown.

Sarnia, Ont.—August 28.—An automobile. Loss, \$8,000. Origin, leaking gasoline tank.

Parrsboro, N.S.—August 27.—Four barns belonging to Broderick's Hotel. Loss unknown.

Clifford, Ont.—Sept. 1.—Mr. H. Heinbacher's barn. Loss unknown. Origin, lightning.

Cartier, Ont.—Sept. 2.—Canadian Pacific Railway station. Loss and origin unknown.

Ingersoll, Ont.—August 30.—Mrs. A. N. Christopher's residence. Loss and origin unknown.

Brunner, Ont.—August 31.—Messrs. Pfeffer Bros.' elevator. Loss, \$6,000. Origin, lightning.

Caradoc, Ont.—Sept. 2.—Mr. A. Holmes' barn and contents. Loss unknown. Origin, lightning.

Gladis, Ont.—Sept. 2.—Mr. J. Stewart's barn and contents. Loss unknown. Origin, lightning.

Sparta, Ont.—Sept. 1.—Mr. G. A. Emmett's two barns and shed. Loss unknown. Origin, lightning.

Saskatoon, Sask.—August 30.—Alberta Chop House, Twentieth Street. Loss and origin unknown.

Walkerton, Ont.—Sept. 2.—Mr. T. Lamb's barn and contents. Loss unknown. Origin, lightning.

Nelson, B.C.—August 5th.—Frame building, 318 Lake Street. Loss, \$60. Origin, matches or cigarettes.

Brantford, Ont.—August 30.—Brantford Cordage Company's plant. Loss, \$1,000. Origin unknown.

Fredericton, N.B.—August 28.—Mr. Frank DeL. Clement's residence. Loss and origin unknown.

London, Ont.—August 31.—Mr. H. Douglas' residence, Centre Avenue. Loss, unknown. Origin, electric iron.

Winona, Ont.—August 30.—Mr. E. D. Smith's stables. Loss, \$50,000. Origin, supposed spontaneous combustion.

Brosseau's Junction, Que.—August 29.—Railway shed containing 40 gallons coal oil. Loss and origin unknown.

South Vancouver, B.C.—August 29.—Mr. R. A. Smith's residence, Twenty-seventh Avenue. Loss, \$2,000. Origin unknown.

Lucknow, Ont.—Sept. 2.—Mr. R. Hellis' barn and contents destroyed. Mr. R. Nixon's residence. Loss unknown. Origin, lightning.

St. John, N.B.—August 31.—Rockwood Park pavilion. Loss, building, \$7,000; contents, \$2,000. Origin, probably defective wiring.

Eholt, B.C.—August 27.—Two hotels, drug store, post-office, empty store and residence. Loss, \$5,000. Origin, supposed carelessness.

Montreal, Que.—August 30.—Mr. W. Reed's sash and door factory, Duquette and Alwin Streets, Hochelaga. Loss, \$50,000. Origin unknown.

Port Stanley, Ont.—August 30.—The fishing tug Gordon Brown, owned by the Lakeside Fishing Company, took fire from her own boilers at the dock.

Port Hope, Ont.—Sept. 2.—Messrs. I. J. Taggart's and N. Dunsford's stores. Loss unknown. Insured with Gore Mutual, Queen City, and Ontario Fire Insurance Companies. Origin unknown.

Lethbridge, Alta.—August 20.—Two outhouses and fence. Loss unknown. Origin, hot ashes.

August 22.—Freight car of wheat. Loss, \$5. Origin, spark from engine.

Vancouver, B.C.—August 23.—Rear 118 Hastings Street West. Loss unknown. Origin, oil stove.

August 25.—Beehive Co-operative meat market. Loss and origin unknown.

Melville, Sask.—August 22.—Messrs. Hepburn & Aikey's hakeshop. Loss, building, \$375; stock, \$300. Insured with Nova Scotia Fire Insurance Company. Origin unknown.

August 24.—Grand Trunk Railway, two tanks of gas. Loss, \$60. Origin, lantern ignited gas.

Victoria, B.C.—August 26.—Residence. Loss and origin unknown.

August 28.—441 Kingston Street. Loss and origin unknown.

August 29.—441 Kingston Street. Loss, \$400. Origin unknown. Contents insured with Hudson Bay Insurance Company, none on building.

Chatham, Ont.—August 26.—Mr. Baker's store, 63 Adelaide Street. Loss, stock, \$87; buildings, \$125. Insurance, stock, \$500; buildings, \$600, Acadia Fire Insurance Company. Origin, rats and matches.

August 28.—Mr. D. J. McDonald's hotel, 6 King Street. Loss, \$19. Insurance, Gore, \$2,000; Independent Insurance Company, \$6,000. Origin, lamp explosion.

August 29.—Canadian Pacific Railway Hotel. Loss and Origin, leaking gasoline tank.

Hamilton, Ont.—August 25.—266 King Street West. Electric fixtures, etc. Loss, \$30. Insured with Northern Fire Insurance Company. Origin, crossed wires. Henessy's drug store, 268-270 King Street. Loss small. Origin, crossed wires. 168 Market Street. Loss, \$20. Insured with North America Fire Insurance Company. Origin, crossed wires.

August 27th.—18 Mary Street. Loss small. Origin, spark from forge.

SCORES OUTSIDE INSURANCE

Editor, Monetary Times:

The July issue of Industrial Canada exemplifies the extent to which "the interests" (a most expressive word) are blinded by "hoo-row." In one place they denounce the threshermen and farmers of the West for combining against those whole-souled patriots—the manufacturers of the East. In another, those self-same patriots announce the favorable arrangements made by their insurance manager for placing business with "unregistered foreign corporations"!

Thinking possibly there might be some "leaven of righteousness" amongst the proprietors of Industrial Canada, I addressed a letter to its editor for publication, but he evidently considered it beneath his notice.

The Monetary Times has nothing to fear from the presentation of both sides of any case, so perhaps you might find room for the letter which reads:—

"As a constant reader of Industrial Canada and as an ardent admirer of the lofty sentiments and patriotic tone which pervade its editorial matter, I have frequently been struck with the apparent lack of what might be called cohesion in its utterances—they do not seem to hang together.

"Let me illustrate: in your last issue you criticize the Western threshermen and farmers for agreeing amongst themselves to pass up the Made in Canada goods and buy from the foreigner, paying the duty, thereby helping the people as a whole instead of lining the pockets of the combinations and corporate selfish class.

"To you it seems incredible that Western threshermen and farmers should be so short-sighted, and you exhort them: 'Keep the work, the worker and the money in Canada.'

"Turn over two pages to the report of the Canadian Manufacturers' Association's executive council:—

"Ontario Insurance Act. In connection with the provisions of the above Act the Manager of the Insurance Department has received a license to act as a broker for business with unregistered foreign corporations to serve the interests of members of the Association in this capacity!"

"The threshermen and the farmers are thus patronizingly told to keep the work; the workers and the money in Canada; their advisors brazenly announce that arrangements have been completed whereby certain work, workers and money will be sent out of Canada!

"It might interest Industrial Canada and the executive council of the Canadian Manufacturers' Association to learn that at the recent annual meeting of the All Canada Fire Insurance Federation a motion instructing the secretary to prepare a list of all concerns placing their fire insurance outside Canada, so that the members (25,000 scattered all over the Dominion) might know those pursuing a course so unpatriotic and detrimental to the interests of the country as a whole, and so that every legitimate influence might be exerted to have withdrawn from them any fiscal advantages they now enjoy, was defeated by the slenderest majority.

"Truly this is a nice way to build up a united Canada: East against West; class against class. Are there none amongst the manufacturers of Canada capable of discerning the trend of all this?—and Industrial Canada would not publish my screed.

"Yours, etc.,

"Montreal, August 30th.

T. L. MORRISSEY."

The union of Canadian Municipalities adopted a resolution voicing opposition to the application of the Canadian Pacific Railway for permission to increase its capital stock by \$60,000,000, on the ground that the proposed increase is designed to keep dividends of the company below the limit at which the Government would be entitled to exercise control over freight and passenger rates.

BURGLARY INSURANCE

How It Has Developed—Broad Policies—The Business in Canada

Burglary insurance, which is transacted to a considerable extent in Great Britain, was introduced into Canada eighteen years ago. It is carried on by five companies, three Canadian and two United States. The total premiums received in 1910 in Canada amounted to \$55,934, and the losses paid to \$14,265, with unsettled claims outstanding at the end of the year amounting to \$3,780.

Mr. W. P. Learned, superintendent of the burglary department of the Fidelity and Casualty Company, writes that at the outset this class of insurance was restricted to loss by two kinds or classes of burglars—safe burglars and bank burglars. "To-day," he says, "we are all issuing insurances not only against safe and bank burglaries as originally undertaken, but under the guise of Burglary Insurance we are also insuring against so many other kinds of losses, that burglary insurance has become a misnomer, and the father of burglary insurance would have difficulty in recognizing his own children.

Guarantee Banks and Bankers.

"In the spring of 1892, at the suggestion of a man who had long been engaged in the safe business as selling agent of safe manufacturing companies, the Fidelity and Casualty Company undertook to guarantee banks and bankers, and also other users of safes, against the loss of money and securities and other valuables from their safes through attacks by burglars, and for a number of years that company had the field to itself. The upbuilding of the business was slow and difficult. The bankers certainly did not cry for the insurance as babies are said to cry for a certain well-known soothing syrup. They had to be educated up to the value of the insurance to them by force of example, by advertising matter of one kind and another, and by travelling expert safe salesmen, who by word of mouth, newspaper clippings and practical demonstration endeavored to convince the bankers of the ease with which their safes could be forced since nitroglycerine had supplemented the use of finely tempered and highly expensive wedges and drills and other burglar's tools.

Bankers' Burglary Insurance.

"In 1895 the company had succeeded in working up to a volume of premiums amounting to about \$65,000 practically all bankers burglary insurance. At the time it was questioned whether this was not about the extreme limit to be obtained, it being considered doubtful that the insurance would appeal to banks located in cities or towns of some considerable size, irrespective of their safe and vault equipment, or even to banks in the small towns, but with more or less superior equipments. Our fears in this direction, however, have proved groundless, as through the force of education the companies writing this line of burglary insurance now undoubtedly do an annual business approximating \$400,000 to \$500,000 in premiums, the insurance appealing to all banks, irrespective of location and the safeguards surrounding their funds.

"About 1896 one or two other companies entered the field, and the insurance was extended to apply to losses of household and personal valuables and effects in private residences, and also to merchandise from stores and other mercantile establishments. The insurance was still restricted to losses occasioned by burglars, which seemed to fill the demands of the insuring public. It was the fear of a call from these nocturnal visitors that caused householders to put away their silver and valuables and to carefully close and lock up their homes at night. Due to this extension of the insurance and the impetus given the business by the healthful competition of the newcomers into the field, burglary insurance writings grew apace until, in 1900, the five companies engaged in the business had gross writings amounting to approximately \$450,000, as compared with \$65,000 of one company in 1895.

Departed From Conservative Lines.

"One of two of the later companies to enter the field becoming restless under and dissatisfied with their slow growth, departed from the conservative lines under which the insurance had theretofore been conducted, and broadened their policies to cover losses by thefts, however and by whomsoever committed, thereby removing the reasonable safeguards surrounding the business of that day. The more conservatively disposed companies were compelled, no matter how much against their good judgment, to follow in the footsteps of these less conservative underwriters.

"It was not the insuring public that demanded this extreme broadening of the insurance, but the agents and brokers, who claimed that whether or not they believed in the conservatism of the older companies they were obliged to give their clients the most liberal contract on sale in the

market, irrespective of the responsibility and experience or rather irresponsibility and inexperience of the companies writing these more liberal contracts, lest other brokers by selling the more liberal contract might gain a foothold with their clients and eventually succeed in securing not only their burglary insurance lines, but also their more important fire and casualty insurance lines.

Twelve New Companies.

"Between 1900 and 1905 twelve new companies entered the burglary field, and the gross writings grew from \$450,000 to approximately \$1,600,000.

"In the next six years twenty-five additional companies entered the field, and the gross premiums were doubled, or, to be more exact, grew to approximately \$3,100,000, the writings in 1911.

"Against these gross premiums written in 1911 the companies paid out in that year something over \$1,000,000 in losses, a loss ratio of about 33½ per cent. on a cash in and cash out basis. Such a cash in and cash out loss ratio is not a fair exposition of the actual loss experience of the companies on the increasing business of the past year. It is safe to assume that were it possible to compute this loss ratio on an earned premium basis it would amount, instead of to 33½ per cent., to considerably over 40 per cent., and possibly to over 50 per cent.

Sub-Lines of Insurance.

"Inasmuch as the writings of the different companies in all of the several sub-lines of burglary insurance are reported in one lump sum under the general heading burglary insurance, it is, of course, impossible to determine what percentage of this volume of \$3,100,000 in 1911 is residence burglary, theft and larceny.

"Up to the time in 1899 or 1900, when the Fidelity and Casualty Company, following the lead of other companies, extended its burglary policy to include thefts by others than burglary, that company had worked up to a volume of about \$100,000 in premiums on residence business, and I doubt whether in the succeeding ten or eleven years it has much more than doubled its residence business. It is a question whether this same result would not have been attained had that company and the other companies entering the field confined their insurance to burglary only, under which in the great majority of claims all the companies would have had reasonable evidence of liability and would not be paying out money to-day by the handful, as they are, on claims for loss of articles where there is no evidence whatsoever of the commission of a theft other than a possible disappearance of the articles.

"It is a question whether we would not to-day be writing in burglary only premiums as large a volume of business as we are writing under our insanely broad policies.

"I take that position, first, by the natural increase in business which one would have reason to expect year by year, and second, by the impetus given the business by the competition of so many new companies and the advertising resulting from such competition. Even if the business had not increased quite so rapidly and so extensively as it would have done, it certainly is not open to question that the companies themselves would have made more money out of the business, and in all probability they would also have been able at the same time to have reduced the cost of the insurance to the insuring public.

Business in Canada.

The following are details of burglary insurance transacted in Canada in 1910, the latest figures available:—

	Premiums of the Year	No. of Policies renewed	Amount of new and renewed	No. of Policies in force in Canada at date

Moose Jaw Rural Municipalities is taking full advantage of the taxing powers conferred upon it by the rural municipalities act, and as a result expects to collect from the owners of subdivisions about \$25,000.

SCIENTIFIC FIRE UNDERWRITING IMPOSSIBLE

Because of the Ever-present Conflagration Hazard— Must Rebuild Our Cities With Fire-resisting Material

Several ways in which Canada and the United States may reduce their appalling fire loss were suggested by Mr. Franklin H. Wentworth, of Boston, in an instructive address delivered to the Nova Scotia Union of Municipalities. This was briefly noted in *The Monetary Times* last week. Mr. Wentworth, who is secretary of the National Fire Protective Association of the United States, said that the ever present conflagration hazard makes any approach to scientific underwriting impossible. "We have built," he stated, "largely of wood, and sooner or later we must pay the penalty, unless we can find some way in which to segregate or protect our cities."

"There is one way to solve this conflagration problem—not absolutely, but at least relatively. You cannot be expected to tear down your cities and rebuild them of fire-resistive material; the cities must be protected as they stand. In the heart of nearly every one there are streets crossing at right angles, along which for a considerable distance are buildings of brick, stone and concrete. Looked at upon the map this shows a more or less complete Maltese cross of buildings which are not wooden, and which operate to divide the wooden-built district into quarter sections, and which might hold a fire in any one of these sections if they were equipped to do so.

Valueless as Fire Stops.

"These brick and stone buildings are ordinarily valueless as fire-stops because their windows are of thin glass and their window frames of wood. At Baltimore and San Francisco the conflagration attacked such buildings easily; breaking out the panes; consuming the frames, and converting every story of these brick structures into horizontal flues full of combustible contents. Brick and stone buildings are logical and capable fire-stops if the fire can be kept out of them. The small city that will trace out its Maltese cross of such buildings and equip them with metal window frames and wired glass will immediately possess the equivalent of substantial fire walls crossing at right angles in its centre, dividing it into four sections. By such a simple, inexpensive, but yet strategic procedure many a city may save itself from the destruction which now awaits only the right kind of a fire on the right kind of a night.

"It is obvious that this form of protection is equally imperative in the brick, stone and concrete districts of all large cities where great values are housed in close proximity. Fires in the large cities entail an enormous waste because of the great values assembled there. We must come eventually to the equipment of all commercial, factory and office buildings with metal window frames and wired glass. This will mean the abolition of the conflagration hazard in our cities. Fires will then be unit fires, extinguished easily by a competent fire department within the building in which they originate; for the protection of window openings not only prevents fire from entering but prevents fire from issuing from the burning building. We may expect an occasional exceedingly hot fire to break down the defences of an adjoining building, but it is obvious that a conflagration could not get under way among buildings of fire-resistive construction with properly protected window openings.

Automatic Sprinkler System.

"Having thus fortified city buildings one against the other, extensive fires within individual structures can be prevented by the use of the now well-established automatic sprinkler system. The automatic sprinkler applies the water without the help of human agencies while the fire is still incipient. It will operate in a dense smoke as well as in a clear atmosphere. It will not throw excessive deluges of water in wrong places as the fire departments are continually forced to do. With our window openings protected and our buildings equipped with such extinguishers the conflagration hazard in mercantile districts will be eliminated. There will then remain for consideration our immense residence districts constructed almost wholly of wood surrounding the mercantile centres, like fagots around a funeral pyre. We can lessen the loss here by the abolition of the use of wooden shingles.

Danger of the Shingle Roof.

"The prohibition of the shingle roof, which is now generally recognized as a conflagration breeder, is to-day almost universal within city fire limits, and from the more enlightened communities it is excluded altogether. Burning shingles can be carried great distances by the wind or draught of a conflagration, and when they may alight in their turn upon other dry shingles, they make fearful havoc. The natural

anarchy of the American temperament does not readily respond to admonitions to correct its careless habits and recognize its public responsibilities, but our common impoverishment by the stupendous proportions of the fire tax is beginning to impress itself upon us so forcibly that even the most heedless of us is forced to give some thought to the common good and the common safety.

"It will not be necessary to remove all shingle roofs immediately. An effective city ordinance might require all roofs constructed in the future to be of incombustible material, and that all roofs which shall hereafter require repair to the extent of one-third of their area shall be replaced with incombustible roofs. The modern shingle is thin and the machinery which now makes it leaves a fuzzy surface which, after a period of drought, becomes like tinder. Without shingle roofs flying brands would not be carried over the brick centres of the city by the wind.

Responsibility of the Public.

"Outside of the abolition of the shingle roof, we must look for the protection of our homes to the corrected habits of our people. We must look carefully after the heating apparatus of our homes, giving them the constant and necessary attention demanded of receptacles containing fire. The building of proper flues and chimneys is especially necessary in connection with residences. The most vital matter in the home, however, is the proper use of the match. Every match is a potential conflagration, as every fire is of the same size when it starts.

"No match should be admitted inside a home except the variety which ignites only on the box. Hundreds of women and children are burned to death in America every year by the type of match which will ignite on any surface. These matches are allowed to lie indiscriminately about the homes. Small children are imitative, and if they can secure such a match, will attempt to ignite it, generally setting fire to their clothing. No father who has proper regard for his family will allow a 'strike anywhere' match in his home. The observation of the precaution I have indicated would mean an almost immediate reduction of the fire waste by perhaps fifty per cent.

Firemen Should Inspect.

"The mental habits of a people are a vital factor in affecting social progress. It is the mental habit of our people to assume that fire departments are maintained for the exclusive purpose of extinguishing fires. It is obvious, however, that fire departments have large possibilities for service in preventing fires; a service which is, I regret to say, yet largely potential. Every fireman, from the chief engineer down to the drivers and pipe men, should be regularly detailed for inspection service. Three or four hours a week for each man, going into basements, attics, courts and alleys, keeping down accumulations of rubbish—which spring up over night—locating the storage of inflammable oils and explosives; would keep the city clear of its most persistent fire dangers. Every fireman should in turn cover every section in the course of six months. One would thus check up the inspections of the other, and local conditions would become a matter for educational conversation about headquarters.

"There is, however, a most important result to be achieved by such an inspection system over and beyond keeping the city clean; and that is the education of the fire-fighters in the exact physical character of the city. To know exactly which passageways are open and which are closed; to know which are fire walls and which are not; to have a mental picture of the exposures, the windows, the roof openings, the cornices, and all the other physical details important in fire-fighting, would so heighten the team work of a department that, like expert swordsmen, they could make their thrusts without loss of time straight at the vulnerable part. There are a few cities in America where such practice, partially in effect, has already demonstrated its singular efficiency. The citizens of every town and city in the country should demand this sort of service from its fire department."

AT THE TORONTO FAIR

Several of the enterprising advertisers in *The Monetary Times* had attractive exhibits at the National Exhibition, Toronto. The city of Moose Jaw made an excellent display, as did also the city of Fort William, the latter being under the charge of Mr. Harkness. Messrs. Pickford and Black, of Halifax, were again responsible for an extensive West Indies' exhibit, one which every year attracts a large number of visitors. It is one of the most interesting exhibits at the Exhibition. Messrs. Goldie and McCulloch, of Galt, makers of safes and vaults, had an effective display, as did also Messrs. Ford and Featherston, manufacturers of similar goods. The various provincial governments' exhibits reflected the expenditure of much time, labor and thought upon their preparation.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Humboldt, Sask.—A \$30,000 by-law for an electric light plant was carried.

Selkirk, Man.—Until September 16th for \$13,000 5 per cent. 20-year sidewalk debentures. T. Partington, secretary-treasurer.

Red Deer, Alta.—Until September 16th for \$67,500 5 per cent. 20-year debentures. A. T. Stephenson, secretary-treasurer.

Harriston, Ont.—By-laws for the installation of an electric light plant costing \$11,000 will be submitted to the electorate.

Tofield, Alta.—The following by-laws were carried: Waterworks, \$25,000; gas distribution, \$43,000; industrial site, \$20,000; drainage, \$1,000.

Langdon S.D. No. 220, Alta.—For sale \$15,000 10-year school debentures. R. Conn, secretary-treasurer, Langdon. (Official advertisement appears on another page).

Macleod, Alta.—By-laws to raise \$81,000 for an incineration plant; \$50,000 for sewage disposal plant; \$36,000 for sewage extension and trunk line were carried.

Imperial, Sask.—Until October 1st for \$6,000 15-year 6 per cent. skating and curling rink debentures. J. J. Hobman, secretary-treasurer. (Official advertisement appears on another page).

North Vancouver, B.C.—The council passed a resolution unanimously to prepare and submit a by-law for \$50,000 to purchase additional stock in the Burrard Inlet Tunnel and Bridge Company.

Sarnia, Ont.—The new waterworks system will cost approximately \$250,000, and the necessary by-laws will be prepared at once and will be submitted to the ratepayers about the middle of October.

St. Clements Rural Municipality, Man.—The Municipal council have passed a by-law to issue \$12,000 30-year 4 per cent. debentures for highway improvements. Thomas Bunn, secretary-treasurer, St. Clements.

Kamloops, B.C.—The three by-laws to provide funds to carry out the improvements to the water and light systems and construction of the hydro-electric plant, totalling \$405,000, will be voted upon September 11th.

Hamilton, Ont.—The ratepayers may be asked next January to vote on by-laws to purchase the whole face of the mountain at a cost of \$130,000, and to meter the 12,000 water services in Hamilton, at a total cost of \$200,000.

London, Ont.—Early this year a bridge by-law calling for \$20,000 was carried but it has been discovered that a satisfactory structure cannot be erected for less than \$35,000, and probably a by-law to authorize this sum may be submitted to the electors.

Calgary, Alta.—A deputation from the General Hospital directors asked the city commissioners to consider the matter of framing and presenting to the ratepayers another by-law for the grant of \$150,000 for the needed extensions to the hospital.

Edmonton, Alta.—By-laws to provide for the raising by the issue of debentures the sum of \$150,380 for acquiring certain lands to extend the part and driveway system, and the sum of \$25,100 for bridges will be voted upon September 20th.

Berlin, Ont.—A request of the light commission to issue \$17,000 in debentures for two modern street cars, and an addition to the car barns was granted, and a proposition to erect and equip a tuberculosis sanatorium at a cost of \$15,000 on the site purchased by the city near Freeport, was carried.

Winnipeg, Man.—On September 13th the ratepayers will vote on four money by-laws, as follows: Water system from Poplar Springs, \$1,800,000; new exhibition site in Kildonan, \$500,000; additions to electrical distribution system, \$750,000; public bath house and gymnasium on Recreation Park Sargent Avenue, \$50,000.

Point Grey, B.C.—By-laws to borrow the sum of £32,000 sterling, equal to \$155,733.33, for school purposes, and to borrow the sum of \$126,533.33 for clearing roads and lanes, also to borrow the sum of \$200,020 to provide extensions and additional equipment for the water service of the corporation will be voted on by the voters on September 7th.

Port Arthur, Ont.—By-laws to authorize the purchase of a site for a new city hall, and to issue debentures for \$200,000 to authorize street extensions and to issue debentures for \$2,600,000; to extend the street railway and to issue debentures for \$34,000; to construct belt line street railway and to issue debentures or \$82,200 will be voted upon September 16th.

St. Thomas, Ont.—By-laws to authorize the granting of a loan of \$35,000 to the St. Thomas Biscuit Company and a fixed assessment of \$5,000, exclusive of school taxes for ten years, in consideration of establishing a factory in St. Thomas for the manufacture of biscuits, confectionery and

card-board boxes, and a loan of \$15,000 to the Erie Iron Works, Limited, and a fixed assessment of \$5,000 in consideration of the extension and improvement of its factory and machinery will be voted upon September 16th.

OTTAWA BONDS SOLD

Offer of the Bank of Ottawa Was Highest and Accepted—Bond Notes

Only four financial houses, one of them a United States firm, were sufficiently interested in the sale of \$1,041,929 4 per cent. bonds of the city of Ottawa to make a bid for them. That is the best possible indication of the present market conditions for municipal securities. The bonds were in two blocks, one of \$991,929.99 and the other of \$40,000. The Bank of Ottawa obtained both, their tender in each case being the highest received. The following were the tenders received for the \$991,929.99 block:—

Bank of Ottawa, Ottawa	94.
N. W. Harris & Company, Boston	92.593
Merchants Bank of Canada, Montreal	92.55
Dominion Securities Corporation, Toronto...	90.265

These were the tenders for the \$40,000 issue:—

Bank of Ottawa, Ottawa	94.
Merchants Bank of Canada, Montreal	92.55
N. W. Harris & Company, Boston	92.073
Dominion Securities Corporation, Toronto...	90.265

Edmonton's Tax Rate.

The Edmonton city council have formally approved of a tax rate of 12 mills on the dollar for 1912. This rate includes general municipal, debenture and school rates, but does not include special frontage rates for local improvements. This rate will produce a revenue of \$1,321,855, and is based on an assessment of \$109,756,330 for general and debenture purposes and \$127,781,800 for school purposes. The difference is accounted for by the fact that, while certain lands are for various reasons exempt from the general tax for the time being, all are liable for school taxes.

According to figures prepared by Montreal's city auditor, Mr. Pelletier, next year the city will have at its disposal sixteen million dollars to spend. The report shows that \$8,100,000 of this amount will come out of revenues, such as real estate taxes, water taxes, etc. The remainder will come out of loans as explained by the following:—

Public Works:—

Unused portion of 1911	\$ 778,306 00
Available in 1912	5,214,000 00

\$5,992,306 00

Over and above this amount the city can borrow to the extent of works on proprietor's account, such as pavings, half cost, of sidewalks, small sewers, which will amount in 1912 to about \$8,000,000	2,000,000 00
Amount available from revenue	8,100,000 00

Total \$16,100,000 00

Finances of Quebec.

The preliminary statement of the revenue and expenditure of Quebec province during the year ending with June 30th last shows: Ordinary revenue of \$8,070,109, and expenditure, ordinary and special, of \$8,310,123.

Including the outlays on new jails and courthouses for the districts of Montreal, Montcalm and Roberval, there was an excess of expenditure over revenue of \$240,014. There were special receipts, also, of \$412,314 on account of the Lower Canada Superior Education Fund, and of \$250,000 returned on account of subsidy voted to the Quebec Bridge—both from the Federal Government. On the other hand, \$82,000 was applied for the redemption of the debt.

The statement of the debt shows outstanding funded debt of \$24,169,781, with \$660,879 of temporary deposits, making a total of \$24,830,661.

Notes of Municipal Bidding.

Six Toronto bond houses bid for the Stettler Alta., \$14,800 5½ per cent. 20-year electric light and waterworks debentures. As previously noted, the award was made to the Dominion Securities Corporation.

Seven bids were made for the \$10,000 5 per cent. 30-year debentures of Windsor, N.S. The offer of the Royal Securities Corporation, Montreal, was accepted.

MORE TEMPORARY MUNICIPAL FINANCING

The municipalities of Point Grey, B.C., and Burnaby, B.C., have made short term loans, the former of \$1,200,000 and the latter \$550,000. The period is for one year and the rate 5 per cent. The loans were arranged with the Dominion Bond Company, of Toronto, Montreal, Vancouver and London, England.

SOME MONTREAL VIEWS OF BANK FIGHT

No Question Apparently as to Invalidity of Proxies—Forget Financial Cauldron is Boiling Hard in Montreal

Monetary Times Office,

Montreal, Sept. 5th.

Some criticism has been offered regarding the action of the meeting in disallowing the proxies of the representatives of the Paris interests at the annual meeting of the Banque Internationale. On this point there can scarcely be any question as to the legality of the stand taken. Possibly half a dozen lawyers, including Messrs Bristol, Marechal, Greenshields, Morgan and Perron, all of them King's Counsel, were present and gave their opinion on this point. Hon. M. Mathieu expressed the view that the directors would be acting wrongly in permitting the proxies. The chief objection is said to have been that the proxies had been attested before an employee of the bank in France instead of before a chief magistrate, mayor, notary public, commissioner, consular official, or other person authorized to exercise that function. In addition, the proxies arrived after the correct date. Some here think that the directors could have taken no other action without exceeding their powers.

Want Another Meeting.

The defeated Paris representatives are considering their next move, and if there is any means of opening the question again and having another meeting they will undoubtedly adopt it, unless a settlement is effected. The general view in financial circles here seems to be that they are in the wrong and have no recourse.

Sir Rodolphe Forget interested practically the same crowd both in the Quebec Railway and in the bank. Whether the Parisians resigned from the board of the Quebec Railway or were retired is not known. It is quite evident that they intended to force Sir Rodolphe from the Banque Internationale.

Simultaneously with these incidents heavy selling commenced of several of the stocks in which Sir Rodolphe is largely interested. Richelieu and Ontario, for instance, gradually sold lower from 120. At the same time heavy selling of Montreal Power went on, and the price, from around 235, gradually came down to 230, and on Tuesday broke to below 225.

Quebec Railway Meeting.

The opinion in certain sections here is that the Paris interests had been selling the Forget stocks. That seems unlikely, a much more probable explanation being that Sir Rodolphe has been selling them himself. If one were to assume that he, who has enormous interests in the Quebec Railway and its subsidiaries and in the Banque Internationale, was placing himself in funds to see the matter through, the market situation would be understandable. Quebec Railway stock is now 20 and the bonds 54. The annual meeting of the company takes place here next Tuesday, when it is hoped more light will be shed on the situation.

Eastern Canada Pulp Bonds.

Unfortunately, a further cause of trouble is furnished in the fact that the interest on the bonds of the Eastern Canada Pulp Company has not been paid, and, it is stated, is not likely to be paid. Once more, Paris capital has been hit, and, unfortunately, it would seem to be much the same interests as in the case of the Quebec Railway, Light, Heat and Power Company.

It is understood here that the directors of the concern made the mistake of building an expensive dam and plant on a stream which has not a sufficient flow of water the year round to keep the industry operating. Whether by the expenditure of a yet further sum the upper waters can be so controlled as to maintain this flow at a sufficient volume is not known.

Altogether the series of incidents make a bad advertisement for Canada. It is likely that it will be years before French confidence in Canadian investments will be fully restored in the circles concerned.

The name of the Texas Northern Land and Irrigation Company, Limited, has been changed to that of the Texas Prairie lands, Limited.

On August 1st, La Sauvegard Life Insurance Company, of Montreal, received a Dominion license for the transaction throughout Canada of the business of life insurance. This company was incorporated in Quebec in 1903. Its authorized and subscribed capital is \$1,000,000, with \$150,000 paid up. At December 31st, 1911, its admitted assets amounted to \$706,400, and its liabilities, except paid-up capital, to \$336,014. Its insurance in force was \$4,766,962. Its business has been principally with the French-Canadian people.

INSURANCE COMPANIES AS BOND BUYERS

Large United States Company, Doing Business in Canada, Will Switch to Mortgages—Differences of Opinion as to Value of Move

The Equitable Life Assurance Society will embark this fall on investment in western farm mortgages. With the opening of agencies for this purpose in four or five western states, the second largest life insurance company in the United States will begin one of the most significant experiments of the year in the financial field.

This action, it is thought, might narrow the bond market considerably if other big life insurance companies emulate the Equitable's example. The company has been doing business in Canada since 1868, Hon. S. P. Stearns being its chief agent for the Dominion, with head office at Montreal. The securities held by the company and on deposit with the Receiver General at Ottawa, have a par value of over \$2,000,000, and are comprised entirely of provincial and municipal bonds including those of the cities of Toronto, Montreal and Winnipeg.

According to the report of the New York State Insurance Department for 1911, the Equitable owns more than \$281,000,000 worth of stocks and bonds and \$99,000,000 of bonds and mortgages.

Opinions Differ Considerably.

A Wall Street authority does not think it is by any means a foregone conclusion that the insurance company market will be closed to the bond salesman. "Whether the Equitable will expand its farm mortgage plan to absorb any considerable portion of its funds for investment will depend on the profit shown by its venture on a small scale," he says. "Obviously this profit cannot be determined until the company has had occasion to dispose of the mortgages purchased, for the venture involves not only rate of interest but safety of principal.

"That there is no immediate occasion for concern over the threatening transition is suggested by the fact that there are such differences of opinion as to the promise of farm mortgages that the Equitable's example will not be followed by others of the big life insurance companies unless their views undergo profound change."

The head of perhaps the largest buyer of bonds among the insurance companies sees nothing in the farm mortgage to attract any large amount of life insurance funds away from the bond market.

Does Not Find It Suitable.

"We have made no plans to enter the farm mortgage field," said this executive, "and we contemplate no such plans. Small western insurance companies do a certain amount of such business but I cannot see wherein it is suitable for us."

As indicated by figures in The Monetary Times recently, Canadian life insurance companies are strong supporters of government, municipal, industrial and other bonds. According to the latest official figures, the life companies doing business in this country hold more than \$127,000,000 worth of these securities.

A branch of the Canadian Bank of Commerce has been opened at Hanna, Saskatchewan.

The Edmonton board of trade has urged the city council to take steps looking to the provision of a supply of natural gas for the city, it being regarded as a certainty that such supply is available within practicable piping distance, if not within the city itself. In the meantime plans are being matured and arrangements made for the purchase of material required for the installation of a distribution system, work on which is to be commenced as soon as practicable, the nature of the gas, whether natural or artificial, and the source of supply, to be left for settlement after further investigation of the possibilities.

Sir Max Aitken, M.P., with a number of English associates and Mr. R. B. Bennett, K.C., M.P., have purchased from Messrs. Beiseker, Davidson and Strong, the elevators of the Alberta Pacific Elevator Company, Limited, the West Coast Grain Company, Limited, and the terminals of the Globe Elevator Company, Limited, some eighty elevators in all. The purchasers propose making a considerable increase in the number of elevators and will by a vigorous campaign of construction endeavor to concentrate so far as possible the west-bound grain business that will be opened up by the Panama Canal at Calgary.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Saskatchewan.

Rexall, No. 697, \$1,200. V. L. Gee, Richie.

Lake McGregor, No. 2724, \$1,500. C. L. McIntyre, Queenstown.

CANADA'S COOPERAGE INDUSTRY.

Seven million two hundred and ninety-three thousand oak staves were imported into Canada during 1911, while only 2,768,000 were cut in the Dominion. These figures which show that Canada is fast losing her possibilities as a producer of tight cooperage, are contained in a bulletin issued by the forestry branch of the department of the interior.

In the manufacture of slack cooperage, used for the dry rough commodities such as lime, potatoes, apples, dry fish, flour, cereals, etc., which predominate in Canada's products, elm is the principal wood employed, forming over 50 per cent. of the total consumption. Spruce is rapidly coming into more general use as a source of stave supply, eleven million more spruce staves and nine million fewer elm staves having been used in 1911 than in 1910. When elm is exhausted birch will probably take its place, being comparatively flexible and available in great quantity.

The total value of the materials used in the slack cooperage industry in Canada for the past year was \$1,465,702. In 1910 it was \$1,595,119 or some \$130,000 more. Imports and exports of materials and finished product were, respectively, \$329,992 and \$135,463, an excess of imports over exports of \$194,529.

The total amount of material used was over 62,000,000 feet, board measure. Through checking, loose methods of manufacture, etc., etc., there is also a great deal of waste not accounted for.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 15th day of August, 1912, incorporating Alfred Bicknell, Gerard Brackenridge Strathy and Harold Ernest McKittrick, solicitors; William Hamilton, Walter and John Fraser MacGregor, accountants; George Whitaker Morley, law student, and William Robert Anderson, law clerk, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of pulp and paper manufacturers, importers and dealers, and to manufacture, prepare, import, buy, sell and deal in pulp wood, wood pulp, either mechanically or chemically prepared, and printing, writing and all other kinds of paper and all other articles incident to the manufacture of pulp and paper and articles in the making of which wood, wood pulp or paper form constituent parts; (b) To manufacture, buy, sell, deal in, prepare for market and otherwise dispose of timber, lumber, logs and other products of the forest, and to acquire, buy, sell and deal in timber lands and timber limits and in standing timber and rights or licenses held by persons to cut or remove such timber, and to acquire and deal in timber and logs and manufacture and deal in lumber, ties, laths, shingles and other wood products and in extracts, essences and by-products thereof and all articles of which timber or wood may form a constituent part; (c) To manufacture, buy, sell, distribute and supply light, heat, water and power, provided, however, that any sale, distribution or transmission of electric, pneumatic or other power or force or gas for the purpose of light, heat or power, beyond the lands of the company, shall be subject to local and municipal regulations in that behalf; (d) To acquire, own and operate either by steam, electric or other power, tramway and railway sidings on or over lands owned or controlled by the company or over lands adjacent to the lands of the company with the consent of the owner or holder thereof; (e) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (f) To acquire, construct, carry on, improve, operate, maintain, develop or manage, carry out or control roads, ways, bridges, reservoirs, watercourses, warehouses, elevators, wharves, steamboats and vessels; (g) To acquire all or any part of the assets and assume all or any part of the liabilities of any corporation, firm or person, and to issue in payment or part payment therefor or for any property, rights or easements which may be acquired by or for services rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities of or assumed by the company, paid-up shares or bonds, debentures, debenture stock or other securities of the company; (h) To sell, lease, turn to account or otherwise dispose of the whole or any branch or part of the business, undertakings, property, liabilities and franchises of the company to any other person or company, for such consideration as the company may think fit and in particular for shares, debentures or securities of any company having objects similar to those of this company; (i) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights, or information so acquired; (j) To subscribe for, purchase, take in exchange, or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell or other-

wise dispose of shares, stock, debentures, bonds, and other obligations of any other company having objects similar in whole or in part to the objects of this company or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents as the directors may appoint; (k) To enter into partnership or any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (l) To develop and turn to account any land acquired by the company or in which it is interested, and in particular by laying out and preparing the same for building purposes, constructing, altering, pulling down, decorating, maintaining, fitting up and improving buildings and conveniences and by planting, paving, draining, farming, cultivating, letting on building lease or building agreement and by advancing money to and entering into contracts and arrangements of all kinds with builders, tenants and others; (m) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (n) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined; (o) To distribute in specie or otherwise, as may be resolved, any assets of the company among its members and particularly the shares, bonds, debentures or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company; (p) To enter into any arrangements with any governments or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (q) To do all or any of the matters hereby authorized either alone or in conjunction with, or as factors, trustees or agents for any other companies or persons or by or through any factors, trustees or agents; (r) The powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (s) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Toronto Paper Manufacturing Company, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 16th day of August, 1912.

THOMAS MULVEY,
Under-Secretary of State.

7-2 Dated at Toronto this 23rd day of August, A.D. 1912.
BICKNELL, BAIN, STRATHY & MACKELCAN,
Solicitors for
TORONTO PAPER MANUFACTURING COMPANY, LIMITED.

BRITISH FIRE INSURANCE PROFITS

A summary of the returns made to the Imperial Board of Trade by the British fire insurance companies has been completed by the Policyholder, of Manchester. It says: "As this covers the record year of 1910, it goes without saying that they are highly satisfactory on the whole. The results for the past year (1911) will not be nearly so good when they come to be summarized. These figures show the following results:

Premiums	£29,157,784
Claims (48.2 per cent.)	£14,039,900
Expenses (20.0 per cent.)	5,849,726
Commission (16.5 per cent.)	4,809,368
	24,698,994
'Surplus (15.3 per cent.)	4,458,790
Less increased reserve for unearned premiums ..	479,903
Net surplus (13.6 per cent.)	£3,978,887

"Thus, in what was perhaps the finest year on record, a profit of 13½ per cent. was produced. The general public probably thinks this is about the normal profit which a fire office may expect, and it is this belief which has led to the formation of so many non-tariff institutions. These concerns have promptly commenced cutting the tariff rates by 10, 15 or 20 per cent., and many of them do not wait for the best business, but take any class of rubbish which is offered, and then are surprised that large profits are not forthcoming. The overwhelming strength of the great offices is the striking feature of the table. They reserve 40 per cent. of the premiums to meet their liabilities in respect of unexpired risks, but in addition thereto they place aside further sums, so that they always have about one year's income set aside for contingencies. Contrast this with some of the small non-tariff offices.

"It must be remembered, however, that when ratios and reserves are under consideration, the age of a concern must

not be overlooked, and from a public standpoint the paid-up capital is also an obvious factor of importance. During the current year many non-tariff offices have joined the majority, some by liquidation and others by amalgamation. The table we reproduce shows all of them to be nearly at the end of their resources, and this at the close of the prosperous 1910—so it is not surprising that trying 1911 finished them. Taking the lean and fat years together, the tariff offices only make a profit of about 7½ per cent. per annum, and this fact must be faced by non-tariff concerns. They can only hope to succeed by writing on conservative lines, and the few that have done this are showing signs of longevity and prosperity."

The staff appointed for the Regina branch of the Sterling Bank is as follows:—Mr. Chas. O. Hodgkins, manager; Mr. S. B. Chapple, accountant; Mr. J. H. C. Coneybeare, ledger-keeper. And the following recent changes and appointments have been made by the Sterling Bank:—Mr. W. F. Burrell, accountant at West Toronto branch has been appointed acting manager at the Broadview Avenue and Wilton Avenue branch; Mr. J. R. Carr of Winnipeg branch has been transferred and is acting manager at Bridgeburg, Ont.; Mr. H. L. Preter, late accountant at Uxbridge has been appointed acting manager at Port Credit; Mr. R. W. M. Thomson, accountant at Cornwall branch is acting manager at Almonte branch during the absence of Mr. J. Bain on sick leave; Mr. G. R. Bradley, teller at St. Catharines branch has been transferred to Winnipeg.

Under the name of the Pacific Automobile Company, all the big-transportation companies of Vancouver have merged. The French Automobile Company, the Columbia Taxicab Company, and the Vancouver Transfer Company, have been absorbed. The capital of the concern is half a million dollars. Officers are: Mr. E. H. Heaps, president; Mr. Noel Humphreys, managing director; G. M. Gibbs, A. S. French, J. F. Langan, directors.

DEBENTURES FOR SALE

STORNOWAY, SASK.

School District, No. 829.

Tenders will be received not later than September 10th, 1912, by the undersigned for the purchase of \$4,000, 20-year, 6 per cent. school debentures. First payment of principal and interest, 1st January, 1914.

F. THOMSON,

The Board of Trustees of Langdon S.D. 220, Alta., is offering for sale fifteen hundred dollars' worth of School Debentures to be paid in ten equal annual instalments with interest. Apply to

R. CONN, Secretary-Treasurer,
Langdon, Alta.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

Common Stock.

Notice is hereby given that a quarterly dividend of 1½ per cent. for the three months ending the thirtieth day of September, 1912, being at the rate of 7 per cent. per annum, has been declared on the Common Stock of the Company.

Preference Stock.

Notice is also given that a half-yearly dividend of 3½ per cent. for the six months ending the thirtieth of September, 1912, being at the rate of 7 per cent. per annum, has been declared on the Preference Stock of the Company.

The above dividends are payable on the first day of October, 1912. The Transfer Books of the Company will be closed from the sixteenth to the thirtieth day of September, both days inclusive.

By order of the Board.

J. J. ASHWORTH,
Secretary.

Toronto, September 5th, 1912.

LAND VALUE TAXATION

Land value taxation was the subject of discussion at three sessions of the Tax Reform League of Eastern Canada held in Toronto. The election of officers for the ensuing year resulted in the selection of the following:—President, Julian Sale, of Toronto; vice-presidents, Romeo Langlais, for the Province of Quebec; Alderman H. H. Stewart, for New Brunswick; Hon. R. M. Macgregor, for Nova Scotia; and W. M. Southam, for Ontario; treasurer, Mr. D. B. Jacques, of Toronto; secretary, Mr. A. B. Farmer, of Toronto; executive committee, Mr. W. A. Douglass, Mr. J. J. Carroll, Mr. P. P. Fornor, Mr. Milton Kerr, Mr. A. C. Thompson, and Mr. John Medland.

Mr. Francis Neilson, M.P., of London, England, stated that the movement had made more rapid strides in England in the past six months than in the twenty-five years preceding. The single tax movement now figured prominently in the election of members of Parliament and would continue to be an issue because of the interest taken in the subject of the young men of England.

Mr. Buchanan, of Winnipeg, stated that nearly every municipality of Western Canada had become converts to the land value tax movement through a campaign being waged by its followers and advocates.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CONDENSED ADVERTISEMENTS

WOLVERTON & CO, LTD.

Suite 704 Dominion Trust Building, Vancouver, B.C.

A STRONG CASUALTY COMPANY, long established in Canada, requires an active special agent who can develop and produce in Ontario. State age, salary, experience. Apply Box 83, Monetary Times, Toronto.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

WANTED

We want a few reliable agents to sell real estate on commission. We have several very attractive propositions and can give exclusive listings to responsible parties. We have some suitable syndicate propositions. Reply to Alliance Investment Company (Canada), Ltd., Calgary, Alberta.

The Winnipeg cartage companies announce a new scale of rates which went into effect September 1st. An increase of 50 per cent. over the present charge is made on one important class of goods, and the minimum rate on small articles will be raised from 15 to 20 cents. In addition, certain limits have been established outside which another, and still higher tariff will be collected.

The following securities were sold by auction at Montreal on the opening day of the securities auction there:—5 shares City Ice Company at \$100; 3 shares Kensington-Brandon Land & Development at \$56; 5 shares Freeman's Limited, at \$126; 5 shares Crystal Spring Land Company at \$90; 20 shares Tate Accumulator Company at \$35; 3 shares St. Regis Hotel Company at \$102.50; \$1,000 bond and 50 per cent. stock, Sterling Coal Company at \$95; \$500 interim script, Stanley Mineral Springs & Brewing Company bonds, and 20 per cent. stock at \$96; \$1,000 bond National Bridge Company at \$87; 50 shares common, Canadian Theatres Company at \$42; 1 share Missisquoi Marble Company at \$60; 1 share preferred Canadian Cereal & Milling Company at \$24.50; 25 shares American Palace Car at 25c.; 4 shares International Educational Publishing Company at \$42; 50 shares Canadian Northern Quebec 5 per cent. statutory stock at \$5.50.

Great Northwest Investments Ltd.

aim to be classed as the most conservative advisors to investors in Western Real Estate and to make absolutely no statements which are not based strictly upon ascertained facts. This Company's Service Department is prepared to act, without charge, in an advisory capacity to investors in Western Property.

GOOD OUTLOOK IN RIO DE JANEIRO.

In view of the large Canadian interests in Brazilian enterprises, the remarks of the president of the State of Rio de Janeiro, in his recent message, regarding the development of the state, have considerable interest. The condition of prosperity which commenced to reveal itself during the Government of Senor Nilo Pecanha has increased under the present President, Senor Oliveira Botelho. Dealing with educational reform the message states that the system of subsidizing elementary schools, recently adopted, has had excellent results. Primary instruction cost the State about 1,500 contos of reis, or 16 per cent. of the budgetary receipts. Professional instruction, the sanitary and statistical services, and public works deserve the careful attention of the Government. Several buildings have been rebuilt, and the city has been embellished and made more sanitary. The question of colonization, on which the future of the State depends, demands the attention of the Government. The State is in possession of immense areas of territory, the ownership of which has lapsed, in a healthy and fertile region, which will be divided among the immigrants on easy terms. A provisional contract for the settlement of 5,000 colonists has already been concluded, and is now being carried out. The State possesses about 2,500 kilometres of railway lines.

The economic situation shows continued development. The system of varied agriculture inaugurated by Senor Nilo Pecanha has been remarkably successful. The exports of several products show during a short period extraordinary increases, notably grease, butter, fresh vegetables, potatoes, and fruit. The output of manufactured articles has especially increased, particularly dry goods, woolen and cotton goods. The total value of the exports amounted to 109,956

contos of reis, including 79,534 for vegetable products, 11,539 for animal products and 6,900 for mineral products.

The revenue, estimated in the budget at 9,050 contos of reis, amounted to 9,066, showing an increase of 1,003 over the revenue for 1910. The expenditure for 1911 amounted to 8,200 contos of reis, including 1,262 contos for supplementary votes, leaving a surplus of 856 contos. The revenue for the first six months of 1912 had reached 6,416 contos of reis and the expenditure 5,699 contos. The State debt, which amounted to 32,570 contos of reis in 1910, had been reduced to 30,647 contos last June. The President's message has created an excellent impression and the newspapers praise Senor Botelho.

WOULD REMOVE DUTY ON PACKING CASES.

The Dry Goods Section of the Retail Merchants' Association at Toronto decided at their annual meeting to forward to the Dominion Government a resolution opposing the duty of fifteen per cent. which is charged on British packing and wrapping-cases and twenty per cent. on foreign packing-cases. As these are of little or no value and as the duty is quite an item in the majority of cases, it is desired that they shall be admitted free or at a much lower rate than at present.

Shortage in measure, which is frequently experienced in connection with imported goods, was another matter which was discussed at length, and some action looking to a remedy will be recommended at a later meeting. A resolution was carried opposing the granting of special privileges to mail-order houses, while criticism was directed against the act which makes it illegal to engage female help after 6 o'clock.

AUGUST MUNICIPAL BOND SALES

Ottawa Made an Issue of More Than a Million Dollars
—Five Provinces Were in the Market

The municipal bond sales in Canada for August as compiled by The Monetary Times, amounted to \$1,649,547, compared with \$1,967,376 for July and \$1,493,507 for the corresponding period last year. Ottawa made the largest issue. Halton County, Ont., and Lethbridge made only other large issues. There were five provinces in the market.

The following are the particulars by provinces:—

Ontario	\$1,283,452
Saskatchewan	195,500
Alberta	122,000
British Columbia	43,595
Nova Scotia	5,000
	\$1,649,547

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$ 881,838	\$ 420,337	\$ 2,133,531
February	1,272,977	1,037,287	2,596,378
March	1,169,730	6,271,025	1,726,716
April	6,805,078	3,910,288	927,160
May	5,964,896	3,946,047	1,928,748
June	2,187,588	3,983,670	1,690,344
July	1,536,424	1,594,566	1,967,376
August	1,312,953	1,493,507	1,649,547
September	2,841,486	1,748,778	
October	2,211,461	1,730,075	
November	2,292,781	2,915,765	
December	566,113	1,243,593	
Total	\$20,043,325	\$30,295,838	\$14,619,800

The following are the details:—

Ontario.

CANADIAN PACIFIC FINANCE

The statement of Sir Thomas Shaughnessy at Winnipeg respecting chiefly the new issue of stock by that company, was a clear exposition of the financial side of the argument. It will not satisfy every critic, and cannot be expected to do so. The fact that the question of rates was being considered by the Dominion Railway Commission caused Sir Thomas to give only passing reference to that matter. It is one, he says, "which must be considered by itself. That may be the railroad view, the financial view, the correct view, but it is not the view of the people of Western Canada. The prairie provinces desire lower freight rates, and, although the Railway Commission are investigating the question, they naturally seize upon the proposed new stock issue as a possible medium for the desired effect. The so-called "melon-cutting" and the question of lower rates would be considered as separate matters by Western Canada were assurance given either by the Railway Commission or by the Canadian Pacific Railway itself, of reduced rates on freight. Indeed, with that assurance, the stock issue would not likely trouble the Western mind.

Little criticism can be made of the strong arguments advanced by the railroad president for the new stock issue and its method of issue. These appear on another page. It is obvious, as Sir Thomas points out, that the government would not likely relieve the railroad directors of their duty and fix the premium at which the shares should be offered to the proprietors or the public. Naturally, that action would be accepted as an undertaking on the part of the Government that the market price of the shares would never fall below the figure named. The credit of a government, a municipality or

a railway company is a delicate matter, especially if funds are required periodically. The strong position of the Canadian Pacific Railway to-day is due, as its president says, "to almost universal faith in the correctness of its methods." The directors know exactly what they can and cannot do in the money markets. They realize that reckless or poor financing and certain other actions would stop the supply of funds for operation and development of the road. The maintenance of the credit of the Canadian Pacific Railroad is a matter of national importance.

The Monetary Times believes that the financing of the Canadian Pacific Railway is a matter entirely for the judgment of the directors. The reduction of freight rates should also be seriously considered by them. In that connection it is interesting to read the remarks of Sir Thomas respecting what is known as the "ten per cent. clause" in the company's contract with the Dominion Government. Briefly stated, the contract provided that the company's rates for the carriage of traffic should not be subject to parliamentary supervision until such a time as the company was earning ten per cent. per annum on the capital actually invested in the work. Dividends played no part. It made no difference whether the company was paying 20 per cent., 10 per cent., 5 per cent., or no dividend at all. The determining factor was the earnings resulting from the operation of the railway. "For a long time," said Sir Thomas, "we have not pleaded that we were not earning 10 per cent. Our rates and tolls have been submitted to the Railway Commission, and are dealt with in exactly the same way as those of any other railway company in the country, excepting the Intercolonial, which does not come under the jurisdiction of the Commission. So that the ten per cent. clause, as it is called, has been a dead issue for

a considerable period. Our rates are the lowest on the continent, but the subject of rates is now before the Commission for consideration, and, therefore, I do not think it proper to enlarge upon the subject. It may be taken for granted that, whatever the decision of the Commission may be, the ten per cent. clause will not be a factor, directly or indirectly. As I said before, it was a condition of the original contract that was swamped and buried by the growth of the company's earnings, and it could not be pleaded now, even if the company desired to do so."

The demand of Western Canada for lower freight rates is insistent. In some way it will have to be answered. The reply, however, is scarcely in any action which would interfere with directorial responsibility, and which might injure seriously the credit of the railroad. Perhaps the Dominion Railway Commission will find the solution.

EXTENDING TRADE WITH AUSTRALIA

Next February, Mr. Foster, Minister of Trade and Commerce, will sail for Australia and endeavor to improve Canadian trade relations with that country. We are enjoying fair business now, but there seems no substantial reason why both countries cannot participate in greater trade. The Canadian Commissioner at Melbourne, Mr. D. H. Ross, has obtained preliminary figures for last year. They are subject to minor corrections. The returns were made available to Mr. Ross in advance of publication, and, with the figures for the three previous years, are given—for comparative purposes—in the appended table:—

	1908.	1909.	1910.	1911.
	£	£	£	£
Australian imports from Canada ..	532,752	680,590	802,045	844,235
Australian exports to Canada	79,135	80,242	100,398	118,284
Total trade..	611,887	760,832	902,443	962,519

The principal items of Canadian goods and products sent to Australia which show increased trade in comparison with the previous year are scheduled thus:—

and parts	46,168	64,873	18,705
Articles, other	6,447	10,998	4,551

Australian imports from Canada in 1910 exceeded 1909 by £121,505, whereas the increase for 1911 over the preceding year is given at £42,190. The inability of some Canadian shippers (referred to in a subsequent

paragraph) to execute orders had a distinct bearing upon the curtailment of exports. Although the 1911 figures constituted a record, yet the result is disappointing in view of improved shipping facilities, and that Australian imports of oversea merchandise showed an expansion of £6,186,848 over the previous year. Agricultural implements have maintained large figures. Taking into consideration some alteration in the classification of imports, the most noticeable increases have been made in the items of metal manufactures by £20,539; rubber manufactures, £5,744; furniture, £9,945; timber, £44,178; wood manufactures, £2,874; stationery and paper, £6,984; vehicles, particularly motor cars and chassis, £18,705, and sundries (including blacking £3,827) by £4,551.

The items showing decreases are few in number, but these include several important industrial lines. The marked decline in exports of canned salmon from British Columbia was attributable to packers being unable to supply the demand. The Australian system of dry, cool storage, for the preservation of fresh fruit, obviates to a large extent the necessity of importing apples, which is reflected in the imports. The consumption of printing paper was never greater in Australia, and hence the contraction in imports of this line from Canada can only be assigned to two reasons, viz., accumulated stocks or the competition from Scandinavian and other foreign paper mills. The full significance of the 1911 decreased imports of some lines from Canada cannot be ascertained until the complete trade returns of the Commonwealth are available some months hence.

Reporting on Australian trade conditions, under date of June 1st, Mr. Ross says: "A moderate rainfall has recently been experienced on the coast line of several of the States, but, over the great bulk of Australia, evidence of the continued dry weather is reflected in heavy losses of sheep and cattle. The outlook is, therefore, not reassuring, and is bound to lead to a contraction in the volume of imports as a natural sequence to reduced production. Imports for the first five months of 1912 show a considerable increase over the similar period of last year, while the volume of exports has also been well maintained. The Canadian steamers from St. John have brought large cargoes for Australian ports, of which lumber comprised a considerable portion. Beginning with the May sailing from Montreal, a more diversified cargo may be expected."

The successful conclusion of the negotiations with the West Indies and the forthcoming effort to improve commercial relations with Australia, recall the fact that Canada's trade within the British Empire is gradually increasing. In 1901, imports into Canada from countries of the Empire totalled \$46,667,758, and in 1911, \$129,520,844, a gain of \$82,853,086, or 177.54 per cent. Exports from Canada to the same countries in the former year amounted to \$113,380,057, and last year to \$154,137,007, an increase of \$40,756,950, or 35.94 per cent.

WATCHING CREDIT

Branches of the Canadian Credit Association are multiplying. The latest is at Regina, which will be the Saskatchewan headquarters. Canada is a close associate of credit, and it is well that the intimacy should be constantly analysed. The law which the New York State Bankers' Association succeeded in having passed through the legislature relating to the obtaining of property or credit by use of false statements became effective on September 1st, and provides severe penalties in the way of fine or imprisonment, or both, for those who traverse its several sections, and, so far as application goes, is of direct benefit to banks and financial institutions, which have suffered so many losses in the past through the making of false statements by borrowers. Similar statutes are now in force in a number of the States, and, with the assistance of the American Bank-

ers' Association, it is hoped to make the same law general throughout the republic.

The Canadian Credit Men's Association of Canada is working along similar lines. Its legislative committee advises the various Provincial Governments, as well as the Federal Government, where improvement is deemed necessary to existing laws affecting credit men all over the Dominion. The principle upon which this committee works is first of all to be satisfied that certain improvements are desirable. The next step is to demonstrate conclusively to the law-makers this desirability. Once this has been done, and been acknowledged by the latter, it has been found that the various legislatures are willing to co-operate in the passing of such Acts as shall be for the general welfare of the whole community. This is only one of the many laudable objects of the Association, for whose work there is ample room in the Dominion.

CANADIAN LLOYDS FOR MARINE INSURANCE

Marine insurance here has become a matter of disagreement between Canadian interests and British underwriters. The centre of the discussion is the St. Lawrence route. Considerable money has been expended on the improvement of the river route, and the risks of navigation have been greatly minimized. On another page are printed the views of the underwriters. Unfortunately for Canadian shipping, their arguments are far stronger than those advanced in Canada. It is true that much has been done to improve the approaches to Montreal and other ports, but, as the marine insurance men state, we have not yet abolished the fogs which so frequently prevent safe navigation, and are the cause of many disasters to shipowners and underwriters every year. The problem which the underwriters have given Canada is to provide clearer weather off the coast. Then, and then only, we are told, they would rejoice greatly and at once adjust their premiums.

The formation of a Canadian Lloyds agency has been suggested. This would be a local organization with, apparently, government assistance. Lower terms than those of the British insurance men would be offered. *The Monetary Times* thinks that such an experiment would prove a failure. Backing our harbor improvements and youthful opinions against the fog danger and the lengthy experience of qualified underwriters, is dangerous.

Mr. Rogers, Minister of the Interior, in order to prevent the accumulation of too large an amount of grain over the winter, suggested the extension of the navigation season on the Great Lakes for a month longer than usual. The underwriters say that they cannot agree to this. Here, again, we feel that the underwriters are right. The risks of navigation will not adjust themselves to desires.

SMALL CHANGE

Forjet it!

* * * *

Three New York goats ate \$145. The owner feels these bill-goats are the worst money-box puzzles he ever struck.

* * * *

This is about the time our sportsmen get out their guns for the Bull Moose in Northern Ontario and New Brunswick.

* * * *

Instead of calling the Privy Council "a bunch of old wig-headed judges, who decide almost every time in favor of private corporations," Alderman J. Clark, of Edmonton, should help a campaign in favor of first-class lawyers for municipal corporations.

Of the total traffic passing through the Canadian Soo canal, 82 per cent. was United States traffic. President Taft please note.

* * * *

The daughter of Quebec's lieutenant-governor has killed a bull moose. It now remains for the elephant to be chloroformed.

* * * *

Thirty-four thousand seven hundred more men are needed for the Western harvest and about that many more inches of summer sunshine.

* * * *

Those visitors who say in Canada we have the worst hotels, noisiest street cars, best mud, poorest roads, etc., etc., etc., probably have to be cruel to be kind.

* * * *

The loan to China of \$50,000,000 advanced by Lloyds' Bank is secured upon unpledged revenue, chiefly the salt duty—not the only loan which has had to be taken cum grano salis.

* * * *

The plea of *The Monetary Times* for a public and not a secret investigation of the Toronto detective department in regard to the Farmers Bank case, has been answered in the affirmative.

* * * *

Orders for steel rails, fastenings and tie-plates, with a value of \$7,000,000, have been placed by the Canadian Pacific Railway this year. This is a striking illustration of Canadian railway development.

* * * *

The gist of the advice of Mr. D. R. Wilkie, president of the Imperial Bank, who has just returned from England, is that Canada should restrict its borrowings until a favorable change occurs in the London money market. This is sound and opportune counsel.

* * * *

The capacity of one of Montreal's grain elevators is to be increased by 1,500,000 bushels. If that does not give the desired relief, another elevator will be increased by 2,000,000 bushels. The Dominion Government and the Harbor Commissioners should exert every effort to place the facilities of this port above criticism.

* * * *

Many stories have been sent from Ottawa as to what Mr. White, Minister of Finance, proposes to do with regard to the revision of the Bank Act. All these are guesses, and most of them poor ones. Mr. White has not a habit of telling newspaper men what he is likely to do, before the matter has been fully discussed with his ministerial colleagues and with many others who wish to be heard.

* * * *

We would advise the London and British Columbia Industrials, Limited, of Vancouver, who are selling the stock of the Night and Day Company, Limited, and we would advise the latter company also to read that part of the Bank Act respecting the use of the title "bank," etc., without being authorized so to do by the act. The company says it will do a banking business by night and day, but it has not obtained a Dominion bank charter. Besides which, there is no room for a night bank in Canada.

* * * *

One of our Winnipeg contemporaries wrongly imputes eastern jealousy of a northern route when *The Monetary Times* suggested the abandonment of the Hudson Bay scheme. It overlooked the fact that we have done all possible to emphasize the necessity of the western shipment of the prairie wheat. The Vancouver outlet is not clogged at any time with bad winter conditions. The Hudson Bay outlet has more ice for a long period than is good for the health of shipping.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

IX.—CANADA'S PACIFIC GRAIN PORTS

As we have seen, the prairie provinces look to the Panama Canal as a stimulant to the Western shipment of their wheat and grain. The Pacific coast ports regard it as a stimulant to their standing as grain ports. This question is having the attention of the Dominion authorities. Mr. Foster, the Minister of Trade and Commerce, it will be remembered, recently asked the Vancouver Board of Trade to supply him with information as to the extent of exports of grain through Vancouver in the last few years and the countries to which cereals had been shipped; the prospects of these exports being increased, and what there is to indicate that the grain for European markets will be diverted to go through the Panama Canal.

The information which the special committee of the board of trade secured is substantially as follows: That during the last three years there has been exported through the port of Vancouver, notwithstanding the fact that there are practically no facilities for handling grain here, and the railway rates to this port are high, about 750,000 bushels of wheat and 500,000 bushels of oats. All of the grain was sacked. The wheat went chiefly to Mexico, and the oats principally to the Philippines, although there were minor shipments to China and Japan.

Shipments Will Increase.

The indications that these shipments will increase are numerous. The completion of the Grand Trunk Pacific, the Canadian Northern and the practically new main line of the Canadian Pacific Railway, double-tracked, with gradients equal to and in places better than those on the prairies, will give the same rail rates west-bound for the same distance as the present eastbound rates, working out to a reduction of from 25 per cent. to 33 per cent. of the rates now in force.

With the completion of the Panama Canal there will also be a large decrease in the distance to Liverpool from Vancouver, the present water route being about 15,000 miles, while with the Canal open for traffic the distance will be brought down to less than 9,000 miles, which, with the added tonnage which will be regularly making Vancouver a port of call, in addition to the tramp tonnage available, will give a corresponding decrease in the water freights.

Eastern Outlets Cannot Handle.

That the Eastern rail outlets are incapable of handling the grain is shown by last fall's experience, when over 15,000,000 bushels of Canadian grain were despatched by way of Duluth.

From the enquiries made by the board's committee they believe that the future rail rates from points in Saskatchewan and Alberta west of Moosejaw to Vancouver should approximate fifteen cents a hundred-weight, or nine cents a bushel, as compared with the twenty-three cents a hundredweight, or fourteen cents a bushel, now in force. Ocean rates from Vancouver to Liverpool via the Suez Canal or around Cape Horn for the last three years have been twenty-five to thirty shillings per long ton. With the shorter route to be provided by the Panama Canal the rate ought not to be more than twenty shillings per long ton, or thirteen cents per bushel, or a total charge against the grain from the point of production on the prairie to the consumer in Great Britain or the Continent, through the port of Vancouver of twenty-two cents a bushel.

Rates on Grain.

The present rates on grain from the prairie provinces by the lake and rail route via Fort William

amount to from twenty-five cents to twenty-six cents per bushel, and the all-rail or winter route, which most of the grain has to take owing to the short period of navigation on the Great Lakes after the harvest, has a rate of thirty-six and thirty-seven cents. Storage charges during the winter months on wheat amounts to five cents and more when kept waiting shipment. If it was shipped through the port of Vancouver there would be no storage charges practically, as the port is open the year round, and there would be no cessation in the movement of freight owing to the closing of navigation from ice.

In this connection, we may recall the evidence of an expert before the United States House Committee on Interstate and Foreign Commerce relative to the Canal, when he traced possible routes to be followed by vessels starting from Europe bound for the East. In some cases he thought ships which had gone via the Suez Canal to Northern China and Japan and which did not have good cargoes in sight for return would go across to Vancouver and the northern ports of the United States and take on cargo there, then returning via the Panama Canal to Europe, or would stop on the eastern coast of the United States and discharge cargo there, possibly taking on more.

From Canada via Vancouver.

This led to inquiries from members of committees as to the lumber trade of the Pacific coast and the ques-

DOCK AT PRINCE RUPERT

The Pacific terminus of the Grand Trunk Pacific Railway is one of our ports which will benefit from the opening of the Panama Canal

tion of grain exports from Canada via Vancouver. The expert said that at present the grain movement was not a growing one. He thought that when the Grand Trunk Pacific had opened up the new grain fields of the North-West the movement might expand considerably, and might be directed via the Canal, some of the grain going to Eastern ports of the United States or continuing to Europe. The lumber movement would probably be largely increased and most of it would go through the Canal.

It is interesting to recall that all three of the Pacific coast States are heavy exporters of wheat. This goes around Cape Horn in sailing vessels, averaging about 1,800 tons register. After the Canal has been opened the ship used will doubtless be a steamer of not less than double, and probably three or four times, the size of the sailing vessels now employed. The freight rates now vary from \$5.50 to over \$10 per long ton—from 15 to 26 cents a bushel—depending upon the available supply of ships. A steamer of large dimensions could doubtless carry the grain by way of a canal from our west coast to Europe for 10 cents a bushel—\$3.73 a gross cargo ton—and pay from that freight receipt \$1 per register ton—less than 50 cents per cargo ton—for canal tolls.

(To be continued.)

WHEAT, CLIMATE AND THE CANAL

The statement has been made that Western Canada's wheat cannot be shipped through the Panama Canal without being damaged by the climatic conditions which might be encountered there. *The Monetary Times* has obtained the opinion of Mr. G. T. Somers, president of the Canada Grain Company, a concern which does a large export business. Mr. Somers can see no good reason for anticipating that the Panama Canal will not be a good route for the shipment of wheat from Western Canada to Atlantic ports. "The Canal will be approximately fifty miles in length," he says, "and, under normal conditions, ships should pass through it in seven or eight hours, dependent upon the number moving. In any event, ships should not be detained there over ten hours."

Temperature in Panama.

"The temperature in Panama reaches its maximum at mid-day during the dry weather. The days are practically all the same length, 6 a.m. to 6 p.m., and the interval of extreme heat short. The nights are tempered by cool winds from the ocean. The temperature and humidity of the Panama Canal should not be much greater than on the sea at both ends of the Canal. It is true that wheat will "sweat" when subjected to an extreme change in temperature, but I do not think that this condition would be met in the Panama Canal, where the climatic conditions would vary very little in passing through the warm Japan current on the Pacific side to the Port of Panama for several days, and through the Gulf Stream for several days after leaving the Port of Colon. In other words, the extreme temperatures and humidity encountered at Panama would be approached and left behind gradually, and not encountered so as to produce a condition which would cause the grain to sweat."

Route Should be Superior.

"Wheat and flour has been safely transported for years from the States of Oregon, Washington and California down the Pacific and around Cape Horn to European ports, encountering climatic conditions not very much different from those which would be experienced on the trip through the Panama Canal, and, the trip via the latter route being much shorter than that via Cape Horn, it is reasonable to assume that the Panama Canal route should be superior to that now existing via Cape Horn, and which has been used for a long time."

"Unless wheat is in good condition, it is liable to damage under almost any circumstances when confined for a long period in bins, cars or ships. If wheat is wet or tough, it could be prepared for shipment by dryers in the same manner that corn and other grain is being prepared for shipment from the Gulf ports of the United States to Mexico and the tropics."

STOCK OFFERING

A few shares of E. R. Watts and Sons, Canada, Limited, are being offered by the company. The company's business as a private concern has been paying a net profit of 15%. Under the organization of the new company, with the saving that can be effected in buying and control, together with the increase of sales anticipated, a net profit of 20% is expected.

The objects of the company are, among others, to take over the established Canadian business of E. R. Watts and Son (manufacturers of engineering, surveying, architectural, building, contracting, railroad and other instruments and supplies) at various branches and agencies, provide further stock and repair facilities, open further branches and agencies, and reorganize and develop the business generally with greater scope and new departments. Prospects are in hand for an almost immediate sales increase of 50%, and the new influence obtained, together with other features, should help to make the business one of the most sound and profitable in Canada. The purchase also includes patent rights and licenses for the United States, which territory the company intends opening up.

PERSONAL NOTES

Sir Rodolphe Forget has resigned from the directorate of the Wayagamack Pulp and Paper Company.

Mr. E. P. Mousir, secretary of the Canadian West Indian League, was a visitor to *The Monetary Times* head office this week.

Mr. S. G. Ramsden, inspector of the Banque Internationale, has left for Paris on business connected with the affairs of the bank.

Mr. S. W. Harris, who for some time has been with Messrs. Nay and James in their bond and debenture department, has been taken into the firm of Curran Brothers, Regina.

Messrs. Osler & Hammond, Toronto, have taken into partnership Mr. George T. Chisholm, Mr. Harold F. Marriott and Mr. Harold Franks, who have all been connected with the firm for a number of years.

Messrs. Osler, Hammond & Nanton, Winnipeg, have taken into partnership Mr. T. Lee Peters, Mr. Charles M. Taylor and Mr. George D. Lynch, who have all been connected with the firm for a number of years.

Mr. W. D. Matthews, a director of the Canadian General Electric, has been elected vice-president to fill the place of the late Mr. H. P. Dwight. The vacancy caused by the death of Mr. Dwight has been filled by the appointment of Mr. F. Gordon Osler.

Mr. G. P. Scholfield was elected a director of the Standard Bank of Canada to fill the vacancy caused by the death of Mr. Frederick Wyld. Mr. Wellington Francis, K.C., for many years a director of the Standard Bank of Canada, succeeds to the vice-presidency.

Messrs. Sydney V. Kendall and Leonard Martin, F.R.I.B.A., architects, of London, England, have won the award in the competition conducted by the Toronto Housing Company, for plans of houses for the development of the company's land in the east end of Toronto.

Right Honorable Sir T. P. Whittaker, M.P. for the Spen Valley division of Yorkshire, who is chairman and managing director of one of the largest life insurance companies in England, is visiting Canada in company with Mr. Henry Holloway for the purpose of forming his own judgment as to investments here.

Lord Claud Hamilton, member of parliament for South Kensington, chairman of the Great Eastern Railway of England, and also chairman of the Employers' Liability Assurance Company, arrived in Winnipeg last week from Eastern Canada. Lord Hamilton is visiting Canada with the chief object of inspecting the agencies of the assurance company, which does a large business both in the Dominion and the United States.

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, is making his annual inspection tour of the system. He is accompanied by three directors of the company, Mr. R. B. Angus, Sir Edmund Osler and Messrs. W. D. Matthews, and by Ferdinand F. Begg, a London financier, and a former member of the British House, James Redmond, now of Montreal, but formerly well known in Winnipeg, and R. Osler, of Messrs. Osler, Hammond & Nanton.

Dr. Gustav Stresemann, one of the managers of the Hansa League of merchants and manufacturers, has left Bremen, Germany, for New York, en route to Toronto, where he will address a meeting to be called for the purpose of organizing a German-Canadian Commercial Association. The association will maintain an active organization both in Germany and Canada, and seek to develop trade between the two countries on aggressive and systematic lines.

WHERE IS IT MADE?

The Canadian business man in his transactions is sometimes at a loss how to ascertain where, and by whom some particular commodity is manufactured. To such an one is commended a volume which indeed should be acquired by all merchants, namely, the "Industrial Buyer's Guide," (the successor to the Canadian Industrial Blue Book) which contains a list of at least 4,000 industrial products. Its completeness is shown by one example—Pumps. Under this heading there are thirty classes with the makers enumerated, and they include firms in Canada, Great Britain, and the United States. The volume is systematically indexed, and is divided into four parts. "Industrial Buyer's Guide,"—Manufacturers' Products List Company, Montreal, Que.

MAJORITY MUST BE BRITISH SUBJECTS

Bank Act Specifies This Respecting Directorates—How the Shares of the Forget Bank Were Held

An analysis, made by The Monetary Times, of the list of shareholders of the Banque Internationale du Canada, as on December 30, 1911, shows that the majority of the stock was held by shareholders resident in France. The following table summarizes the figures:

Stock held in	No. of shares.	Amount paid.	Amount subscribed.
France	56,325	\$508,210	\$5,632,500
Canada	39,980	422,010	3,998,900
Switzerland	3,485	16,850	348,500
United States	101	3,320	10,100
Italy	100	1,000	10,000
	100,000	\$1,041,390	\$10,000,000

This result is obtained even after including in the Canadian stockholders the following entries in the shareholders' list:—

Madame E. d'Aoust	2,500	\$ 25,000	\$ 250,000
Monsieur O. B. d'Aoust	17,990	179,900	1,799,000
	20,490	\$204,900	\$2,049,000

The residence of Mr. O. B. d'Aoust is given as Paris, France, but Mr. d'Aoust has offices in Montreal and is generally believed to be friendly to the Forget interests.

Majority British Subjects.

It is said that the French interests of the International Bank desire to elect five French and four Canadian directors—these to constitute the new Board. That would be contrary to the Bank Act, section 20 (3) of which states: "A majority of the directors shall be natural born or naturalized subjects of His Majesty."

Respecting proxies, the point on which the dispute largely hinges, section 32, clauses 6, 8 and 9 of the Act read as follow:

"6. Shareholders may vote by proxy, but no person other than a shareholder eligible to vote shall be permitted to vote or act as proxy.

"8. No appointment of a proxy to vote at any meeting of the shareholders of the bank shall be valid for that purpose, unless it has been made or renewed in writing within the two years last preceding the time of such meeting.

"9. No shareholder shall vote, either in person or by proxy, on any question proposed for the consideration of the shareholders of the bank at any meeting of the shareholders, or in any case in which the votes of the shareholders of the bank are taken, unless he has paid all calls made by the directors which are then due and payable."

Calls on Shares.

A demand was made for a writ of injunction to restrain the present board of directors from making any additional calls for payment on stock. The French shareholders represented that they understood that the directors intended to make such a call and asked that this be prevented. The judge dismissed this with costs, remarking that it had not been shown that even if such call should be made it would work irreparable injury to the French shareholders, who were liable to be called upon for payments on their stock in the ordinary course of events.

Respecting calls on shares, section 38 of the Bank Act reads as follows:

"The directors may make such calls of money from the several shareholders for the time being, upon the shares subscribed for by them respectively, as they find necessary.

"Such calls shall be made at intervals of not less than thirty days.

"Notice of any such call shall be given to the shareholders.

Not to Exceed Ten Per Cent.

"No such call shall exceed ten per cent. of each share subscribed."

An interesting article respecting the subscribed and paid capital of the International Bank appears elsewhere in this issue.

The French interests of the Banque Internationale, in a further petition to court, have asked for the removal of the present president of the Banque Internationale, Sir Rodolphe Forget, claiming that they represent over 55 per cent. of the stock, and have submitted to the court a board of directors which includes, in addition to their own appointments, some of the members of the present board to the exclusion of the president.

CHARTERED ACCOUNTANTS' CONVENTION

Education of Students in Ontario—The Chartered Accountants' Degree

Members of the Montreal, Ontario, Nova Scotia, British Columbia, Saskatchewan and Alberta Institutes of Chartered Accountants will attend the annual convention of the Dominion Association in Toronto on September 24th and 25th.

Members of the Montreal Institute number about 60, Ontario about 140 and Manitoba about 40. These are the numbers resident in the respective provinces. There are numerous members in the United States and other places abroad. The other institutes in more sparsely populated provinces have naturally smaller memberships, but all are sending several representatives to the coming convention.

For some time there has been a movement on foot to secure greater uniformity of qualifications and examination in the various provinces—a natural preliminary to interchange of membership which is considered desirable. For instance, a man qualifying as a chartered accountant in Montreal, and subsequently wishing to practise in British Columbia should be allowed to do so on affiliating with the local provincial institute, for which he should be eligible on producing his diploma from the province in which he has qualified. At any rate this is the view that is strongly advocated by the organ of the profession, the "Canadian Chartered Accountant." This representative and ably edited journal, which is published in Toronto, is subscribed to by every chartered accountant in the Dominion of Canada, and circulates largely too in banks, insurance companies and other financial institutions. In addition to articles dealing with topics of professional interest, it produces papers read before the several societies, and it has an exceedingly able correspondence section. The desirability and feasibility of adopting this interchange of membership is part of the "brain food" which will be laid before the convention for mental digestion and for decision.

As to Ontario Students.

Other matters are the education of aspirants for the chartered accountant degree. In this, Ontario takes a leading place. Every year from October to May there are lectures two or three times a week at the University of Toronto to the members of the Chartered Accountants Students Association. The following is the syllabus for the ensuing session, which commences on October 7th: "Auditing," 5 lectures, Mr. H. J. Welch, C.A.; "Bookkeeping and Accounts," 24 lectures, Mr. Bryan Pontifex, C.A.; "Commercial Arithmetic," 6 lectures, Mr. Arnold Morphy, Upper Canada College; "Commercial Law," 10 lectures, Mr. Jas. E. Day, K.C.; "Investigations," 2 lectures, Mr. G. M. Mulholland, C.A.; and "Office Systems," 2 lectures, Mr. F. E. Roberts, C.A. Arrangements are now being made for courses of tuition by correspondence for students residing outside Toronto, the professional education of whom has for many years been a difficult problem. The Students' Association possesses a library of nearly 200 books, covering all the standard works on bookkeeping, accounting, auditing and mercantile law.

Three Sets of Examinations.

There are three sets of examinations: The primary, the intermediate and the final. Ontario prescribes three years' service with a public accountant before writing on the final examination, but any person employed in the keeping of accounts may, on the approval of the council, sit for the primary examination—which covers commercial arithmetic, bookkeeping and the bills of exchange act and the possession of a pass in this examination is now highly appreciated by discriminating employers of bookkeepers.

At Niagara Falls, Ont., the steel works by-law was defeated.

A petition has been served on the city of Montreal and on the Canadian Autobus Company, Limited, at the request of Mr. William George Maxwell Shepherd, who states that he is an elector and taxpayer of Montreal. Mr. Shepherd is the representative in Canada and Newfoundland for Messrs. Colgate & Company, and resides in Westmount. The petition was taken under the provisions of section 304 of the charter of the city of Montreal, for the purpose of having the courts annul and set aside the by-law 453 adopted by the city council on June 10th last concerning the establishment, maintenance, and operation of autobus lines in the city of Montreal. Mr. Shepherd also asks that the resolution of the city council adopted on August 14th last and approving of a contract with the Canadian Autobus Company, Limited, and granting to the latter company an exclusive franchise for ten years, be declared null and void.

MINERAL PRODUCTION IN BRITISH COLUMBIA

Outlook and Output of Principal Mines—Iron Ore Prospecting

Copper is the only mineral showing an increased production in British Columbia. Lead and zinc show decreases, while iron is a negative quantity in the preliminary review for 1911, compiled by the provincial mineralogist, Mr. W. Flett Robertson.

A considerable falling off in the production of lead is shown, the average price of which for 1911 was practically the same as for 1910. The most serious decrease was in the output of the St. Eugene mine; this amounted to more than 8,000,000 pounds. The Sullivan increased its output between 2,000,000 and 3,000,000 pounds, and to that extent reduced the decrease in quantity from East Kootenay mines as compared with 1910. Approximate figures of production for 1911 are: St. Eugene, 6,000,000 pounds; Sullivan, 11,000,000 pounds. Ainsworth Division mines produced but little lead in 1911, whereas in 1910 they contributed about 2,500,000 pounds to the total for that year, the three shippers having then been the Bluebell, Highland, and Whitewater group. The 1911 total from all properties in Ainsworth Division is estimated at less than 300,000 pounds. Slocan maintained its output, the total from the Richmond-Eureka, Ruth-Hope, and Rambler-Cariboo, and that from the Slocan Lake section—Van Roi, Standard, and Hewitt-Lorna Doone—having together been somewhat higher than the corresponding figures for 1910. Nelson Division had the Emerald and Molly Gibson mines as its chief producers of lead. There was a relatively small production from the Lardeau District, and still smaller from Portland Canal.

A statement published last autumn showed the total expenditure by the Dominion of bounty on lead to July 1st, 1911—that is, for eight years—to have been \$1,617,020. Of this sum, \$249,370 was paid in the fiscal year ended March 31st, 1911, and \$49,714 for three months to July 1st, 1911. After deduction of \$50,000 appropriated for zinc-ore reduction experiments, there remained, as at July 1st, 1911, of the \$2,500,000 originally voted an unexpended balance of \$832,980.

Important Copper-producing Districts.

The estimated increase in the copper production of the Province, as compared with 1910, is about 1,200,000 pounds.

The Boundary District made a decreased production in 1911 by about 6,500,000 pounds (the reason for which has been already explained), and West Kootenay (chiefly Nelson Division) also shows a decrease of about 300,000 pounds; but against these decreases is to be placed an increase of about 8,000,000 pounds in the Coast District. The more important copper-producing districts of the Province are the Boundary, Coast, and Rossland; of these, the Coast bids fair to in future make a much larger output of this metal than it has done in recent years, for in both the Britannia mine, in New Westminster Division, and the Hidden Creek mine, near Goose Bay, Observatory Inlet, very large bodies of copper ore of commercial grade have been opened. No production of copper has yet been made at the latter mine, which was not extensively developed until the year just past, but it is planned to put in reduction works as soon as all arrangements necessary for smelting ore on a large scale are made. The increase in output of copper at the Britannia mine in 1911 as compared with 1910 is believed to have been between 6,000,000 and 7,000,000 pounds, but the actual output is not yet available. The Marble Bay mine, Texada Island, also made a substantial increase, but this was in part offset by a decrease at the neighboring Cornell mine. There is little comment to be made relative to either Boundary or Rossland mines in regard to their copper production, which is being generally well maintained, except when the supply of coke for the blast furnaces of the copper smelteries is interrupted.

Comparative Copper Prices.

The New York average price of electrolytic copper for 1911 was a trifle lower than that for 1910—12.376 cents as compared with 12.738 cents—but the former year closed with an average for the month of December of 13.552 cents per pound, which was the highest monthly average since January, 1910. The expectation is that a higher price will rule in 1912, so the outlook for this year is considerably brighter. If this increase of one cent a pound occurred in the beginning of the year and had been maintained throughout, it would have meant an increase in the total value of this year's copper production of about \$400,000, and the copper mining companies would have benefited to this increased extent.

Lack of Transportation Facilities.

The smaller output of zinc in 1911 than in 1910 is accounted for by the fact that it was not practicable for either the Whitewater group of mines or the Lucky Jim, in the Slocan, to ship ore, owing to the absence of trans-

portation facilities, for the Kaslo and Slocan Railway line, six miles of which was destroyed by fire in the summer of 1910, has not yet been reconstructed. Further, the Whitewater mill, also burned, has not been replaced, though in both mines much development work has been done, and shipment of ore will take place whenever it is possible to send it out.

No zinc concentrate was produced by the Slocan Star mill, though production may be resumed in 1912. There are now three mills in Four-Mile camp, Slocan Lake, equipped for producing a zinc as well as a lead concentrate, namely, those of the Van Roi, Silverton Mines Limited (Hewitt-Lorna Doone), and Standard. Of these, the Van Roi produced in 1911 concentrate containing more than 2,000,000 pounds of zinc, and the Silverton Mines, Limited, a much smaller quantity. The Standard mill is a new one, the operation of which was only commenced late in the year.

Reported Iron Ore Development.

No commercial results appear to have yet have been obtained from experiments in reduction of the zinc-lead ores of the Kootenay, neither by the Dominion department of mines, experimenting in the East, nor by any process tried in the province.

Some prospecting for iron ore has been going on in the vicinity of Quinsam and Battle Lake, on Vancouver Island, and it is stated that a large body of magnetite has been developed there, eighteen men being employed during the year. Statements were made as to the large quantity of ore; also that the ore contained as much as 68 per cent. iron, and was more than ordinarily free from impurities. No iron ore was mined in 1911, and the mines remain just as in 1910.

WESTERN TRUST COMPANY

For six years the Western Trust Company has been conducting a business in the prairie provinces. During the first year of operation the net earnings were about \$4,000. For the year ended June 30th, 1912, the profits reached \$80,120, as compared with \$54,026 in the previous year.

Among the liabilities of the company are trust, guarantee and agency funds, \$804,824; and assets of estates and agencies under administration by the company, \$4,265,252. The assets include real estate mortgages, valued at \$1,065,189, and other important items, which will be found in the company's statement elsewhere in this issue.

During the year there have been several new departures in the company's business, the directors having decided in January to call in all the subscribed capital. This call has been met in a satisfactory manner by the shareholders, and the paid-up capital is now over a million dollars. The company have been able to keep up a proportionate reserve account of ten per cent., and the reserve account now stands at \$100,000.

There has been a large expansion in the amount of the estates entrusted to the care of the company. The total assets have increased from \$1,293,000 to \$6,293,000. The figures in last year's statement indicate substantial progress.

CANADIAN BANKER GIVES SOUND ADVICE

Canadian municipalities and corporations must restrict their expenditures on improvements requiring the borrowing of money until the present stringent position of the world's money markets has passed, says Mr. D. R. Wilkie, president of the Imperial Bank of Canada, who has just returned from a visit to England.

"Canada's borrowings will certainly be restricted by force of circumstances," he added, "and I would counsel all municipalities, incorporated companies, and even Provincial Governments, to restrict their expenditure until something more is known of the future.

"Our municipalities and provinces have found it difficult to borrow at the rates which prevailed a few years ago, and has wisely disposed of short-term notes to provide for immediate necessities. Otherwise I should not have been surprised to hear that any time loans placed upon the market would have been sold to bear 4½ or 4¾, or perhaps even 5 per cent. interest.

"Careful expenditure and preparation for any crisis that may follow upon a condition of war or a continued stringency in the money markets of Europe, England and Germany in particular, should be the rule for Canadian institutions.

"It must not be supposed that the high rates which Canadian municipalities are called upon to pay are any indication of want of confidence in the safety of their loans, because England has the pick of the loans of the universe, and legitimate development requiring capital is not confined to Canada."

QUEBEC RAILWAY, LIGHT, HEAT AND POWER COMPANY

Report of Annual Meeting—Comparison of Two Years' Profit and Loss Accounts

Monetary Times Office,
Montreal, September 11th.

The annual meeting of the Quebec Railway, Light, Heat and Power Company was held on Tuesday, and save for the presentation of the financial report showing the result of the year's operations, the street is but little wiser as to the many points of recent discussion.

It is satisfactory to note that the earnings of the company for the year ending June 30th, 1912, were equal to 2.11% on the common stock, after all charges, save dividends, had been provided for. This meant that had no dividends been paid, the surplus for the year would have amounted to \$211,200. Inasmuch, however, as two quarterly dividends of 1% each, making a total of \$199,990 were paid during the year, the total surplus brought forward from the year's operations was but \$11,210.

This compared with the deficit of \$37,381 the previous year. This comparison is a fair one, inasmuch as the dividends paid the previous year were exactly the same as those of the last year. The fixed charges of the past year, however, were \$204,000 more than the previous year, while the amount written off to organizing expenses was \$7,000 less this year than a year ago.

Quebec and Saguenay Railway.

Those who attended the meeting in the hope that light would be shed upon the situation as respects the relationship between the Quebec Railway and the Quebec and Saguenay were disappointed. A representative of the Paris interests was present and asked certain questions with respect to expenditures on the Quebec and Saguenay which were refused, although Sir Rodolphe added that the affairs of the company would presently be straightened out. The following is a comparison between the profit and loss statements of the past two years:

	1911.	1912.
Gross	\$1,280,127	\$1,415,825
Operating expenses	661,907	734,925
Net earnings	\$ 618,220	\$ 680,900
Sundry interest earned	11,109	
Miscellaneous earnings		194,584
Gross income	\$ 629,319	\$ 875,484
Fixed charges	456,329	660,364
Net income	\$ 172,990	\$ 215,120
Dividends 2 quarters	199,990	199,990
Org. expense	10,681	3,919
	\$ 210,671	\$ 203,909
Deficit on 1911 oper.	\$ 37,681	
Surplus on 1912		\$ 11,211
Brought forward from previous year	100,000	62,328
Total surplus at June 30th	\$ 63,319	\$ 72,539

The accuracy of the statement was sufficiently vouched for by the auditors and the only criticisms that were heard among the shareholders were as to whether sufficient appropriations for various purposes had been made, and what effect would be on the percentage of surplus to capital, were it necessary to make allowance for depreciation, &c.

Progress Made by the Company.

The statement of assets and liabilities and of the progress made by the company, in the matter of traffic, was as follows. The point in this which perhaps is of greatest interest is the excess of payments now due, or falling due, over available funds.

Assets.	
Investments, stocks, bonds and interests in other corporations	\$22,819,192.64
Less bonds or subsidiary companies outstanding	3,659,000.00
	\$19,160,192.64
Treasury bonds	1,286,100.00
Advanced to controlled companies for construction	865,359.36
General construction	389,952.73
Underlying Securities Redemption Fund	40,169.75
Cash on hand and in banks	254,513.25

Accounts and bills receivable	241,643.01
Stores and supplies on hand	130,739.87
	\$22,374,670.61

Liabilities.	
Capital stock	\$10,000,000.00
Less unissued	500.00
	\$ 9,999,500.00
Bonds	\$14,600,000.00
Less in escrow to redeem bonds of subsidiary companies	\$3,659,000
Less unissued	220,600
Less cancelled	114,000
	\$ 3,993,600.00
	\$10,606,400.00
Accounts payable	158,572.62
Sundry loans	1,171,968.01
Accrued interest	148,875.12
Unpaid interest and dividends	189,586.84
Accrued charges	8,154.10
Reserves	18,074.47
Surplus	73,539.45
	\$22,374,670.61

Passengers carried in the city division: 1909, 6,859,679 includes tercentenary celebration); 1912, 8,785,995.

Passengers carried on the Montmorency division: 1909, 1,442,327 (including tercentenary celebration); 1912, 1,581,846.

Gross gas output from January, 1905, to September 1, 1912: 1909, 122,000,000 cubic feet 50 cent gas for 6 months; 1910, 98,000,000; 1911, 103,000,000; 1912, 74,000,000 (8 months).

Nine Directors Instead of Fifteen.

The number of directors were reduced to nine from fifteen and the following were appointed:—Sir Rodolphe Forget, Hon. Senator J. P. B. Casgrain, Hon. Robert MacKay, Messrs. J. N. Greenshields, Lorne C. Webster, Paul Galibert, D. O. Lesperance, L. C. Marcoux and O. B. d'Aoust. Of these, the new names are the last three. The directors whose names are absent are as follows: Hon. C. E. Dubord, A. Haig Sims, W. G. Ross, Maxime Beauvisage, Anthony Thierree, Louis Galliard and Charles Michel.

Sir Rodolphe Forget suggested the appointment of a president who would reside in Quebec, who could give his whole time and attention to the affairs of the company, but he was appointed president at a meeting of the directors held after the shareholders' meeting, and it is thought will continue to occupy the office until other arrangements can be made.

MONTREAL TRAMWAYS COMPANY

Monetary Times Office,
Montreal, September 11th.

President Robert, of the Montreal Tramways Company, in response to a request made some time since by the city council, presented his suggestions of what was required to provide a better street railway service in the city of Montreal. He advocated that another east and west street in the down-town district—namely Vitre Street—be opened through to Windsor Street, at the Canadian Pacific Railway depot, and that the company be permitted to lay down tracks thereon. He further advocated that two additional north and south streets be given to the company for the purpose of laying car tracks, both streets being east of Bleury Street, the growth of the city in the north being rapid and the traffic being now too heavy for the existing lines. Grading and improving Guy Street, a north and south street in the west end, leading to the mountain side residential district, was also suggested and the president considered that the construction of a subway under the canal was very essential, to provide against interruptions to both the street car service and vehicular traffic. The elevation of the Grand Trunk Railway tracks was considered essential. Delays through the canal amounted to thirty-two hours in August and those due to waiting on trains to pass on the Grand Trunk Railway were sixteen hours. The Board of Control will consider the recommendations.

WHO HAS READ THIS PAPER FOR THE LONGEST PERIOD?

The Monetary Times would be glad to hear from persons who have read this journal every week for a lengthy period.

ST. LAWRENCE INSURANCE RATES

NEWS AND NOTES

Views of British Underwriters—Proposed Extension of Lake Navigation Season Was Refused

The threat that Canada will inaugurate a marine insurance institution of its own, has no terrors for experienced members of the profession in Great Britain. That is the opinion of a writer in the London Financial Times, discussing the insurance rates on the St. Lawrence route. He thinks while there can be no question that the English underwriters will have the best of the argument, it is possible that there may be important developments hereafter arising out of the question which is now being debated. "For some years," he continues, "there has regularly been considerable congestion in the movement of Canada's crops, for it has been found utterly impossible to ship a sufficiently large proportion of the total yield before the closing of the Great Lakes and of the St. Lawrence to prevent the accumulation of a larger supply of grain over the winter than can be properly accommodated."

Lake Season Cannot be Extended.

"This year the question promises to be more acute than ever, and in order to relieve the situation, Mr. Rogers, the Canadian Minister of the Interior, has proposed that the season on the Great Lakes should be continued for a month longer than usual. To this suggestion, however, underwriters have offered a polite though definite refusal on the score that it is unworkable from their point of view; that is to say, experience has shown that the continuance of shipments during the month of December can only result in accidents and consequent loss to those whose business it is to issue policies against sea risks, and, this being so, the underwriting community will not hear of any alteration of the present conditions."

"This attitude is perfectly logical; nevertheless, it has led to a renewal of the familiar cry in Canada that the Dominion must have a marine insurance institution of its own. Such a threat has no terrors for experienced members of the profession, for they are already quoting as low premiums as circumstances justify, and they believe that in the event of a local Canadian organization offering any cheaper terms the result can only be disastrous for those who undertake such a policy."

Can Fog be Abolished?

"Canadians argue that they have spent so much money of late years in improving their waterways that insurance rates ought to be reduced correspondingly, instead of which the tendency is for premiums to move upward. The explanation is that while much may have been done to improve the fairway of the approaches to Montreal and other Canadian ports, such matters are entirely subsidiary to the exceptional climatic conditions which render Canadian shipping a very dangerous risk for underwriters. We refer to the fogs which so frequently prevent safe navigation, and are the cause of many disasters to shipowners and underwriters every year. If by any process of meteorological legerdemain something could be done to provide clearer weather off the coast of Canada, underwriters would rejoice greatly and at once adjust their premiums accordingly, but it may be deferentially doubted whether Mr. Rogers or anyone else is competent to solve that particular problem."

Provide More Ships.

"He will be wise, however, if he listens to the words of wisdom which experienced persons are able to offer to him and to look in another direction for the solution of the speedier overseas movement of the crops. The proper course would obviously be to provide more ships, for as matters stand at present Canada's output of wheat exceeds the amount of tonnage available to carry it. If this fact be realized there should be an end to the cry for a shorter winter season in Canadian waters. Underwriters are not unreasonable; they are merely business men employing their capital with intelligence, and until it has been proved that their bases of calculation are wrong, they will continue to charge such premiums as their knowledge of the facts acquired by sometimes bitter experience, shows to be justified."

An agreement for a loan to China of \$50,000,000 at five per cent. for forty years has been signed by the Chinese minister and a representative of Lloyd's Bank. The loan is secured upon unpledged revenue, chiefly the salt duty; it is to be free of control and supervision which proved an obstacle to the loan by the six-nation group. The salt duty, however, is to be controlled by the British inspector-general of customs in case of default.

The Canadian Tool Steel Company, Limited, has increased the number of its directors from three to five.

The Atares Wharf and Warehouse Company, which is largely owned in Montreal, is issuing 55,000 shares additional stock at \$50 a share.

The name of the Texas Northern Land and Irrigation Company, Limited, has been changed to that of the Texas Prairie Lands, Limited.

The capital stock of Sheldons, Limited, has been increased from \$200,000 to \$600,000, the increase consisting of 4,000 shares of \$100 each.

The first grain warehouse to be established in Northern Ontario will be built this autumn at New Liskeard by Messrs. Hogg and Lytle, of Toronto.

The issue of \$1,500,000 6 per cent. bonds of the Canadian Locomotive Company was listed on the Toronto Stock Exchange on Thursday. While there were no transactions in the newly-listed securities, they were quoted at 100 bid.

Work on the new \$500,000 shipbuilding plant at Coquitlam began last week. Ships of from 300 to 800 tons will be the principal output at the start, but the officials expect to enlarge the plant after the opening of the Nanaimo Canal. Eight and one-half acres have been secured. Mr. L. D. Schafner, of Bridgetown, Nova Scotia, and several Vancouver and Victoria capitalists are interested.

Commenting on the issue in London of £300,000 capital by the Canadian Middle West Trust Company, The Economist says:—"The present is a dangerous time to start a financial business in Canada, as values have risen extraordinarily fast and are bound to come down if one or two bad harvests occur. In that event the older companies, whose operations are based on a lower average of values, would be in a far better position than newer concerns."

To date this year the Canadian Pacific Railway has purchased 185,300 tons of steel rails, with the fastenings, amounting to 14,347 tons, and the tie plates to 6,500 tons, make a total of 206,147 tons. These new rails are chiefly of Canadian make, being the output of the Soo and the Sydney mills. Small quantities were bought in the United States. They are nearly all 85 pound rails, and the average cost is \$33 a ton, the whole order aggregating about \$7,000,000.

The Dominion Cabinet has awarded the contract of the \$1,000,000 customs house in Montreal to the Peter Lyall Construction Company, of that city. The contract for 14 locomotives to increase the rolling stock of the Intercolonial Railway was divided between the Montreal Locomotive Works and the Canadian Locomotive Company at Kingston, five to the former and nine to the latter. Mr. W. McCartney was the successful bidder for the construction of the new Tete Du Pont barracks at Kingston. The contract price was \$17,000.

Tenders were opened on Thursday by the Protestant Board of School Commissioners for the \$500,000 four per cent. bonds, maturing 1942, which they propose to sell. The tenderers were: Messrs. E. W. Harris Company, Boston, 90.79; Royal Securities Corporation, 90.07; Montreal City and District Savings Bank, \$92,588 for \$100,000; Hanson Bros., 89.01, and the City of Montreal bid par for \$66,000 worth, the same being a special arrangement with the sinking fund for school bonds. The award was not made, the offers being referred to a financial committee.

The four resigned French directors of Quebec Railway have made no statement as yet and are not expected to make any, but express the strongest views in private of the unfair way in which they allege they and the French investors have been treated, says a cable message from Paris. They especially criticize the policy of paying four per cent. dividends when the earnings are at a low level. It is generally felt in Paris that the immediate effect will be a serious check of the flow of French money into Canada just when the prospects seemed brightest. It was heard that one large undertaking is hung up. Nevertheless, well-informed people in Paris believe that, though a great error in judgment has been shown in the over-capitalization at the outset, the decline in earnings will prove temporary only.

There is no truth in the assertion that the Bewick-Moreing group have withdrawn from Canada, says a London cable to the Montreal Star. They have no intention of withdrawing, but, on the contrary, are now organizing a system of investigation for new Canadian mining districts, with a view of utilization, with a large cash reserve. The group has, however, withdrawn from the Porcupine camp, where they say they experienced great disappointment in the area taken over from the Timmins syndicate. Also the offices will be removed from Montreal to Toronto, the latter being found more convenient to the mining centre. Gerald Lovell, their former representative in Canada, is now representing the same group in Burmah, not Australia.

MINING IN NEW BRUNSWICK

Estimate of Coal Areas—Crop Reports—Various Commercial Undertakings

(Special correspondence.)

St. John, N.B., September 2nd.

The North Shore Railway and Navigation Company, which has sixty men working a small coal mine at Beersville, in Kent County, twenty miles from Moncton, and selling the coal to the Intercolonial Railway, has also ordered machinery for the manufacture of bricks. Dr. H. J. Von Hagan, the president of the company, declares that New Brunswick has the best material for manufacturing bricks and other clay products that can be found in Canada, or in the eastern states outside of New Jersey. He is bringing several engineers from New York to inspect the company's property in Kent County.

It is announced that a large number of miners will be brought from the Old Country to work in the mines in Queen's County, where there will be great development as soon as the Gibson and Minto Railway is completed this fall. Homes are being built for miners. The Canadian Pacific Railway will take one hundred thousand tons a year out of the district, and the Intercolonial Railway has contracted for twenty thousand tons. It is estimated that there is anywhere from one hundred million to one hundred and fifty million tons of coal in this district.

Crop Reports are Fair.

The last reports concerning the crops of New Brunswick are to the effect that potatoes are turning out much better than was expected in view of the long period of wet weather. A Carleton County report states that potatoes have sold there at \$1.50 a barrel with the price tending downward. The hay crop has not been gathered in good condition, and some of it on wet lands is still uncut. There will be a fair crop of grain, but the yield of apples will be considerably less than that of last year.

Several items of industrial news of interest have developed during the last two weeks. The firm of Dearborn and Company have purchased a lot beside the Canadian Pacific Railway tracks at Fairville, and it is announced that they will have associated with them one of the largest manufacturers of grocers' specialties in the United States, in the erection of a factory on this site. It is said the work of construction is likely to begin at an early date. Mr. John E. Moore, who is largely interested in lumber and shipping, is erecting at South Bay a barrel and box factory to be ready for operation next spring. The factory will give employment to 250 men. Mr. Moore has also purchased a planing mill at South Bay, which is close to the city. The mill has of late been idle. He will reconstruct it, and operate it on a larger scale than before. The contract for the erection of the new automobile factory has been awarded and the work begun. The Metcalf Construction Company, of Montreal, who will erect the new million bushel elevator for the Canadian Pacific Railway at West St. John, are assembling their plant and erecting their temporary buildings, and will go on with the work during the winter. The building will be of concrete.

Harbor Improvements Being Made.

There are now five dredges at work in St. John Harbor. None of them are doing work in connection with the big Courtenay Bay contract for which the Norton Griffiths Company will organize a subsidiary company, and for which new dredges are being constructed. It is expected that dredging in Courtenay Bay will be begun this fall. The other dredges are clearing the site for additional steamship berths at West St. John. With regard to the dry dock at Courtenay Bay, the present plans only provide for one 950 long, and an agitation is now in progress to have it made 1,150 feet, which is the length of the proposed dock at Levis.

The Millerton Tanning Extract Company, at Millerton, has taken over the business of the old company and is operating the factory, employing sixty men, and having a great number of men in the woods peeling bark for winter hauling. The company will shortly enlarge the factory. The pulp and paper mill at Lower Derby, N.B., is being enlarged.

A local company is being organized to carry on the manufacturing business of Mr. A. J. Sollows in ladies' neckwear, and other dry goods novelties, retaining Mr. Sollows as manager. The St. John Railway Company have submitted to the public utilities commission a proposal to make a reduction in the rates charged for electrical power in St. John to the extent of twenty-five horse power, or more.

Hon. C. J. Osman, manager of the Hillsboro Manufacturing Company, who has introduced natural gas in the mills, predicts a rapid industrial development in Albert County as the result of the introduction of natural gas.—W.E.A.

GROWTH OF CANADIAN MANUFACTURING

Census Reports Show Great Industrial Expansion—Nearly Twenty Thousand Factories

Compared with the census of 1901 for the year 1900, the census of 1911 shows an increase in ten years of 4,559 in the number of working establishments; of \$798,829,009 in the value of capital; of 175,108 in the number of persons employed; of \$127,274,301 in the earning of salaries and wages; and of \$683,722,157 in the value of products.

The following statistics give the comparative figures for the two census years 1900 and 1910: Establishments in 1900, 14,650; in 1910, 19,209, an increase of 31.12 per cent.

Capital, 1900, \$446,916,487; in 1910, \$1,245,745,496, increase of 178.74 per cent.

Employees and Products.

Employees, 1900, 339,173; in 1910, 514,287, increase 51.62 per cent.

Salaries and wages, 1900, \$113,249,350; in 1910, \$240,523,651, increase 112.38 per cent.

Products, 1900, \$481,053,375; 1910, \$1,164,775,532, increase 142.13 per cent.

During the past decade there has been evidently a steady tendency toward the merging of industries. There are fourteen industrial establishments in the Dominion each having a production of five million dollars or over annually, and one hundred and thirty-six establishments each with an annual production of between one and five millions.

Over half of the total number of factories in Canada, or 7,992, are in Ontario, and the annual value of products is given as \$578,763,118.

During the five years from 1905 to 1910 the three Prairie Provinces doubled the annual value of their industrial products, the figures aggregating \$35,000,000 in 1905 as compared with \$70,000,000 in 1910.

In Western Canada.

Manitoba:—Establishments 1905, 354; 1910, 439. Value of annual products, 1905, \$28,155,732; 1910, \$53,673,609.

Saskatchewan:—Establishments in 1905, 80; 1910, 173. Value of products, 1905, \$2,520,172; 1910, \$6,332,132.

Alberta:—Establishments, 1905, 120; 1910, 290. Value of products, 1905, \$5,116,782; 1910, \$18,698,826.

The cost of raw materials used in Canadian factories in the year 1910 was \$601,140,765, which when deducted from the total value of finished products, leaves a total of \$563,634,767, representing the value added by manufacturers.

IRON AND STEEL TARIFF

Speaking of further extensions of the iron and steel plant of the Lake Superior Corporation, Mr. T. J. Drummond says that the company has decided to postpone definite action pending possible consideration and action by the Dominion Government in regard to the iron and steel tariff.

"The existing tariff in iron and steel," he says, "is so torn up by special dispensations, exemptions and rebates, that the progress of the industry is retarded, and in many cases made absolutely impossible. Under the existing tariff we are encouraged to manufacture in small lines, giving small tonnage, and then discouraged in progression into the manufacture of heavier sections, which give larger tonnage. In other cases industries are practically bonused to purchase their pig iron, merchant steel, etc., abroad, and so in one way and another the industry is hampered, and the tariff is in many cases by these exemptions made absolutely illogical and inconsistent.

"If the iron and steel industry is to go forward this tariff must be overhauled, and such matters as I have referred to must be dealt with in a commonsense manner, and especially in connection with pig iron, merchant mill products and structural steel. At present practically one million tons of iron and steel are annually being brought into the country, and the bulk of this tonnage could and should be made in Canada. We placed our case before the Government during the last session of parliament, and we are hoping that something may be done this session, but pending the outcome of what consideration the Government is giving to our case, we can only mark time, and hope that such action will be taken as will warrant us in going ahead with the extensions we have in view."

The only Canadian flotation in the London market last month was that of the Canadian Middlewest Trust, Limited, of 200,000 £1 preferred ordinary shares at par. This company is backed by the Dominion Trust Company, of Vancouver.

INTERNATIONAL BANK'S CAPITAL

Difference in Subscribed and Paid Shows Great Disparity—French Capital and Canadian Bank Stocks

By H. M. P. Eckardt.

The contest for control of La Banque Internationale du Canada has directed attention to the great disparity between the subscribed capital and the paid-up capital of the institution referred to. According to the July bank statement the total of subscribed capital of the twenty-seven banks was \$120,274,416, and the total of paid-up capital was \$110,410,732. Thus the total of callable subscriptions was \$9,863,684. In the same statement the subscribed capital of the Banque Internationale appears as \$10,000,000 and the paid-up capital as \$1,356,318. The amount for which the directors could call upon the subscribers was, therefore, \$8,643,682. As against this showing the boards of the twenty-six other banks could call upon subscribers to the extent of about \$1,220,002—the average per bank being less than \$50,000. As a matter of fact, two of the recently organized banks—the Vancouver and Weyburn Security—account for more than half of the total shown by the twenty-six other banks. If they be taken separately, the average of uncalled subscriptions per bank in the case of twenty-four other banks would be about \$25,000.

It is well known that, as a rule, when a Canadian bank makes an issue of new stock, the payments will be spread over ten, twelve, or eighteen months. While the payments are being met the subscribed capital is usually somewhat larger than the paid-up capital, but on completion of the payments the two are on an equality, and remain so until the next issue of stock takes place. In the case of the Franco-Canadian banking institution the intention appears to have been to provide a large authorized and subscribed capital, and to call it up as the business of the bank increased.

Third in the List.

In the matter of subscribed capital the Internationale ranks third in the list of Canadian banks, the Bank of Montreal and the Commerce being the only two banks ahead of it. The total assets of the Internationale were but \$4,078,535 on July 31st, after ten months' operations; nevertheless, its subscribed capital was well above the subscribed capital of the Royal Bank, with \$124,000,000 of assets, above that of the Merchants with \$83,000,000 of assets, and above the subscribed capital of the Imperial, Dominion, Nova Scotia, Toronto, British, etc., all of which had from twelve to about twenty times the Internationale's assets.

In following this course doubtless the promoters of the bank were moving along lines commonly followed in Europe. It must be said that the disproportionately large subscribed capital appears to offer exceptional security to the creditors of the bank. Thus the liabilities to the public as at July 31st were \$2,722,201, consisting of note circulation \$1,007,625 and deposits and other liabilities of \$1,714,576. To secure these liabilities of \$2,722,201 there were first the assets amounting to \$4,078,535; next the uncalled capital, \$8,643,682; and finally the double liability of the stockholders, \$10,000,000. Adding these items together the total \$22,722,217 is arrived at to represent the nominal security against \$2,722,201 of liabilities.

Responsibility of Stockholders.

At this point is encountered the question as to the responsibility of the stockholders in France and in Canada. When the bank was organized it was said that the French subscribers comprised some powerful Paris financiers. These men could doubtless respond to all rightful calls made upon them; and their position in Paris is such as would probably prevent them resisting any rightful calls. The promoters of the bank stated that about seven-tenths of the capital had been subscribed in France. However, the security enjoyed by the depositors is largely due to the heavy responsibilities assumed by the stockholders—by those stockholders at any rate who have only paid a small amount on their subscriptions. They are liable, first, for the amount of their subscriptions not yet paid up, and then they are under the double liability also.

One can easily understand that when the French financiers realized the full extent of the responsibilities incurred by them in subscribing to the bank's stock they would likely be desirous of having a large share of the control and direction of the bank in their own hands. They would naturally have that desire, no matter how well and prosperously the affairs of the bank were developing. In a certain sense they have been altogether in the hands of the Canadian directors and managers. It is well known that the French bankers are extremely conservative in their practice, and many bankers in Canada wondered, when the new bank was formed, how these conservative Frenchmen would pull

with Sir Rodolphe Forget, who had a name in Canada for dashing exploits on the stock exchanges.

There will be many Canadians to regret the differences that have arisen in this case. The Paris parties who are seeking to oust the present board of the bank are influential, and they have it in their power to direct much needed capital to Canada. In some respects the Canadian banking laws do not lend themselves well to the purposes of foreign financiers desirous of making large investments in Canadian bank stocks. Foreign capitalists, like these French bankers, have to put themselves into the hands of Canadians to a considerable extent when they engage in banking business in the Dominion.

ARE WE OVER-ADVERTISING?

At the British Association meeting in Dundee this week Sir W. Wilcocks read a paper on "Irrigation in Canada," in which he said that irrigation and marriage were inseparable. Children in towns were a source of expense; on irrigated farms they were a source of wealth. "Either Mormonism made Brigham Young turn his thoughts to irrigation or irrigation turned him to Mormonism." The young unmarried man, said the speaker, had not been a success on the farm.

If the money spent on expensive schools for boys and girls were to be put by as dowries for the girls, and if the boys were taught practical farming and then married to the girls and sent out to Canadian farms with moderate capital, there would no longer be the sight of young men hanging about for odd jobs, with all the professions crowded, and so many militant Suffragists making Britain the laughing stock of the world. The Suffragist worry was the price which had to be paid for spending so much money on extravagant and painful education for boys, while the girls had no dowries provided for them.

The speaker expressed great hopefulness with regard to the future of irrigated Canada, though he thought the people there, like true sons of a shopkeeping nation, rather over-advertised their attractions.

AUGUST COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore for the month of August:—

Mine.	Tons.
Beaver	63.8
Buffalo	92.
Chambers-Ferland	32.
City of Cobalt	75.4
Cobalt Lake	121.5
Cobalt Townsite	170.8
Colonial	21.5
Coniagas	207.9
Crown Reserve	47.4
Hudson Bay	62.8
Kerr Lake	105.7
La Rose	342.3
McKinley	168.5
Miller Lake and O'Brien	20.
Nipissing	228.6
Penn. Can.	20.6
Right of Way	30.6
Temiskaming	62.7
Tretheway	70.3
Total	1,962.4

The July shipments totalled 1,669.5 tons.

The contract for the two new fishery protection boats for the Pacific Ocean will likely be granted to the Dublin Deckyard Company, of Dublin. A large number of tenders were received from Great Britain and Canada. The Canadian tenders exceeded the amount provided in the appropriation.

We are anxious to obtain copies of The Monetary Times dated July 16th, 1910, and September 3rd, 1910. Any subscriber sending in a copy of this issue will have his subscription extended one month without further charge. Address to Circulation Department, The Monetary Times, 62 Church Street, Toronto.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Twin City Rapid Transit Company.—Twin City Company's earnings for August were \$709,371, against \$663,291 for August, 1911, an increase of \$46,079. For the year to date the earnings have increased \$192,633.

Nipissing Mines, Limited.—The Nipissing mine produced \$226,613 net, and shipped \$170,213 net during August. Of this amount only 236,800 ounces were in bullion, as the high-grade mill was shut down for ten days while the tube mill was being repaired. There were no important developments during the month.

Kingston Shipbuilding Company.—The Kingston Shipbuilding Company held its annual meeting recently and re-elected the directors and also the officers, the latter being: Mr. Simon Dymont, Barrie, president; Mr. H. A. Calvin, Kingston, vice-president; Mr. W. J. Fair, Kingston, secretary-treasurer.

British Columbia Packers' Association.—The net profits of British Columbia Packers for the year 1911 amounts to \$422,352.82, after deducting \$48,682.57 for depreciation. All dividends due have been paid on the preferred stock, and dividends last November and May on the common stock. One thousand and eighty-eight shares of preferred stock, series "B," have been redeemed since the issue of the last balance sheet, making a total redeemed to date of 3,242 shares.

Nova Scotia Steel and Coal Company.—Nova Scotia Steel and Coal Company made a new record both for output and shipments. The increase is largely the result of the extensions and improvements made to plant last spring. The output of coal for the month amounted to 75,000 tons, while total shipments for the month were 90,000 tons. The output of pig iron amounted to 8,020 tons; steel ingots, 6,840 tons, while the works rolled no less than 7,100 tons. The company during the month shipped 72,500 tons of ore.

Sao Paulo Tramway and Light Company.—A special dividend of five-sixths of one per cent. on the paid-up common stock of the Sao Paulo Tramway, Light and Power Company has been declared, payable on October 1, 1912, to shareholders recorded on August 31. This special dividend is for the month of July at the rate of ten per cent. per annum. Holders of certificates of deposit for shares will receive the dividend on or after October 1 on surrender of certificates in exchange for Brazilian Traction shares.

Dominion Steel Company.—The following is the steel company's output for the month of August:—

Pig iron	26,280
Steel ingots	29,490
Steel blooms	24,160
W. steel rails	17,740
Steel rods	4,030

Total shipments

Canadian Mineral Rubber Company.—The directors report for the year 1911 that the results obtained are disappointing, but they are satisfied with the year's work, as the profit on large contracts secured in 1911 and remaining uncompleted at December 31 will come into the accounts in 1912. The earnings, after deducting operating charges, interest on loans, &c., amount to \$68,151, out of which interest of \$48,015 on the debenture stock has been paid, leaving a surplus of \$20,136. The company's expenses have been largely increased this year by exploiting new materials and opening up new territories. Out of the year's profits an amount of \$21,546 has been written off capital account. Sales of paving have been satisfactory, and the paving has given satisfaction, so that steadily increased sales may be looked for. The yardage completed in 1911 is about the same as 1910, but, in addition, there are uncompleted contracts in hand for 540,000 square yards. Important contracts have been signed for the year 1912, including contracts with the cities of Vancouver and Calgary. Sales of mineral rubber have largely increased over those of the preceding year. The manufacturing costs per ton are lower than any previous year, and, with the increased tonnage looked for in 1912, still further reductions in costs are anticipated.

Porto Rico Railways Company, Limited.—The comparative statement of earnings for July, 1912, is as follows:

	July.	1911.	1912.	Decrease.	Per cent.
Gross	\$69,050.34	\$56,516.08	\$12,534.26	18.15	
Net	34,346.16	10,327.63	24,018.55	69.93	
For seven months:					
Gross	\$424,903.93	\$490,096.52	*\$65,192.59	*15.34	
Net	218,841.67	195,148.66	23,693.01	10.82	

*Increase.

Duluth-Superior Traction Company.—The Duluth-Superior Traction Company comparative statement of gross passenger earnings for the month of August is as follows:

	1912.	1911.	Increase.
First week	\$ 23,887.70	\$ 23,870.65	\$ 17.05
Second week	23,418.40	22,932.15	486.25
Third week	23,374.10	23,437.80	*63.70
Remainder of month ..	33,297.85	32,283.94	1,013.90
Month	103,978.05	102,524.55	1,453.50
Year to date	748,899.75	735,813.80	13,085.95

*Decrease

Crown Chartered Mining Company.—That the Crown Chartered Mining Company will be reorganized was announced by Mr. J. P. Heffernan, the secretary and treasurer of the company, on his return from Rochester, where he has been in conference with three of the largest shareholders of the company.

"The directors have decided to call a special meeting of the shareholders in the near future," declared Mr. Heffernan, "to take action on a reorganization scheme, which includes a proposal to liquidate the indebtedness of the company by the issue of bonds."

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail Smelter for the week ending August 29th, and from July 1st, in tons, to date, are as follows:—

	Week end, Aug. 29.	July 1 to date.
Centre Star	2,837	28,509
Sullivan	639	5,003
Le Roi	483	7,462
Richmond-Eureka	63	246
Molly Gibson		601
St. Eugene		160
No. 1		129
Other mines	1,864	10,650
	5,886	52,760

Canadian Northern Express Company.—The Canadian Northern Express Company reports to the United States Interstate Commerce Commission for June and twelve months compared as follows:

	1912.	1911.	Changes.
Total rcpts. from op....	\$ 58,900	\$ 46,867 Inc.	\$ 12,032
Express priv-debit	22,890	18,246 Inc.	4,644
Total oper. revs.	36,009	28,621 Inc.	7,388
Total oper. expen.	20,079	14,490 Inc.	5,588
Net oper. revs.	15,930	14,130 Inc.	1,799
Taxes	871	18 Inc.	889
Oper. income	15,059	14,148 Inc.	910
July 1 to June 30:			
Total rcpts. from op....	622,325	466,087 Inc.	156,238
Express priv-debit	241,413	178,974 Inc.	62,439
Total oper. revs.	380,912	287,113 Inc.	93,798
Total oper. expen.	202,128	154,924 Inc.	47,204
Net oper. revs.	178,783	132,189 Inc.	46,594
Taxes	4,842	1,540 Inc.	3,302
Oper. income	173,940	130,648 Inc.	43,291
Mileage:			
Steam roads	4,022	3,369 Inc.	652
Other lines	22	22	

The Monetary Times reminds us of its issue in 1860, when hooped skirts were advertised and butter was 15 cents a pound. That butter looks good, but that hooped skirt makes us rather prefer these later, but more costly times.—Halifax Recorder.

INDUSTRIAL ASSURANCE

Supplies a Public Want in Australia—Outstanding Defects Shown by an Actuary

The marked growth during the past few years in Australia of that species of life assurance business known as industrial assurance clearly indicates that it supplies a distinctly felt public want, writes "An Actuary" in the Melbourne Age. This particular form of assurance was initiated in England in 1854. Since then it has developed to an amazing extent, and the following table shows the total approximate amount of industrial assurances now in force in British speaking countries:—

Britain	£290,000,000
United States	545,000,000
Australasia	12,500,000
Canada	10,000,000

Industrial assurance consists in the issue of policies for small amounts (the average amount of Australian policies is £21), which are paid for by means of weekly premiums (ranging from 1d. per week upwards), collected by the servants of the assurance company at the homes of the persons assured. The usual object which the proponent has in view differs from that of a proponent for an "ordinary policy." Either it is to obtain a small endowment after a stated period, or to provide for death and burial expenses. Probably the tremendous and steadily increasing popularity of the industrial policy is due to the hatred of pauperism and the importance attached to the idea of a "decent burial" by the industrial classes of all Anglo-Saxon communities.

Factor of Civilization.

Industrial assurance is undoubtedly a factor of civilization. It brings the blessings of assurance within reach of the poorest in the land. It encourages habits of independence. It is a teacher of thrift to the improvident, and it saves the taxpayers of the countries wherein it is established an aggregate sum of fully £5,000,000 per annum. These are its virtues, but it is not without defects.

The outstanding defect of industrial assurance business is that it is carried on under existing conditions at a cost immeasurably in excess of the cost of ordinary assurance, and this surplus cost falls with undue severity upon the very people industrial assurance was designed to relieve and benefit. The following table shows how the cost of the two systems compares:—

	Per Cent. of income.
Expense rate of a well managed ordinary assurance business	12
Expense rate of average industrial assurance business	42

This means that while it should never cost more than 1¼d. in the shilling to carry on ordinary assurance profitably, about 5d. out of every shilling collected is spent in keeping industrial assurance on its feet.

At One-Fourth Expense Rate.

In other words, the well-to-do citizen who assures in the ordinary branch for a considerable amount gets the larger benefit for which he contracts guaranteed to him at one-fourth the expense rate fastened on the shoulders of the poor man who seeks a much smaller benefit in the industrial branch.

The prime reason assigned for this singularly oppressive anomaly by the assurance companies is that industrial assurance essentially depends for its successful conduct on the house to house collection of premiums by the companies' agents. Ordinary policyholders pay their premiums direct to the companies' offices without putting the companies to any cost of collection, but practically all the premiums of industrial assurance are directly collected, and the agent has to be paid. There is a good deal of force in the contention that the house to house system of collection in the industrial branch is necessary. Experience has proved that the industrial policyholder is very apt to let his premiums go unpaid and to allow his policy to lapse if a collector is not at hand to remind him. But the contention, at the same time, does not cover all the field.

Employ no Agents and Pay no Commissions.

There are four life offices operating at this moment in England which employ no agents and pay no commissions. They have insurances in force totaling about £35,000,000, and their expense rates range from 4.50 to 8.75 per centum. This fact is not an argument that Australian offices should not employ agents to canvass the public nor write business at an expense rate higher than 8 per centum; but it certainly suggests that the practice of employing agents and col-

lectors, and paying them high commissions, may very easily be overdone. And the practice, as a matter of truth, is overdone—overdone enormously. An illustration will make this clear. One Australian life assurance office, which has now in force a total amount of industrial assurances of about £4,000,000, has issued industrial policies since it started business to the value of about £29,000,000. The discontinuances amount, approximately, to £25,000,000. Of these discontinuances only about one-ninth are accounted for by death or maturity, and about one-fifth by surrender.

Two-thirds not Persuaded.

The balance were forfeited. That is to say, some two-thirds of the people who were induced by agents to become policyholders could not be persuaded by the agents to continue their premiums, and they allowed their policies to lapse.

The system of house to house canvass and collection shows itself in the light of these figures (which are fairly representative of the industrial business in Australia) a failure which does not even begin to justify its huge cost. Reverting to the fact that in all Australasia there are about £12,000,000 worth of industrial policies in force to-day, it would be fair to estimate the total discontinuances through forfeiture at approximately £48,000,000. The legion of people who took out the policies represented by that colossal sum and allowed them to lapse absolutely lost whatever they paid in premiums. Some paid their premiums only for a few weeks, some for months, some for years. But in the end their policies all were forfeited, and they obtained no tangible benefit from their expenditure.

(To be concluded.)

ONTARIO GOVERNMENT RAILWAY INSURANCE

The Temiskaming and Northern Ontario Railway Commission carries a considerable amount of fire insurance. The following are the details:—

On buildings, including all office permanent fixtures as follows:—Station buildings, \$158,120; agents' dwellings, \$7,920; section houses, \$52,665; freight sheds, \$39,250; engine houses, \$33,290; store houses, \$44,005; and track scale, \$2,720; total, \$337,970.

On contents of buildings, excluding all office permanent fixtures but including merchandise, movable and office furniture, telegraph instruments, and property of all kinds: Station buildings, \$28,400; freight sheds, \$78,500; and store houses, \$43,000; total, \$149,900.

In car and locomotive, machine and boiler shops, painting and erecting shops, engine and boiler houses, and other buildings used for manufacturing: Buildings, including permanent fixtures and fittings, \$39,680; stock manufactured, unmanufactured, and in process of manufacture, materials and supplies, \$19,000; fixed and movable machinery and machines, engines, boilers, dynamos, motors, patterns (limit on any one pattern or set of patterns, \$250) tools, implements, utensils and all plant, \$56,644.44; total, \$115,324.44.

On tanks, supports, pumps, engines, tools, implements, and plant connected therewith, or pertaining thereto, \$52,330; on bridges, trestles and their approaches, \$82,116; on decks and steel structures, \$15,760; on coal trestles and chutes, piers, pockets, sheds and platforms used for the storing or handling of coal, \$46,240; on platforms, \$488; on decks, \$960; on the coal, \$19,000; total, \$216,894.

On rolling stock, covering all that owned by the assured in any engine or car house or repair shop, or otherwise upon the line of the road and its branches, spurs, sidings, and yards, with the following limits, \$1,303,900; on freight in transit, including earned freight earnings, \$200,000; on various buildings and contents distributed over the entire line where the individual liability does not exceed \$250, \$12,500; on miscellaneous specified insurance covering buildings and contents, not coming under heading of any other group, \$21,170; total, \$1,537,570.

The total of the entire schedule is \$2,357,658.44.

The rate on all the above is fifty cents per hundred dollars and is divided: twenty-five per cent. with the Mercantile Fire Insurance Company, thirty-five per cent. with the London and Lancashire Fire Insurance Company, twenty per cent. with the General Fire Assurance Corporation, fifteen per cent. with the Norwich Union Fire Insurance Society; and five per cent. with the Union Assurance Society who took over the risk of the Richmond and Drummond Fire Insurance Company.

In addition to above, \$174,820 is in force on dwellings, office building and contents situated in North Bay and Toronto, also ties, construction camps, etc., upon which tariff rates prevail.

St. Martins, N.B., branch of the Bank of British North America has been closed.

CROP REPORTS

Grain Dealers' Estimate of Nineteen-Twelve Crop—
Official Figures from Ottawa

The crop prophets are active now. The general opinion seems to be that the Western wheat will be about the same as last year.

"The Western Canada crop, while equal to it, will not exceed that of last year," says Sir William Mackenzie, president of the Canadian Northern Railway.

Grain Dealers' Estimate.

The Northwest Grain Dealers' Association have issued the following estimate of the 1912 crop for the three prairie provinces:—

Wheat, 10,584,000 acres at 17 bushels per acre, 179,828,000 bushels.

Oats, 5,245,000 acres, at 42 bushels per acre, 220,290,000 bushels.

Barley, 1,500,000 acres, at 32 bushels per acre, 48,000,000 bushels.

Flax, 1,110,000 acres, at 11 bushels per acre, 12,210,000 bushels.

The final estimate of the wheat crop of 1911 gives 177,109,000 bushels, which includes half a million bushels still in the farmers' hands.

Crops in Saskatchewan.

The estimate of the Saskatchewan Department of Agriculture of the crop of 1912, based on reports received from 1,800 correspondents, follows:—

The total yield of wheat, oats, barley and flax, is estimated at 228,466,154 bushels, or an increase of 15,755,801 bushels over the crop of 1911. This was grown on an estimated acreage of 582,358 acres.

Wheat shows an increase both in acreage and in average yield. Oats show an increase in acreage, but a slight decrease of the average yield, while barley and flax show increases in acreage and in yield.

Crop district No. 7, the northeastern, had the smallest acreage under wheat, but had the largest yield per acre.

Interpretation of Crop Figures.

In the following official statement from Ottawa the figures representing the average standard condition on July 31st, 1912, have been converted into the percentage of a condition according to the scale in which 100 represents an average yield per acre equal to that of the four years 1908-11. It is assumed that the conditions between the end of July and the time of harvest will be equal to the average conditions of the same period for the four years 1908-11. The figures are for the entire Dominion.

Crop	Average standard condition July 31 1908-11	Average yield per acre 1908-11	Standard condition July 31 1912	Anticip't'd yield per acre 1912	Condition (100 = average yield per acre 1908-11)
	p.c.	bush.	p.c.	bush.	p.c.
Spring wheat ...	82.90	18.48	83.07	18.52	100
Rye	83.26	18.32	83.53	18.38	100
Barley	83.36	27.44	83.02	27.33	100
Oats	84.03	35.11	81.11	33.89	96
Flaxseed	81.80	10.83	86.28	11.42	105
Corn for husking	84.48	58.41	70.37	48.65	83
		tons.		tons.	
Corn for fodder.	88.32	9.97	73.19	8.26	83

Compared with June 30, 1912, the per cent. condition in relation to the average yield of the four years 1908-11 has receded by 2 points spring wheat and by 1 point rye; barley has advanced from 99 to 100 and oats remain as last month, viz., 96. On the same date last year spring wheat was 114, rye 101, barley and oats 108, corn for husking 103 and corn for fodder 98.

Fall Wheat, Area and Yield.

The following table gives the area and a preliminary estimate of yield per acre of fall wheat for 1912:—

Provinces.	Area. acres.	Yield per acre. bush.	Total yield. bush.
Ontario	561,000	20.34	11,411,000
Manitoba	3,100	25.06	77,600
Saskatchewan	53,000	24.78	1,313,000
Alberta	161,000	24.09	3,878,400
British Columbia	2,900	32.20	93,300
Total	781,000	21.48	16,773,300

The Western wheat crop this year is estimated by the Grand Trunk Pacific Railway to reach 179,828,000 bushels. Their report shows that an average of over 50 per cent. of

the grain had already been harvested, but the work has been greatly delayed from one end of the prairies to the other by heavy rain. In several places it is reported that the early cut grain has begun to sprout, but in the majority of districts no damage has yet been done to it. Threshing has not yet commenced, and in some places it is feared that unless the weather clears a promising crop is going to be badly damaged. There has been no frost to hurt. The yield generally is a large one.

Estimates carefully prepared by experts for the company place the total crop as follows: Wheat, 10,584,000 acres, at 17 bushels per acre, 179,828,000 bushels; oats, 5,245,000 acres, at 42 bushels per acre, 220,290,000 bushels; barley, 1,500,000 acres, at 32 bushels per acre, 48,000,000; flax, 1,111,000 acres, at 11 bushels per acre, 12,210,000 bushels. The total wheat crop last year was 177,109,000 bushels, so that this year's estimate places the yield at between two and three million bushels in excess of that of last year.

EXTENDING ANGLO-CANADIAN TRADE

A despatch from London states that the strong, and, it may be said, successful efforts which are being made in England next November to secure an increasing share of Canadian trade, are one of the chief features of the general industrial situation. Canadian prestige has been boomed much by the visit of the Canadian Premier to Britain.

As regards the Anglo-Canadian trade position a well-informed correspondent writes:

"Canada's imports of iron and steel manufactures during the last fiscal year were valued at no less than twenty millions sterling. Of these the United States supplied sixteen millions worth and the United Kingdom £2,800,000. It is difficult to imagine that distance from England and the similar habits and customs of the people of Canada and United States as regards use of the same articles and patterns should account for Great Britain's small share of the imports of this class. And it would seem that British manufacturers have here a considerable opportunity if they will only adopt ordinary business methods in looking into the conditions of Canadian consumption and catering accordingly. The Canadian market is constantly growing, and is assuredly worth while. It is suggested that what our manufacturers are not able to accomplish individually may be effected by combination.

"A useful example of this method of exploiting a market is seen in the recent formation of a manufacturers' agency company with adequate capital for carrying stocks of standard machinery and engineering appliances and in executing contracts for the construction and equipment of engineering works in Canada. The company in question holds sole agency agreements for the specialties of such firms as Armstrongs, Cammell, Laird and Company, Dorman Long and Company, Galloway's, Limited, the Power and Gas Corporation, Limited, Ransome, Sims, and Jeffries, Sandycroft Foundry Company, Willans and Robinson, Limited. A number of similarly powerful combinations in other directions will naturally occur, and there seems no reason to doubt that with a careful study of the requirements of Canada's development, intelligent support and adequate capital, British enterprise and British industries should win a high position in competition with American and local effort of this character.

"Henceforward, great works in connection with docks and dock equipment, municipal works of every description, to say nothing of new industrial undertakings, will be numerous in every part of Canada, the capital for which must ultimately be sought in this country. It seems, therefore, a most natural and economic procedure for both the financing and the execution of these works to fall largely into British hands; provided only that adequate arrangements can be made on the spot in some such way as outlined for securing at first hand the contract for supplies and equipment."

A branch of the Royal Bank of Canada is being opened at Brantford, Ont.

The capital stock of the Trust Mortgage and Investment Company, Limited, has been increased from \$100,000 to \$500,000 by the issue of 4,000 new shares of \$100 each.

A struggle for the management of La Banque Internationale du Canada at the outset is deeply to be regretted, for it tends to affect the public attitude towards such financial institutions. Confidence is the primary essential of financial stability. It is the public compensation for the monopolistic tendencies of a virtually limited number of gigantic concerns. It rests with them to sustain that confidence by scrupulously avoiding anything tending to weaken it. It remains with the Canadian courts to turn this unfortunate circumstance to public advantage by making it clear that Canadian laws and Canadian courts insure fair treatment for all investors in Canadian financial institutions.—Toronto Globe.

CANADIAN PACIFIC STOCK ISSUE

Sir Thomas Shaughnessy Thinks Government Should Not Fix Price—Talks of the "Bogey of Melon Cutting"

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, in an interview at Winnipeg, replied to criticisms respecting the company's proposed issue of stock below the market quotation. "The directors," he said, "in determining the issue price of the stock must take into account many things that do not occur to those who lack intimacy with the company's affairs, or, indeed, with financial affairs generally. The credit of a government, or a municipality, or a railway company, is a tender plant that must be handled with the greatest possible care, if money required from time to time is not to cost too much or is to be promptly obtained. If the Government were to assume this duty of the directors and were arbitrarily to fix the premium at which the shares should be offered to the proprietors or the public, the position and responsibility of the government would be essentially different from that of the directors."

Would be Taken as Government Guarantee.

"The order-in-council fixing the premium would, I think, be generally accepted as an undertaking on the part of the government that the market price of the shares would never fall below the figure named. I do not see how the government could justify such action without coupling with it a direct undertaking to that effect.

"You will see at once that our Canadian government would be in an undesirable position if it ordered the company to issue its shares at, say, 150, and if in the course of time, and by a combination of circumstances that nobody could have foreseen or controlled, the market value of the security was reduced to a figure that represents a loss to the shareholders.

"Manifestly, while it is probably quite competent for the government to refuse point blank its approval of a proposed increase in railroad's capital stock, and thus in all likelihood force restrictions of expenditure, with consequent public loss and inconvenience, there are, in my opinion, inconceivable grounds upon which that same government could fix an issue price in excess of the par value of the security.

Some Important Considerations.

"When people purchase our common stock they have in mind an investment that will give them a reliable return in the future. If a shareholder has 100 shares of which the market price is 270, and he subscribes for 30 additional shares at 175, the average price of his entire holding is reduced to 248. If the issue price is 200, the average price will be 254. In other words, if after he gets his new stock the market breaks 16 points, or in the other case 22 points, the advantage in price has been wiped out, and we know how often a financial disturbance in Europe or elsewhere that has not the most remote connection with Canada or Canadian affairs will cause a break of 16 or even 22 points in a high-priced security like Canadian Pacific.

"These are the considerations that weigh with the people upon whom we rely for our vast money requirements, and any company of the magnitude of the Canadian Pacific must, if it is to expand and progress, have an army of those who are prepared to follow its fortunes and invest in its securities. If we were to approach them with the financial propositions outlined by our good friends, who mean well, but do not know, they would button up their pockets and tell us to go hang for our money."

As to Rates.

With regard to the suggestion recently made that a reduction in rates might be made a condition of the government's approval, Sir Thomas said: "The subject of rates is one that must be considered by itself, and in Canada we have a capable commission clothed with plenary powers who are now conducting a comprehensive inquiry.

"The policy and affairs of the Canadian Pacific are proper subjects for discussion and criticism by the public and the press of Canada. The company's prosperity would naturally breed some jealousy, and the bogey of melon-cutting, as it is sometimes termed, can be flaunted with a degree of effectiveness that would not be possible in other circumstances.

Land Grant Bonds.

"Most people forget or do not know that the cash subsidies, large amounts received from the sales of land and the proceeds of land grant bonds, all of which were applied to the construction and equipment of the railway, play no part whatever in the accounts of the company, the cost

of the property having been reduced by these amounts years ago.

"The land grant has proved to be a most valuable asset, but if we go back to 1888 we find that \$15,000,000 of land grant bonds secured by the entire land grant of the company and fortified by a Dominion government guarantee of interest only realized about ninety in the market. For seventeen years after the completion of the railway the land grant in that vast wilderness was not coveted by anybody, and it was only after 1902 that stupendous efforts and the vast expenditures of the company to attract attention and bring people to the country commenced to bear fruit, and the land grant became an important feature in the company's financial affairs.

REDUCTION OF CABLE RATES

As the result of representations made to the Western Union Telegraph Company by the postmaster-general of Great Britain, and the postmaster-general of Canada, the following additional reductions will be made at an early date in cable rates:

No. I.—For telegrams in plain language the present deferred rate of sixpence (twelve cents) per word will be reduced to four and one half pence, and besides these telegrams, instead of being subject to a delay of twenty-four hours, will be transmissible without any more delay than what is necessary to give priority to the ordinary traffic of one shilling per word.

No. II.—Another rate of night lettergrams will be inaugurated at a charge of three shillings (72 cents) for twelve words, and two and a half pence (5 cents) for each additional word. Those lettergrams will be subject to the prior delivery or ordinary traffic to be delivered on the morning of the day following that on which they are handled.

No. III.—There is at present in existence a rate of six shillings for thirty words and one shilling for each additional group of five words for the week-end cable letters handed in up to Saturday for delivery on the following Tuesday. This arrangement is replaced by the following:

The rate will be four shillings and sixpence (one dollar and eight cents) for every twenty-four words, and five cents for every additional word, but the time of delivery is Monday instead of Tuesday as before.

No. IV.—The five pence per word (10 cents) rate for ordinary press telegrams is reduced to three pence and a half (seven cents). This change is in force already, but these messages are not now subject to nine hours deferment as before.

No. V.—Another change for press night rates is also made at once, and is as follows: The price per word will be two and a half pence (five cents) during six hours from midnight to six a.m. from the country of destination, which means that Canadian morning papers will get those messages at that rate between six p.m. and midnight.

B.—During the hours of 1 p.m. and 4 p.m. (Montreal time) equivalent to from 6 to 9 p.m. (London time) these rates are also applicable, and are subject to no deferment, being transmissible as received. All the above changes apply to those places in Canada and the United States for which the rate for ordinary telegrams was one shilling per word. The other rates for other places in Canada and the United States are also reduced correspondingly.

NEW BOARD OF ROYAL BANK

At a meeting of the directors of the Royal Bank of Canada, held at Montreal, the new directorate was formed. Under the agreement by which the two banks became one the Traders Bank was entitled to three representatives from its board. One outsider has been added, and the Ontario members of the Royal Bank board are: Messrs. E. F. B. Johnston, K.C., of Toronto; W. J. Sheppard, of Waubesa; C. S. Wilcox, of Hamilton, president of the Steel Company of Canada, and Albert E. Dymont, of Toronto. This section of the board will meet in Toronto, and will deal with all Ontario matters, so that as regards the Traders business there will be practically the same conditions as under the old management. Mr. E. F. B. Johnston was also elected second vice-president of the bank, and will thus become chairman of the Ontario section of the board.

Mr. F. L. Pease, the general manager, remains first vice-president, and Mr. Stuart Strathy becomes supervisor for Ontario, with his office at Toronto. He will have charge, as formerly, of the general business for that province, and, as there are now 112 branches of the bank in Ontario alone, the duties of the former directors and general manager of the Traders will be considerably increased. The president, Mr. H. S. Holt, continues at the head of this progressive bank.

SEVENTY NEW COMPANIES

Large Number of Charters Granted—Aggregate Authorized Capital is Sixteen Million Dollars

The following is a list of charters granted during the past two weeks in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- North Vancouver, B.C.**—Pioneer Bakery, \$30,000.
- South Vancouver, B.C.**—Barker Drug Company, \$50,000.
- Sooke, B.C.**—Sooke Harbor Water Company, \$200,000.
- New Westminster, B.C.**—Harbour City Electric Company, \$10,000.
- Newport, B.C.**—Newport News Publishing Company, \$50,000.
- Winnipeg, Man.**—Garden Realty Company, \$60,000. D. G. Martin, A. Jamieson, L. F. Earl.
- Jacquet River, N.B.**—Antinori Fishing Club, \$5,000. A. Culligan, R. L. Ellis, D. McAlister.
- Kingston, Ont.**—Kingston Realities, \$250,000. A. W. Wheatley, E. Davis, C. Birmingham.
- Thetford Mines, Que.**—Thetford Land Company, \$99,000. H. Roberge, J. L. Demers, J. Demers.
- Hebertville, Que.**—Compagnie Industrielle d'Hebertville, \$20,000. L. A. Dubois, O. Martel, J. Saulnier.
- Pictou, Ont.**—G. E. Fraser Sons, \$75,000. W. S. Fraser, H. E. Fraser, Los Angeles; I. F. Fraser, Pictou.
- Chippawa, Ont.**—Chippawayne, \$40,000. H. A. Campbell, E. C. McNally, W. M. Goring, Niagara Falls.
- Chatham, Ont.**—Catholic Hospital Building Company, \$40,000. J. Pleasence, L. Howard, H. J. Sullivan.
- St. Marys, Ont.**—De Long Hook and Eye Company of Canada, \$50,000. A. L'E. Malone, E. G. Long, A. Mearns.
- Sudbury, Ont.**—Grand Opera House Company, of Sudbury, \$50,000. L. O'Connor, F. Shields, J. H. Morin.
- Hamilton, Ont.**—Canadian Roll and Machine Company, \$500,000. J. L. Counsell, A. C. McFarlane, Miss F. A. Bell.
- Millerton, N.B.**—Millerton Extract Company, \$98,000. J. W. Miller, Newcastle; T. C. Miller, Derby; E. P. Williston, Newcastle.
- North Bay, Ont.**—Pearce Meat Company, \$20,000. A. C. Pearce, R. M. Rattray, J. R. Moffat. Bogart Refrigerator Company, \$100,000. E. M. Bogart, G. Northway, L. O. Clarke.
- Victoria, B.C.**—Capital Trust Company, \$2,000,000. Acme Press, \$50,000. Home Builders' Investment Company, \$100,000. Prince George Hotel Company, \$50,000. Weiler Bros., \$1,000,000. Victoria Finance and Loan Company, \$500,000. Universal Motor Transfer Company, \$25,000. Victoria Tug Company, \$56,229. Portland Canal Tunnels, \$700,000. Universal Metal Flume Company, \$100,000.
- Ottawa, Ont.**—Twin City Ice Company, \$100,000. L. C. Morisset, L. H. Morisset, M. A. Morisset. Bishopric Wall-Board Company, \$150,000. J. A. Barrett, J. A. Heron, A. E. Caughey. Lapiere Realty, \$40,000. C. Lapiere, J. E. Cusson, J. A. A. Fissiault. Dominion Forged Steel Car Wheel Company, \$1,000,000. J. W. Gauvreau, F. Lochman, E. Buck, E. R. Watts & Son, \$200,000. P. W. Ward, E. R. E. Chevrier, W. J. Grace.
- Montreal.**—Compagnie de Montreal-Est, \$150,000. J. A. Brunel, M. Loranger, B. Melancon. Eastern Quarries of Canada, \$25,000. W. R. Smith, J. G. Ross, P. F. McCaffrey. Market Gardens, \$100,000. A. Wainwright, M. Alexander, L. J. Beique. Gault Realities, \$500,000. G. W. MacDougall, L. Macfarlane, W. B. Scott. United Co-operative Stores, \$500,000. P. F. Brown, A. F. Teulon, W. R. Ford. Windsor Investment Company, \$100,000. H. Pearce, E. Gilbert, A. R. Bostwick. Standard Clay Products, \$1,000,000. A. J. Brown, G. H. A. Montgomery, W. R. L. Shanks. St. Lawrence Land Syndicate, \$90,000. J. R. Law, E. A. Barnard, W. H. H. Hume. Globe Realty Corporation, \$2,000,000. A. J. Brown, W. R. L. Shanks, F. G. Bush.
- Toronto.**—Lansdowne Bowling and Athletic Club, \$10,000. R. F. Curry, M. T. Robertson, J. Kent. Oxygen Fuel Company of Canada, \$20,000. G. Grant, A. Dods, B. Williams. New York Graphite Company, \$1,000,000. G. M. Clark, R. W. Hart, G. M. Miller. Aladdin Cobbalt Company, \$500,000. E. B. Ryckman, H. Howitt. Hill-Leonard Engineering and Construction Company, \$50,000. F. H. Stewart, W. C. Willis, A. W. Ballantyne. Webb Lumber Company, \$40,000. R. H. Webb, J. A. McAndrew, W. H. Irving. Legg Brothers, \$40,000. J. I. Sutcliffe, H. J. Welch, H. A. Munro. Musgrave Thermo-Alarm Company, \$100,000. A. E. Knox, E. L. Middleton, T. L. Monahan.

Vancouver, B.C.—Canada Realty Syndicates, \$250,000. Georgian Loan and Investment Company, \$100,000. Custodians, \$10,000. Canadian Borneo Company, \$100,000. Nelson, Shakespeare, Watkins, \$250,000. Jellsoppe Manufacturing Company, \$20,000. North Burnaby Lumber Company, \$10,000. Nearby Sand and Gravel Company, \$100,000. Christian Literature Depot, \$25,000. Canadian Mutual Lands, \$100,000. Lillooet Dairy, \$100,000. British Financial Corporation of Canada, \$200,000. Hardy Bay Trading Company, \$100,000. Burke and Wood, \$75,000. Athletic Park Company, \$25,000. Pacific Sales Association, \$5,000. S. W. Forsyth & Company, \$200,000. Coquitlam Shipbuilding and Marine Railway Company, \$500,000. Stoltze Manufacturing Company, \$60,000.

FOR INSURANCE AGENTS.

"Life Insurance Salesmanship," by T. J. Henderson, is a book which should appeal to those engaged in selling life insurance. The work is practical and its precepts excellent. "The successful salesman of insurance is an expert of the highest type—one who must not only be able to supply the demand for his goods but must be able to create this demand." And books of this type assist the insurance man to attain unto efficiency and become expert in dealing with prospects and securing sales. Life Insurance Salesmanship, Thomas J. Henderson, \$1, Spectator Company, 135 William Street, New York.

RAILROAD EARNINGS.

The following are the railroad earnings for the week ended August 31st:—

	1911.	1912.	Increase.
C.P.R.	\$3,329,000	\$3,809,000	+ \$480,000
G.T.R.	1,442,953	1,660,916	+ 217,963
C.N.R.	460,900	563,800	+ 102,900
T. & N.O.R.	58,451	58,451	— 13,205
Halifax Electric ...	8,532	7,699	— 833

The July statement of the Grand Trunk Railway system shows a total decrease of £14,450 sterling. The earnings of the Grand Trunk proper show an increase of £10,300, but the subsidiary companies show a substantial decrease: Grand Trunk Western Railway, net profit decreased £2,200; Grand Haven & Milwaukee Railway, net profit decreased £10,150; Canada Atlantic Railway, net profit decreased, £12,400.

The gross earnings of the C.P.R. for the month of August, as given in the weekly statements, show an increase of \$1,813,000, or 18 per cent., over earnings in the same month last year. August earnings were \$11,886,000 against \$10,073,000 for August, 1911.

BRITISH TRADE COMMISSIONER TO ARRIVE NEXT WEEK

Mr. C. Hamilton Wickes, recently appointed British Trade Commissioner in Canada, in succession to Mr. Richard Grigg, who is now chief Canadian Trade Commissioner, will sail from England on Friday. He is expected at Montreal, his headquarters in the Dominion, on Monday week.

Mr. Wickes is a son of Mr. Thomas Harries Wickes, late of the Public Works Department, Indian Government, and was educated at All Hallows School, Honiton, Devon. In 1883 he was articled to the firm of Ingle, Cooper and Holmes, 20 Threadneedle Street, London, E.C., and qualified as a solicitor. He severed his connection with the firm in 1890, and, proceeding to Pretoria, during the next two years managed the company department of a firm of attorneys and solicitors there. In 1897 Mr. Wickes returned to London and started a commercial career with Messrs. W. E. Aylwin and Company, produce brokers, Leadenhall Street, E.C. In 1897 he established the firm of Hamilton, Wickes and Company, St. George's House, Eastcheap, London, and Victoria Street, Liverpool, and conducted the business until 1908, acting for many years as broker on the London and Liverpool markets for several large importing firms in trade with North and south America, South Africa, Australia, China, Japan, the Straits Settlements, India, and Europe.

In 1908 Mr. Wickes accepted the position of H.M. Trade Commissioner in Australia, where, in the interests of British trade, he has achieved great success. His relations with the Commonwealth Government, the various State Governments, and the commercial community, have been most amicable. Mr. Wickes is widely known amongst manufacturers in the United Kingdom. He has a staff of trade correspondents, reporting to him and direct to London, in the leading cities of Canada.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Woburn, Ont.—September 6.—Frame barn. Loss, unknown. Origin, lightning.

Parrsboro, N.S.—September 3.—Mr. F. Earle's store. Loss and origin unknown.

Aurora, Ont.—September 6.—Mr. Preston's barn. Loss, unknown. Origin, lightning.

Elmira, Ont.—September 10.—Mr. G. Ratz's flour mill. Loss, \$12,000. Origin, unknown.

Leamington, Ont.—September 11.—Mr. F. Hodgson's store. Loss, \$300. Origin, unknown.

Hartington, Ont.—September 9.—Mr. W. Babcock's residence. Loss, \$2,000. Origin, unknown.

Cobalt, Ont.—September 11.—Mr. A. Gillies' motor boat. Loss unknown. Origin, engine back-fired.

East Zorra, Ont.—September 6.—Mr. T. Rowe's barn. Loss, unknown. Origin, lightning.

Tavistock, Ont.—September 6.—Mr. N. Roth's barn. Loss, unknown. Origin, lightning.

Chatham Township, Ont.—September 6.—Mr. J. Rumble's barn. Loss, \$3,000. Origin, lightning.

Dover, Ont.—September 6.—Mr. A. Charbonneau's barn, Creek Road. Loss, unknown. Origin, lightning.

Peterboro, Ont.—September 5.—Chemong Park Hotel. Loss, unknown. Origin, defective chimney.

St. Catharines, Ont.—September 5.—Mr. J. O'Brien's barn. Loss, unknown. Origin, lightning.

St. Thomas, Ont.—September 12.—Mr. E. Pound's garage. Loss, \$2,500. Origin, gasoline explosion.

Winnipeg, Man.—September 12.—Patterson Manufacturing Company plant. Loss, \$50,000. Origin, unknown.

Earlscourt, Ont.—September 9.—Mr. A. McLaughlin's frame house. Loss, unknown. Origin, oil stove exploded.

Halifax, N.S.—September 4.—Dr. R. E. Mather's automobile. Loss, unknown. Origin, heat from brakes.

Cobourg, Ont.—September 11.—Mr. Moses Heard's barn and contents. Loss unknown; insured with Hamilton Township Mutual.

Chatham, Ont.—September 6.—Mr. Leonard Marsh's barn, 5th concession, Camden. Loss, unknown. Origin, lightning.

Winnipeg, Man.—September 4.—Mr. T. J. Johnstone's warehouse, Bannatyne Avenue. Loss, unknown. Origin, lightning.

Ottawa, Ont.—September 6.—Mr. A. L. Florence's rag warehouse, McTaggart and Dalhousie Streets. Loss and origin unknown.

Saskatoon, Sask.—September 6.—Great West Furniture Company's storage premises. Loss, \$50,000. Origin, unknown.

Stratford, Ont.—September 1.—Mr. T. J. May's stable. Loss, \$1,000. Insurance, Monarch Company, \$100. Origin, lightning.

Thorold, Ont.—September 1.—Mr. T. Carey's barn. Loss, unknown. Insured with Waterloo Mutual. Origin, lightning.

Markham Village, Ont.—September 6.—Mr. J. Hood's barn. Loss, \$2,000. Origin, lightning.

Mr. Reesor's barn. Loss, unknown. Origin, lightning.

Madoc, Ont.—September 11.—Dr. Sutton's barn and contents. Loss, \$1,500. Mr. J. Stewart's barn and contents. Loss, \$1,000. Origin, lightning.

Parry Sound, Ont.—September 11.—Messrs. G. Neiber-gall & Son and Niagara Veener and Basket Factory. Loss, \$100,000. Origin, unknown.

Saskatoon, Sask.—September 2.—Mr. J. Brandon's plumbing shop, Second Avenue. Loss, \$2,000. Origin, head of match fell in oil-soaked oakum.

Montreal, Que.—September 3.—Stable at rear 49 Benoit Street. Loss, small. Origin, lighted candle placed in wooden cupboard.

Orillia, Ont.—September 9.—Messrs. Leitch's residence. Loss, \$1,000. Insurance, \$300. Miss Leitch's death resulted from fire. Origin, exploded lamp.

Bowmanville, Ont.—September 6.—Goodyear Tire and Rubber Company's works. Loss and origin unknown. Mr. R. Gilbert's barn, 8th concession of Darlington. Loss, unknown. Origin, lightning.

Belleville, Ont.—September 6.—Mrs. N. Vermilyea's barn, Rosses Corners. Loss, unknown. Origin, lightning. Mr. T. Davis' barn, 6th concession. Loss, \$1,200. Origin, lightning.

Fort Francis, Ont.—September 9.—Fort Francis Times office. Loss, \$25,000. Origin, lightning. Mr. Harty's

building, adjoining the Times, caught fire from sparks and was also a complete loss of about \$10,000.

Hamilton, Ont.—September 5.—Barn owned by Mr. H. Burch, 95 Ray Street North. Loss, \$625. Three horses were burned. Insured with Springfield Fire and Marine Insurance Company. Origin, supposed incendiary.

September 7.—Small fire at Messrs. Hancock's brick-yard. Loss and origin unknown.

Toronto, Ont.—August 26.—Motor at Scarboro' Beach. Loss, \$300.

August 26.—185 Bathurst Street. Loss, contents, \$100; building, \$50. Insured with Merchants.

August 27.—Gasoline Launch. Loss, \$100. Insured with Northern Insurance Company.

August 28.—Oriole Road and St. Clair Avenue. Loss, \$75. Origin, bale of rags ignited.

August 30.—Stable, 205 Withrow Avenue. Loss, \$1,050. Insurance, Quebec Insurance Company, \$1,000; Anglo-American, \$300.

August 31.—107 Manchester Street. Loss, \$250. Insured with York Mutual.

August 31.—707 Queen Street. Loss, \$200. Origin, explosion.

September 5.—588 Gladstone Avenue. Loss, \$75. 64 Euclid Avenue. Loss, \$50. Origin, lightning.

September 7.—Mr. James Staples' planing mill. Loss, \$2,500. Mr. Henry Smith's house. Loss, \$1,500. Origin, supposed incendiary.

September 9.—Ideal Bedding Company's factory. Loss, \$10,000. Origin, dropped lighted match.

September 7.—Mrs. P. Chambers' residence, 45 Brunswick Avenue. Loss, \$50. Origin, head of match set fire to curtains.

September 7.—Dominion Crown Cork Company works, 150 Pears Avenue. Loss, unknown. Origin, resin pot.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Stratford, Ont.—August 25.—Messrs. Duggan and Gray's barn. Loss, \$300. Insured with Perth Mutual. Origin, lightning.

Calgary, Alta.—Messrs. P. Burns & Company's granary. Loss, stock, \$1,279; plant, \$30; buildings, \$744. Insured with 41 companies.

Winona, Ont.—Mr. E. D. Smith's barn and stables. Loss, \$2,000. Insurance, Saltfleet and Binbrook Mutual, \$800. Origin unknown; probably dropped matches.

Virden, Man.—August 21.—Mr. E. E. Blakeman, residence. Loss, building, \$2,500; contents, \$4,000. Insurance, \$2,100, with Minniota Mutual. Origin, unknown.

East Zorra, Ont.—August 26.—Mr. J. W. Tod, barn and contents. Loss: stock, \$80; implements, \$950, and building. Insurance: building, \$700; contents, \$800; with Oxford Farmers' Fire Mutual Insurance Company. Origin, lightning.

MUCH DONE TO PREVENT CAR SHORTAGE.

That the complaints regarding the congested "carload and less than carload" traffic on the Canadian railways were warranted is the conclusion arrived at by the Dominion Railway Commission.

"The matter of providing increased facilities has been taken up by the board in such a way that the companies have been forced to take prompt action. The result is that the manufacturers of equipment, etc., have been flooded with orders, and the railways appear to be somewhat relieved.

"But the railway companies alone are responsible for the condition complained of, as they could and should have steadily increased their facilities to provide for the increasing traffic.

"When the matter was taken up with the companies, they passed large appropriations for improvements and new equipment. Since then the companies have done all in their power to increase their facilities as rapidly as possible.

"This fall the companies will have 20,000 more cars than they had last year, and 400 more locomotives, with increased terminal facilities and warehouses. Besides the heavy cost for new equipment, the railways will have spent, at the close of the season, \$4,000,000 on terminal improvements and enlargements.

"In short, the railways have done much to remedy the situation of last winter and spring, but it has taken millions to do it."

The number of directors of the General Assets, Limited, has been increased from three to five.

PLATE GLASS INSURANCE

Fourteen Companies Are Transacting it in Canada—
Adequate Rate Must be Exacted for Risks

The business of plate glass insurance was transacted in Canada last year by fourteen companies, viz.:—five Canadian, four British and five United States.

The companies having adopted the system of insurance by replacement, instead of paying the value of the glass broken, and their contracts not stating any amounts as insured thereby, their returns do not show the amount of insurance effected during the year, nor the amount in force at the end thereof. The premiums received during the year in Canada for plate glass insurance were \$272,205, being greater than the amount received the previous year by \$120,806, and the total losses incurred were \$69,696, being \$8,192 greater than the amount incurred in 1910.

In the early days the plate glass underwriter had but little need to exercise underwriting skill, says Mr. William T. Woods, president of Lloyds Plate Glass Insurance Company. Store fronts contained mainly plain plate glass of ordinary size, set entirely in frames; in the cities the population was smaller and greatly congested districts did not exist; boys could find other places besides the public streets for baseball and other games. To-day in certain tenement districts the conditions are such as to render the insuring of plate glass a very unprofitable proposition.

The tendency of the times runs to more attractive store fronts and the use of bent plates, which are very expensive to replace, and in addition for many reasons liable to breakage. There are also many styles of patent setting, rendering the glass more liable to breakage. There are also now in use many styles of cut, mitred and other decorative plates, all of which enhance not only the cost but the liability of breakage. In these days the plate glass underwriter must bring into play all his judgment gained by experience so as to intelligently accept or decline risks, and, if accepted, exact an adequate rate for the various classes of risks, otherwise at the end of the year, when the annual statement is completed, he will find the results disastrous.

Companies Co-operated.

A few years ago, owing to the large number of companies engaged in the business, and in consequence an apparent scramble for business to obtain volume at rates that proved to be inadequate, it seemed wise for the companies to co-operate and improve conditions, and it was decided to attempt some kind of an organization for the betterment of the business in Greater New York, where a large volume annually was written by the companies. This having proved successful, efforts were made to extend such co-operation, with the result that the Plate Glass Service & Information Bureau was organized early last year, and conditions in the business throughout almost the entire United States have been very much improved, and it is to be hoped that the benefits to be obtained by membership in the bureau will be recognized by those companies not as yet members, and by any company that may enter the business in the future.

Details of Canadian Business.

The following are details of plate glass insurance transacted in Canada in 1912:—

	Premiums of the year.	Nunbe. of Policies New and Renewed.	Amount of Policies New and Renewed.	Number of Policies in force in Canada at Date.
Canada Accident	21,014	1,799		3,359
Dominion of Canada Guarantee and Accident	9,819	1,336		1,101
Fidelity and Casualty	10,024	397	181,942	312
Imperial Guarantee and Accident	603	44		43
Lloyds Plate Glass	166,833			
London and Lancashire Guarantee and Accident	7,723	670		677
London and Lancashire Plate Glass Maryland Casualty	285	767		709
National Provincial Plate Glass...	7,015			
New York Plate Glass	19,105			
Ocean Accident and Guarantee	18,140			

	Net Amount in force at Date.	Losses incurred during the Year.	Claims Paid.	Unsettled Claims, Not Resisted
Canada Accident		8,793	8,887	999
Dominion of Canada Guarantee and Accident		1,328	938	390
Fidelity and Casualty	140,233	787	890	27
Imperial Guarantee and Accident		8		None.
Lloyds Plate Glass		34,542	32,173	5,000
London and Lancashire Guarantee and Accident		2,576	2,074	572
London and Lancashire Plate Glass Maryland Casualty		104	314	None.
National Provincial Plate Glass...		1,404	1,004	400
New York Plate Glass		3,771	3,458	610
Ocean Accident and Guarantee		9,791	9,093	1,211
		6,582	6,756	310

GUARDING AGAINST WINTER FIRES

Simple Precautions that May Prevent Heavy Losses—
Each House Should Have Apparatus Available

"Some of the most serious fires this year in Winnipeg, as well as throughout the province, have been due to carelessness and disregard to ordinary precautions," states provincial fire commissioner Lindback in a report just issued.

"This province has burned up one million dollars, created values during the first six months of the year, and while this is only one-twentieth part of what it has built up during the same period, it nevertheless means a per capita tax of \$2.00 for six months, or if, judging from this record we keep up the same loss ratio, every man, woman and child will be taxed \$4.00 for fire losses, which is going it \$1.00 better than anywhere else on this continent, and advertising us as extremely reckless.

"The accounts of what is being done on the line of creating new buildings are issued regularly. If, at the same time, however, attention was drawn to the fact that a great many of these new creations are built regardless of safety as to construction and location, and that if a fire started among them they would burn like card houses, as in many districts the protection is inadequate, owing to the acknowledged shortage of our present water supply, the public at large at least would understand how necessary it is that each individual property holder and tenant need exercise common care in preparing to avoid fires during the season of cold weather now approaching.

Suggestions That Should be Heeded.

"The following suggestions should be acted upon, and will be the means of avoiding serious fires. Now is the time to inspect and repair all furnaces and heating apparatus. clean all pipes and flues, inspect all chimneys and clean up all basements, attics and closets.

"No building, residence, warehouse or other business place should be without some simple apparatus for extinguishing fires. A considerable portion of fires that start in the roof from defective chimneys, or sparks from neighboring chimneys, get beyond control for the want of a ladder; sometimes the attic can only be reached in that way, when the interior is impossible on account of smoke, not having it when needed the building and contents and very often lives are sacrificed when a little forethought and an insignificant expenditure could have prevented disaster and annihilation of years of saving.

Some Means of Extinguishing Fires.

"No residence or building should be without some means of extinguishing a starting fire, either in the form of fire buckets set aside and kept full of water for that purpose only, or chemical fluid extinguishers, of which there are now some 25 different makes approved by the Underwriters' Laboratories, and selling them from \$5.00 and upwards.

"The many fires recorded, for which there is no explanation, are mainly due to the failure of providing a proper watch and care of premises, during the time when they are not occupied.

"No warehouse, manufacturing plant or building containing valuable stock should be allowed to stand uncared for at any time.

"In arranging the stock in warehouses care should always be taken to keep the aisles, windows and fire escape exits free from obstructions; while all empty and unoccupied buildings should be properly locked and the windows boarded up."

BRITAIN AND THE CANAL

The British case regarding the Panama Canal is summed up in a letter written by Sir Edward Grey, the Foreign Secretary, that was read before the Newcastle Chamber of Commerce. Sir Edward writes: "The British Government is making representations to the United States Government. There seems to be no doubt that the adoption by the Senate of the Panama Canal bill, containing provisions for the free use of the canal by American coastwise vessels as well as United States ships in the foreign trade under certain conditions, is a violation of the Hay-Pauncefote treaty, as the canal will not be open on terms of entire equality to the ships of all nations."

Commenting upon this the chairman of the Manchester Chamber says:—

"It follows that if a large part of this trade is allowed to pass free the total amounts of the tolls collected will be diminished to a large extent, and, as a consequence, general trade will in future be unduly taxed on account of this suppression of part of the earning power of the canal, and the loss will fall upon the shoulders of foreign ship-owners."

CORPORATION INSURANCE

Policies for Business Partners—Uses and Possible Abuses of Corporation Underwriting

The development of corporation insurance was one of the many interesting matters discussed at the Life Underwriters' Convention at Montreal recently. A desirable form of commercial insurance is to take a separate policy on the life of each partner or officer. Then, should the firm at a later date be dissolved, or should a partner withdraw from it, the value of the policy can be readily learned, and it can be taken over by the retiring partner and continued by him for the benefit of his heirs. Or it can be surrendered on termination of the partnership agreement for its then cash value.

The policy may be on the whole life, limited payment life or endowment plan. In the last-named case it forms a sinking fund, which, on termination of the partnership agreement, will pay off the retiring member of the firm in whole or in part, while during the term of the partnership agreement giving protection for its face value against his premature death.

Policies Become More Valuable.

No matter which of these plans is chosen, the policies become more valuable each year, and may be carried in the books of the firm as an asset. The premiums, too, should be entered in the books precisely as the fire insurance premiums are. There is every justification for this, for there is less chance of the stock burning than there is of the death of a partner, says the Canada Life house magazine in detailing the merits of this form of insurance.

An important point about commercial insurance is that it protects the business by providing at once money to discharge the interest of a deceased partner, allowing the survivors to continue the business, and at the same time it ensures the comfort of the deceased partner's family by placing at their disposal in their time of greatest need funds which the business could not furnish without its being severely crippled.

Use as Collateral.

A feature of great importance is the use as collateral which may be made of the policies, enabling a firm to obtain increased credit at the bank. Again, the guaranteed loan values written in the contract for each year enable a firm to obtain money quickly and privately in time of stress.

Hon. J. A. De Boer, president of the National Life Insurance Company of Montpelier, Vermont, stated at the Canadian convention that corporation insurance had come to stay. Mr. De Boer not long ago referred to this matter in a paper he prepared and which was reproduced in the first volume of "The business of Insurance."

"It was recognized," said Mr. De Boer, "at the outset of active life insurance work in this country that it was indispensable to success that its mathematical assumptions as to net rates and net values should be correct, that its practice as to the rights of the insured in policy reserves should be equitable and that state supervision should control its publicity. It was also recognized that, apart from vesting ownership and the results of management of companies in the insured, there should be a proper accounting for surplus to the individual.

Objections to Gaming Policies.

"Particularly was it recognized that, as stated in Phillips on Insurance, 'an exceedingly indulgent construction in favor of the sufficiency of an insurable interest in a life and in favor of the assignableness of life insurance policies, not based upon a substantive, distinct, valuable, appreciable, insurable interest, tends to convert such contracts into gaming policies. Such a use of these insurances is subject to as great, at least, if not greater, objection as other species of gambling.'

"Life insurance was built up on the idea of conserving the home, of protecting the widow and children, of self-care and provision against old age. It was in quite recent times that various causes induced the use of its patiently acquired assets as collateral for the benefit of partners and, even more recently still, for the benefit of corporations or impersonal beneficiaries, thus diverting a system of indemnity and service based specifically upon human affections and the instincts of self-protection into the channels of mere commerce and speculation.

"This transfer of insurable interest which is not yet fully established in law, is to-day one of the gravest questions of insurance and one with which legislation must carefully deal. For it is certain that the issuance of insurance on a single life of millions of dollars, as is oftentimes the case, to be paid for ultimately through a tax upon many thousands of farmers, artisans, clerks and professional men whose insurances average less than \$2,500 in the different companies, is not a sound postulate of economy, of finance, of public pol-

icy or of the duty which life insurance trustees owe to their great constituencies.

"This question has now passed from one of mathematics, of rate sufficiency, of policy provisions, of surplus apportionments, of supervision as to expense and of publicity to one of insurable interest. The first fundamental problems have been fairly well solved but the question of whether it is a safe public policy to intermix the occasional great corporation insurance, through brokerage, with the average policy of the small insurance holder, still calls for solution.

"The demand has been induced by the great strength of our leading companies, by their issue of popular low-cost policies, and by a competition among them for new business which is not justified by either the laws of their need, the nature of their origin, the character of their trust or the true interests of their policyholders, based upon the law of average and distributed risk. There ought not to be a union of non-human, impersonal, corporation and speculative risk with home or individual and human insurable interest. The history of life insurance during half a century past reveals great and gratifying advance in both practice and principle, and it is to be regretted that the closing part of the period is characterized by so widespread a failure to recognize the injustice, the non-equity, the moral hazard and the inconsistency of the so-called corporation insurance for extremely large amounts.

Importance of Net Values.

"It is to the credit of the actuaries of the first half of the period that they did not fail to bear witness to the fundamental importance of net values, non-forfeiture, a proper surrender charge and a true insurable interest consistent with public policy, and to the fact that business depends for its existence, not upon unsecured credits, but upon cash.

"This whole subject is now under review and, if decided in favor of the impersonal insurable interest, a form of policy will be required adapted to the circumstances and, for the companies which practice it, will involve all the intricate and difficult problems of reinsurance and an independent management."

TEMISKAMING RAILWAY FINANCES

The following is the condensed statement of revenue account of the Temiskaming and Northern Ontario Railway for the year ended October 31st, 1911, compared with the year 1910:

	1911.	1910.
Revenue from transportation ..	\$1,708,249.02	\$1,522,020.05
Revenue other than transportation	72,715.81	60,831.97
Total operating revenue ..	\$1,780,964.83	\$1,591,852.02
Operating expenses	1,181,998.63	1,165,361.36
Net operating revenue	\$ 598,966.20	\$ 426,490.66
Ore royalties	17,060.56	31,762.92
	\$ 616,026.76	\$ 458,253.58
Hire of equipment, etc.	22,874.07	22,123.27
Total earnings	\$ 593,152.69	\$ 436,130.31
Paid Treasurer of Ontario	515,000.00	420,000.00

The operating expenses amount to 66.4 per cent. of the gross earnings, and the net earnings to 33.6 per cent., as compared with 73.2 per cent. and 26.8 per cent., respectively, for the twelve months ending October 31st, 1910.

The total mileage of the railway, including main and branch lines, yards and siding is 379.62.

The Canadian Whaling Company, organized in Montreal, about two years ago, and operating in the Gulf of St Lawrence, is reported to be prosperous this season. The company has two steam whaling boats in commission and over 70 whales have been captured this season. Most of the capital was subscribed in Norway, and many of those engaged in the enterprise are Norwegians.

Dr. R. Magill, chairman of the Canada Grain Commission, at Winnipeg last week laid before a meeting of terminal elevator owners, exporters and representatives of the railways the fact that there were just about 500 grades, or rather variations of grades of wheat at present recognized by the inspection department and that nearly all of them were represented in the 2,500,000 bushels now in store at the head of the lakes. This multiplicity of grades was tying up storage to an extreme extent and he requested that some means be devised of combining some of the variations of grade now in store and also of reducing the number to be permitted in the grading of the crop just coming on the market.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Hagersville, Ont.—The municipality of the village of Hagersville carried the by-law for the hydro-electric.

Niagara Falls, Ont.—The by-law to spend \$7,000 on the local waterworks was carried.

Medicine Hat, Alta.—The water by-law which authorizes the council to spend \$411,000 on the water system of the city was carried.

Selkirk, Man.—Until September 16th for \$13,000 5 per cent. 20-year sidewalk debentures. T. Partington, secretary-treasurer.

Red Deer, Alta.—Until September 16th for \$67,500 5 per cent. 20-year debentures. A. T. Stephenson, secretary-treasurer.

Rosetown, Sask.—Until October 1st for \$12,000 20-year 6 per cent. local improvement debentures. N. M. Aseltine, secretary-treasurer.

Woodstock, Ont.—The by-law calling for \$30,000 for increased school accommodation was given a first reading at the city council meeting.

Bassano, Alta.—Up to September 16th for \$150,000 5 per cent. 30-year water and sewer debentures. Geo. B. R. Bond, secretary-treasurer, Bassano.

Grandview, Man.—On September 20th the ratepayers will vote on a by-law to issue \$13,000 debentures for waterworks purposes. William Dickie, secretary-treasurer.

Transcona, Man.—On September 18th the ratepayers will vote on a by-law to issue \$120,000 school debentures, payable in 20 years. G. P. Campbell, town clerk.

Melfort, Sask.—Until October 18th for \$125,000 6 per cent. 30-year debentures. J. E. Durnin, secretary-treasurer. (Official advertisement appears on another page.)

Langdon S.D. No. 220, Alta.—For sale \$15,000 10-year school debentures. R. Conn, secretary-treasurer, Langdon. (Official advertisement appears on another page.)

Miniota Rural Municipality, Man.—The ratepayers will vote on September 14th on a by-law to issue \$2,400 10-year 6 per cent. school debentures. W. Howard, secretary-treasurer, Miniota.

Imperial, Sask.—Until October 1st for \$6,000 15-year 6 per cent. skating and curling rink debentures. J. J. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

Welland, Ont.—At a meeting of the park commissioners a resolution was passed asking the council to pass a by-law to provide debentures to the amount of \$2,000 to help defray the cost of the new bandstand.

Aurora, Ont.—The ratepayers passed a by-law authorizing the town council to grant the Collie-Cockerill Company, makers of office furniture, a loan of \$15,000 at five per cent. for 20 years, repayable annually, and also a fixed assessment of \$6,000 for ten years.

Dominion, N.S.—Up to September 15th for \$20,000 water debentures of the town of Dominion dated August 31st, 1912, payable in thirty years bearing interest at five per cent. per annum, payable half-yearly to J. S. Liscombe, town clerk and treasurer, Dominion.

Thornbury, Ont.—Up to September 20th for \$12,000 debentures, payable in twenty years, for the purpose of erecting a new schoolhouse (principal and interest at the rate of five per cent.), unconditionally guaranteed by the town of Thornbury. E. Rorke, town clerk, Thornbury.

West Vancouver, B.C.—The ferry by-law will be placed before the ratepayers September 21 and will be for \$100,000 instead of \$120,000.

It is possible that the Dundarave Wharf question will be settled by the presentation to the ratepayers of a local improvement by-law for about \$35,000.

A new \$5,000,000 steel plant for the manufacture of steel barrels and commercial packages has just been organized at Montreal. A group of influential Canadians, including Sir William Van Horne, Sir William Mackenzie and Messrs. George F. Johnston, C. W. McLean and J. Wesley Allison, have secured from the Steel Package Company of New York the letters patent to manufacture steel barrels and commercial packages of all descriptions. The new concern, it is said, is capitalized at \$5,000,000, the financing having been done in New York, and will erect a plant in the vicinity of Montreal. The new concern is to be known as "The Canadian Steel Package Company," and it is probable that Sir William Van Horne will be the first president.

DEBENTURES AWARDED

Joslin, Man.—\$2,400 to Messrs. Nay and James, Regina.
Killam Village, Sask.—\$4,000 to Messrs. Nay and James, Regina.

Sacre Coeur, Sask.—\$2,400 to Messrs. Nay and James, Regina.

Radville, Sask.—\$7,000 to Messrs. Nay and James, Regina.

Bladworth Village, Sask.—\$500 to Messrs. Nay and James, Regina.

Grayson Village, Sask.—\$3,000 to Messrs. Nay and James, Regina.

LeRoss Village, Sask.—\$1,000 to Messrs. Nay and James, Regina.

Wellington R.M., Sask.—\$5,000 6 per cent. 20-year to Curran Bros., Regina.

Windsor, N.S.—\$10,000 5 per cent. 30 years to Royal Securities Corporation.

Carleton Place, Alta.—\$3,000 6 per cent. 10-year to Curran Bros., Regina.

Rural Municipality of Morris, Sask.—\$6,000 to Messrs. Nay and James, Regina.

Montmartre Village, Sask.—\$3,000 6 per cent. 15-year to Curran Bros., Regina.

Lake of the Rivers R.M., Sask.—\$6,000 5½ per cent. 10-year to Curran Bros., Regina.

Biggar, Sask.—\$18,000 5½ per cent. to Messrs. H. O'Hara and Company, Toronto.

McDonald, N.S.—\$1,500 6 per cent. 10 years to Messrs. H. O'Hara and Company, Toronto.

Wrenford R.M., Sask.—\$3,000 6 per cent. 10-years to Messrs. Curran, Laird and Curran, Regina.

Regina S.D., Sask.—\$275,000 4½ per cent. 20 instalments to Messrs. Wood, Gundy and Company, Toronto.

Pangman Village, Sask.—\$1,000 to Messrs. Nay and James, Regina.

FOREIGN EXCHANGE

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows:—

Between Banks.			
	Buyers.	Sellers	Counter.
N. Y. funds	1-32 dis.	Par	¾ to ¼
Mont. funds	10c. dis.	Par	¾ to ¾
Sterling—			
60 days' sight	8 7-16	8 ¼	8 ¾ to 8 ¾
do. demand	9 3-16	9 ¼	9 ½ to 9 ½
Cable trans	9 5-16	9 ¾	9 ¾ to 9 ¾
New York—		Actual.	Posted.
Sterling, 60 days' sight	4.82 to 4.82 ¼		4.83 ½
do. demand	4.85-30 to 4.85-50		4.86 ½
Sterling market demoralized.			
Call money in Toronto, 5½ to 6 per cent.			
Call money in New York, 5½ per cent.			
Open market discount rate in London for short bills, 3¾ per cent.			

BANK CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Bank Clearing Houses for the weeks of September 14th, 1911; September 5th, and September 12th, 1912, with percentage change:—

	Sept. 14, '11.*	Sept. 5, '12.	Sept. 12, '12.	Change %
Montreal	\$42,986,428	\$50,125,140	\$56,847,893	+ 32.2
Toronto	33,779,870	37,851,047	39,198,528	+ 16.0
Winnipeg	19,183,000	21,525,238	27,003,487	+ 40.7
Vancouver	11,371,242	11,950,168	13,767,555	+ 21.0
Ottawa	3,530,966	3,169,069	3,361,186	— 4.8
Calgary	4,686,530	4,269,314	5,034,767	+ 7.4
Quebec	2,330,034	2,935,343	3,480,924	+ 49.3
Victoria	2,465,780	3,390,020	3,694,837	+ 49.8
Hamilton	2,272,406	2,736,759	2,893,960	+ 27.3
Halifax	1,492,086	1,752,667	2,382,387	+ 59.6
St. John	1,315,636	1,610,944	1,688,146	+ 28.2
Edmonton	2,348,089	3,572,208	4,147,509	+ 76.6
London	1,296,361	1,418,758	1,518,704	+ 17.2

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

VANCOUVER'S AUGUST FIRE LOSS

Amounted to Over Fifty Thousand Dollars—Calls Were Numerous

The property loss by fire and water during the month of August was \$52,965; the insurance paid was \$50,563, leaving the loss above insurance \$2,402. The value of property involved was \$179,890. The total number of alarms responded to during the month was 52; 16 of these were for fires where damage occurred, one being in South Vancouver at 176 Ontario Street, where a dwelling and contents were destroyed; 8 were false alarms and 28 were for fires where no damage resulted, such as bush fires, tar-pots, chimney fires, etc. A complete list of alarms where damage occurred follows:—

August 1st—Telephone alarm at 9.40 p.m. Fire in three-story brick building at 62 Hasting Street West, owned by J. Borland, and occupied by the Max Freed Furniture Company. The blaze started in the repair and finishing-room on the second floor, presumably from spontaneous combustion, and spread to the top floor and roof before it was brought under control. Considerable damage was done to the stock by water. Damage, \$23,750, covered by insurance.

August 3rd—Alarm from Box 847 at 2 p.m. Small fire on roof at 640 Twenty-third Avenue East caused by sparks from chimney. Building owned by Mr. Sadner and occupied by T. W. Harding. Damage, \$5.

August 5th—Telephone alarm at 7.27 a.m. Small fire in plant of the Rowe Manufacturing Company at the City Market Building, Main Street, caused by an overheated electric iron. Damage, \$28, covered by insurance.

August 7th—Alarm from Box 416 at 5.30 p.m. Small fire in floor at 1622 Second Avenue West. Owned by Mrs. C. C. Owen and occupied by Church of England Japanese Mission; caused by embers from fireplace. Damage, \$35; covered by insurance.

Sash and Door Factory Destroyed.

August 8th—Telephone alarm at 11.20 a.m. An electric motor had burnt out at Hardman's Hat Works, 419 Abbott Street. Fire confined to motor. Damage, \$10.

August 10th—Alarm from Box 318 at 7.20 p.m. Small fire in partition at the Hoffar Motor Boat Company's plant, 1933 Georgia Street; cause unknown. Damage, \$5.

August 15th—Telephone alarm at 6.10 p.m. Fire at Hatch Bros.' sash and door factory at Fifth Avenue and Cedar Street. The building, which was a two-story frame structure, was enveloped in flames on arrival of the fire apparatus, and both the factory and contents were totally destroyed before the fire was extinguished. Building owned and occupied by A. C. and W. C. Hatch. Damage, \$24,030; partly covered by insurance. Alarm from Box 847 at 10.10 p.m. Fire in dwelling at 637 Twenty-fourth Avenue East. Owned and occupied by J. McDonald. The blaze started in a clothes closet from some cause unknown, damaging some valuable furs that were stored there. Damage, \$700; covered by insurance.

August 17th—Telephone alarm at 12.20 a.m. Fire in some paint and oil stored in a shed in rear of 1908 Sixteenth Avenue West. Contents owned by the Canada Paint Company. Fire caused by spontaneous combustion. Damage, \$50.

August 21st—Telephone alarm at 9.20 p.m. Fire in store and tent at 3690 Fourteenth Avenue West. Owned and occupied by D. W. Hutchinson. The blaze was caused by an overheated stove in the tent, and both building and tent with the contents were a total loss. Damage, \$1,900; partly covered by insurance.

Matches, Coal Oil and Gasoline.

August 23rd—Alarm from Box 37 at 2.15 p.m. Small fire in frame building at 216 Keefer Street. Owned by Lefurgey & Company and occupied by Cullen & Russell, and used as a clothes cleaning establishment. Fire caused by stepping on a match and setting some gasoline on fire. Damage, \$50; covered by insurance. Alarm from Box 24 at 4.40 p.m. Fire on first floor of building at 118 Hastings Street West. Occupied by S. J. Wilson and, used as a photographic studio; caused by a coal oil stove exploding. Building owned by Hewson Bros., and used as offices, stores, etc. Damage, \$1,050; covered by insurance.

August 24th—Alarm from Box 262 at 3.40 p.m. Small fire in bake shop at the Modern Bakery 445 Seventh Avenue East. Owned by the Calgary Milling Company and occupied by Jack & Flannigan; caused by an overheated oven. Damage, \$250; covered by insurance.

August 25th—Alarm from Box 529 at 12.15 a.m. Fire at 1745 Commercial Drive. Owned by Mrs. G. Shelton and occupied by J. Houseman, and used as a grocery and provision store. The fire started in the top of the building from some cause unknown, and burned off the roof and part of floor. Damage, \$1,100; covered by insurance.

August 28th—Telephone alarm at 12.55 p.m. Small fire in floor under the gas range at "The Creche," 752 Thurlow street; caused by an overheated range. Building used as a day nursery. Damage, \$2.

Total number of alarms, 52; false alarms, 8; chimney fires, 1; property involved, \$179,890; loss, \$52,965; insurance paid, \$50,563; loss above insurance, \$2,402; hose laid at fires, 14,550 feet; chemical used at fires, 1,208 gallons.

GRAND TRUNK AND GOVERNMENT

**President Chamberlin Makes Further Statement—
Movement of Wheat Crop**

The following explanation was made this week by Mr. E. G. Chamberlin, president of the Grand Trunk Railway, of the position of that road on the question of the National Transcontinental lines which the Government is building:—

"The contract between the Government and the Grand Trunk Pacific relative to the Transcontinental Railway provides that on the completion of the line the company shall take a fifty-year lease. It also stipulates that, pending the completion, the company may, if it desires, take over any section which has been completed, but it is obvious that any unit of the line would hardly be very profitable for the company to lease until the whole line is complete, or at least until it can get a direct connection with the Grand Trunk System and enjoy a through traffic.

"The question of leasing sections of the line when completed was brought up by what is known as the old Commission, and this company made the proposition at that time that it would take over any section of the Transcontinental which the Commission desired to have placed in operation, the Government taking the earnings and paying expenses; any profit or loss which might occur as a result of operation to go to capital account—i.e., if the operation showed a profit, capital account would be reduced accordingly, and if it showed a loss, capital account would be increased that amount. The company since renewed that offer to the present Commission, but has not received their reply to same.

Think It a Fair Solution.

"The Grand Trunk Pacific officials feel that this is a fair solution, and will enable people located along the line to secure the benefit of railway communication on a fair basis to the Government and the company. The statement which several newspapers of the country have made, that the Grand Trunk did not desire to lease the line, as it would then come under the control of the Railway Board as to rates, etc., could not have originated with the Commission, but in the imagination of the reporter. The Commission are well aware of the fact that the Grand Trunk Railway rates now between Fort William and Winnipeg are the same as those via the Canadian Pacific and Canadian Northern, and that tariffs were filed with the Board of Railway Commissioners."

Storage Facilities Inadequate.

The Grand Trunk, said Mr. Chamberlin, hopes to prevent congestion such as occurred last winter. At Fort William the company has increased its yard accommodation for the handling of grain to a considerable extent, and now has room for 2,000 cars, while the new 2,500,000 bushel elevator is nearing completion, and should be ready to store this season's grain. At Fort Erie and Suspension Bridge additional facilities are now under way, and by the close of the season these improvements should be sufficient to prevent the congestion which occurred last winter, both as regards wheat and coal.

The prospects of another wheat blockade this year were inconsiderable, so far as the question of railroad transportation went. At the same time, facilities for storing grain during the winter and getting it out of the country were quite inadequate.

Will Use Oil Fuel.

Mr. Chamberlin stated that oil would be used as locomotive fuel on the mountain section of the Grand Trunk Pacific. The company has large sections of oil lands along its lines which should assure a practically illimitable supply. Eventually it is hoped to use oil on the National Transcontinental section of the road.

Representatives of the Grand Trunk and the Canadian Pacific Railways are working on a new set of plans, which will take three months to complete, for the Toronto Union Station.

Mr. Chamberlin, with Mr. A. W. Smithers, the chairman of the Grand Trunk directorate, and other officials, have just returned from an inspection of the company's lines throughout Canada. They speak of a serious dearth of labor in the West.

The capital stock of Russell Shale Bricks, Limited, has been increased from \$300,000 to \$1,000,000.

The few remaining shares now unsubscribed for in the undermentioned issue will be withdrawn on September 21st.

Application should, therefore, be made at once.

N.B.—It is seldom that an industrial proposition offering so unique a return, and having such an assured basis for successful development (see article in "Monetary Times" of August 24th) is open for public subscription. We consider it one of the best offerings this year.

E. R. Watts & Son, Canada, Limited

(Incorporated under Companies Act of Dominion of Canada)

Head Office: OTTAWA, ONT.

Branches and Agencies in Winnipeg, Montreal, Toronto, Quebec, St. John, N.B., Halifax, Victoria, B.C., Regina, Edmonton, etc.

CAPITALIZATION

Authorized	-	-	-	\$200,000
To be Issued	-	-	-	\$100,000

DIRECTORS:

FRANK C. WATTS, Esq. (Senior Partner E. R. Watts & Son, London, England; Parent House, of which the Canadian business has until now been a branch.)
 HON. N. A. BELCOURT, K.C., P.C., Ottawa (President A. E. Rea Co., Ottawa, Ltd., and Director in several important industrial and financial corporations.)
 ROBERT BICKERDIKE, Esq., M.P., Montreal (Vice-President International Bank of Canada, Director Western Assurance Company, etc., etc.)
 G. H. DUGGAN, Esq., C.E., Montreal (Vice-President and General Manager Dominion Bridge Company, Ltd.)
 W. B. RUSSELL, Esq., C.E., Toronto (Late Chief Engineer Temiskaming and Northern Ontario Railway.)
 GILBERT E. TYLER, Esq. (Manager of E. R. Watts & Son, Winnipeg.)
 PERCY W. WARD, Esq. (Manager of E. R. Watts & Son, Ottawa.)

Bankers: BANK OF MONTREAL.

Solicitors: BELCOURT & RITCHIE, Ottawa.

Auditor: G. L. BLATCH, B.A., Ottawa.

The objects of the Company are, among others, to take over the established Canadian business of E. R. Watts & Son (Manufacturers of Engineering, Surveying, Architectural, Building, Contracting, Railroad and other instruments and supplies) at the above-mentioned Branches and Agencies, provide further stock and repair facilities, open further branches and agencies, and reorganize and develop the business generally with greater scope and new departments. Prospects are in hand for an almost immediate sales increase of 50%, and the new influence obtained, together with other features, combine to make the business one of the most sound and profitable in Canada. The purchase also includes patent rights and licenses for the United States, which territory the Company intends opening up.

The business already numbers amongst its consistent customers every Dominion Government Department, all the Canadian Railways and Universities, the Corporations of Montreal, Toronto, Ottawa, Winnipeg, Vancouver, and 70 other cities and towns; over 100 Resident Railway Engineers, and the largest Canadian Drafting Offices. The house to day holds the highest reputation in Canada in its line of business, and is backed by possibly the most accurate and up-to-date works of its kind in the world.

PROFITS—The business, as a private concern, has been paying a Net Profit of 15%. Under the organization of the new Company, with the saving that can be effected in buying and control, together with the great increase of sales anticipated, a Net Profit of 20% may be readily looked for.

NOTE—No stock has been underwritten, nor commissions paid for the introduction of subscribers. Every dollar, therefore, goes directly into the business.

Complete Prospectus, and form of application for Stock, may be secured from P. W. WARD, address as below:

E. R. WATTS & SON, Canada, Limited
 45 BANK STREET, OTTAWA

REPORT OF THE ANNUAL MEETING OF THE WESTERN TRUST COMPANY

The Sixth Annual General Meeting of the Shareholders of The Western Trust Company was held in the Company's Board Room at their Head Office, 274 Main Street Winnipeg, Manitoba, on Wednesday, the Fourteenth Day of August, A.D. 1912.

In the absence of the President and Vice-President, Mr. J. E. Adamson was elected to the Chair.

The Secretary read the Minutes of the last annual meeting of the Shareholders of the Company, and the report of the Directors and the Financial Statement with Profit and Loss Account attached was then submitted to the meeting as follows:

REPORT OF THE BOARD OF DIRECTORS SIXTH ANNUAL REPORT

To the Shareholders of The Western Trust Company:

The Directors of the Western Trust Company beg to submit their Sixth Annual Report, which shows the results of the Company's business from June 30th, 1911, to June 30th, 1912, accompanied by the Balance Sheet, which has been duly audited.

During this year there have been several new departures in the Company's business, the Directors having decided in January last to call in all the Subscribed Capital. This call has been met in a most satisfactory manner by the shareholders, and you will notice that the Paid-Up Capital is now over a million dollars. We have been able to keep up a proportionate Reserve Account of Ten Per Cent., and our Reserve Account now stands at \$100,000.00.

There has been a large expansion in the amount of the estates entrusted to the care of the Company. We desire to foster this class of business, and the large expansion is good evidence of the appreciation by the public of the manner in which their affairs have been looked after.

The Regina business has been a heavy burden to the Company, but is in a very promising condition, and we are glad to be able to report that the decision of the Company to open a head office for Saskatchewan at Regina has met with satisfactory results. We have to be thankful that the late disastrous storm in Regina did not affect the Company's property.

The Auditors have examined the securities of the Company in their usual careful and painstaking manner, and have certified to the correctness of the account. Their certificate is attached to the statement.

Respectfully submitted,

A. J. ADAMSON, President.

AUDITORS' REPORT

To the President and Directors of The Western Trust Company:

Gentlemen: We beg to report to the shareholders of The Western Trust Company that we have audited the books and accounts of the Company for the year ended 30th June, 1912, verifying the cash receipts and payments during the year with the several bank accounts, the amounts due at 30th June from borrowers, and the bank balances at that date. We have examined the mortgage securities taken during the year and have found them in order, and duly certified as valid; and have inspected all those held by the Company at the end of the year, finding them likewise in good order and according to the mortgage ledger accounts. We have found the books and accounts, including those at Regina, to be correct and sufficiently vouched, and we certify that the accompanying Profit and Loss Account and Balance Sheet exhibit a true and correct view of the state of the Company's affairs for the year and as at 30th June, 1912.

Winnipeg, Man., July 26th, 1912.

CLARKSON, CROSS & MENZIES, Auditors.

The adoption of the report was moved by Mr. D. H. McDonald and seconded by Mr. Michael Long, and was unanimously adopted. The reference was made to the fact that it was very gratifying to the Shareholders that the Directors had been able to increase the Paid Up Capital from slightly over half a million dollars to over a million dollars during the past year.

A comparative statement showing the progress of the Company since it commenced business was laid before the meeting in the following form:

Financial Year Ending	Paid-Up Capital	Reserve	Net Earnings for year	Total Assets	Financial Year Ending	Paid-Up Capital	Reserve	Net Earnings for year	Total Assets
June 30th, 1907....	\$ 238,726.07	\$	\$ 4,076.29	\$1,293,324.90	June 30th, 1910....	\$ 385,050.00	\$ 38,505.00	\$33,496.48	\$3,114,813.95
June 30th, 1908 ...	244,457.50	12,500.00	17,851.62	1,691,963.28	June 30th, 1911....	580,600.00	58,060.00	54,026.76	3,497,558.35
June 30th, 1909....	252,879.00	25,287.90	25,340.71	2,279,606.62	June 30th, 1912....	1,001,266.65	100,126.00	80,120.43	6,293,258.38

which showed very substantial progress during the year just closed.

The Company's business at Regina was touched upon and the meeting unanimously expressed their gratification at the progress that had been made in so short a time. It was also a pleasure to note that the members of the Regina Advisory Board were present at the meeting.

The election of Directors was then proceeded with and the following gentlemen were duly elected Directors of the Company for the ensuing year:

BOARD OF DIRECTORS

ALAN J. ADAMSON, ESQ., President The Western Trust Company. Vice-President The North Empire Fire Insurance Co.

SIR R. P. ROBLIN, K.C.M.G., Premier of Manitoba and Minister of Agriculture. Director of Northern Crown Bank, Winnipeg, Man.

JAMES JOHNSTON, ESQ., Broker, Winnipeg, Man.

MICHAEL LONG, ESQ., Banker, Vice-President The North Empire Fire Insurance Co., Winnipeg, Man.

J. D. McARTHUR, ESQ., Railway Contractor, Winnipeg, Man.

JOHN A. THOMPSON, ESQ., Manager Moose Mountain Lumber & Hardware Co., Winnipeg, Man. Director The North Empire Fire Insurance Co.

G.R. WHITMORE, ESQ., Merchant, Regina, Sask.

JOHN E. ADAMSON, ESQ., Barrister, Winnipeg, Man.

F. E. KENASTON, ESQ., President The Minneapolis Threshing Machine Co. Director The Union Bank of Canada, Hopkins, Minn.

KENNETH MACKENZIE, ESQ., Director Canada Life Assurance Company, Winnipeg, Man.

HON. J. H. ROSS, Senator, Moose Jaw, Sask.

J. G. TURRIFF, ESQ., M.P., Late Commissioner Dominion Lands, Ottawa, Ont.

A. B. COOK, ESQ., Sheriff, Regina, Sask.

At a later meeting of the Directors, Alan J. Adamson was elected President, and Sir Rodmond P. Roblin, K.C.M.G., Vice-President of the Company for the ensuing year.

THE 1913 RUSSELL "30" IS READY

Russell "30" Model "R" 1913 Touring Model \$2500 Russell "30" Model "R" 1913 Torpedo Model \$2600
 Russell "30" Model "R" 1913 Torpedo Roadster Model, \$2550

There will be a big demand for this car. We are prepared to accept orders for it now, thereby insuring late Fall or early Spring delivery. The 1913 Russell "30" surpasses in grace and elegance all previous models. Its many improvements, both in design and construction, enhance its outward beauty, provide greater riding comfort, give smoother running power and add to the simplicity of its control. You will be charmed with this model; it is so essentially a Canadian's Car. There is about it a combination of dignity and power, plus that "something" which immediately denotes the owner's refinement and good taste. As a town car, it is incomparably luxurious. For hard touring service its strength is immense.

Briefly, the new features are:

1. Absence of all working parts on the body, allowing unbroken graceful lines to sweep the whole length of the car.
2. New self starter; electrically operated. Turn the switch and your car is ready to go.
3. Electric lighting by current generated in car's own dynamo. Press a button and you "light up."

4. 36-in. wheels and 4-in. tires, a combination to absorb all shock and cause less wear on tires.
5. Demountable rims so that road repairs may be avoided.
6. A spare rim with each car.
7. Motor fresh air pump, driven by the car's own power.
8. Electrically lighted speedometer and clock in each car.

The Tonneau is delightfully roomy; and it is upholstered in fine leather over an eleven-inch padding. The complete top includes a dust shield device for the rear seat. \$325 worth of extra equipment and labor has been built into the 1913 Russell "30" as compared with the 1912 model. Send us your card for an advance descriptive pamphlet.

Also makers of the Famous Russell Knight Car.

DEBENTURES FOR SALE

TOWN OF MELFORT DEBENTURES FOR SALE

Sealed tenders will be received up to October 18th, 1912, for the purchase of \$125,000 town of Melfort, Sask., debentures in denominations of \$5,000 each at 6% payable annually, principal at end of thirty years.

Tenders for one or more will be considered. No tender necessarily accepted.

J. E. DURNIN, Secretary-Treasurer.

IMPERIAL, SASK.

TENDERS FOR DEBENTURES

Tenders will be received by the undersigned up to October 1st, 1912, for the purchase of \$6,000 15-year six per cent., skating and curling rink debentures. Full particulars may be had from

J. G. HOBMAN,
Secretary-Treasurer.

Imperial, Sask., August 27th, 1912.

COST OF PROCURING LIABILITY INSURANCE

It is worthy of mention that the attempt made, with the approval of ex-Superintendent of Insurance Hotchkiss, to enact a law in New York State to limit commissions and expenses on liability and other casualty lines to a per cent. of premiums received, was wisely defeated.

While it is generally conceded that the cost of procuring business should and must be further reduced—and this has been accomplished in States having compensation laws—there seems to have been a wide difference of opinion as to whether the end sought could possibly justify such radical means as the limiting by law of the amount of its own money which a private corporation may expend.

Reasonable regulative legislation should be encouraged and directed along proper lines, but any legislation designed to restrict legitimate development and competition. To prevent any private corporation, whether engaged in the insurance business or something else, from expending any amount of its own funds in its own way, so long as its financial obligations are fully protected, should be vigorously opposed.—J. Schofield Rowe.

The collier "Bridgeport" arrived at Montreal this week with 11,500 tons of coal, the largest cargo of this nature ever brought to Montreal by a single steamer. The "Bridgeport" was built for the Dominion Coal Company in England, and launched last July. She was designed for the Montreal-Sydney coal trade, and will be the largest coal steamer in the world.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, July 17th, 1912.

SCHOOL DEBENTURES FOR SALE

The Board of Trustees of Langdon S.D. 220, Alta., is offering for sale fifteen hundred dollars' worth of School Debentures to be paid in ten equal annual instalments with interest. Apply to

R. CONN, Secretary-Treasurer,
Langdon, Alta.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September 6th:—La Rose, 65,200; Right of Way, 64,400; Cobalt Lake, 64,300; Cobalt Townsite, 77,620; McKinley-Darragh, 83,604; Buffalo, 130,734; Coniagas, 327,900; total, 749,458, or 374 tons. The total shipments since January 1st are now 30,008,539 pounds, or 15,004 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

The new Canadian Pacific Railway steamer "Empress of Russia," has been launched from Messrs. Fairfield's shipbuilding yard at Glasgow. She is a vessel of 15,000 tons and 17,000 horsepower. Her speed will be 18 knots. She has been constructed to carry 1,300 passengers and cost £500,000.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

POINT GREY SHORT-TERM NOTES

Unsold Balance Offered—Calgary Power Company May Make Issue

The unsold balance of \$1,200,000 one year notes of Point Grey, B.C., is being offered at a price to yield 5½ per cent. by the Dominion Bond Company. The denominations are \$100 to \$5,000. Included in the municipality's general debenture debt of \$3,399,000 are \$1,350,000 long term bonds, which the municipality is holding in its treasury. The present issue of short term notes is made to avoid disposing of these bonds in the present unfavorable market for long-term securities. Point Grey immediately adjoins the present city limits of the city of Vancouver on the south and west, and has a population of 8,000 and an area of 12,000 acres. In addition to being a first charge against the municipality, these notes are additionally secured by the \$1,350,000 treasury bonds.

The amount of debentures validated by the Ontario Railway and Municipal Board during 1911 was \$1,353,855. Of these \$895,711 par value of debentures validation was rendered necessary to cure technical objection.

Eastern Canada Power and Pulp Bond Interest.

Sir Rodolphe Forget has authorized a statement to the effect that the interest on East Canada Power and Pulp bonds, which was due on September 1st, but which was not paid on that date, will be forthcoming, but that some arrangements have still to be made.

A Calgary despatch states that the Calgary Power Company will likely arrange a further bond issue in the near future to provide for the erection of another power plant, owing to the fact that the company cannot secure sufficient power for its requirements at the Horseshoe Falls. The bond issue will probably be made in England, although a certain amount will likely be kept for the local market.

When the steamer Titanic sank there went down with her seven city of St. John 40-year \$500 debentures, due in 1942, bearing 3½ per cent. interest. The city has agreed to pay the owners the value of the securities at 87.35. The Bank of Montreal has agreed to indemnify the city in the unlikely case of the original bonds turning up for payment.

Finances of Kamloops.

The auditor's financial statement of Kamloops, B.C., for the six months ending June 30 was read at the last meeting of the council, and received and filed. In commenting on the expenditure shown of \$164,000 for the six months the mayor thought this was spending money pretty fast. He recommended that the finance committee go over the report and compare it with that of last year which would serve as a guide for the expenditures of the balance of the year. The

receipts for the six months, as shown by the reports were approximately \$239,000. The \$8,000 profit shown by the water and light department, the mayor thought, was small in comparison with other cities, especially when allowance was made for depreciation and a proportionate share of the office expenses. His recommendation to the finance committee was formally moved by Alderman Brown, and carried.

The three by-laws to raise \$250,000 for the hydro-electric project, \$90,000 for the extension of the water system, and \$65,000 for the electric light system were voted on September 11th.

BIG BOND OFFERING NEXT WEEK

A block of \$1,250,000 6 per cent. first mortgage bonds of a well-known Western Canadian packing house will be offered by the Dominion Securities Corporation, Limited, next week. This firm recently made other packing house issues, namely, P. Burns & Company, Limited, and William Davies Company, Limited, successfully. The bonds will be secured by total assets of over \$4,000,000, of which nearly \$1,300,000 is of land. The average annual net earnings for the last three years were over \$275,000, or almost four times the \$75,000 required for annual bond interest. The certificates of Messrs. Price, Waterhouse & Company, as auditors, and of the Canadian Appraisal Company, Limited, and W. Toole, of Calgary, as valuers, will be available to substantiate the figures relating to the company's operations.

TO THE STOCKHOLDERS OF THE TRI-CITY RAILWAY & LIGHT COMPANY

Notice is hereby given that the annual meeting of stockholders of the Tri-City Railway & Light Company will be held at the principal office of the company at No. 11 Central Row, in the city of Hartford, State of Connecticut, on the 19th day of September, 1912, at the hour of one o'clock p.m., for the purpose of electing directors to take the place of the directors of the company whose terms are about to expire, and to transact any and all other business which may lawfully come before said meeting.

The transfer books for the transfer of the stock of the company will close with the close of business on Wednesday, the 11th day of September, 1912, and will reopen the day succeeding the day of the final adjournment of said annual meeting.

Dated September 7, 1912.
By order of the Board of Directors.
The Tri-City Railway & Light Company,
by M. K. PARKER, Secretary,
49 Wall Street, New York.

OUTLOOK IN THE LONDON MARKET

The time will shortly arrive when the London market should have ceased to rest. Few issues have been made during the summer months. Since the end of July, only one Canadian flotation was placed overseas, and, apparently, it did not have a favorable reception. Comparatively early in the year, the market was flooded with new issues, every one of which made worse the congestion in securities. Only a few of the many applications for capital enjoyed complete success. The underwriters had to take a large share in the majority of issues. A small proportion of the floating supply of stocks, debentures and bonds have been absorbed during the quiet months. The greater part remains for autumn demand.

The condition of the London market is of importance to Canada for several reasons. Firstly, it will need a good demand for Canadian securities to remove the unabsorbed securities issued by Canada's corporations and municipalities. Secondly, a considerable amount of temporary financing has been done by municipalities. They have issued short-term notes, varying in duration from six to twelve months. Some will fall due at an early date. These notes have been sold in order to provide money for civic improvements until a favorable time arrives for the disposal of long-term debentures. Some of these will not expire until next year, thus giving the market a chance to improve before the long-term municipals are issued. Prince Rupert, South Vancouver, Toronto, Montreal, Quebec and Moose Jaw are among those which adopted that form of financing. Other towns and cities have been withholding large issues, in the meantime obtaining temporary bank loans. Therefore, when the London market shows signs of greater inclination to purchase Canadian and other

bonds, there is likely to be a heavy aggregate emission of Canadian municipals.

Thirdly, many industrial and other corporations are preparing to place their applications for capital in the overseas market at the earliest possible date. A brewing company will issue simultaneously in England and Canada a large block of bonds. A new bond company will probably offer a portion of its stock abroad. A large Western investment corporation proposes also to seek favor in the English market. These are a few in a long list of contemplated issues.

The disposition of the British investor to curtail his patronage of Canadian securities is apparently more marked this year than at any time since 1908. His faith in our sound securities is not less, but our tendency to borrow heavily has been greater. That, combined with the fact that the supply of securities generally in London has been larger than the demand, has tended to make our pilgrimages to that market less frequent. If any Canadian city or corporation has exhibited extravagance, that also has acted as an adverse factor. The British investor naturally will not tolerate extravagance, as it affects the securities he purchases.

The following table, compiled by *The Monetary Times*, shows the aggregate of Canadian flotations in London for the first eight months of the current year and every other year since 1905:—

First eight months.	Amount of flotations.
1905	£12,005,287
1906	4,527,500
1907	3,482,211
1908	20,676,521
1909	27,075,500
1910	30,950,088
1911	26,611,836
1912	23,498,641

The amount of our flotations in London for the first eight months of 1912 total \$23,000,000. Last year, for the same period they were \$26,000,000; in 1910, almost \$30,000,000; in 1909, \$27,000,000; and in 1908, \$20,000,000. The total for the twelve months of 1911 was \$39,855,517. Only three months remain to equal the record of last year. Present market conditions and the outlook indicate that the flotations of the current year will not equal those of 1911.

The following table shows the number of flotations for the first eight months of each year since 1905:—

First eight months.	No. of flotations.
1905	12
1906	10
1907	12
1908	26
1909	33
1910	47
1911	62
1912	55

This year's record for eight months is still seven applications short of last year's. The total issues for the twelve months of 1911 numbered eighty. It would, therefore, require twenty-five more issues during the remaining three months to equal last year's record. While there are more than twenty-five municipalities and corporations ready to make flotations, it is unlikely that the London market will receive them. Altogether the outlook is not good for new issues from Canada. Only the best securities which will bear the strictest scrutiny will have any chance there at all.

What may be termed the partly sentimental factors of the export of British capital is being discussed in Great Britain just now, although it is unlikely to affect the strength of the market. The results on British industry of such an export is thought by the London Bankers' Magazine to increase for the time being the export of merchandise, as almost every remittance of capital is embodied in an export of merchandise. Our contemporary, however, thinks that the general result is to diminish the power of home industry to maintain its position if the remittances of capital exceed, or even are close in amount to the sum of the local savings. "When the goods are once sent abroad and the capital they represent is invested there," it adds, "it may be in a foreign railway, or a new harbor, or a mine, no doubt the dividends earned by the new and successful industry return to this country, and the investor himself receives the benefit of the difference between what he obtains from abroad and what he would have received if he had kept his capital at home. But to the prosperity of this country and to the working people of this country there is a considerable difference and a corresponding disadvantage. The capital no longer remains to assist local industry. It might not have produced so large a return here, but it would have employed labor and the production of materials which would have yielded a profit which no longer accrues to the home worker. Hence this difference in the form of investment, that is to say, the preference for foreign over home investments, is one of the reasons for the depreciation of home investments which has recently been so largely observed here. We do not mean to say that it has been the sole cause by any means, but it has undoubtedly exercised a considerable influence in conjunction with other causes which are in some ways more prominent, such as the increase of cost in many directions which we have already mentioned, the unrest of labor, political troubles, and anxiety as to the preservation of peace. Some of these influences are powerful in other countries, though not to the same extent as they are in Great Britain."

Dr. Vrooman, of Vancouver, discussed before the London Chamber of Commerce a few weeks ago an Imperial preference for British investments. His thesis

was that British money was better invested where it would build up the British Empire than where it would build up a possible enemy and certain competitor of the British Empire—provided the Empire offered a better economic security in the natural resources and the people behind the investment; provided, further, it offered a better political security for the protection of that investment, and provided, once more, that it would earn a better dividend. If he claimed that 6 per cent. under the British flag was better than 4 per cent. anywhere else, he should not like to be thought of as reckoning patriotism as equal to minus 2 per cent.; for his claim, simply, was that it was better to be building up the Empire where it did not cost them anything.

INCREASING HUMAN EFFICIENCY

It is refreshing to hear utterances such as those made by Dr. Bryce, of Ottawa, and Dr. George D. Porter, at the Canadian Public Health Association Convention at Toronto. "How long," asked Dr. Bryce, "can a country, essentially a product of raw material by virtue of geographical location and territorial extent largely undeveloped, continue to develop normally and prosper when it has shown a displacement of rural population during the last ten years to an extent never witnessed before in the history of any people, and an urban population rapid beyond even the palmiest days of the United States immigration?"

"Can we as intelligent Canadians view without alarm a situation when a population, largely without capital, mostly of casual laborers, often of foreign tongue, has crowded into our urban centres, living necessarily from day to day upon the ever-changing demands for day labor, forgetting that 1890 and 1907 may come again?"

That disaster was in sight because speculation had taken the place of production was an assertion of Dr. Bryce, in whose warning there is much food for thought. The upbuilding of a new country, rich in natural resources, with a comparatively small population, tends to individualize prosperity. Where, in an old country, the possession of lands may not even give a livelihood, in a new country it often yields a fortune, due to rapid development. Speculation is greatest in populous centres. There are usually made the quickest fortunes and the most failures. The countryman crowds to the town, because the latter is more attractive. The farm has magnetism for the few, and it is easier to convert the farmer into a city man than later to change the city man to an agriculturist. The best type, physically, is found in the country. Congested centres do not assist human efficiency. To make the farm more attractive and to prevent partially the drift of population to urban centres, the gap between the producer and the consumer of farm products must be lessened. Dr. Bryce thinks that one solution of the problem is to reduce cost of production on the farm and to carefully prepare and conserve farm products till sold. Another is to pay the producers the highest possible price, and to supply them the cheapest and most direct transportation for their products to the market.

We were reminded by Dr. Porter at the same gathering that Canada imports from the United States about \$9,000,000 worth of patent medicines every year. Here, again, is a factor reducing human efficiency. The doctor said, for instance, that the average consumption cure contains opiates or alcohol in large quantities, and, while the former often eases the cough and stills the pain, it only masks the symptoms until it is too late for proper treatment, while alcohol is no more a cure for consumption than it is for crime. Let the people spend their money for good, nourishing food, and not waste it on alcohol and drugs. Other types of quackery are the various electric and pneumatic paraphernalia, which are about as useful in curing this disease as the armor of Saul would have been to David in fighting

Goliath. The public must learn that the five stones by which they can overcome tuberculosis, this giant among diseases, are: Good food, sufficient rest, fresh air, cleanliness, and sunshine.

That is sound advice. In Canada we have not thought enough of the value of a strong race of men, physically and mentally. A check should be placed upon the high pressure of living. That pressure is unnatural, and is often obtained by the use of drugs, and invariably by a loss of strength. Let us look to these matters now. It is of supreme importance that the agricultural industry should be encouraged, so that men may find a good living on the land. There they may get good food, rest, fresh air, cleanliness and sunshine, and become the strong factor in developing a race efficient both in mind and body.

A PROMOTER IN GRIEF

When Mr. A. P. Gillies came to Toronto from Tacoma, Washington, he found there was no feverish haste or disposition to swallow his big schemes for railway terminals and canal building. *The Monetary Times* criticized that gentleman's immense ideas. This week the following despatch has been wired from Seattle to Toronto:—

"A. P. Gillies, of Toronto, a promoter with a number of million-dollar schemes that have kept the city of Tacoma, this State, on the edge of expectancy for a year, was arrested this afternoon and held in \$10,000 bonds. As he was unable to give the required bonds he was removed to the county jail.

"Gillies is the promoter for the Lewis and Clark Steel Company, which, he announced, was preparing to invest a huge sum in a steel plant on the outskirts of Tacoma. His proposition has been up before the Commercial Club a number of times. He also has plans for the promotion of a company for building a twenty-four-story sky-scraper in Tacoma, and several other schemes, some of which have been discussed by the Municipal Commission.

"Gillies represents that he is heavily backed by capitalists in New York and London, and letters in his possession indicate that he is in communication with big men in the financial world. His different schemes interested several Tacoma capitalists, one of whom a short time ago declared the city should take Gillies seriously.

"A year or so ago Gillies came to public notice in Toronto with plans for that city that received much newspaper notice, according to a mass of clippings in his possession."

We do not think that Mr. Gillies can properly be described as "of Toronto," being merely an interesting transient. We are curious to know whether, in the "mass of clippings in his possession," he has the gentle raps of *The Monetary Times*. In the meantime, the above may be filed for future reference.

SMALL CHANGE

Can Forget forget?

* * * *

The harvesting. twins—Jupiter Pluvius and John Frost.

* * * *

The perennial autumn flower, tight money, is again blooming.

* * * *

Why not try less C.O.D. and I.O.U. and a little more Cash Down?

* * * *

Deaths caused by hanging live wires are increasing. The danger can be met best by jailing those responsible.

A contemporary, in a grain story, speaks of "Secretary Max Aiken"—evidently a case of when Knight-hood was in flour.

* * * *

The Canadian Pacific Railway will probably bore an eight-mile tunnel through the Rockies. One of these days we will read that the company has decided to remove the mountains to obtain a better grade.

* * * *

In Toronto they talk of stopping the Italian barrel organ's music, the crying of babies, and the crowing of hens. This will leave only the noise of the discussion as to whether Toronto or Montreal is Canada's financial centre.

* * * *

The Bewick-Moreing group, says a London cable message, have not withdrawn from Canada, but are organizing a system of investigation for new Canadian mining districts. They have, however, withdrawn from the Porcupine camp, where, they say, they experienced great disappointment. Up to date, the Porcupine region does not seem to have lived up to the mining brokers' early advertisements.

* * * *

A Winnipeg contemporary still frets over the contention of *The Monetary Times* that it is better to increase the facilities and strength of our existing ports, especially those on the Pacific Coast, rather than to experiment with Hudson Bay ice water, that it is better to make Vancouver, Victoria, New Westminster, Prince Rupert, Halifax, St. John, Quebec and Montreal first-class ports than to coddle the Hudson Bay fad and experiment, which, we consider, is in the same class as the ambitions of Winnipeg and Toronto to become ocean seaports.

* * * *

In the August issue of the *Canadian Workman*, the organ of the Ancient Order of United Workmen, is an article entitled, "Think Before You Jump," the closing sentence of which reads as follows: "In this connection it must not be forgotten that the old-line life companies have made more raises and changes in their rates and policies than the Ancient Order of United Workmen has done." This statement, following an announcement of an increase in the rate of assessment of the existing members of the Ancient Order of United Workmen, must create in the minds of many of them an erroneous impression as to the regular life insurance companies and what they have done. The policies of the old-line insurance companies are absolute contracts, under which the rate of premium is fixed and unalterable. When fraternal assessment societies adopt this principle and more scientific underwriting methods generally, there will be some hope for them.

* * * *

Our Minister of Trade and Commerce may well be congratulated upon the arrangement concluded with Sir Edward Grey, the British Secretary of State's Foreign Affairs, by which the British Consular service is placed within the reach of Canadian business men. The British Foreign Office has agreed to furnish the Department of Trade and Commerce at Ottawa with copies of all trade reports from its consular offices, as soon as they are published, from any districts which may be specified by Canada as of interest to Canadian trade. The Canadian Trade Commissioners, whose territories are being reorganized with a view to even better results than have been obtained, are by the new arrangement given full liberty to seek assistance and advice in trade matters from any of His Majesty's consuls. The details of this arrangement are noted elsewhere in this issue. Their perusal will indicate the existence of an admirable spirit of co-operation between the commercial departments of Canada and Great Britain.

CANADA AND ITS INDUSTRIES

Nineteen Thousand Factories With Capital of More Than One Billion Dollars Employ Half a Million Operatives. They Produce Goods Valued at Over a Billion and Receive in Wages Two Hundred and Forty Million Dollars

Nineteen thousand two hundred and nine manufacturing establishments, with capital of \$1,245,745,496, turning out products valued at \$1,164,775,532 and employing 514,281 operatives who received in salaries and wages \$240,523,651, are the striking figures shown in the census reports of manufactures taken last year for the calendar year 1910. Compared with the census of 1901 for the year 1900 they show an increase in the ten years of 4,559 in the number of working establishments, of \$798,829,009 in the value of capital, of 175,108 in the number of persons employed, of \$127,274,301 in the earnings of salaries and wages and of \$683,722,157 in the value of products. The following table gives the principal statistics for the two census years, together with the total increase and the increase per cent. in the decade, namely:—

Schedule	1900	1910	—Increase— Totals	Per Cent.
Establishments	No. 14,650	19,209	4,559	31.12
Capital	\$446,916,487	\$1,245,745,496	\$798,829,009	178.74
Employees	No. 339,173	514,281	175,108	51.62
Salaries and wages	\$113,249,350	\$240,523,651	\$127,274,301	112.38
Products	\$481,053,375	\$1,164,775,532	\$683,722,157	142.13

Groups of Products.

A summary of all establishments by groups of products is presented in the following table for the year 1910, showing for each group the number of establishments, the number of employees, the value of products, the average number of employees and the average production per establishment, namely:—

	Establish- ments No.	Employees No.	Value of products \$	Average employees No.	Average production \$
Under \$200,000	18,112	254,998	430,136,426	14.1	23,749
\$200,000 to under \$500,000	716	98,496	219,099,372	137.6	306,005
\$500,000 to under \$1,000,000	231	67,641	156,519,094	292.8	677,572
\$1,000,000 to under \$5,000,000	136	73,480	261,081,166	540.3	1,919,715
\$5,000,000 and over	14	19,666	97,939,474	1,404.7	6,995,677
Totals and averages	19,209	514,281	1,164,775,532	26.8	60,637

Analysis of the Figures.

For groups producing \$200,000 to under \$500,000 in 1900 there were 323 establishments with \$94,531,698 for value of products, and in 1905 there were 479 with \$145,587,183. For groups producing \$500,000 to under \$1,000,000 in 1900 there were 68 with \$46,729,825, and in 1905 there were 139 with \$92,065,800. For groups producing \$1,000,000 and over there were 39 with \$71,051,834 in 1900 and 81 with \$177,273,913 in 1905. The average value per establishment producing \$200,000 to under \$500,000 was \$292,668 in 1900, of \$303,940 in 1905, and of \$306,005 in 1910, compared with an average producing \$500,000 to \$1,000,000 of \$687,203 in 1900, of \$662,344 in 1905, and of \$677,572 in 1910, and an average over \$1,000,000 of \$1,821,242 in 1900, of \$2,188,567 in 1905 and of \$2,393,471 in 1910. One establishment in Nova Scotia gave a product in 1910 of more than \$8,000,000, one in Ontario gave more than \$9,000,000, and two in Quebec gave more than \$10,000,000. Fourteen establishments of the highest class in the Dominion gave for 1910 an average of \$6,995,677.

Comparison by Provinces.

Compared by provinces the census of manufactures shows the following records for the years 1900 and 1910, as taken in the years 1901, 1906 and 1911, namely:—

Provinces	Establish- ments No.	Capital \$	Employees No.	Salaries and wages \$	Value of products \$
1900.					
Canada	14,650	446,916,487	339,173	113,249,350	481,053,375
Alberta and Saskatchewan	105	1,689,870	1,168	465,763	1,964,987
British Columbia	392	22,901,892	11,454	5,456,538	19,447,778
Manitoba	324	7,539,691	5,219	2,419,549	12,927,439
New Brunswick	919	20,741,170	22,158	5,748,990	20,972,470
Nova Scotia	1,188	34,586,416	23,284	5,613,571	23,592,513
Ontario	6,543	214,972,275	161,757	56,548,286	241,533,486
Prince Edward Island	334	2,081,766	3,804	445,998	2,326,708
Quebec	4,845	142,403,407	110,059	36,550,655	158,287,994
1910.					
Canada	19,209	1,245,745,496	514,281	240,523,651	1,164,775,532

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

X.—CANADA'S PACIFIC PORTS, THEIR FACILITIES AND SHIPPING

Supposing that the necessary harbor facilities are provided by our Pacific ports, we may reasonably expect expansion in the shipping patronizing those harbors. The railroads may be expected not only to provide a certain amount of terminal elevator and dockage facilities, but also further steamship lines. It was feared at one time that legislation proposed at Washington would prevent Canadian steamships owned by Canadian railroads from using the Canal. This was denied by Judge Adamson, the author of the legislation. The doubtful section of his bill applied only to the coastwise commerce of the United States and to railroads which are common carriers under the Interstate Commerce Act.

The section in question provides that after July 1st, 1913, it shall be unlawful for any railroad or other common carrier subject to the Act to regulate commerce, to own, lease, operate, control, or to have any interest whatever in any common carrier by water with which said railroad or other carrier aforesaid does or may compete for traffic. It would vest the Interstate Commerce Commission with jurisdiction to determine questions of fact, as whether there is competition between rail and water carriers as contemplated in this section.

The Canadian Pacific Railway already has steamship services to the Orient and to Europe. The Canadian Northern Railway also has an Atlantic steamship line. When the Grand Trunk Pacific and the Canadian Northern Railways have completed their roads from coast to coast, we may reasonably expect the establishment by them of Atlantic and Pacific services, as the case may be. Both the Canadian Pacific and Grand Trunk Pacific have services along the coast of British Columbia.

Shipping at Vancouver.

Even without the Panama Canal, Vancouver shipping has grown rapidly. The following figures, showing the total number of vessels and tonnage inwards and outwards, including coasting, illustrate this fact:—

Year.	Vessels.	Tonnage.
1896	4,871	1,496,827
1906	10,763	3,563,342
1911	16,775	8,038,913

Activity in regard to the Canal is noticeable in all important shipping centres. The Compania Trasatlantica, of Cadiz and Barcelona, principal of the Spanish steamship concerns, will establish a service via the Canal to the North Pacific Coast ports. This company operates a fleet of modern passenger and freight steamers from Cadiz and Barcelona to New York, South American ports and in the Mediterranean. The company expects to handle large emigrant traffic to the Pacific coast ports by way of the Canal.

Establish at Vancouver or Victoria.

The special representative of the Royal Mail Steam Packet Line, who has already visited our Pacific Coast and the Panama zone, may recommend that the headquarters of the line from Europe via Panama on the North Pacific be placed at Victoria or Vancouver. When he was in Victoria, he stated that if proper railroad connections were provided and cargoes could be assembled and distributed there at the same expense as at other coast ports he would favor that port being made the terminus of the line.

Construction has been commenced in Germany of the first passenger and cargo steamer specially designed for the trade to the North Pacific ports via Panama Canal. This steamer, a vessel of about 8,000 tons

register, is being built at the Weser shipyards for the Hamburg-Amerika line. The Holland-Amerika line has announced that it will shortly order two steamers for this business, and the Swedish-Johnston line of Christiana is preparing to construct vessels.

Many Lines Interested.

The Blue Funnel Line, which is now operating a fleet of the largest freighters in the Pacific trade from Liverpool and the Orient, will add two new steamers to the line. The Nippon Yusen Kaisha have announced the construction of two new steamers, to be known as the Yokohama Maru and the Shidzouka Maru. Another Japanese line has been investigating ports on the Gulf of Mexico with a view toward inaugurating a line from Japan through the Panama Canal.

The Kosmos line has announced four new steamers for the Pacific trade, each to be of about 12,000 tons. This company has already a large fleet of freighters in the service, and is planning on making use of the Panama Canal with an extended service.

The Harrison line, which inaugurated a service to Puget Sound a few months ago to be early in the field to secure traffic which will develop via the Panama Canal, is building three large steamers.

London to Vancouver.

From the Tyne comes the interesting news that not a few of the steamships now building on the north-east coast are designed for the navigation of the Panama Canal. The orders for these vessels have been placed quietly, and in many cases it is not yet known for which particular branch of the Pacific trade they are intended.

A leading English shipping concern controlling two hundred steamers is said to be making preliminary arrangements for a regular cargo service between London or Liverpool and Vancouver. Grain from Alberta and timber and fruit from British Columbia will constitute the chief home-bound cargo at low freight rates.

Investigating Pacific Ports.

In New York maritime circles, representatives of important British shipping interests are reported to be investigating Pacific ports to discover where the best terminals for steamship lines between Great Britain and the ports upon the North American Pacific coast can be located.

These activities indicate that as soon as the Panama Canal is open to navigation great commerce will avail itself of its opportunities. Many competent judges predict that the new commercial highway between the Orient and the great industrial and financial countries of western Europe and the United States will be established by the new Canal route.

Sir William Howell Davies, a member of the British House of Commons and of Bristol dock associations, has urged that immediate provision of docking facilities be made at Victoria. In an interview he stated his pleasure in hearing that a \$3,000,000 scheme was contemplated for the improvement of Victoria harbor, for he had not seen yet in British Columbia any quay facilities similar to those demanded by the class of vessel which would be seen in the trade after the opening of the Canal.

Likely Class of Vessel.

The freight vessel for the business, he thought, would be from 8,000 to 15,000 tons, and at least 500 feet long, vessels which would pick up freight in a number of ports, and carry sufficient cargo to pay the dues for passing through the waterway. It would not unlikely cost \$5,000 for a big vessel to pass through the Panama Canal, judging by the only similar example in the world, the Suez Canal. In the Suez Canal the dues ran to something between £1,000 and £1,500, and were a heavy charge upon the business done; in fact, the vessels must be able to carry a big cargo in order to make it profitable. Such steamers were plying in India and the Far East, picking up trade in various ports

and gradually accumulating enough to pay the Suez Canal dues.

So far as the future circumstances of British Columbia warranted he believed that business sufficient to justify this expenditure would be forthcoming, bearing in mind the growing trade with the Orient and the Antipodes, and the fact should always be remembered that trade creates trade, and there would inevitably be a large increase in the business of any port which prepared itself for these opportunities.

Tramp Steamers to Benefit.

Experts contradict the general impression that the greater part of the profits to be derived by British shipping from the trade of the Pacific coast ports will go to the companies owning big liners. That may be true to a certain extent, but the owners of tramp tonnage expect also to obtain benefits from the opening of the Canal not only in connection with actual trading operations to and from the Pacific coast of America, but in addition, from the diversion of many liners to the new routes which will become available when the Canal is in full swing.

Our Coast Must Prepare.

Preparations, therefore, for the revised conduct of trade and commerce are being made by all the large shipping companies. They must have terminals and ports of call, and will choose those which offer the greatest facilities. San Diego, Los Angeles, San Francisco, Oakland, Portland, Tacoma and Seattle have extensive plans in hand for the improvement of their harbors. Vancouver and its sister ports on Canada's Pacific coast cannot afford to take second place. If they do so now, they will likely do so always.

(To be continued.)

CHARTERED ACCOUNTANTS' CONVENTION

On Tuesday and Wednesday, September 24th and 25th, the chartered accountants of Canada will meet in convention at Toronto, the headquarters of the meeting being the King Edward Hotel. The meeting is held under the auspices of the Dominion Association of Chartered Accountants, which association comprises the members of the seven provincial institutes, each of which will be well represented. Among the delegates will be Mr. E. L. Suffern, C.P.A., president of the American Association of Public Accountants, and Mr. E. W. Sells, C.P.A., of Messrs. Haskins and Sells, New York.

A central committee has for some time been engaged in arranging the details of the convention—business and social. This committee includes Mr. Osler Wade, chairman; Messrs. Henry Barber and William Fahey, reception committee; Mr. C. E. Stone, chairman banquet committee; Mr. W. H. Thompson, chairman whips committee; Mr. Bryan Pontifex, chairman publicity committee and Mr. John I. Sutcliffe, secretary. After the business of the day on September 24th, the usual annual banquet will be held at the King Edward, and amongst the after-dinner speakers will be the Honorable W. T. White, Minister of Finance for the Dominion, who will deliver an address on "Canada's Balance Sheet," and kindred topics, and the Honorable W. J. Hanna, Provincial Secretary. During the mid-day interval on Wednesday, the delegates will be the guests at luncheon of the members of the Ontario Association. It would seem that the convention will have other than wholly intellectual food placed before them.

The office-bearers of the Dominion Association this year are Mr. George Edwards, Toronto, president; Mr. W. A. Henderson, Winnipeg, vice-president; Mr. G. U. Stiff, Toronto, secretary-treasurer. Details of the proceedings, the business transacted, the professional papers read and the discussion thereon will appear in the Canadian Chartered Accountant, the official organ of the Dominion Association of Chartered Accountants.

The Howard Smith Paper Mills, Limited, has been formed for the purpose of manufacturing loft-dried papers, and are erecting their mills at Beauharnois, Que. The company intends manufacturing bond and ledger papers. The directors of the company are Messrs. C. Howard Smith, president; J. C. Newman, vice-president, and Messrs. J. J. Meagher, F. G. O'Grady, H. C. Courtney, with Mr. T. A. Hubley as secretary-treasurer. The company has contracted with the Canadian Light and Power Company for 500 horsepower to supply its immediate needs.

FIRST GOLD FROM PORCUPINE

Output This Year Will Probably Reach Goodly Sum— Ontario's Mineral Production for Six Months

The returns to the Ontario Bureau of Mines show that the output of the metalliferous mines and works of that province for the six months ended June 30th, 1912, was as follows:—

Product.	Quantity.	Value, 1912.
Gold, ounces	11,854	\$ 235,198
Silver, ounces	14,258,403	7,936,600
Copper, tons	5,170	730,409
Nickel, tons	10,179	2,166,895
Iron ore, tons	12,342	33,060
Pig-iron, tons	283,926	3,942,638
Lead ore, tons	17	849
Cobalt, cobalt and nickel oxides, crude cobalt material, etc., lbs.....	854,324	192,073

The figures of gold production as compared with the first six months of 1911, show an increase of \$192,878. This is practically the first fruits from Porcupine, chiefly from the Dome mine. Since the six months ended the Hollinger mill began turning out gold, and as there are now several smaller producers as well, the output for the full year may be expected to reach a considerable sum.

The yield of silver from the Cobalt mines, measured in quantity, shows a reduction of 973,566 ounces from that of the first six months of last year, but the money value was \$292,400 greater, owing to higher prices for silver.

Nickel and copper from the Sudbury mines touched high water mark; and if the production continues at the same rate, 1912 will show a record for both metals. This is also true of pig-iron. Iron ore, however, shows a falling off as compared with a year ago.

The by-products from the refining of the silver ores, such as cobalt and nickel oxides, had a value of nearly three times that of the corresponding period in 1911.

IMPORTANT CANADIAN FINANCIAL HOUSE MAKES ISSUES

In connection with Sir Max Aitken's purchase of the elevators of the Alberta Pacific Grain Company, The Monetary Times learns that an issue of stock will be made (probably 7 per cent. preferred cumulative stock with bonus of common stock) by the Royal Securities Corporation.

Sir Max Aitken and several other prominent financiers have obtained an interest in the Toronto Structural Steel Company and have increased the capital from \$200,000 to \$1,000,000, to be divided \$500,000 in preferred and \$500,000 in common stock.

More than half of this has already been purchased by Sir Max Aitken's friends, and it is expected that the balance will also be disposed of privately, although a small public offering of the issue may be made at par. The stock will bear dividends of 7 per cent.

An issue of 6 per cent. first mortgage sinking fund gold bonds of the Santiago Electric Light and Traction Company is being made simultaneously in England and Canada by the Royal Securities Corporation, and in the United States by Messrs. Speyer and Company and Lawrence Turnure and Company.

CANADA AND NEW YORK MONEY MARKET

Commenting on the money situation in New York, the Journal of Commerce says:—"Not only do our own agricultural sections show signs of requiring more than usually large amounts of currency this year as a result of what now may be regarded bumper crops of 1912, but Canada also is becoming insistent for the return of funds that the Dominion banks have at present on deposit at New York in the form of call loans. An idea of the importance of the Canadian demand is contained in the exchange rate for New York funds in Montreal, which were quoted at 46½c. for \$1,000 discount.

"Canada has not only been drawing home call loans from New York, but two of the large Canadian banks have been among the heaviest sellers of nine-day finance bills drawn on London, which means, of course, that they are drawing on their London funds through New York and it is considered quite probable that there will be an additional shipment of gold from New York to the Dominion as soon as this can be accomplished without causing unnecessary strain at this centre. This delay suggests a very cordial understanding between Canadian and New York banks. Taken altogether our bankers do not seem to expect any severe degree of stringency in local money markets."

WORKMEN'S COMPENSATION LAW INADEQUATE

Interim Report of Sir William Meredith to Ontario Government—Industries Should Bear the Burden

Sufficient progress has been made to warrant the statement that the law of Ontario is entirely inadequate to meet the conditions under which industries are now carried on or to provide just compensation for those employed in them who meet with injuries or suffer from occupational diseases contracted in the course of their employment.

This is a statement in his interim report of Sir William Meredith, the Commissioner appointed by the Ontario Government to inquire into the subject of workmen's compensation. The report has been published as a blue-book containing the minutes of the evidence taken at the hearings held by the Commissioner, the briefs submitted by the Canadian Manufacturers' Association and the Trades and Labor Congress of Canada, and a summary of the workmen's compensation laws of European countries, and the provinces of Canada and of the acts passed by state legislatures in the United States.

Burden Borne by Industries.

Sir William Meredith continues:—It is satisfactory to be able to say that there is practical unanimity on this point and that those who speak for the employers concede the justice of the claim made on behalf of the employees that the industries should bear the burden of making compensation.

The employers, however, contend that the whole of this burden should not be borne by them, but that the employees should share it, and suggest as a fair contribution by the employees 10 per cent. of the amount required to provide for the compensation.

This contention is strenuously opposed by the employees who take the position that the whole burden should be borne by the employers.

Favor Mutual Insurance.

The basic principle that the burden of providing compensation should be borne by the industries being conceded, the question arises as to what form the legislation necessary to give effect to it should take.

Those representing the employers who have appeared before me favor what is practically a plan of mutual insurance, under the management of a board appointed by the Crown, that the industries should be divided into groups or classes, and that an annual assessment should be made by the Board to meet the claims for the preceding year, each group or class being assessed only for the compensation for injuries happening in establishments within it with a special additional assessment in all cases to provide a reserve fund. This plan seems to be favored by the representatives of labor organizations.

There being practical unanimity on the part of the employers and the employed as to these two main principles, it would seem to follow that it is reasonable that they should form the basis for provincial legislation, and as at present advised I shall be prepared to recommend a plan such as is proposed if, after careful and thorough enquiry and examination, I am satisfied that it is economically sound and workable.

Important Subsidiary Questions.

There are yet to be considered many subsidiary but very important questions and among them the following:—

(1). To what industries or employments the law should extend and whether (a) as in most countries it should be limited to dangerous occupations; (b) it should extend, as it does under the British act, to the farming industry and to domestic servants; (c) it should extend to establishments in which less than a stated number of workmen are employed.

(2). Whether there should be any, and if so, what "waiting period"—that is, a period for which no compensation can be claimed if the disability resulting from the injury does not last beyond it.

(3). Whether in any and if so what cases the employee should not be entitled to compensation, e.g., where the injury is the result of a serious and wilful misconduct on his part, or drunkenness, or the violation of law, or of a rule of the establishment.

(4). Whether the compensation provided should be in lieu of the common law or other statutory right of the employee against his employer.

(5). How the board should be constituted.

(6). Whether the decisions of the board should be final or subject to appeal, and, if appealable, to what tribunal the appeal shall lie.

Careful enquiry must also be made as to the probable cost of administration, and machinery must be provided for collecting the assessments and for the investigation and ad-

justments of claims, and this machinery must be made as simple and inexpensive as possible.

Whether or not use should be made of the municipal bodies for some of these purposes is, I think, worthy of serious consideration.

If the industries are to be divided into groups or classes, care will have to be taken in the selection of those which are to form each group. It will also be necessary that a scale be adopted according to which the industries are to be assessed, as this will, of course, vary according to the nature of the industry, and the hazard to which the employees are exposed. The preparation of this scale will require much consideration and must be entrusted to experts.

It will be necessary, also, in order to provide for claims during the first year that a special contribution be made, and to enable an estimate to be formed of the rate of this contribution, an investigation as to the payrolls of the industries within the scope of the act and other enquiries requiring care and time will be requisite.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended September 13th:— Temiskaming, 48,100; Hudson Bay, 71,229; Cobalt Townsite, 108,100; La Rose, 153,427; McKinley-Darragh, 152,176; O'Brien, 149,423; Nipissing, 141,812; total, 824,267 pounds or 412 tons. The total shipments since January 1st are now 30,832,806 pounds or 15,416 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

NEW WELLAND CANAL

Tenders are likely to be called in a few months' time for the Welland Canal improvement. The cost will be approximately \$50,000,000 and the time required for construction five years. The work is to be done at several sections at once, and seventy-five steam shovels and over a dozen dredges will work at various points along the route. The old course will be widened and deepened from Port Colborne to Thorold, but the descent from Thorold to the new harbor at McCalla's Grove, about three miles east of Port Dalhousie, will be by an entirely new channel, the outlet being at the Ten Mile Creek. Between Thorold and Lake Ontario there will be seven locks, with a depth of 25 feet. The lift system instead of the swing gate system will be in vogue. All will be operated by electricity.

BRITISH CONSULS WILL HELP

An important arrangement has been concluded between Sir Edward Grey, British Secretary of State for Foreign Affairs, and Hon. George E. Foster, Canadian Minister for Trade and Commerce, by which the British consular service is made available to Canadian business men. The leading features of the agreement are:—

1. The Foreign Office agrees to furnish the Department of Trade and Commerce with copies of all trade reports from its Consular officers, as soon as they are published, from any districts which may be specified by Canada as of interest to Canadian trade.

2. Any Canadian firms or business men will be at liberty to apply direct to any of his Majesty's Consuls in any part of the world for information as to the sale of Canadian products, methods of business pursued, and the best means of getting in touch with markets.

3. His Majesty's Consuls will be supplied through the Foreign Office with statements of Canada's commerce, resources and development, with lists of the principal industries and sources of supply, and the questions upon which Canadian merchants and manufacturers desire information.

4. Canadian Trade Commissioners will have full liberty to apply to his Majesty's Consuls for assistance and advice in trade matters.

5. Office room in British Consulates will be afforded to Canadian commercial representatives when it is possible and convenient to arrange therefor.

6. Members of the Canadian commercial service will be eligible for selection for and entrance to the British commercial service on the terms and conditions applicable to other entrants thereto.

The number of directors of the Donnacona Paper Company has been increased from three to seven.

THIS CANADIAN RAILWAY BLOOMED AND FADED

History of the Hudson's Bay and Pacific Railway— Receiver Says its Career Consisted of Repeated Attempts to Borrow Money

When officials of the Hudson's Bay and Pacific Railway Development Company became active in the neighborhood of Prince Albert, Sask., *The Monetary Times* criticized the conduct of the corporation. A compulsory winding-up order was made by the Court in May. A few weeks ago the creditors and shareholders of the company met in London to select a liquidator. The story of the enterprise was told by Mr. A. T. Burgess, the official receiver. It is given in detail here, as it may prove of future assistance to the investor in Canada's securities. Mr. Burgess reported that the company was incorporated in April, 1909, with a nominal capital of £150,000, which was increased in November, 1910, to £250,000, the increase being necessitated by the fact that most of the original capital had been issued for considerations other than cash. The objects of the company were to take over the construction and equipment of a line of railway in Canada from a point on Hudson's Bay, through Prince Albert to Calgary, with certain branches. The directors in office at the date of the winding-up order were Messrs. J. T. G. Greville, J. Kerry, C. Mannesmann, E. Bastian, J. Brailsford, V. A. Dupont, E. B. Bernard, H. Watts-Johnson and J. R. Denning and Colonel Sir Augustus FitzGeorge. Mr. Greville was appointed as managing director at a salary of £2,000 per annum, and Mr. Herbert Spicer acted as general manager at the same salary. The promoters of the company were Messrs. Greville, Spicer, J. E. Hatton and William Vaughan Williams.

Stock and Bonding Powers.

The construction to be taken over arose under certain powers granted by an Act of Parliament of the Dominion of Canada in October, 1896, to several gentlemen, including Colonel Josiah Harris and Mr. John Weston, who became directors of this company. The Act of Parliament incorporated the Hudson's Bay and Pacific Railway Company, with a capital stock of \$8,000,000 and a right to issue bonds to the extent of \$20,000 per mile of length of railway constructed or under contract to be constructed. The two gentlemen were constituted "provisional directors," having under the general law of Canada certain preliminary powers, such as to cause plans and surveys to be made and to receive subscriptions to the capital stock and make the necessary allotments. The Act of Parliament had a time limit, which had been renewed from time to time. It appeared that for several years nothing was done towards the development of the project.

In 1902 a syndicate was formed to raise money for the surveys, but it failed. Then in 1905 an English company, styled the Canadian Railways Finance Company, Limited, was formed for the same purpose, and some money was raised. Colonel Turnbull, one of the provisional directors, made a flying survey of the route, but the company went into compulsory liquidation in 1907 without assets, and Colonel Turnbull retained his plans and maps against a charge of about £800 in respect of his fees and expenses.

Scheme Was Much Handled.

Later in 1907 Mr. Joseph Skinner took up the scheme on behalf of the provisional directors; he introduced it to Mr. Spicer, who handed it on to Messrs. Greville and Hatton. As the result of negotiations between all interested parties, an agreement dated 11th March, 1908, between the railway company and Mr. Skinner was prepared and executed. Under that document the railway company purported to assign to Mr. Skinner their rights of construction under the charter. Mr. Skinner was (1) to put up £15,000 for surveys, etc., (2) hurry on the surveys, (3) form a development company with a working capital of £50,000, and (4) build and equip the line. There was no limit of time fixed under the agreement, and it would be contended by the liquidator that the agreement was still in existence. Mr. Skinner was to be entitled to the entire share and bond issues of the railway company authorized by the charter, and all subsidies, bonuses and land grants that might be obtained, his profit to be what was left over of the stock, bonds, etc., after the railway had been completed and equipped.

How Quarrels Were Squared.

He further undertook to provide cash £10,300 and shares for \$1,400,000, in order to meet the liabilities attaching to the scheme. No details of those had been furnished, but they were stated to represent interests of old charter-holders and fees payable for obtaining the various renewals of the charter. On the following day Mr. Skinner entered into an agreement with Messrs. Greville and Spicer, and the three gentlemen arranged for the promotion of this company and for the way in which certain profits of the promotion were to be divided; they

had some quarrels, which were made up by giving each other additional profits.

Mr. Skinner then raised some few thousands of pounds from several persons in England in exchange for promises of stock and of lucrative appointments on the railway, and with that money Messrs. Greville and Spicer went to Canada and obtained a renewal of the charter in April, 1909. They then formed this company, and on 17th April, 1909, purported to assign their rights to Mr. Wm. Vaughan Williams, who acted in the capacity of nominal vendor to this company.

First Directors were "Dummies."

The first directors were the signatories, who appointed themselves and were merely dummies, but were useful for the purpose of executing the purchase agreements with Mr. Wm. Vaughan Williams (who was stated to have vested in him all the interest in the charter), under which they agreed to purchase that gentleman's rights and interests under the charter for £100,000 in fully-paid shares. It was contended that under that agreement this company undertook all the obligations that their predecessors in title had contracted in connection with the charter, so that all the gentlemen who were previously connected with the scheme were freed from their responsibility, and were, in addition, presented with £100,000 in shares. The company also agreed to give Mr. William Vaughan Williams a commission of 5 per cent. on the actual cost price of the construction of the railway as charged by the contractors and engineers.

No Independent Board to Investigate.

There was no independent board of directors to investigate the nature and value of the property to be acquired or to test the extent of the vague liabilities assumed under the agreement. The signatories passed an account for £6,327 for preliminary expenses in favor of Mr. Williams, the major portion being in respect of lawyers' fees in Canada. Having adopted this agreement, the signatories retired in favor of the permanent board of directors, which then consisted of Messrs. Greville, Williams, Weston, Friends and Pearce, and Colonel J. Harris. The company had to a certain extent surveyed some 300 miles of the line and incurred very considerable expense in the survey; they also constructed 75 miles of bush road, but there was some variety of opinion as to how much work was done in respect of the latter. It was clear, however, that in return for the immense expenditure of money all the company had to show was the 300 miles of track surveyed and 75 miles of bush road.

Repeated Attempts to Borrow Money.

The history of the company really consisted of repeated attempts to borrow money; they were successful in borrowing a little, but had to pay an awful price for it. Cash to the amount of £8,705 was received in the shape of subscriptions for shares; shares for £100,000 were issued as the purchase consideration; and £128,182 shares were given as commissions and bonuses for conducting the negotiations for the advances, so that in return for £236,887 shares out of the total capital of £250,000 virtually nothing had been done towards the construction of the railway. Then the company had raised on various securities about £36,267, of which £17,000 was secured by mortgages on the assets, so that the total cash which the directors had through their hands was £44,972. The expense incurred in raising that amount was £136,887 in shares, and they had given away a quantity of the Railway Company's stock and bonds. Under its call on the Railway Company's stock and bonds this company had received stock \$4,000,000 and bonds \$900,000, practically the whole of which had gone in bonuses and commissions and security for the loans.

Mr. Vaughan Williams pointed out that the major portion of the stock and bonds was redeemable when the loans were repaid.

Only Asset is Now the Charter.

The chairman added that the £44,972 received by the directors was expended in wages, salaries, rent, lawyers' costs, directors' fees, commissions, bonuses and other minor items, whilst the only asset now possessed by the company was the charter. In April, 1909, a construction contract was entered into with Messrs. J. A. Taylor and Company, of New York, but that was cancelled. Before the Railway Company could issue bonds it was necessary under the General Railway Act for the railway to be under contract for construction, and in March, 1911, another contract was signed for cost price plus 15 per cent., and that was used as justification for issuing the bonds, but as apparently there was nothing with which to pay for the work the contractor had not started work.

The statement of affairs disclosed unsecured liabilities of £51,892 and the mortgage of £17,000, whilst on the other side was the charter, which had cost £110,300. It was contended by the Railway Company that as this company had only paid about £5,000 on account of the price of £10,000 the charter was not this company's property, and their right to it would be contested. The account with the contributories showed a deficiency of £192,416.

SOUTHERN VANCOUVER ISLAND

Coal is Source of Important East Coast Industry— Other Valuable Mineral Deposits

The area described in a report to the department of mines, Ottawa, by Mr. C. H. Clapp, includes that part of Vancouver Island which is south of the Alberni-Nanaimo road, and east of the Alberni canal and Barkley Sound; and also includes Saltspring Island, and several smaller islands off the east coast of Vancouver Island, in Haro Straits. This area is approximately 4,000 square miles.

Much of the southeastern and eastern part of the region is accessible by road. In the vicinity of Victoria, on the Saanich Peninsula, and along the east coast north of Cowichan Bay, the country is well settled, and there are many good roads. Main roads extend from Victoria west to East Sooke and Jordan River, and northwest by way of Sooke and Shawinigan Lakes to Duncan. There is a stage road from Duncan to Cowichan Lake, and another from Nanaimo to Alberni. There are two railroads in the area, the Victoria and Sydney, and the Esquimalt and Nanaimo. The former is located on the Saanich Peninsula, while the latter follows the east coast as far north as Nanoose. At the present time an extension is being built across the island to Alberni. Other extensions and new railroads and tramways are projected, to open up the interior of the island.

More Trails are Required.

At present the inlets and lakes, a few of the rivers, and the Cowichan Lake and Alberni roads furnish ready access to the interior of the island, and no very long packing trips need be made. Such trips at the present time must be made without the aid of pack animals, as the trails are not numerous, and with two or three exceptions are suitable only for men. Even these trails, when well located and cleared of brush, are of the greatest assistance, for on them seven or eight miles may be readily travelled in a day by one carrying a heavy pack; while without a trail three miles is often the limit which it is possible to travel in a day, with the hardest sort of muscular work. The establishment of more trails is, therefore, of the greatest importance, and would fill a most urgent need.

A large part of the shore may be safely traversed in a small boat. Coasting steamers run between Victoria and ports on both the east and west coasts.

Coal Chief Source of Mineral Wealth.

The mineral resources of southern Vancouver Island include deposits valuable, or possibly valuable, for gold, copper iron, fuels, fluxes, lime, cement pigment, clay, sand and gravel and stone. Coal has been the chief source of mineral wealth, and copper and some gold have been commercially produced. Lime, cement, clay, sand, gravel, and crushed stone as well as coal are being produced at present.

Gold occurs in the gravels of a large number of the streams of southern Vancouver Island, but with two or three exceptions, the principal deposits all occur in the streams which drain the area underlain by the Leech River slates and have been derived from very low grade quartz veins in that formation. The gold-bearing gravels are usually of a fair grade, but are not very abundant. A large accumulation of gravel at the old mouth of Lost River and near the mouth of the present Sombrio River is being exploited at present. Mineralized shear zones occur throughout the rocks of the Vancouver group, and although they are usually more important as possible sources of copper, they also carry small amounts of gold.

Copper and Iron Deposits.

The copper deposits of southern Vancouver Island are all more or less closely connected with the igneous rocks erupted during the upper Jurassic period of batholithic and dyke intrusion. They may be subdivided into three main types,—contact deposits, impregnated and replaced shear zones with accompanying quartz veins, under which is the special Sooke type, occurring in the shear zones of the Sooke gabbro, and lastly the Tyee type, a large lens of ore which was formed in a syncline in the Sicker schists of Mount Sicker. The contact deposits, which are developed chiefly in metamorphic limestones near their contacts with intrusive igneous rocks, are the more numerous. They are, as a rule, small, irregular, and of low grade, but some of them are of considerable economic interest. The deposits occurring in shear zones are of little importance, with the exception of the special Sooke type, which is of great prospective interest. The Tyee deposit, now largely worked out, is the only deposit from which there has been a commercial production.

The iron ore deposits are of four types, contact deposits, impregnated schists, replacement or segregation deposits in the Sooke gabbro, and bog ore deposits. The contact deposits are by far the most important; and consist of bodies of magnetite, which have been formed in the metamorphosed

Nitinat limestones, near the intrusive Beale diorite. The bodies are large, and low in phosphorus, but high in sulphur. The chief deposits occur in the valleys of Gordon River and its tributary, Bugaboo Creek. The impregnated schists occur in the Sicker series. The mineral-bearing rocks are dark red, jaspery schists, with 10 to 15 per cent. of magnetite. Since the magnetite can be easily concentrated they are of prospective importance. The other two types are apparently of no value.

Important Industry on East Coast.

Coal is the source of a very important industry on the east coast; the coal being obtained near the base of the Nanaimo formation in the Comox basin, and in the northern part of the Nanaimo basin, from 600 to 1,500 feet above the base. These coal deposits have not been examined during the present investigation. Coal of commercial value is apparently absent from the other basins of the Cowichan group, and is almost certainly absent from the Tertiary sediments of the west coast. These sediments have also been prospected for oil, but the conditions for the accumulation of oil do not seem to be favorable.

The crystalline limestones of the Nitinat and Sutton formations furnish excellent and ample material for flux, and for the manufacture of lime and cement. Cement is manufactured in the southeastern part of the island by the Vancouver Portland Cement Company, and lime is burned by several manufacturers also in the southeastern portion of the island.

A bog deposit of yellow ochreous clay in the Sooke district is a possible source of material for a base for colored paints.

Two Types of Clay Deposits.

There are two types of clay deposits in southern Vancouver Island, the shales of the Nanaimo formation and the clays of the stratified superficial deposits. The greater part of the shales of the Nanaimo formation are sandy and impure, but associated with the coal in the Nanaimo and Comox basins are thin, lens-like beds of clay-shale. This shale is mined by the coal companies and used by the British Columbia Pottery Company at Victoria, where it is mixed with the clays of the superficial deposits, for the manufacturer chiefly of sewer pipe. The clays of the stratified superficial deposits are used for the manufacture of common bricks and drain tiles, at Victoria, Sidney, Sidney Island, and Somenos.

Sand and gravel are also obtained from the stratified, superficial deposits of southeastern Vancouver Island.

The fractured and sheared character of the rocks renders most of them unfit for building stones. In rare instances the marbles may be of value, and some of the dark granites (granodiorites) exposed near Alberni canal would doubtless make good building stone. The sandstones of the Cowichan group, especially of the Nanaimo and Comox basins, offer excellent material for stone of that kind.

The traps, especially those of the Metchosin volcanics, offer abundant material for an excellent quality of crushed stone. The Metchosin volcanics are quarried at Albert head, in Esquimalt district, by the British Columbia Trap Rock Company.

BRANDON AS A DISTRIBUTING CENTRE

A map showing the advantageous situation of Brandon as a wholesale distributing centre has been issued by the Commercial Bureau of that city. This map was issued by the Canadian Government to show the elevator capacity of Western Canada and the only change made in it is the coloring red of the railway lines and shipping points with elevator capacity throughout the district in which Brandon has more favorable railway freight rates than Winnipeg or any other distributing centre in Western Canada. This district is known as Brandon's distributing area. The figures at the different shipping points of the district show the elevator capacity. According to the Canadian Government map issued in 1910 over one-third of the elevator capacity of Western Canada was in the Brandon distributing area. This district not only includes the most popular and progressive farming area in Western Canada, but a report recently prepared showed that there were in this district 289 small towns, villages and hamlets with 3,500 retail merchants. The Brandon distributing area embraces the most productive farming country of Manitoba and a considerable portion of the province of Saskatchewan, and it is covered by a network of railways, all tributary to Brandon. Including trunk lines and branches there are twenty-seven railway lines spreading out into that district.

The following insurance companies have been licensed to transact fire insurance in Saskatchewan: Westchester Fire Insurance Company, of New York; General Assurance Company, of Paris; North British and Mercantile Insurance Company, of Edinburgh; and the Alliance Insurance Company, Limited, of London.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Sherbrooke Railway and Power Company.—A large increase in earnings is shown by the Sherbrooke Railway and Power Company for the exhibition week. The increase over the earnings of exhibition week last year is nearly 30 per cent.

The figures for the week in the past three years are:—

	Earnings.	Gain.
1910	\$2,600	
1911	2,866	\$ 266
1912	4,070	1,204

Grand Trunk Pacific Railway Company.—The adjourned annual meeting of the Grand Trunk Pacific Railway Company was held this week. Good progress was reported on the construction work of the main line, as well as on branch lines, the latter comprising approximately 2,000 miles.

The directors elected are: Mr. Alfred W. Smithers, Sir Henry Mather-Jackson, Sir Felix Shuster, Sir William Henry White, Hon. R. Dandurand, Hon. George A. Cox, Messrs. E. J. Chamberlin, Wm. Wainwright, M. M. Reynolds, E. H. Fitzhugh, W. H. Biggar, E. B. Greenshields, Wm. M. MacPherson, E. R. Wood and J. R. Booth.

The following officers were elected: Mr. E. J. Chamberlin, president; Mr. M. Donaldson, vice-president and general manager; Mr. Wm. Wainwright, vice-president; Mr. M. M. Reynolds, vice-president; Mr. J. E. Dalrymple, vice-president; Mr. Henry Phillips, secretary; Mr. Frank Scott, treasurer.

Quebec Railway, Light, Heat and Power Company.

The first of what it is supposed will be regularly monthly statements of earnings has just been issued by the Quebec Railway, Light, Heat and Power Company. It covers the month of July, the first month in the company's new fiscal year. Gross earnings showed a considerable gain, \$15,300, or nearly 11 per cent., but operating expenses made a still larger increase, and the net earnings were \$2,114 less than in the same month, 1911. The comparative statement is as follows:—

	1912.	1911.	Increase.
Total earnings from operation	\$155,838	\$140,538	\$15,300
Operating expenses	83,294	65,879	17,414
Net earnings from operation..	\$ 72,453	\$ 74,658	* \$ 2,114

* Decrease.

Nipissing Mines Company.—At the meeting of directors of the Nipissing Mines Company, held yesterday in New York, the statement presented showed cash, bullion and ore on hand amounting to \$1,368,876, an increase of \$150,000 over this time last year. Of this amount cash and bullion amount to \$983,000.

The regular quarterly dividend of 5 per cent. and 2½ per cent. bonus was declared, which brings the total disbursements for the year up to 30 per cent.

The company has spent over \$250,000 on the new low-grade mill out of the profits this year, which was charged to operations. The new mill is expected to start up early in November.

The net production of the Nipissing Mines for August was \$226,613, which is above the average, but the shipments for the month were below the normal.

It was reported that during this year a good body of ore was found in vein 73, on the second level, and a new ore body located in vein 74. These are between three and four inches wide, and average 2,000 ounces of silver to the ton. A new ore body was also found on vein 63, which averaged 800 ounces to the ton.

Minneapolis, Sault Ste. Marie and St. Paul Railway.

The system earned last year, gross \$26,684,340.93, \$4,711,633.15 in excess of the year preceding. This high record, which marks the period that closed June 30th, 1912, is likely to stand only until June 30th, 1913, said President Pennington.

The Soo line proper earned \$17,105,685.95 of the total, and the Chicago Division, or formerly Wisconsin Central, \$9,597,554.98. In the preceding fiscal year the Soo line proper earned \$13,135,907.80 and the Chicago Division \$8,836,669.08, the increase in first instance being \$3,909,778.15, and in the second instance \$741,885.

Operation expenses of the Soo line proper came up from \$8,375,995.03 to \$9,586,408.06, and those for the Chicago Division \$6,622,342.25 to \$6,636,882.56. Net earnings rose from \$4,759,912.77 on the Soo to \$7,519,277.49, and net earnings on the Chicago Division came from \$2,214,326.73 to \$2,941,672.42.

Final results show that while the Soo line proper had a surplus from operations to fiscal year 1911 of \$1,831,426.65, surplus for fiscal year 1912 is \$4,224,289.89, and Chicago Division, which fell behind in 1911, and showed deficit of \$231,279.03, closed the fiscal year 1912 with a surplus of \$504,649.53.

La Rose Mining Company.—The directors of La Rose Mining Company met at the office of the president, in the Eastern Townships Building, Montreal, on Wednesday, and declared the quarterly dividend at the regular rate of 2½ per cent. per quarter. The dividend is payable on October 30th to shareholders of record of September 30th.

The directors were a little reticent concerning the proceedings at the meeting, but it would not seem that anything has been discussed very seriously concerning the disposition of the surplus. It is known, however, that a number of properties have been examined, and that all have been refused by President McGibbon, who is evidently determined that there shall be no mistake made, and that when La Rose disposes of its surplus it will be for something of undoubted value.

Shipments from La Rose during the past season may not have been so large as during the corresponding period of 1911, but there is no doubt that the earnings have been more than sufficient for dividends. During the month of August they amounted to somewhere in the vicinity of \$150,000, and for the eight months were at the rate of about \$150,000 per annum in excess of the dividend requirements.

The surplus is gradually increasing, and at the present time is well over the high mark of \$1,750,000, and development is being carried on as heretofore, and with varying success.

Lake Superior Corporation.—The annual statement of the Lake Superior Corporation, which was sent out this week, shows that from the operations of all the subsidiary companies there is a surplus, subject to depreciation and other charges, of \$1,570,377, to which is added earnings brought forward from last year of \$223,226, making a total of \$1,802,604.

After deducting \$76,334 interest paid to the bank, \$578,307 interest on bonds of subsidiary companies, \$101,262 for redemption of capital on Helen Mine, sinking fund, etc., and \$695,975 paid to Lake Superior Corporation as interest on bonds, notes and as dividends, there is left a balance reserved for extensions and improvements of \$245,218.

The total income from the subsidiary companies in the previous year was \$1,200,216, with a balance of \$89,346.

The increased earnings and prospects warranted the payment of the full 5 per cent. interest on the \$3,000,000 income bonds. The interest, which amounts to \$150,000, will be payable October 1st. For the two previous years interest has been paid on the income bonds at the rate of only 2½ per cent.

The income account for the year ended June 30th, 1912, compares as follows with that of the previous year:—

Income from subsidiary companies....	\$695,975	\$429,139
Other income	124,449	189,430
Gross income	\$820,425	\$618,570
Bond interest and general expenses..	\$653,006	\$532,592
Surplus	\$167,418	\$ 85,977
Brought forward from previous year..	\$ 4,436	\$ 3,368
Total surplus	\$171,764	\$ 89,346
Interest on income bonds	\$150,000	\$ 85,000
Transferred to reserve	\$ 21,764	\$ 4,346

President T. J. Drummond in his report speaks of the financial readjustment which took place during the year, by which the Algoma Steel Corporation took over the Algoma Steel Company; Lake Superior Power Company, Algoma Commercial Company, together with the full interests of Fibron Limestone Company and the control of the Cannerton Coal and Coke Company. Short-term notes of the steel company have under the new consolidation been entirely repaid.

The Westminister Gas Company, operating at New Westminister, B.C., will apply to the supreme court to quash the by-law passed by the city council on August 30th to repeal the New Westminister Gas Company by-law of 1886.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Kamloops, B.C.—The hydro-electric, waterworks and electric light by-laws, totalling \$405,000, were all carried.

Watrous, Sask.—Watrous is still open for tenders for its issue of \$83,000 40-year 5½ per cent. debentures.

Simcoe County, Ont.—Until October 15th, for \$20,000 20-year 5 per cent. debentures. Daniel Quinlan, treasurer, Barrie.

Loreburn, Sask.—The village will borrow \$2,000 for permanent improvements. B. C. Wormworth, secretary-treasurer.

Calgary, Alta.—The by-law providing for the issue of \$378,000 in debentures to pay the cost of installing water extensions.

Point Grey.—Ratepayers have approved by-laws to borrow \$220,000 for waterworks purposes, \$126,533 for roads, and \$155,733 for schools.

Rosetown, Sask.—Until October 1st for \$12,000 20-year 6 per cent. local improvement debentures. N. M. Aseltine, secretary-treasurer.

Estevan, Sask.—A by-law for \$25,000 for sites and warehouses for the International Harvester Company and Rumely Products Company was carried.

Winnipeg, Man.—Three by-laws were passed that call for an expenditure of \$1,300,000, which will be levied against the property in the next assessment.

Langdon S.D. No. 220, Alta.—For sale \$15,000 10-year school debentures. R. Conn, secretary-treasurer, Langdon. (Official advertisement appears on another page).

Melfort, Sask.—Until October 18th for \$125,000 6 per cent. 30-year debentures. J. E. Durnin, secretary-treasurer. (Official advertisement appears on another page.)

Coleman, Alta.—Until September 30th for \$3,500 5 per cent. 10-year debentures. James Ford, secretary-treasurer. (Official advertisement appears on another page).

Melville, Sask.—Until September 30th for \$43,300 5 per cent. 30-year debentures. F. H. Clarkson, secretary-treasurer. (Official advertisement appears on another page).

Vancouver, B.C.—A number of local improvement by-laws, aggregating an expenditure of \$645,000 for pavements and sidewalks, were brought up at the city council's meeting.

Cudworth, Sask.—Up to October 1st, for the purchase of \$7,000.00 (seven thousand), 15-year 6% (six per cent.) village improvement debentures. F. G. Exel, Cudworth, Sask.

Imperial, Sask.—Until October 1st for \$6,000 15-year 6 per cent. skating and curling rink debentures. J. J. Hobman, secretary-treasurer. (Official advertisement appears on another page).

Melville, Sask.—Until September 30th for \$55,000 5 per cent. 40-year town hall and \$6,000 5 per cent. 6-year mill loan debentures. Fred. H. Clarkson, secretary-treasurer. (Official advertisement appears on another page).

Chester Rural Municipality No. 125, Sask.—Until October 10th for \$5,000 5½ per cent. 20-year road debentures, government guaranteed. J. B. Lupton, secretary-treasurer. (Official advertisement appears on another page).

London, Ont.—Five by-laws to give consent to five-year loans totalling \$175,000, will be submitted in the January voting, in an effort to bring new industries to London that promise to employ between 1,000 and 1,200 hands.

Edmonton, Alta.—A by-law to authorize the establishment of a gas plant for the manufacture, distribution and supply of gas, and to provide by the issue of debentures of the sum of \$770,880.00 was voted upon September 20.

Strathmore, Alta.—Until November 1st for 5,000 15-year 6 per cent., cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer. (Official advertisement appears on another page).

Grand Forks, B.C.—The ratepayers of Grand Forks endorsed the by-law granting the issue of \$5,000 worth of debentures for an addition to the public school. Twelve thousand dollars had been granted the school board by the provincial government.

Bowmanville, Ont.—By-laws to provide for the issue of debentures for the sum of \$39,000 for the construction of main sewers and of sewage disposal works, and to provide for the issue of debentures for the sum of \$111,000 for the construction of waterworks will be voted upon October 8th.

St. Thomas, Ont.—By-laws granting the St. Thomas Biscuit Company a loan of \$30,000 for ten years and a fixed

assessment of \$5,000 for a like term; the Grave Vault Company a free site, not to cost in excess of \$2,500, and the Erie Iron Works a loan of \$15,000 for ten years, and a fixed assessment of \$5,000, were carried.

Windsor, N.S.—Up to September 24th for \$12,000 debentures bearing interest at five per cent. per annum, payable half yearly, redeemable in twenty-five years from 1st September, 1912. For \$5,000 redeemable in thirty years, interest five per centum per annum, payable half yearly, and for \$10,000 redeemable in twenty-five years from 1st November, 1912, interest five per centum per annum payable half yearly. The latter sum to pay off debentures maturing 1st November, 1912. J. C. Geldert, town clerk and treasurer, Windsor.

PERSONAL NOTES

Mr. A. E. Osler has been elected a member of the Toronto Stock Exchange.

Mr. C. E. Brown, of Medicine Hat, has been appointed as industrial commissioner at Moose Jaw.

Mr. J. W. Tyson, of the Guelph Mercury, has been appointed assistant manager of Saskatoon industrial league.

Baron A. Ledebur and Carl von Dippe, of Germany, have been looking over Western Canada to see its investment possibilities.

President E. J. Chamberlin, of the Grand Trunk Railway, has been appointed a director of the Montreal Warehousing Company.

Mr. W. S. Dinnick, of the Dovercourt Land Company, and the Standard Loan Company, has resumed duties after a five weeks' sojourn in the old country.

Mr. E. P. Clement, K.C., of Berlin, Ont., president of the Mutual Life of Canada, and Mr. George Wegenast, of Waterloo, general manager of the company, have been in the West on a trip of inspection.

Mr. D. W. Campbell, general manager of the Canadian end of the Elder-Dempster line, has been on the Pacific coast enquiring into shipping conditions there. He was in company with Mr. J. G. Ross, of Montreal.

Mr. E. R. Wood has returned to Toronto after an absence of several weeks in England. He reports that business conditions abroad were fairly good while there is apparently plenty of money in England for legitimate foreign purposes.

Mr. J. B. Tyrrell, who is in the James Bay country on behalf of the Ontario Government, will return to Toronto at the end of October. Mrs. Tyrrell has received word recently from her husband that he has had good success so far.

Mr. H. V. Meredith, general manager of the Bank of Montreal, left Montreal on Tuesday in company with Mrs. Meredith, and they will sail from New York for Liverpool, en route for London. This is Mr. Meredith's first visit to England since his promotion to the general managership, and it is understood that he will be absent about five weeks.

Dr. P. W. Bonthuis de Vries, a banker of The Hague, Holland, and director of the Netherlands Mortgage Bank of Canada, stated at Edmonton that more than \$2,000,000 of Dutch capital will be invested in the provinces of Alberta and Saskatchewan the coming year. The company has already placed \$2,000,000 in the two provinces and, the banker added, the returns are highly satisfactory. The head offices are in Winnipeg, the business in Edmonton district being handled by the National Trust Company, the Royal Trust Company and the Standard Trust Company.

Mr. Richard Wilson-Smith, proprietor of The Chronicle, of Montreal, died last week at his summer home at Ste. Agathe. Mr. Wilson, who was formerly mayor of Montreal, also was or had been president or director of many important business corporations, including the Lachine Rapids Hydraulic and Land Company, the Montreal Water and Power Company, the Abbey Salt Company, the Canada Accident Company, the Guardian Assurance Company, the Montreal Trust and Deposit Company, the National Security Company of New York, and the American Surety Company.

Mr. D. Jellet Barker, of the Bank of Montreal, takes over his new appointment this week as assistant to the general manager, Mr. H. V. Meredith. He is practically the successor to Mr. A. R. Doble, who lately resigned to become president of the Royal Securities Corporation, Limited. Mr. Barker is a native of Picton, Ontario, and joined the service of the Bank of Montreal about twelve years ago. Apart from a brief period as an official of the Royal Trust Company, he has been connected with head-office ever since. He has been chief accountant for the past year and a half.

PROPOSALS OF WESTERN TOWNS

Regarding Disposal of Crops, Storage and Transportation Facilities—Workmen's Compensation—Subdivision Plans

(Special correspondence.)

Calgary, September 16th.

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, was in Calgary to-day, and in the course of an interview said: "It is gratifying to see the growth of Calgary. Wherever I have travelled crops are good and will be far in excess of present estimates. People will be agreeably disappointed when it is harvested and they learn of its magnitude."

Of the Panama Canal, Sir Thomas said: "I do not think the canal will affect the Canadian Pacific Railway, as we do not contemplate running our ships through it. There will doubtless be heavy grain traffic to the west coast and the question of elevators has not been overlooked. However, we will wait until there is sufficient demand for elevators before constructing them."

Associated Boards of Trade.

President Georgeson and Secretary Webster leave this week to attend the annual meeting of the Associated Boards of Trade to be held in Moose Jaw. Among the resolutions are the following:

By Fort William: That the Dominion Government be petitioned to promptly enact legislation permitting it to erect such terminal elevators at the head of the lakes as will care for the grain commerce of Western Canada, allowing safe and sure transmission to tide water during the season of navigation and permitting storage facilities during the winter months.

Lethbridge: In view of the coming change whereby the Western or Pacific route will be established for handling Western grain, the board of grain commissioners create sub-districts located to suit the altered conditions.

Moose Jaw: Provincial Governments be asked to enact legislation compelling all owners of sub-division property to submit all their plans to proper provincial authorities for approval and steps be taken to prevent the indiscriminate issue of false and misleading representations regarding such property. Also that the Western Provinces appoint freight rate experts to assist in securing adequate redress for shippers in the event of disputes. Western Provinces to be urged to further promote industrial and technical education.

Dominion Compensation Act.

Saskatoon petitions the Dominion Government for the early introduction of one Workmen's Compensation Act which shall apply adequately to the Dominion of Canada as a whole and shall cancel and be substituted for all Provincial acts.

An early investigation of means employed in the United States to ensure clean paper money and reasonable and equitable legislation to compel Canadian banks to adopt similar steps towards that end.

Amendment to the Dominion immigration policy extending it so as to include laborers, tradesmen, and other classes so indispensable to the general development of Western centres.

That the control of immigration in the Provinces of Saskatchewan and Alberta be placed under provincial authority.

Regina: As neither the Interstate Commerce Commission nor the Dominion Railway Commission have jurisdiction in each other's territory, the Dominion Government be urged to continue negotiations with the object of creating a joint commission vested with the necessary powers to regulate and control railway freights in international (United States and Canada) traffic.

Chattel Mortgage Act.

Red Deer: That the Dominion Government be urged to proceed at once to provide elevators, terminals, wharves, etc., on the Pacific Coast, operated for the benefit of the people by the Government.

Calgary: Provincial and Dominion Governments be urged to establish interior storage elevators at convenient points, short distances apart, so that grain may be taken from the field to such elevators, and thus increasing the service of existing equipment.

That the Governments of the Western Provinces be urged to place upon the statute books a simple chattel mortgage act on the lines of those now in force in the States of North Dakota, Minnesota, Iowa, and other States of the American Union.

The Carreras and Marcius of Canada, Limited, have decreased the number of their directors from five to four.

NEW BRUNSWICK CONDITIONS ARE GOOD

Crops Are Better Than Expected—Many Industrial Developments—Wholesale Trade is Busy

(Special correspondence.)

St. John, N.B., September 16th.

The latest reports are to the effect that New Brunswick crops will show a generally better yield than was anticipated some weeks ago, and that on the whole the farmers will come out very well. There is a large potato crop and apparently it is not much affected, especially on dry ground, by the prolonged wet weather. There is a fair crop of grain, and root crops generally are good. In Carleton County potatoes were selling at 80c. to \$1.00 per barrel.

Wholesale merchants in St. John report that their sales during July and August were ahead of those for the corresponding months last year. Labor continues to be well employed throughout the province, and the supply of skilled labor is scarcely equal to the demand.

The dredging at Courtenay Bay will be begun within ten days. The Norton Griffiths Dredging Company are bringing two dredges from Providence, Rhode Island, and two very large ones from England will be here within five weeks. The plant engaged on the breakwater and the site of the dry dock is being steadily enlarged and work will be continued throughout the winter. The minister of public works has replied to the city council that he is prepared to consider the enlargement of the plans for the dry dock so that it will be 1,150 feet long.

The Norton Griffiths Dredging Company, which has \$1,200,000 capital, has absorbed the Daly and Hanan Dredging Company, of the St. Lawrence, whose plant is now at Ogdensburg.

The company which had an option on a property at Greenhead, near the city, as a site for a cement plant, has purchased the property outright, paying \$38,700. There is no provision in the agreement as to when a cement plant will be established, but the company declare their intention of going ahead with the project in due time.

New Factories and Organizations.

The Canada Brush Company have secured from the city a site for their new factory and will erect a concrete and brick building 50 x 100 feet, to which others will be added. They expect to be in the new factory within three months, and meantime have set up their plant in temporary quarters in order to fill orders already taken.

The Canadian Sardine Company are about ready to turn out sardines from their new factory at Chamcook. They have brought out about 150 girls from Norway and some others from Newfoundland, and intend to employ about 600 when everything is in full blast. They have their own fleet of motor boats for the fishery, but will can many other articles besides fish.

Sir Thomas Tait is said to be interested in a company with half a million dollars capital to be organized for the extensive development of the fire clay deposits in Queen's County. These deposits are declared by government engineers to be equal to any found in Canada, and their development would mean the rise of a great new industry in the region where Sir Thomas Tait and others are already bringing about a great development of the coal mining industry.

A valuable property at the head of the St. John Harbor, now under lease to the Maritime Nail Works and another industry, has been sold.

Industrial Garden Suburb.

An industrial garden suburb is to be established at Coldbrooke, 3 miles from St. John, on the line of the Intercolonial Railway. An automobile factory is now being erected at this place and will be ready for work by the 1st of February. The Coldbrooke Realty and Development Company, composed of local and Montreal capitalists, has secured 600 acres of land and proposes to develop an industrial suburb along modern lines. Some 50 to 75 acres will be reserved for factory sites, another considerable area for market gardening, and 400 acres, extending along both sides of a beautiful valley, will be devoted to workingmen's homes, the whole being laid out with due regard to a proper town plan.—W.E.A.

The head office of the Joseph Roger Dusablon Company, Limited, has been changed from St. Casimir to St. Tite, Que.

Dr. P. W. Bonthuis de Vries, a banker of The Hague, Holland, and director of the Netherlands Mortgage Bank of Canada, says that more than \$2,000,000 of Holland capital will be invested in the province of Alberta and Saskatchewan during the coming year. The company has already placed \$2,000,000 of Dutch money in the two provinces.

NEW COMPANIES

Seventy More Corporations Have Obtained Dominion or Provincial Charters

Seventy new companies have been incorporated this week with aggregate capitalization of \$11,486,000. Quebec province is most strongly represented with 19 companies, with capital of \$5,000,000. Two of the largest corporations have head office at Montreal, the Alaska Securities, capitalized at \$1,500,000, and the Wallace Sandstone Quarries, with capital of \$1,000,000.

The following is a list of charters granted during the past two weeks in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Brock, Sask.**—Brock Elevator Company, \$9,000.
- Dilkie, Sask.**—Dilkie Trading Company, \$20,000.
- Prince Albert, Sask.**—Orpheum Theatre Company, \$50,000.
- Prince Rupert, B.C.**—Kaien Investment Company, \$10,000.
- Allan, Sask.**—A. to Z. Lumber and Supply Company, \$25,000.
- Fergus, Ont.**—Beatty Bros., \$750,000. G. Beatty, W. G. Beatty, M. J. Beatty.
- Galt, Ont.**—Mayfair Investments, \$400,000. M. A. Secord, M. E. Secord, J. Sloan.
- Port Stanley, Ont.**—Producers Fish Company, \$20,000. N. S. Cornell, H. F. Jelly, G. F. Stanton.
- Ayer's Cliff, Que.**—Eastern Trading Company, \$12,000. A. G. Clough, L. L. Clough, S. C. Worthen.
- Rivers, Man.**—Rivers Rink Company, \$2,000. J. E. Thompson, S. D. Thomas, T. M. Ferguson.
- Kamsack, Sask.**—Kamsack Realty and Investment Company, \$25,000. Kamsack Publishing Company, \$10,000.
- Adamsville, Que.**—Adams Creamery Association, \$100,000. W. G. Mitchell, R. Chenevert, F. Callaghan, Montreal.
- St. Eugene de l'Islet, Que.**—La Chicoutimi Brique Compagnie, \$49,000. J. W. Thibeault, A. Thibeault, J. Thibeault.
- St. Gedeon, Que.**—Gaudreau & Gagnon, \$15,000. P. Gaudreau, St. Bruno; H. Gagnon, St. Gedeon; J. E. L. Fortin, St. Bruno.
- Smith's Falls, Ont.**—Smith's Falls Real Estate & Improvement Company, \$50,000. J. T. Hackett, T. J. Coonan, K. Archibald, Montreal.
- Ottawa, Ont.**—Kuhn Merrill, \$40,000. H. J. Merrill, W. Y. Denison; E. F. Holcomb, MacKenzie, \$200,000. C. McCrea, G. J. Valin, L. M. Nicholls.
- Regina, Sask.**—Cottage Building Company, \$50,000. Canadian Hungarian Land Company, \$20,000. Office Devices, \$5,000. General Builders, \$100,000.
- Moose Jaw, Sask.**—Allan Cumming Company, \$150,000. Saskatchewan Terminal Elevators, \$100,000. Progress Laundry Company, \$100,000. Moose Jaw Flour Mills, \$500,000. Crichtons', \$50,000.
- Vancouver, B.C.**—Washington Court, \$200,000. Vancouver Typewriters, \$10,000. British Pacific Power Company, \$500,000. Rogers Printing Company, \$15,000. Britannia Land Company, \$10,000.
- Saskatoon, Sask.**—Canadian Grain Company, \$100,000. D. J. McCallum, T. K. McCallum, A. E. Stewart. Lee Hotel Company, \$300,000. Commercial Investment Company, \$10,000. H. L. Martin Lumber Company, \$50,000. Saskatoon Concert Hall Company, \$100,000. Avondale Company, \$10,000. Western Co-operative Agencies, \$25,000. Saskatoon Industrial Development and Power Company.
- Toronto.**—Parker's Dye Works, \$100,000. G. Price, F. R. Harvey, J. C. Macklin. Fuel-Saving Company, \$250,000. A. T. Wilson, J. E. Porter, J. B. Burdick. Grantham Realty Company, \$40,000. C. R. Allison, P. W. Oake, H. Catley. National Sporting Goods Company, \$40,000. W. A. Brown, R. P. Gordon, S. W. Burns. Canadian Countryman Publishing Company, \$100,000. J. S. Lovell, R. Gowan, J. Ellis. Northern Brick Company, \$500,000. T. A. Hiam, N. P. Dalziel, G. Ruel.
- Winnipeg, Man.**—Consumers' Ice Company, \$500,000. F. M. Burbidge, J. H. Radford, L. D. Morosnick. Automobile Owners' Association of Winnipeg, \$100,000. W. L. Carr, C. J. F. Collier, Miss E. M. Carruthers, Toronto. C. L. Peterson & Company, \$20,000. C. L. Peterson, Minneapolis; L. E. Hamblet, H. F. Hanley, Winnipeg. Northwest Quarries, \$500,000. G. H. Ainkins, E. H. Coleman, B. M. Gunn. Headingly Lands, \$30,000. J. H. Cotter, M. H. Hark, E.

A. Conde. Federal Grain Company, \$40,000. W. Herriot, J. Stewart, G. H. Yule. United Meat and Provision Company, \$20,000. E. H. Verral, R. L. Besson, J. A. Hodson. Sano Manufacturing Company of Canada, \$200,000. C. Baner, C. Beyer, M. G. Macneil. Souris Investment Company, \$10,000. A. McKenzie, C. W. Chappell, A. H. Laidlaw.

Montreal.—Alaska Securities, \$1,500,000. H. H. Drummond, W. R. Hastings, J. L. Reay. Birmingham-Montreal Realty Company, \$50,000. A. Chase-Casgrain, G. Sutherland Stairs, P. F. Casgrain. Wallace Sandstone Quarries, \$1,000,000. C. G. Greenshields, E. R. Parkins, A. C. Calder. Montreal Automobile Carriage Company, \$185,000. J. A. Michaud, Y. Lamontague, E. Bouchard. Kingsey Land Company, \$150,000. J. W. Blair, F. J. Laverty, J. Dunlop. Fearless Tire Company, \$185,000. J. A. Michaud, V. Lamontagne, Melrose Gardens, \$90,000. R. McMaster, Westmount; T. M. Papineau, A. Angers, Montreal. Charles Elevator Company, \$50,000. A. H. Charles, E. J. Lusignan, E. G. Robertson. Mount Pleasant Heights Company, \$100,000. A. Chase-Casgrain, G. S. Stairs, P. F. Casgrain. Vinot Car Company of Canada, \$185,000. J. A. Michaud, V. Lamontagne, E. Bouchard. Rose Hill Park Realities, \$500,000. M. Rosenberger, A. S. Goodstone, J. Presner. Mount Royal Annex Realities, \$250,000. J. A. Mann, C. G. Mackinnon, T. B. Gould. Fireproof Crushed Stone Company, \$50,000. J. A. A. Belanger, J. B. Gratton, O. Marchard. Mount Royal Garage Company, \$500,000. J. A. Brook, G. A. Ross, Hon. F. L. Beique. Parc Saint-Jacques, \$49,000. A. Tourangeau, A. Courchenes, O. Chabot.

CANADIAN PACIFIC RAILWAY IN WASHINGTON

A New York banking house is informed by its Spokane representative that, in order to obtain a water grade from Kingsgate to Grand Forks and also to avoid three mountains, Canadian Pacific will build additional mileage through the northwest part of Washington, and will utilize the lines of the Spokane International, Idaho and Washington Northern and Spokane Falls and Northern. In this way Canadian Pacific will obtain a new freight line which will occupy an important position geographically in that general section of the Northwest.

Canadian Pacific, according to the same information, has secured from the Hill interests the right to use that part of the Spokane Falls and Northern known as the Red Mountain Line, running between Northport and Rossland, and the further extension of the Hill line to Nelson known as the Nelson and Fort Shepard.

At the present time Canadian Pacific has under way the location and surveying of a new freight line from the terminus at Meteline Falls to Waneta at the junction of the Columbia and Pend d'Oreille Rivers. Canadian Pacific, according to plans recently adopted, will operate its freight to Kingsgate over its own line and over the Spokane International to Clagstone Junction, over the Idaho and Washington Northern to Meteline Falls, over the new Canadian Pacific line to Waneta, and thence by way of Spokane Falls and Northern to Marcus, Grand Forks, the Fraser River and the coast. Canadian Pacific and Great Northern recently entered into an agreement to build jointly the line over the Hope Mountains to the Fraser River.

According to Engineer Dibblee, in charge of the location work, a very easy grade between Meteline Falls and the boundary has been secured, and work will be rushed on this section as well as on the projected line from the boundary to Trail, a distance of thirty miles. Between Meteline Falls and the boundary line eleven tunnels will be built. The total length of the line from Meteline Falls to Trail will be forty miles and construction will cost approximately \$3,000,000.

"The very existence of this Empire, as such, depends upon the security of the routes across the sea. I venture to think that not only Canadians, but all the people of the Empire, will not be oppressed but stimulated in bearing their share of the responsibility of maintaining the greatness and integrity of the Empire."—Premier Borden at Ottawa.

The Swift Canadian Company will erect a five-story brick warehouse at Edmonton. This is for the purpose of facilitating the distribution of the products of their packing plant at the outskirts of the city. This has been rendered necessary by the development that has taken place in the business of the plant; and is fairly typical of the development of Edmonton's industrial and commercial activities. This plant started operations in 1908, and the extension to their facilities now being commenced is one of many additions to the original plant. The great resources of Central Alberta as a mixed farming country naturally lends itself to the development of such an industry.

MONTREAL'S FINANCIAL MOVEMENT

Improvement in Situation—Conservative Management of La Banque Internationale is Shown—Laurentide Company's Intentions

Monetary Times Office,
Montreal, September 19th,

There is manifestly a much more comfortable feeling in Montreal financial circles this week than there was a week ago. For some considerable time past the uncertainty of the situation as respects Quebec Railway and associated concerns has been hanging over the market and occasioning the withholding of confidence which the situation otherwise would have received. Since the annual meetings of several of the concerns which have been so much talked of lately have taken place no particularly dangerous aspects were revealed over and above those already talked of on the street (and probably considerably exaggerated) a recovery has set in and the feeling of confidence and optimism once more holds sway. No doubt the boom which has taken place in Richelieu has had considerable to do with this. Richelieu, as may be recalled, receded to 103 in the selling which took place, a couple of weeks ago. It has recovered to around 120, the recovery being undoubtedly due to foreign purchasing. There is little reason to doubt that the Furness-Withy interests have been buying and that they are desirous of obtaining control. The stock market position in Richelieu and Ontario has been rehabilitated, therefore, from abroad more than from within. The advance in the stock has been none the less acceptable in Montreal and has withdrawn attention from less encouraging aspects and reflected much encouragement upon the situation.

Not Connected With Management of Bank.

In view of the very considerable amount of uninvited publicity which La Banque Internationale du Canada has had thrust upon it since obtaining its charter a year ago as a result of circumstances in no way connected with the management of the bank or its business, a further analysis of the actual position of the bank may be of value. As will be seen from the table which follows, in which comparisons are made between the figures in January, June and July of the present year, the bank has been making good progress. Deposits on demand have increased in a satisfactory manner and savings deposits have shown an even greater increase. While the liabilities have increased considerably, the increase in the assets has been very much greater and the bank has been maintained in an unusually good position as respects quick assets. In July, no less than \$70 to \$71 was held in cash and readily available assets against every dollar owed to the public. In this, the call loans in Canada were not included. The bank met all the extraordinary expenses accompanying the first year's business out of the profits of the first year, instead of averaging them over a period as it would have been entitled to do.

The following statement shows the extent of deposits and circulation, and capital, and it will be borne in mind that capital and rest represent the margin of security which the shareholders furnish to secure liabilities to the public.

The liabilities in July, it will be observed, are twice the amount of capital:—

1912.	January.	June.	July.
Paid-up capital	\$1,116,000	\$1,344,000	\$1,356,000
Deposits on demand ...	697,000	518,000	737,000
Deposits after notes	342,000	640,000	754,000
Others		215,000	204,000
	\$1,039,000	\$1,373,000	\$1,695,000
Total deposits in circulation	\$1,301,000	\$2,260,000	\$2,703,000
Due from agents and United Kingdom ..	309,000	54,000	19,000
Total liabilities	\$1,610,000	\$2,314,000	\$2,722,000
Rate of liabilities to capital	144	172	200

Total Amount of Risks.

In the following table will be seen the total amount of risks, exclusive of "quick assets," and the rate of risks to capital as well as the rate of capital to risks. It will be seen that in July the proportion of risks to capital is as 158 to 100, while the rate of capital to risks is as 63.01 to 100.

1912.	January.	June.	July.
Risks, less quick assets.	\$1,511,000	\$2,033,000	\$2,152,000
Rate of risks to capital.	153	151	158
Rate of capital to risks...	73.85	66.10	63.01

The latter comparison is important as showing the proportion of bank funds provided against risks, the average amount contributed by the bank against risks being, as stated, 63.01 for every \$100.

In the following table is set forth the growth of the quick assets exclusive of call loans, together with the ratio of these to the liabilities to the public, this being in July \$70.72 against every \$100 of liability. It will also be seen how this ratio is established. In the month of July, for instance, the amount of specie and legals was \$11.90 to every \$100 of liabilities, while the call loans in New York amounted to \$58.81 on every \$100 of liabilities, making the \$70.72 referred to.

Strong Position as to Quick Assets.

This is important as showing the readiness of the bank to meet any urgent calls from the public. It will also be observed that the bank premises and furniture are worth \$83,000, and that the total assets in the month of July were \$4,078,000 as against \$2,722,000 liabilities:—

	1912.	January.	June.	July.
Quick assets	\$1,224,000	\$1,625,000	\$1,925,000	\$1,925,000
Rate to liabilities	76.02	70.22	70.22	70.72
Rate liabilities to specie and legals	18.38	12.23	11.91	11.91
Call loans New York ..	57.64	57.99	57.99	58.81
Bank premises and furniture		\$83,000	\$83,000	\$83,000
Total assets	\$2,735,000	\$2,658,000	\$2,658,000	\$4,078,000

The above suggests that the general manager has been maintaining the bank in a strong position as to quick assets, the effect of which has unquestionably been to inspire confidence in the conservative attitude of the management and in the standing of the bank in financial circles and among the public generally.

Laurentide Company May Issue Bonds.

The Laurentide Company may make an issue of \$2,000,000 of new stock. Such an issue will be possible without increasing the capital of the company. The total subscribed capital is \$10,000,000 and of this only \$7,200,000 has been issued.

The object of issuing the new stock would probably be to furnish the money to carry on the work of development on the Grand Mere water power which is owned by the company. There is a possibility that the falls will give 50,000 horsepower, and it is assumed that the company intends to develop the entire quantity as quickly as possible.

For some time past the stock has had an upward trend and at the present time is selling near 220, thus suggesting that something in the nature of a further advantage to shareholders may shortly be announced. It is assumed that this advantage will be in the purchase of the new stock referred to at a discount under the market price.

The company during the past year has made an excellent showing, the total earnings as related in these columns some time ago, amounting to \$1,009,551, which, after bond interest and other charges of \$152,099 were deducted, left a balance of \$857,452.

Surplus Earnings Over and Above Dividends, Etc.

The company then allowed \$103,880 for betterments to plant, leaving a balance of \$753,572 for dividends. This amounted to \$520,000. In addition \$20,000 was provided for depreciation reserve, bringing the total surplus earnings, over and above all dividends and charges for the year to \$103,572, which was but slightly less than 3 per cent. on the common stock. This was after paying dividends for the last three quarters of the year at the rate of 8 per cent. per annum, and during the first quarter of the year at the rate of 6 per cent. per annum. With the additional earnings which should arise from the sale of the power to be developed, the company should continue to pay large dividends even after the reported new stock issue has been made.

It will doubtless be remembered that during the past year the present company was formed in order to take over the Laurentide Paper Company, and that in the exchange of shares two shares of the present company were given for each share of the old. That the company is again able to continue the former payment of 8 per cent. per annum upon the increase in the capital stock has attracted attention to the pulp industry of Canada, and has reflected credit upon the management of this particular concern.

The live stock and ranching industry of Western Canada is to be enquired into by a commission about to be appointed by the Hon. Robert Rogers. It will be composed of E. E. Taylor, chief ranch inspector, Calgary; George H. Pope, Winnipeg; and Clarence F. Graham, Winnipeg. The question as to what lands can be set aside for grazing, conditions of leases, etc., will be investigated.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Winnipeg, Man.—Winnipeg Excelsior Mill. Loss \$4,000. Origin unknown.

Montreal, Que.—September 13.—Steamer "Wakanui." Loss and origin unknown.

Edmonton, Alta.—September 7.—Mr. Grant's stable. Loss and origin unknown.

Yarmouth, N.S.—September 15.—Sander's machine shop. Loss and origin unknown.

Dunnville, Ont.—September 17.—Fowler factory building. Loss and origin unknown.

Port Hope, Ont.—September 8.—Mr. Nelson's barn. Loss unknown. Origin lightning.

Kingsiton, Ont.—September 13.—Mr. W. W. Gibson's drug store. Loss and origin unknown.

St. Thomas, Ont.—Mr. E. O. Pound's garage. Loss \$2,500. Origin, spontaneous combustion.

St. Catharines, Ont.—Lincoln Bedding Company, 9 St. Paul Street. Loss \$1,000. Origin unknown.

Medicine Hat, Alta.—September 13.—Dominion Garage Company's building. Loss and origin unknown.

Moose Jaw, Sask.—September 12.—Canadian Pacific Railway ice house. Loss \$5,000. Origin unknown.

St. John, N.B.—September 16.—Mr. G. Kimball and Mrs. M. French's residences, Metcalf Street. Loss and origin unknown.

Windsor, Ont.—September 16.—Nelson Hardware Company's premises. Loss \$10,000. Origin, crossed electric wires.

Quebec, Ont.—September 16.—177 Neeve Street. Loss \$275. Insured with the Waterloo Mutual. Origin, lamp exploded.

Edmonton, Alta.—September 11.—Wooden structure rear of 627 First Street. Loss unknown. Origin, supposed incendiary.

Winnipeg, Man.—September 12.—Mr. A. Jardin's residence, 112 Lusted Street. Loss slight. Origin, candles set curtains alight.

Portage La Prairie, Man.—September 10.—Messrs. McCutcheon's barn. Loss \$1,000. Insurance \$600, Farmers' Mutual. Origin lightning.

Drury Cove, N.B.—September 11.—Drury Cove Land Company's three houses. Loss \$1,500. Mr. Alwood's furniture, \$500. No insurance. Origin unknown.

Humberstone, Ont.—September 13. Mr. Otto Temple's barn. Loss \$900. Insurance \$450 with North British and Mercantile Companies. Origin lightning.

Lethbridge, Alta.—August 27.—Cooldale Hotel. Loss \$80. Origin, hot ashes.

September 5.—Sherlock Block. Loss slight. Origin, defective flue.

Ottawa, Ont.—September 14.—Mr. C. Corbeil's residence, Kent and Albion Streets. M. J. Laverdure, \$600; Mrs. Neville, \$500; O. Groulx, \$500; Corbeil, Earley and Carmier, \$50 each. Origin unknown.

Leamington, Ont.—September 13.—Ladlam-Ainslie sash and door factory. Loss \$20,000. Insurance will reach about \$10,000. The companies involved are The Home Insurance, London, Liverpool and Globe, North British and Mercantile, and the Royal. Origin unknown.

Toronto, Ont.—September 2.—Art Pottery Company, Dentonia Avenue. Loss \$25. No insurance. Origin unknown.

September 2.—143 Hope Street. Loss \$246. Insured with York Insurance Company and Equity Insurance Company. Origin unknown.

September 3.—Salvation Army Rescue Home. Loss \$800. No insurance. Origin unknown. City Garage, St. Lawrence Market. Loss \$25. No insurance. Origin, looking for leak in gasoline tank. Canadian Northern baggage car. Loss \$500. Origin unknown. 149 Brandon Street. Loss \$15. Origin, lamp exploded.

September 5.—185 King Street East. Loss \$200. Insured with Royal and Nova Scotia companies. Origin, pan of wax ignited. 28 Fairbank Avenue. Loss \$100. Insured with Royal Company. Origin, struck by lightning.

September 7.—2556 St. Clair Avenue. Loss \$425. Insured with Norwich Union. Origin unknown.

September 10.—143 John Street. Loss: stock, \$125; building, \$30. No insurance. Origin, supposed incendiary. Adams Furniture Company. Loss \$200. Origin unknown. No insurance.

September 11.—16 Birch Avenue. Loss \$60. No insurance. Origin unknown.

September 10.—Gendron Manufacturing Company, rear 137 Duchess Street. Loss \$700. Origin, shavings set alight.

September 14.—35 Lindsay Avenue. Loss \$550. Insured with Quebec Insurance Company. Origin, children playing with matches.

September 16.—56 Laws Avenue. Loss \$30. Insured with Quebec Insurance Company. Origin, gas set fire to floor. 80 Ryding Avenue. Loss \$550. Insured with Royal Insurance Company. Origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Paris, Ont.—August 31.—Mr. J. J. Hahiff's barn and shed. Loss \$3,300. Insurance: Economical, \$800. Origin unknown.

Rosess Corners, Ont.—September 6.—Mrs. N. Vermil-yea's barns. Loss \$10,000. Insured with London Mutual. Origin lightning.

Sparta, Ont.—September 1.—Mr. G. Emmett's three barns and contents. Loss \$5,000. Insured with London Mutual. Origin lightning.

Victoria, B.C.—August 20.—Mr. C. J. Runciman's residence. Loss \$105. Insured with Alliance Insurance Company. Origin, spontaneous combustion.

Brantford, Ont.—August 30.—Brantford Cordage Company buildings. Loss \$1,317. Insured with 19 companies. Origin, a picking machine struck fire.

St. Paul l'Hermite, Que.—August 22.—Mr. L. H. Ver-ronneau's bungalow. Loss \$3,200. Insurance: Royal, \$2,200. Origin, supposed from men smoking.

Brimer, Ont.—August 31.—Pfeffer Milling Company's elevator. Loss: stock, \$1,200; building, \$5,000. Insured with Waterloo Mutual and London Mutual. Origin lightning.

Port Stanley, Ont.—August 30.—Messrs. Williams' and Sampson's tug "Gordon Brown." Loss \$700. Insured with Montreal and Rimouski companies. Origin unknown.

Elmira, Ont.—Elmira Milling Company's flour mill. Loss: stock, \$3,000; buildings, \$15,000. Insured with London, Waterloo and Perth Mutual Companies. Origin unknown.

Maddox, Ont.—September 17.—Miss Sutton's barn. Loss: stock, \$260; building, \$1,000. Insurance: stock, \$200; building, \$600. Merchants Fire Insurance Company. Origin unknown.

Walkerton, Ont.—September 1.—Mr. T. W. Lamb's barn, basement, stables and pig house. Loss: stock, \$750; contents, \$1,250. Insurance: stock, \$450; buildings, \$650 with Farmers' Central Mutual. Origin lightning.

Maddox, Ont.—September 11.—Mr. J. Stewart's barn. Loss: barn, \$1,500, 70 tons hay and 45 loads grain destroyed with implements and some poultry. Insurance \$900 with London Mutual. Origin, lightning.

Toronto, Ont.—September 7.—Ideal Bedding Company, 10 Jefferson Avenue. Loss \$5,000. Insured with Queen and other companies. Total \$25,000. Origin unknown.

September 9.—Crown Cork Company. Loss \$400. Insured with Norwich Union. Origin, resin pot.

DEBENTURES AWARDED

Keeler, Sask.—\$2,500 to Messrs. Nay and James, Regina.

Lacombe, Alta.—\$12,000 5 per cent., to Merchants Bank.

Amazon, Sask.—\$2,500 to Messrs. Nay and James, Regina.

Churchbridge Village, Sask.—\$2,500 to Messrs. Nay and James, Regina.

Blenfai Village, Sask.—\$3,500 to Messrs. Nay and James, Regina.

Alberta S.D.—\$18,300 to Messrs. G. A. Stimson and Company, Toronto.

Saskatchewan S.D.—\$2,500 to Messrs. G. A. Stimson and Company, Toronto.

Amherst, N.S.—\$88,300 4 3/4 30-years, to Messrs. F. B. McCurdy and Company, Halifax.

Enderby, B.C.—\$6,000 6 per cent. 20-year, to Messrs. C. H. Burgess and Company, Toronto.

Coldstream S.D., Man.—\$1,500 6% 10-years, to Messrs. Osler, Hammond and Nanton, Winnipeg.

Taber, Alta.—\$28,000 5 per cent. 10 and 20 instalments, to Dominion Securities Corporation, Toronto.

Nokomis, Sask.—\$15,735 6 per cent. 20-years, to Messrs. C. H. Burgess and Company, Toronto.

HARVEST LATER BUT FROSTLESS

Government Crop Report to End of August—Big Yield of Flax Anticipated

A bulletin issued by the Census and Statistics Office of the Department of Trade and Commerce at Ottawa reports the condition of crops and live stock at the end of August and gives preliminary estimates of the yield of spring wheat, rye, oats, barley and flaxseed as compiled from the reports of correspondents upon the appearance of these crops.

The cold, wet weather which prevailed throughout Canada during August delayed ripening and the harvest is everywhere later than usual; but no serious frosts have as yet been reported. All crops show an improvement since the end of July, excepting peas, beans and corn. The average condition of spring wheat is 84.57 per cent. of the standard or full crop, which is represented by 100; rye is 84.14, barley 87.29, oats 88.15, mixed grains 86.57, and flax 87.84. These figures are higher than those of a month ago by about 1 per cent. for wheat, rye and flax, 4 or 5 per cent. for barley, mixed grains and buckwheat, and 7 per cent. for oats. On the whole they compare not unfavorably with the figures at the corresponding date of last year, oats, barley, rye, buckwheat and mixed grains being in fact higher, while spring wheat is about two points lower. Peas are 74 against 76 last month, and 72 last year; beans are 76.71 against 79.27 last month, and 80.92 last year. Corn for husking is 69.66 and for fodder 76, compared with 70.37 and 73.19 last month and with 81.46 and 86.55 for last year. Root crops and pasture show an excellent condition, the figures, ranging from 86.64 for sugar beets to 92.10 for potatoes, and 91.79 for pasture.

Some Unproductive Areas.

From the reports furnished by correspondents it is calculated that of the areas sown in Canada 3 per cent. spring wheat, 2.3 per cent. oats, 2.1 per cent. barley, and 3.8 per cent. flax will from various causes, such as hail, flood, pests, etc., be entirely unproductive, and the following preliminary estimates of yield are therefore based upon the areas to be harvested. Of spring wheat, the average yield per acre for Canada is provisionally placed at 21.08 bushels, which upon a harvested area of 8,977,400 acres makes the total yield of spring wheat to be 189,256,000 bushels. This quantity added to the estimate of 16,773,300 bushels of fall wheat as published last month gives the wheat total as 206,029,300 bushels compared with the final estimate for 1911 of 215,851,000 bushels. The yield per acre in 1911 was 22.19 bushels for fall and 20.63 bushels for spring wheat.

Rye, Barley and Oats.

The rye estimate is 3,136,000 bushels for 148,700 acres, a yield per acre of 21.09 bushels compared with 2,694,400 bushels from 142,571 acres last year, a yield per acre of 18.89 bushels.

Barley, with a yield per acre of 32.86 bushels, gives a total yield of 46,497,000 bushels from the harvested acreage of 1,415,200, the relative yield last year being 28.94 bushels per acre.

Oats yields 40.90 bushels per acre, as compared with 37.76 bushels last year, giving a total yield of 376,943,000 bushels upon a harvested area of 9,216,900 acres, the final figures of 1911 being 348,187,600 bushels from 9,219,920 acres.

Flaxseed and Live Stock.

Flaxseed upon a greatly increased acreage of 1,677,800 acres (allowing for deduction of non-productive areas) is expected to yield 23,145,000 bushels, or at the rate of 13.74 bushels per acre, figures which compare with a total of 7,867,000 bushels from a productive area of only 682,622 acres last year when, it will be recalled, so large a proportion of the area sown in the Northwest Provinces was not harvested in consequence of the late and stormy season. For the three Northwest Provinces the total yield of spring and fall wheat is estimated at 189,984,000 bushels as compared with 194,083,000 bushels in 1911; of oats the estimated yield is 230,387,000 bushels compared with 212,819,000 bushels, and of barley 29,189,000 bushels compared with 24,043,000 bushels.

The general condition of live stock is very satisfactory, being expressed in percentages of a standard of 100 representing a healthy and thrifty state, as 94.66 per cent. horses, 94.90 per cent. milch cows, 96 per cent. other cattle, 93.72 per cent. sheep, and 94.81 per cent. swine.

Application will be made at the next session of the Dominion Parliament for an act to incorporate the Inter-Ocean Trust Company, with power to carry on the business of a trust company in all its branches. Messrs. MacKenzie, Brown and Company, Regina, are the solicitors for the applicants.

WHEN A MANUFACTURER CAN BORROW

Elements of Credit—Qualifications Necessary to Obtain a Full Line of Credit

The elements of credit are: Character, meaning the man; his reliability; the moral risk; capacity, meaning the method; the business risk; capital, meaning the resources; the means, the property risk.

When these elements exist in whole or in part in sufficient quantity there exists a basis for credit at a bank.

A lecture delivered before the Manufacturers' Committee of the Oakland (Cal.) Chamber of Commerce by Mr. Frank C. Mortimer, cashier of the First National Bank, of Berkeley, outlined when and under what conditions a manufacturer may apply successfully for assistance to his bank. Here are Mr. Mortimer's rules.

Under normal conditions a full line of credit may be granted a manufacturer:

1. When a full, complete and honest statement of his affairs is made to his banker, and when he co-operates in its verification
2. Who maintains his account at one bank and does not divide it among several.

Permanent Demand for Manufactures.

3. When the business occupies a legitimate field.
4. Where a permanent demand exists for the article manufactured.
5. When healthful competition exists which yields legitimate profits.
6. When patents and patterns have a real value.
7. When the business is well located where production is economical.
8. When the applicant for credit is an experienced man and has been engaged in business over an appreciable length of time.
9. When the accounting system clearly discloses the exact condition of affairs at all times.

Relation of Management and Employees.

10. When the one seeking credit is well spoken of by others in the same or kindred lines.
11. When the relation between management and employees is satisfactory.
12. When inquiries regarding the uses of the borrowed money are frankly answered.
13. When an adequate balance of from 10 to 20 per cent. of credit line is maintained at bank.
14. When no attempt is made to overdraw the account.
15. When stocks and goods are made up of live and moving inventories.
16. When the credit asked for is not in excess of the bona fide capital paid in by the owners of the business.
17. When depreciation of machinery and buildings is regularly charged off.

Fifty Per Cent. of Quick Assets.

18. When there is a good lot of quick assets, and when the amount requested is not in excess of 50 per cent. of the market value of these quick assets. Quick assets consist of cash, bills and notes receivable, accounts receivable and merchandise.

19. When the management of the company is competent and aggressive and of high moral standing and business integrity.

20. When past obligations have been promptly met, and where indebtedness is fully paid once each year.

STRIKE SITUATION MORE FAVORABLE

The Department of Labor's record shows the influence of labor disputes upon industrial conditions during August to have been not so serious as during July, fewer disputes being recorded as in existence. An improvement, too, over July conditions is seen in the fact that of the seventeen disputes which commenced during August a definite termination occurred in the case of eleven. Transportation in different sections was considerably interfered with by strikes; these were, however, of short duration in most cases and conditions were generally normal towards the end of the month. About 9,500 employees were involved in trade disputes during August.

The number of directors of the Miner Rubber Company has been increased to five.

CANADIAN LOCOMOTIVE COMPANY'S REPORT

Satisfactory Statement Presented—President Jarvis
Further Explains Last Year's Financing

The first annual report of the Canadian Locomotive Company, Limited, for the year ended June 30th, 1912, was presented to the shareholders on Wednesday. The net earnings from operations and interest received from investments for the year amounted to \$326,380.43, which has been disposed of as follows: Bond interest, \$90,000; preferred stock dividend, \$105,000; organization expenses written off, \$10,232.13; transferred to depreciation reserve, \$25,000, and balance at credit of profit and loss, \$96,148.30.

Are Building New Plant.

Following the policy of enlargement outlined last summer the directors have entered upon the construction of new works and have purchased the machinery to increase the output of the company from five locomotives per month by the old company to eighteen locomotives per month, the funds for which are being met by the sale of investment bonds.

Although the capacity of the plant will next spring be three times what it was when taken over from the old company in July, 1911, the company has already contracted for its entire output practically to the close of 1913.

Last December, a discussion arose as to a portion of the company's profits as shown in the balance sheet not being derived from the ordinary business operations of the company. Mr. Emilius Jarvis further explained this matter to the shareholders this week, stating that when negotiations were going on for the purchase of the stock and bonds of the company and before the public offering of the stock was made in July, and of the bonds in September, 1911, Messrs. Price, Waterhouse & Company were employed to make an audit of the affairs of the old company for the four years preceding December 31st, 1910.

As to a Particular Contract.

In June, 1911, they gave the certificate which appeared in the public offering in July, and at the same time conveyed the information to the issuing financial firm that among the contracts in hand there was one upon which a profit of \$105,000 was expected. In September, 1911, and after the preferred stock had been sold to the public the auditors reported that it had developed that the contract referred to would be unprofitable, and that the plant would be engaged in working out this unprofitable contract well on into November. As the company had taken over the works from the old company on July 1st, 1911, the operations of the company for the months of July, August, September and October, and part of November, were unprofitable, for the reason mentioned. In other words, one-third of the working year had been lost.

Would Have Earned Amount.

The discovery of this situation naturally caused a good deal of irritation, and those financial firms associated with the public offering of the preferred stock and bonds felt keenly their position, as it was quite impossible for the company, in the remaining part of the working year, to make the profits they had been led to expect, so they voluntarily put into the company \$105,000 cash, the amount of profits they had been led to expect would result from this particular contract, therefore, the figures of \$326,380.43, shown in the statement as the result of this year's operations include this amount of \$105,000. It must also be borne in mind that had the company had its entire year free to work on its own contracts the amount that would have been earned during the period above mentioned would have considerably exceeded this \$105,000.

INDUSTRIAL ACCIDENTS

According to the record of industrial accidents maintained in the Department of Labor that for the month of August showed that 88 workmen were killed and 305 injured, compared with 108 fatal and 272 non-fatal accidents during the month of July; or a decrease of 20 in the number of fatal and an increase of 33 non-fatal accidents compared with the record of July. The largest number of fatalities occurred in the building trades and in the steam railway service, there being 11 workmen killed in the former and 25 in the latter. In the metal trades and steam railway service, the largest number of non-fatal accidents occurred, the record being 65 in the case of the former and 53 in the latter.

The annual general meeting of the shareholders of the Canada Provident Investment Corporation will be held in Toronto on October 10th. At the same time a special general meeting will be held to increase the capital to 1,000,000 shares of £1 each.

SEVERAL LARGE BOND ISSUES

Well-known Packing House Makes Flotation—Calgary
Brewing Company's Bonds—New Listings

The most important bond issue this week is that of \$1,250,000 6 per cents. at 100 and interest of Gordon, Ironsides & Fares Company, packers, ranchers and provisioners, Winnipeg. The offering is made by the Dominion Securities Corporation. The authorized total issue (closed mortgage) is \$2,000,000, of which amount \$750,000 is retained in the treasury and can only be issued for 70 per cent. of the cost of new properties, permanent betterments, etc., as set forth in the trust deed.

Messrs. Gordon, Ironside & Fares Company, Limited, conducts a wholesale packing and produce business throughout New Ontario and the Middle West as far as Central Alberta, with packing-houses located at Winnipeg and Moose Jaw; storage and distributing plants at Kenora, Fort William, Port Arthur, Rainy River, Sault Ste. Maria, Sudbury, Regina and Saskatoon.

The company had its inception in 1885 as a partnership. In 1902 it was converted into a joint stock company, and has now an issued capital of \$2,172,600, with a surplus of \$655,000, derived principally from net earnings. The general management is in the hands of Mr. J. T. Gordon, president, who also particularly supervises the packing department. The vice-president, Mr. W. H. Fares, is in charge of the ranching division.

Notes as to the company's assets and earnings appear in its prospectus, printed elsewhere in this issue.

Calgary Malting and Brewing Company.

An issue of \$1,200,000 5 per cent. first mortgage sinking fund thirty-year gold bonds, due in 1942, of the Calgary Malting and Brewing Company, is being made by the Royal Securities Corporation. The bonds are secured by a fixed mortgage upon all the assets of the company. The assets, exclusive of good-will, are valued at over \$2,700,000. The fixed assets, as valued in November and December of 1911 by the American Appraisal Company, of Seattle, are worth over \$1,600,000. These are the only bonds outstanding, and are part of total authorization of \$1,700,000. The issue is being placed in Canada and Great Britain.

The earnings of the company for the year ending March 31st, 1912, after providing for depreciation of buildings and plant, but before charging bank interest on money forwarded, were \$270,251.

The Atlas Glass Works, a new glass manufacturing company, has been formed and is issuing \$350,000 of 6 per cent. 20-year first mortgage sinking fund gold bonds at par. The issue carries with it a bonus of 50 per cent. of common stock.

To Build New Plant.

The location of the new plant will be in the town of St. Pierre, close to the Lachine Canal. The company will issue \$750,000 in common stock and \$350,000 in bonds at present.

The directors are: Messrs. George L. Kavanagh, O. L. Brunelle, J. Whitesell, Laurent G. Morin, David Pugh.

A block of \$500,000 additional bonds of the Canadian Car and Foundry Company were listed on the Montreal Stock Exchange last week. The total amount listed is now \$4,000,000.

The Canadian Car and Foundry Company has issued \$500,000 additional 6 per cent. first mortgage bonds, and these have been purchased by the Royal Securities Corporation and Lee Higginson, Boston.

Mr. C. J. Hallett, late Montreal manager of the New York firm of Gilbert Elliott & Company, and Mr. A. L. Walker, until recently connected with the Bank of Commerce in Montreal have opened a bond business at 178 St. James Street, under the name of C. Hallett & Company, for the transaction of a general bond and brokerage business.

At a meeting of the directors of Canadian Sardine Company, Limited, the report of the plant-building operations at Chamcook, N.B., was presented to the board. Managing director F. P. McColl stated that the new plant would probably be ready by October 15th, as operations had been proceeding satisfactorily since the company had taken over the construction a month ago. The sardine fishing in the vicinity of Chamcook, which is near St. Andrews-by-the-Sea, has been satisfactory. The company has been operating a small plant near its new one, and has obtained \$5 per case for its output, as compared with the average price of \$2.75 secured by United States packing companies. Mr. George F. Johnston is president of the company. The other directors are: Sir William Van Horne, G. M. Rosworth, W. R. MacInnes, Tancrede Bienvenue, R. B. Van Horne, and F. P. McColl.

ANCIENT ORDER OF WORKMEN

What Will the End Be?—Discussion as to Rates—Options Offered to Members

By William H. Orr.

"Whether in the body or out of the body," whether dreaming, or only thinking, or partly one and partly the other, I do not say. But the vision, or the dream, was most impressive. I have concluded to recall its outlines and fill them in for readers of *The Monetary Times*, somewhat as the scientific men do when the bones of a prehistoric animal are occasionally unearthed.

As the dream proceeded, there seemed to be a lively conversation on the way between an elderly member of the Ancient Order of United Workmen, who had never enjoyed the advantage of book learning, and his grandson, also a member of the same society. The younger man, it was easy to discover, had been to school. He was profiting from it, for he held a good situation in a neighboring city.

Grandad.—"Oh, burn it, Dick; this work will never do! When I joined the Ancient Order of United Workmen the society was weak with scarce a dollar in its treasury, nor need of any, more than to get together the \$2,000 as it should be called for by the death of a member. But now it has one and a half millions of money, mostly paid in by us, and here we old people are ordered to pay double and treble what we agreed to do, and what we have all along been paying, and what we have many times been assured by the monthly organ was sufficient. Without our contributions there never would have been such prosperity. I say it is most unfair to us old people who have borne the burden and heat of many years, to throw all the cost on us, and none on the younger people. What do you think of it?"

Grandson.—"Well, it does not seem quite fair, considering that Father J. J. Upchurch, the founder, started it in 1888 as a purely fraternal society, wherein every member would pay the same entrance fee and the same level contribution to the \$2,000. The idea was a very good one for a temporary, or occasional calamity, such as a neighbor's house and barns being consumed by lightning, or something of that sort. All honor to him, I say. But he is long since dead, and the society has far outgrown his limited vision. It is now in trouble, both in the States and in Canada, because the members are growing old, and the death calls are steadily from month to month greatly exceeding the income. If this was only for one or two months, there might be some hope that the surplus would stand it. But the difficulty grows greater, month by month, and the membership itself is decreasing. Instead of 38,088 as a year ago, with nearly \$100,000 as a monthly income, there were only 34,040, contributing \$76,372 last month; and the Reserve Fund has dropped from \$1,597,023, as it was last January, to \$1,398,702. Something must be done, and that quickly."

Grandad.—"But why not every member, old and young, bear a fraternal share, by an equal assessment upon all, sufficient to meet the difficulty, the same as if it were a neighbor's property burned down? Then there could be no complaint of unfairness. But if any favor should be shown, surely it should be to the old men. If they did not lay the foundations and build up the Order, who did? The newer and younger members of to-day are getting the benefit of our labors. And they are better able to stand a few extra assessments than we older members. And they have, probably, many years ahead of them in which to enjoy their membership, while ours will soon terminate in any event."

Grandson.—"That may all be, but all who entered since 1905, seven years ago, are paying a graded rate, supposed to be pretty nearly right, according to a minimum scale constructed by the late Government Inspector Hunter. From all accounts the extra mortality, which causes the trouble, is not upon their lives. It is confined, almost wholly, to those who entered previously to 1905, and who never have yet paid sufficient in any month to provide for their own increasing deaths, due to their advancing old age. Out of 224 deaths during the past four months, only 24, and mostly by accident, were of persons under 50 years of age. Out of 65 in June, only one death occurred at an age under 50."

Grandad.—"That seems all right. If none die young except by accident, then, you see, the old people who are now dying fast, must have been paying for a long time. I have, myself, been paying in for twenty-five years. And so have many others. The younger people should be grateful and lend a hand to rescue an institution which is thus so fully carrying out the fraternal design of its founder. Look at my own case. I have already paid \$812.04, and am now 74. If I should live ten years longer and pay the extra amount called for each month, the total will then be \$2,200. Why should I thus have to contribute \$200 more than my certificate calls for?"

Grandson.—"That does seem hard on the face of it. But then, on the other hand, you will then have had the protec-

tion of \$2,000 for the long period of 35 years, from age 49 to 84, if you live so long; and protection costs money in old age. It is like a fire insurance policy on a planing mill, or on a sailing vessel in winter time. The risk of death is very great in the case of old people, and must be paid for at a high rate. I joined when very young, and therefore pay only \$1.56 per month, or \$18.72 per year for my \$2,000, apart from lodge dues and other expenses. If I should live to 84, the assessments would come to \$1,198.08. With dues added it would be \$1,326.08. The brother who joins at age 49, on the new scale of 1905, pays \$5.38 per month, or \$64.56 per year for \$2,000. Therefore, if he lives to 84, as you hope to do, his total payments, plus \$2.00 a year for dues, would come to \$2,329.60. But my \$1.56 per month, and his \$5.38 are the equivalent of each other, even though my total payments should be very much less than his."

Grandad.—"That is more than one thousand dollars of a difference against the older man, while the young man gets nearly twice as many years of protection. Is not that a crying injustice, even under the Hunter rates? Why should that be so?"

Grandson.—"Because the deaths are comparatively few between ages 20 and 49, and the Order thus saves up considerable from interest on the money, all the way through. But there is little gain from interest upon the elder brother's payments, because they are so soon called out again by the more frequent deaths among the elderly men. No regular life insurance company will insure a man who is over 70 years of age, at any price."

Grandad.—"Well, well! It's a fine thing, sure, to have a good education, so as to understand such difficult matters."

Grandson.—"When you joined, in the early days, the rate of assessment was the same for an old man as a young man. Therefore the Order, both in the States and here, became loaded up with old men, which was most unfair to the young men, though even they did not pay as much as they should have done. Mr. Carder says you paid, during your twenty-four years, only \$33.86 a year for your \$2,000 of protection, which comes to only \$812.64 in all. So, you see, the loss would have been heavy on the society if you had died even at the end of twenty-four or twenty-five years. And he says, further, that being over 70 years of age, the option is open to you to do as so many others are doing. That is, you can surrender your certificate and get back half of what you have paid in, or \$406.32."

Grandad.—"Yes, I see by the last 'Workman' that a long string of the older members have been already doing this. Also, Dr. Ferguson shows they may take the other option of surrendering \$1,000 and having a new certificate issued for the other \$1,000 and pay no more assessments. My difficulty is to decide as to which option to accept. I am inclined to think that a bird in the hand is worth two in the bush."

Grandson.—"Those two lines of retreat are still open, and they must be deemed extremely liberal. In fact, I often wonder where the fool-killer was when they were adopted. Is it not 'as plain as a pike-staff' that every member accepting either option is likely to be in good health, and therefore whose going out cripples the society by cutting down its income? If every healthy member above 70 goes out, where is the money to come from to meet the death-claims of the sickly and dying ones?"

Grandad.—"Well, what is the immense surplus for but to do that? We have all contributed to that boasted surplus from our pocket reserves, and now is a good chance for our officers to show what it can do."

Grandson.—"That surplus is all that is now holding the Order in Ontario from immediate dissolution, the same as happened to it in Michigan and in New York some years ago, and this surplus is rapidly disappearing. It made a most encouraging growth of about \$200,000 in the two years from 1908 to 1910. Then it stood still, pretty much, during last year. But this year it is diminishing at the rate of nearly \$400,000. The September 'Workman,' page 5, shows an anticipated deficit for October of \$183,797.96. It also shows that last month the deaths were 55, and the large number of 144 went out through the fifty per cent. open door, Option No. 1. The 55 took \$99,100.00 and the 144 took \$54,946.88, total \$154,046.88, while the call produced an income of only \$76,273.23."

Grandad.—"Yes, and I see that an item of \$82,756.50 is expected to be paid out for options alone during this very month. Even at that rate per month, and death claims already in for \$98,000 this month, the great surplus might nearly all be gone inside of a twelve-month. Why did not the officers give us warning of this years ago?"

Grandson.—"They did so, to some extent; but their warnings were not heeded by the members, and it was with difficulty they succeeded in getting an actuary called in to report to the 1911 Grand Lodge. But his report was turned down, and it was only in June of this year, 1912, that the officers were instructed by the Grand Lodge to proceed with what should have been done in 1905, viz.: to require all the old members to pay according to their attained ages."

Grandad.—“Yes, that would have been easy on us in 1905. But we are all now seven years older, and I doubt me if many who are over seventy will comply, so long as the Options, No. 1, 2 and 3 remain open.”

Grandson.—“Well, look at it! If only 10,000 took Option No. 1, and each received an average of \$380, no less than \$3,800,000 cash would be called for within a very few months. Where is that money to come from, seeing that the monthly receipts are now so much less than the death calls, month by month? Those options were harmless so long as the Order was strong and plenty of new members coming in; but they were ten times more than could be afforded, or than was due, in any case. They ought now to be immediately suspended by whatever means is yet possible. Otherwise it appears to me the end of the Order is only a few months distant. Instead of getting a Court injunction against the increased rates, such as the Guelph district has applied for, it ought to be an injunction against the Options, before another dollar is paid out.”

Grandad.—“Well, my claim for the \$406.32 is going in, and I hope it will prove successful. I have as good a right to it as had the 144 to get the \$380 apiece that was paid to them last month, whether the society lives or dies.”

FOREIGN EXCHANGE

Mr. John Seath, Jr., exchange broker, Toronto, quotes rates as follows:—

Between Banks.			
	Buyers	Sellers	Counter
Sterling, 60's	8 3/4	8 17-32	8 3/4 to 8 7/8
Demand	9 7-32	9 1/4	9 1/2 to 9 5/8
Cables	9 11-32	9 3/8	9 5/8 to 9 3/4
N.Y. funds	Par.	1-64 pre.	3/8 to 1/2
Montreal funds	10c. dis.	5c. dis.	3/8 to 1/2

New York, September 19.—Call money in London, 1 1/4 to 2 per cent.; short bills, 3 3/4 per cent.; three months' bills, 3 3/4 to 3 13-16 per cent.

Bar silver in London to-day was 1-16d. lower at 29 1/2d. per ounce.

The market for sterling to-day was easier; rates were 15 points lower. Rates for actual business closed as follows:—Sixty days, \$4.81.90 to \$4.82.40; demand, \$4.85.45 to \$4.85.55; cables, \$4.85.95 to \$4.86.05.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of September 21st, 1911; September 12th, and September 19th, 1912, with percentage change:—

	Sept. 21, '11.	Sept. 12, '12.	Sept. 19, '12.	Ch'g %
Montreal	\$42,632,253	\$56,847,893	\$59,618,171	+ 39.8
Toronto	34,040,350	39,198,528	36,767,485	+ 6.1
Winnipeg	21,624,967	27,003,487	24,011,238	+ 11.0
Vancouver	10,875,567	13,767,555	13,212,617	+ 21.4
Ottawa	4,484,789	3,361,186	4,212,513	— 6.0
Calgary	3,964,381	5,034,767	4,791,748	+ 20.8
Quebec	2,490,384	3,480,924	3,231,075	+ 25.7
Victoria	2,396,360	3,694,837	3,831,598	+ 59.4
Hamilton	2,398,495	2,893,960	3,317,916	+ 38.3

Total	\$137,733,715	\$173,247,371	\$171,347,624	+ 24.4
Fort William		741,431	845,260	

The Western Assurance Company has received a Dominion license for the transaction of lighting, explosion and tornado insurance in addition to fire and inland transportation insurance, for which it is already licensed. Mr. W. B. Meikle, Toronto, is the chief agent.

Germany's new compulsory insurance law is, says a Berlin dispatch, proving a heavy drain upon employers and salaried persons as distinct from wage earning workers. The annual burden amounts to over \$75,000,000. Strange to say, the employers are said to be quite satisfied with the law, but the employees resent the idea of having weekly and monthly contributions deducted from their earnings. This is especially true of clerks and others listed among the "salaried persons," who are taxed for benefits in which they do not immediately share, the bulk of the beneficiaries being of the "wage earners class."

The cost of raw materials used in the manufactures of 1910 was \$601,140,765, which when deducted from the value of products in the foregoing table gives the value added by manufacture, namely, \$563,634,767.

INDUSTRIAL INSURANCE ADVERTISES ORDINARY

But Economic Waste Shows Need of Scientific Management and Rigid Supervision of Agents' Work —Commission Proposes State Regulation

(Concluded.)

A system that writes policies for £60,000,000 and suffers £48,000,000 to be discontinued by forfeiture can hardly be defended as an economic one, is the contention of the Melbourne Age, regarding industrial assurance. There is a vast waste somewhere, obviously. The forfeited policyholders all paid something, and they paid that something for nothing as far as any ultimate benefit to themselves was concerned. Who benefited? The companies declare with one voice that they did not. They assert most emphatically that the lapsed industrial policy is a source of heavy loss to them, and they point to the strenuous efforts they customarily make to obviate discontinuances as a proof of their contention. They may be right, but, if so, who profits from the tremendous waste of forfeited premiums?

By a process of elimination we reach the agent. The forfeited policyholder certainly cannot profit. The companies say they do not profit. It must then, be the agent. In that case the conclusion is unavoidable, that it is to the agent's interest that a large proportion of the people he induces to assure industrially should sooner or later cease to pay their premiums, and suffer their policies to lapse. Is this another example of the octopus middleman? It is, at any rate, certain that the insurance agent is a middleman. Actually the companies partially excuse the high expense rates of industrial assurance by reference to the discontinuance evil and the "indispensable agent."

Has to Pay High Premiums.

Economic thought shrinks aghast from the spectacle of a business run on such wastefully exhaustive principles. No wonder the continuing industrial policyholder has to pay high premiums (however small his weekly payments) when he has (if the allegation of the companies is accurate) both to indemnify the companies against their losses by discontinuance, and also to support an army of agents who write business, two-thirds of which is impermanent. But the question is—Are the companies correct in saying they do not benefit from discontinuance?

The companies say they lose by the failure of their agents to maintain the policies, and in the same breath they eagerly defend the system of agency canvass and collection. This curious inconsistency compels us to infer either that the lapsed policies support the agents (and thus indirectly benefit the companies) or that the continuing policyholders are bearing not merely an inordinate, but a positively unconscionable burden. Which is the truth? The latest figures for discontinuance in the Australasian industrial assurance business show that the discontinuances bear the ratio of about 78 or 79 per centum to all new business. This is an improvement on the past, but it indicates that the waste incident to present methods of conducting this class of business is still simply enormous.

There is Another Alternative.

That the insurance world is ashamed of present methods is evident from the elaborate efforts of the companies doing industrial business to euphemise and palliate their operations. They say that the only possible alternative to the waste involved in the canvass and house to house collection system is some form of compulsory, universal assurance, and saying that—they shelter behind the bugbear of nationalization so astutely raised. Some companies, however, have already demonstrated that there is another alternative—the alternative of reformed scientific management and rigid supervision of agents' work; and at least one society is giving proof of a capacity to introduce conditions of stability and economy into industrial assurance that were formerly unknown.

It has become a custom among certain companies to claim great credit for bringing the blessings of assurance within reach of the working classes. These affect to look upon the cost of industrial assurance as a trifle in comparison with the good done. "We are encouragers of thrift—we teach the people to be provident and independent"—they say. It is true enough, but the pupils have to pay very dearly for the instruction, and that is not so good. After digging down into the root facts of the problem, it is not possible to give the insurance world much praise for its vaunted philanthropical spirit.

No sound company has ever lost by industrial assurance yet. Few of them really like the business for it is mean and peddling, and not one would engage in it from choice. But it is always a business proposition even when it does not yield large profits—and for this reason. Industrial as-

urance is a mighty engine of advertising ordinary assurance, and the time is approaching when no company, however strong, will be able to afford to stand out. A little reflection will make this clear. The company doing both ordinary and industrial business soon becomes a household word. Its agents go into every house and every home and visit them continuously, crying the company's wares at every visit.

Such a company, therefore, need spend little or nothing in the usual forms of advertisement, for it is advertised orally and directly by its agents to the whole community. It was largely for this reason that the A.M.P. Society was drawn into the industrial assurance sphere, in which it is now faring so well; and what the A.M.P. has done every other "ordinary" company will one day be obliged to do.

Results From Canvassing.

The canvass by industrial assurance agents, moreover, leads surely and inevitably to a great increase of "ordinary" business, for the industrial agents are always on the look out for an "ordinary" proponent, and lose no chance of converting an industrial into an "ordinary" policy. The industrial business, therefore, always effects large savings in the ordinary branch, and it thereby indirectly operates to the benefit of the company.

The very great growth of industrial assurance and the certain prospects of its great extension in the near future not merely warrant, but demand, the most careful and paternal regulation of the whole business by the State. The Commonwealth Royal Commission, which investigated insurance in 1908, came most emphatically to this conclusion. It unanimously recommended that closer Government supervision should be exercised in the case of industrial than in any other form of assurance, and that all companies doing industrial business (in addition to the protective provisions specified for "ordinary" companies) should be required to obtain a State licence, to lodge a deposit; to submit their policy and proposal forms, and their premium and dividend rates for Government approval; to value, actuarially, their assets and liabilities at fixed periods; and to publish periodically a complete statement of their position. It also recommended that all companies doing both "ordinary" and "industrial" assurance should be compelled to keep separate accounts for each branch, and to make a fair apportionment of the expenses common to the two branches under the direction of and on principles approved by the Government.

Royal Commission's Recommendations.

The Royal Commission expressly made the recommendations in order to prevent the alleged abuse that "small premiums are collected from poor policyholders in order to pay large dividends to rich shareholders" (the words quoted are from the commission's report); and also because the commissioners found it to be a fact "that the classes amongst which industrial assurances are usually effected are not, on the average, as well able as 'ordinary' policyholders are, to use for their protection published returns concerning the companies carrying on business."

It would be difficult to conceive anything more significant than the language above quoted. The royal commission made no specific charge against any section of the insurance world. That was not its function. But it hinted strongly that a serious exploitation of the working classes is in progress, and it devised a machinery to arrest, if not to crush the wrong.

CANADA'S TRADE

The aggregate foreign trade of Canada for the past fiscal year was \$874,637,794, comprising exports of \$315,317,258, and imports of \$559,320,344. In duty \$87,576,036 was collected.

The United Kingdom bought from Canada merchandise valued at \$151,353,413, while the United States took \$120,504,634; West Indies, \$6,900,948; South America, \$4,825,130; Newfoundland, \$4,289,313; Australia, \$3,947,015; Germany, \$3,814,914; Belgium, \$3,732,722; France, \$2,123,705.

From the United States, Canada bought \$356,354,478, and from Great Britain \$116,907,022; of duty collected, \$49,177,584 came from the United States and \$22,367,030 from Great Britain.

In exports, Quebec heads the list with \$123,104,336; Ontario is second with \$108,554,834; New Brunswick third, \$28,979,547; Nova Scotia fourth, \$23,569,432.

In imports, Ontario is the heaviest buyer, with \$240,262,161; Quebec second, \$164,349,054; British Columbia third, \$49,345,161; and Manitoba next, \$44,223,886.

Ontario contributed \$34,326,700 to the customs revenue and Quebec \$23,047,221.

The number of directors of the Stand Clay Products Company has been increased from nine to ten.

The LAKE SUPERIOR CORPORATION

Annual Report for the Year ending June 30th, 1912

The Directors of The Lake Superior Corporation in issuing their Annual Report for the Fiscal Year, ending June 30th, 1912, state that the result of the year's operations of all the Subsidiary Companies of the Corporation, shows a surplus, subject to depreciation and other charges, of One Million Five Hundred and Seventy-nine Thousand, Three Hundred and Seventy-seven Dollars and Fifty-nine Cents (\$1,579,377.59).

The report in referring to the operation of the steel plant gives the following:

STEEL PLANT.

The Steel Company's Mills have been in continuous operation. The output for the Year compared with the previous year was as follows:

	1910-11	1911-12
Pig iron	170,359 tons	258,979 tons
Steel Rails	208,283 "	241,729 "
Merchant Mill Material		39,406 "

It will be seen that the production of Pig Iron and Steel Rails was the largest yet attained.

The new Blast Furnace, as well as the Coke Ovens, are producing in accordance with expectations.

As previously intimated new construction is not yet completed, and work is still being continued under somewhat adverse circumstances. Labor in particular is difficult to get on account of the demand in other directions, but it is expected that all construction work now on hand will be completed before winter.

With regard to the Algoma Central and Hudson Bay Railway Company, the report states:

THE ALGOMA CENTRAL AND HUDSON BAY RAILWAY COMPANY

Your Directors have again to report increased earnings for the year. On account of the scarcity of labor, the extensions previously indicated were not completed at 30th June, but so far as the Hawk Lake—Hobon section, is concerned the Government have just made an official inspection and it is expected that this line will be passed for immediate operation. The Main Line from Mile 68 to Hawk Lake Junction will also be completed this year. Of this only a small mileage remains to be ballasted, the steel being completely laid. Extensions to the north of the Canadian Pacific Railway are proceeding rapidly and it is expected that connection will be made with the Canadian Northern (50 Miles north of the Canadian Pacific) before winter. This connection

will be of very decisive benefit to the Company as the Canadian Northern Railway Company has intimated its intention of taking in its Rails and supplies via the Algoma Central.

Referring to The Algoma Eastern Railway Company, the report has the following:

THE ALGOMA EASTERN RAILWAY COMPANY

With the exception of the swing bridge at Little Current the building of this railway through from Crean Hill to Little Current will be completed this year, and the subsidies and land grants duly earned. The results as compared with the previous year show an increase; but full benefit from this Railway cannot be derived until such time as dock facilities are installed at Little Current. Full plans are under way in respect of these. The completion of the Algoma Eastern Railway will enable the vast district which this Railway serves to have facilities for shipping by water. The importance of these to such as the Nickel and Paper Industries in the district cannot be over-estimated.

Speaking generally of the operations for the year, the Directors say:

GENERAL

During the year a very important financial re-adjustment took place. The Algoma Steel Corporation, Limited, (previously Lake Superior Iron & Steel Company, Limited,) took over the plant, properties and business of The Algoma Steel Company, Limited, The Lake Superior Power Company, The Algoma Commercial Company, Limited, together with the full interests of Fiborn Limestone Company, and the control of Cannelton Coal & Coke Company. Short terms notes of the Steel Companies have, under the new consolidation, been entirely repaid.

On account of the increasing demands for Steel Rails and in view of your Directors' efforts to keep up with the demand the old Blooming and Rail Mills are at the moment being replaced with larger and more modern plants.

The new construction yet to be completed consists of the installation of turbines for the development of surplus power, the 350 ton Melting Furnace which is almost finished, the new Iron Works buildings which will be occupied and fully equipped next month, and other work of a minor nature, all of which will, as stated, be completed before winter.

The Maggie Mine Plant has been installed and will, it is expected, be in operation in October.

Your Directors are much impressed with the outlook, and aided by the efforts of all employees, who during the last year have given efficient service, they expect to show continued progressive results.

THE LAKE SUPERIOR CORPORATION

BALANCE SHEET AS AT JUNE 30th, 1912.

ASSETS

Investments and Securities	\$48,627,347.96
Real Estate	194,501.70

DEBENTURES FOR SALE

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,

Minister of Lands, Forests and Mines.

Toronto, July 17th, 1912.

SCHOOL DEBENTURES FOR SALE

The Board of Trustees of Langdon S.D. 220, Alta., is offering for sale fifteen hundred dollars' worth of School Debentures to be paid in ten equal annual instalments with interest. Apply to

R. CONN, Secretary-Treasurer,
Langdon, Alta.

TOWN OF MELFORT DEBENTURES FOR SALE

Sealed tenders will be received up to October 18th, 1912, for the purchase of \$125,000 town of Melfort, Sask., debentures in denominations of \$5,000 each at 6% payable annually, principal at end of thirty years.

Tenders for one or more will be considered. No tender necessarily accepted.

J. E. DURNIN, Secretary-Treasurer.

IMPERIAL, SASK.

TENDERS FOR DEBENTURES

Tenders will be received by the undersigned up to October 1st, 1912, for the purchase of \$6,000 15-year six per cent., skating and curling rink debentures. Full particulars may be had from

J. G. HOBMAN,
Secretary-Treasurer.

Imperial, Sask., August 27th, 1912.

COLEMAN, ALBERTA

Tenders for Debentures.

Tenders will be received by the undersigned to September 30th, 1912, for the purchase of \$3,500 five per cent. debentures of the Town of Coleman, repayable in ten equal annual instalments.

JAMES FORD,
Coleman, Alta., Secretary-Treasurer.
September 11, 1912.

STRATHMORE, ALTA.

Tenders will be received up to November 1, 1912, for the purchase of the following debentures of the Town of Strathmore, Province Alberta.

Local Improvement Cement Side-walk Debentures, Five Thousand Dollars, Six per centum. Fifteen years.

Local Improvement Plank Side-walk Debentures, Fifteen Thousand Dollars, Six per cent. Ten years.

Local Improvement Fire Wall Debentures, Six Thousand Dollars, Six per cent. Ten years.

M. EUGENE SLY,
Strathmore, Alta., Secretary-Treasurer.
September 11th, 1912.

NOTICE TO CONTRACTORS AND OTHERS

The Porcupine Rand Belt Electric Railway Company (Ontario Government Charter, 1912), invite contractors desirous of tendering for and otherwise being interested in 500 miles, more or less, of grading, bridges, and steel-laying, standard gauge-single track road 80-pound rails—through the great clay belt, and touching all the mining camps, to submit their names to the undermentioned, when forms of tender, schedule and plans will be forwarded.

W. J. JAMES,

Secretary,

33 Home Life Building, Toronto.

TOWN OF MELVILLE, SASK.

TENDERS WANTED FOR \$43,300 DEBENTURES

Sealed tenders marked, "Tenders for Debentures," will be received up to **six p.m., September 30th, 1912.** Purchasers to pay accrued interest, cost of printing debentures and bank charges. Funds to be paid at Merchants Bank, Melville, Sask.

The debentures are 30 years, 5 per cent. interest, equal annual instalments of principal and interest; payable at Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Que.

The highest or any tender not necessarily accepted. Particulars may be obtained from

FRED. H. CLARKSON,

Secretary-treasurer,

Melville, Sask.

September 14th, 1912.

TOWN OF MELVILLE, SASK.

Tenders Wanted for \$55,000 Town Hall and \$8,000 Mill Loan Debentures.

Sealed tenders marked "Tenders for Debentures," will be received up to **six p.m., September 30th, 1912.** Purchasers to pay accrued interest, cost of printing debentures and bank charges. Funds to be paid at Merchants Bank, Melville.

The Town Hall Debentures are 40 years, payable at end of term, with interest payable yearly at 5 per cent., and are in issues of \$1,000.

The Mill Loan Debentures bear interest at the rate of 5 per cent., and are repayable in six equal instalments of principal and interest. Payments for both of these issues to be at the Merchants Bank, Melville, Sask.; Toronto, Ont., or Montreal, Que.

The highest or any tender not necessarily accepted.

Any further particulars may be obtained from the undersigned.

Both the Town Hall and Mill Loan Debentures are ready for delivery on demand.

FRED. H. CLARKSON,

Secretary-treasurer,

Melville, Sask.

September 14th, 1912.

CHESTER, SASK.

Tenders will be received by the undersigned up to **10th October, 1912,** for the purchase of 20-year 5½ per cent. Government Guaranteed Debentures of the Rural Municipality of Chester No. 125, Province of Saskatchewan, amounting to \$5,000, for the purpose of improving main roads.

Debentures repayable in twenty equal annual instalments with interest.

The highest or any tender not necessarily accepted.

J. B. LUPTON,

Secretary-treasurer.

Kaiser, Sask., Sept. 13th, 1912.

The N. Bawlf Company state that a new grain company organized by Sir Max Aitken, and which has purchased the two Alberta systems, including 142 elevators, will build a big terminal elevator in Fort William.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CONDENSED ADVERTISEMENTS

A minimum charge of 50 cents per insertion will be made in each case.

ADVERTISER, 27, desires position as chief clerk or underwriter. Has had nine years fire insurance experience; past three years as inspector. Thoroughly acquainted with the various inside departments and has a sound knowledge of C.F.U.A. schedules. Box 75, The Monetary Times, Toronto.

WANTED.—Contracts from Board Fire Insurance Companies for City of Regina. Excellent connection. Write Cathcart, Price & Boyd, Limited, Regina, Sask.

WANTED by young man possessing good business ability, initiative, capable organizer, and having experience in accountancy, advertising, financial, and iron and steel trades, the representation of good firm or journal. Winnipeg and West. Do you wish to open up? Address Herbert Thomas, c/o Y.M.C.A., Winnipeg.

WANTED—Inspector by leading Accident and Guarantee Company for Province of Ontario; must be good business producer. Applications treated "confidentially." State age, experience and salary expected to Post Office Box 430, Montreal, Que.

WELL EDUCATED young man, 10 years' experience, capable to act as accountant or secretary, desires to change position. Excellent references furnished. Box 89, Monetary Times, Toronto.

WANTED.—Position of Fire Insurance Inspector in service of strong Tariff Company. Have eleven years experience in General Insurance work. Inspection and organization work. Apply Box 77, Monetary Times, Toronto.

WANTED.—Stock salesman to handle company with bright prospects. Nature speculative but better and safer than many so-called investments. No exaggeration necessary. Apply Box 85, Barrie, Ont.

WANTED

Two high-class Stock Salesmen to handle a stock issue of an established successful company. Only men who can earn from \$3,000 upwards need apply. Send full particulars of experience and reference to Box No. 91, Monetary Times, Toronto.

DIVIDEND NOTICE

DOMINION TRUST COMPANY, LIMITED

Dividend Notice.

Notice is hereby given that an interim dividend at the rate of 8 per cent. per annum for the quarter ending September 30th, 1912, will be paid on October 1st, 1912, to the members who are registered as shareholders at close of business on September 12th, 1912. The transfer books and register will be closed on September 13th and 14th, 1912.

By order of the Board,

A. H. BAIN,

Secretary.

Vancouver, B.C., September 3rd, 1912.

TURPENTINE STANDARDS

By an order in council the following standards for turpentine are put in force in Canada under the Act respecting the adulteration of food and other articles:—When turpentine is sold as a drug, for medicinal purposes or to the order of a physician, it shall meet the pharmacopoeal requirements as provided by section 7 of the Act. When turpentine is sold under any other conditions than for purposes of medicine, as above, it shall meet the following requirements: It shall be entirely free from mineral oil; unless sold as wood turpentine, it shall not absorb less than 340 times its weight of iodine (Hubl solution and method); if sold as wood turpentine, it shall not absorb less than 240 times its weight of iodine by the same method; the undissolved (unpolymerized) residue on treatment of 10 cubic centimeters with 40 cubic centimeters of a sulphuric acid containing 20 per cent. of the fuming acid, shall not exceed 10 per cent. by volume of the sample; the refractive index of this residue shall not be less than 1.4950 at 20° C.; the refractive index of the sample at 20° C. shall lie between 1.468 and 1.473; the specific gravity of the sample at 20° C. shall not be less than 0.86; the initial boiling point shall not be lower than 150° C. under ordinary atmospheric pressure; at least 75 per cent. by volume shall distil below 160° C.; the residue on evaporation over a steam bath shall not exceed 2 per cent.

PATENT MEDICINES IN CANADA

"A revision of the Patent Medicine Act appears quite likely. The Minister of Inland Revenue has stated his intention of amending the present statute at the next session of the Dominion Parliament. The drug trade and manufacturers will be given an opportunity of presenting their views before the House assembles. It seems certain that a higher figure will be named for the licence. The fee is very small, perhaps, but it covers any number of articles made by the same individual company. It will be made possibly \$2.00 for each and every article produced. The demand for the formula will also be made, and this will meet with strong objection all round. It is to be hoped that the minister will not insist on this feature at any rate. It will confer injustice, and as well will serve no good purpose. The doctors are at the bottom of this movement again. What a 'Trust' the profession would become if they succeeded in their full objective and no medicine could be procured without a prescription!"—Montreal Pharmaceutical Journal.

DOWNWARD MOVE IN PRICES CONTINUES

The decline of two points in the Department of Labor's index number of wholesale prices for July, after a continuous rise for twelve months, was followed in August by another drop, the index number standing at 133.4 as compared with 134.8 the previous month. Last year, however, at this date it stood at only 127.2. The decline during August was due chiefly to decreases in prices of grains and fodders, fruits and vegetables, with slight increases in dairy products, fish, metals, and coal. These index numbers are percentages of the average prices of some 250 articles during the decade 1890-1899.

A conference which was held recently between Hon. J. D. Hazen, minister of marine, and the Montreal harbor commissioners will likely be productive of great good. At the conference ways and means were discussed for increasing the storage capacity of the harbor commissioners' grain elevator number one by another 1,500,000 bushels. The present storage capacity of the harbor commissioners' elevator is: Number one (old elevator). 1,000,000; number two (new elevator), 2,640,000. When the addition to No. 1 is completed this will give a total storage capacity in the harbor commissioners' elevators of 5,140,000 bushels.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

MUNICIPAL BOND MARKET

Calgary's Proposed Loan—Notes of Municipal Financing—Central Power for Civic Loans Suggested

Up to the present, the proposed advance of \$1,500,000 by the Bank of Montreal to the city of Calgary on pledged bonds has not been put through. It appeared on close investigation that the practice of borrowing from one by-law fund to help out another was technically illegal, and until this could be straightened, the Bank holds off. Civic contractors are being assisted through their own banks.

The Protestant School Commissioners may decide, in connection with the recent tenders for \$500,000, to do temporary financing rather than accept any of the offers made for the issue. Such action would be taken in the hope that a much better price could be obtained for the bonds a year from now.

Prince Rupert Debentures.

A plan for buying up the short term debentures issued by Prince Rupert, B.C., for sidewalks, etc., with part of the sinking funds of long term loans has been suggested to the council by the city clerk and was adopted. The city solicitor advised the council that this method was quite regular and that being so the plan was approved.

Three offers were received for the \$88,300 4½ per cent. 30-year schools, streets, water, fire, etc., debentures of Amherst, N.S. Two bids were from Halifax and one from Toronto. The award was made to Messrs. F. B. McCurdy and Company, Halifax.

Four offers were received for the Coldstream S.D., Man., \$1,500 6 per cent. 10-year debentures. The bid of Messrs. Osler, Hammond and Nanton was accepted.

Three Toronto bond firms bid for the \$4,500 5 per cent. 20-year school debentures of Parry Sound. The offer of Messrs. Wood, Gundy and Company was accepted.

During the past week a change occurred on the London Stock Exchange, in Province of Alberta sterling bonds, redeemable 1938, 4 per cent. from 99 to 101.

South Vancouver and Toronto.

"There is no good foundation for the criticism of our annexation request for the expenditure of \$5,000,000 in two years on the ground that we have exhausted our borrowing power," declared Reeve Kerr of South Vancouver recently. "As a matter of actual fact, we have an available balance of borrowing power over debt of \$4,000,000, so that we are quite reasonable in asking the city to guarantee to spend \$5,000,000 within the municipality in two years, if South Vancouver is annexed."

Toronto's debenture debt has increased at the rate of more than \$1,000,000 a month for the nine months of this year, and it may be over \$10,000,000 by the end of the year. The limit of the city's borrowing power will be added to by \$4,000,000 on the 1913 assessment, and this gives the city over \$7,000,000 "to come and go on." The gross debt at present is \$59,565,300, and as the sinking fund is about \$10,000,000, the net debt is about \$49,565,300.

Victoria's Overdraft.

The report of the Victoria, B.C., city comptroller for August shows that the sum of \$2,017,394 represented the overdraft on August 3. The general revenue account represented \$787,826, made up of the advance on notes, less the current balance, \$2,589,429 on local improvement construction account (notes held by bank, and current account overdraft), and \$6,911 on sundry overdrafts. These made a total of \$3,384,166, against asset credit balances to the amount of \$1,366,771, leaving the above overdraft with the bank of British North America. This is an increase on the July figures, owing to the large amount of work done in the meantime.

Before the British Columbia municipal commission Mr. M. Cotsworth, advocated the abolishment of the present system of raising money for public projects, and, instead, declared for investigation by a government expert, skilled in such matters, and report by him to the body he suggested as a central power over civic bodies. He argued that no city should be allowed to create a debt which would put a burden on future councils.

Must Watch Expenditures.

That Victoria may not expect to see any improvement in the money market until after the new year and that in the meantime it behoves the city to watch its expenditures and not undertake any scheme requiring extensive outlay until such time as the prospects for the flotation of the city's debentures become brighter than they are at present, is the gist of a communication received from that city's fiscal agents, the Dominion Trust Company.

Welland, Ont., made no award in connection with its recent issue of bonds. Edson, Alta., received no bids for its advertised issue.

Messrs. C. H. Burgess and Company have removed from 1123 to 528-32 Traders Bank Building, Toronto, where they have more commodious premises and increased facilities for dealing with their increasing bond business.

At Chilliwack, B.C., the bids for an issue of \$62,500 5 per cent. 40-year bonds were not considered satisfactory and debentures were not sold.

The capital stock of the Campbell Manufacturing Company, Limited, has been increased from \$75,000 to \$150,000.

CHINA AND ITS LOAN

If China has not made progress, in the Western sense, as rapidly as has Japan, it is at least learning something of the intricacies of modern finance. For months past, it has endeavored to negotiate a large loan. Six important nations, especially Great Britain and the United States, desired to have a finger in the financial chop suey. A loan to be advanced by six powers was practically arranged, but the Chinese balked somewhat at the conditions attached. An American promoter, Wendell Jackson, then apparently saw an opening to act as a medium. An agreement for a loan of £10,000,000 was signed by the Chinese Minister in London and by a representative of Lloyds' Bank, which was to finance the transaction. If finally consummated, the loan will run for forty years at 5 per cent., and will be secured by unpledged Chinese revenue, chiefly the salt duty, which is to be controlled by the British Inspector-General of Customs in case of default. Expenditure of the proceeds is to be free of foreign control and supervision.

Wendell Jackson is said, on July 1st, to have cabled from New York to the Chinese Government that he represented a powerful syndicate which was ready to advance China immediately \$50,000,000, and as much more as was needed, on advantageous terms. He asked the Chinese Government to instruct Liu Yuk Lin, its Minister in London, to conduct the negotiations and to give the Minister power to sign the contract. About a week later the Chinese Government accepted his proposition, and on July 12th cabled that Hsung Liang had signed the provisional contract in Peking, and that on July 14th cabled instructions and authority would be sent to the Chinese Minister in London.

Being unable to interest American capital, Jackson sailed for England on July 16th and received in that city from Peking a copy of the provisional contract signed in Peking by Hsung Liang. After protracted negotiations the Chinese Minister in London gave a signed statement that his Government had empowered him to make a contract with Jackson for a £10,000,000 loan, and this statement, it is believed, was the basis of Jackson's negotiations in interesting Lloyd's Bank.

The State Department at Washington recently received cable advices from the United States Minister at Peking that the reported loan is being investigated by the foreign Ministers there. The representative of Lloyd's Bank in that city says that the transaction is merely a preliminary loan, and that all funds necessary for the reorganization of China's finances will be forthcoming. It is also stated from Peking in press dispatches that French, German and American banks will participate with Lloyd's Bank in the new loan, and that the terms of the agreement include the starting of a new bank, having its head office in London, with a prominent financier as chairman of the board of directors and a subordinate board at Peking. The bank is to be capitalized, it is said, at \$10,000,000, half of which will be subscribed by Chinese.

In the meantime, representatives of the so-called six-power syndicate and the new independent Chinese loan of \$50,000,000 both assert that their own positions are impregnable. The six-power bankers have announced that the Ministers of their powers in Peking had been instructed to express disapproval of the new loan, and they also declared that China has no liberty, pending a definite closing of the negotiations with the six-power syndicate, to make outside arrangements. If the Chinese Government does contract other loans the lenders advancing the money will do so at their own risk and without the support of the Governments interested.

China informally reapproached the old syndicate during the present month, but the banking group will and re-open negotiations unless assured of China's sincerity.

The independent syndicate, on the other hand, scoffs at the suggestion that the British Government will ask China to repudiate the contract made by the Chinese Minister at London under the authority of the Chinese Premier and the Minister of Finance.

On the first intimation to the foreign office of negotiations bearing on this loan, it is said, the promoters were informed that if they proceeded with it they would be acting in direct opposition to the wishes and policy of the government, which would be compelled to protest to the Chinese government against the transaction.

A statement on this subject given out by the foreign office makes reference to the instructions which the government recently gave to the British minister at Peking, Sir John N. Jordan, to oppose the loan. The United States and Great Britain co-operated in this opposition, objection to the loan being based on the belief that foreign supervision was necessary over the expenditure of loans granted to China.

Despite these facts, a message from London says that half of the loan was to be offered to the public in London for subscription, on Thursday or Friday of this week, according to Mr. Charles Birch Crisp, head of the Anglo-Russian Bank, who has also been prominent in the negotiations.

OUR EXPORT TRADE

Canada is failing to develop to any great extent its export trade. This fact is giving concern to economists, our Minister of Trade and Commerce, and to his commissioners. It seems doubtful that the Canadian agricultural and industrial producer will spend much time in studying the export market just now for two reasons. Prosperity is general from coast to coast, and the demands of the home market are greater from year to year. This subject was mentioned at the annual meeting of the Canadian Manufacturers' Association at Ottawa this week. The Commercial Intelligence Committee of that body thought that the probability was that export trade will continue to be regarded as a problem reserved for future consideration.

In the ten-year period from 1900 to 1910 the annual output of our factories rose from \$481,000,000 to \$1,164,000,000, an increase of \$683,000,000. As against this, however, our exports of manufactures increased during the same period by only \$16,000,000, while the exports of all classes of Canadian products increased by only \$110,000,000, or less than one-sixth of the increased production of manufactured goods alone.

Meantime our imports entered for consumption have increased greatly. In the last ten years they have jumped from \$202,000,000 to \$547,000,000, with predictions that for the current fiscal year they will far exceed the \$600,000,000 mark.

The indifference of the average Canadian manufacturer towards export trade is not denied. The Commercial Committee of the Manufacturers' Association reported that inquiries from abroad for Canadian merchandise have been distributed to members by the score, only to be met in most cases with the response that the parties addressed were too busy with domestic orders even to quote on foreign business. Trade commissioners in different centres have written, complaining of the apathy of Canadian business houses towards the openings they bring to their attention. The committee recently volunteered to make up sets of catalogues from firms that were prepared to export, and to send one set to each of the trade commissioners abroad, but only 75 members of 3,000 thought it worth while to take advantage of the offer.

There is a danger of losing a chance to get into foreign markets. That danger is certainly likely to remain so long as prosperity remains, the purchasing power of Canada is high and the absorption strength of the home markets is increasing.

SHIPBUILDING INDUSTRY FOR BRITISH COLUMBIA

One of the most important points of a discussion at a meeting of the Vancouver Board of Trade regarding the establishment of a shipbuilding industry in British Columbia was that raised by Mr. J. J. Shallcross, president of the Victoria Board of Trade. Such an industry on the cities of the Pacific Coast, he said, would be a great gain when the time came that public works expenditure was diminishing. That is a serious matter, and one which *The Monetary Times* has also dwelt upon previously.

We must recognize that in addition to the share of prosperity built upon heavy borrowings, a fair measure of Canadian prosperity is due to large expenditures on public works and local improvements. Comparatively new towns and cities have been obliged to install water, sewerage and electric light systems. Sidewalks have been built, municipal street railway systems constructed, roads paved, and many other things done to make municipalities habitable. While a certain amount of growth will always be in evidence, expenditures on local improvements will not continually be as heavy as during the past year or so. This means there will be less employment in that direction. Hence the desire of thoughtful citizens to establish permanent industries which will give permanent employment when the town has been built upon a solid foundation, so far as civic utilities and comfort are concerned. The possession of such industries also mitigates the worst effects of a general economic depression.

British Columbia thinks a good step in this direction would be the establishment of shipbuilding yards. For that, encouragement is needed. Mr. G. G. Bushby, at the same meeting, suggested a bonus of some description. He also described how the industry would quicken the commercial pulse of the province. "Build your vessel in Canada," he said, "and you, in the broad sense of the term, will find a new market for your wares in supplying the shipbuilding with either home-made products or duty-paid imported goods. At the same time the workmen of Canada will find a new avenue of employment at good wages, which wages will eventually filter back into the channels of domestic trade, your own good selves again, and so the ball will keep rolling and the money spent for the Canadian-built ship will continue to circulate in the country of its origin for the benefit of Canada, her merchant, men and manufacturers."

Shipbuilding plants are in operation on the Southern Californian coast, but British Columbia has yet to have its first equipment. The question of ship industries for Canada's Pacific Coast is one worth consideration without delay. The citizens of the province, the provincial government and the Dominion authorities might with advantage confer on the matter.

A CANADIAN LLOYDS AGENCY

At Ottawa this week Mr. N. Curry urged more action and less talk respecting the establishment of a Canadian Lloyds marine insurance agency. Here are Mr. Curry's arguments: "The reason we export so little grain from Montreal is that there are so few ships to carry it away, and the reason that ships are so scarce is because the rates of insurance are so high. All boats

trading to Canada are penalized at Lloyds by what is known as the British North America marine insurance clause. This clause, which, by the way, puts Canadian ports in the same class with certain ports in the Arctic Ocean, was adopted by Lloyds in 1900 to meet conditions then prevailing.

"But the gentlemen at Lloyds are unmoved by the arguments advanced in our behalf. They thank us politely for what we have done, but continue in effect against us rates of insurance that, in the case of regular liners, are discriminatory to the extent of from two to four per cent., and so much higher in the case of tramp steamers as to be practically prohibitive."

The chief reason that Lloyds will not give better rates on the St. Lawrence route is that up to the present it has been found impossible to abolish the fog and ice dangers there. A Canadian Lloyds, even under government patronage, would not, we think, influence London Lloyds in the least. They are writing marine insurance; it is their particular business, and that business is done on terms based upon a lengthy underwriting experience in every ocean and on every route.

MANUFACTURING IN THE UNITED STATES

The relative importance of the leading manufacturing industries in the United States, each having a gross value of products of \$100,000,000 or more in 1909, is shown in a statement issued by Director Durand of the Bureau of the Census. A considerable volume of United States manufactures come to Canada each year, and the fact that the republic's exports of manufactures now exceed its agricultural exports, makes the figures of additional interest to Canada. In the table below the industries are arranged in the order of their gross value of products, but their rank in respect to the other items is also shown. Some of the industries which hold a very high rank in gross value of products rank comparatively low in the average number of wage earners employed and in the value added by manufacture. Where this is the case it indicates that the cost of materials represents a large proportion of the total value of products, and that, therefore, the value added by manufacture, of which wages constitute usually the largest item, is not commensurate with the total value of products.

Thus the slaughtering and meat-packing industry, which ranks first in gross value of products, and the flour mill and grist mill industry, which ranks fifth in that respect, both hold a comparatively low rank with regard to number of wage-earners and value added by manufacture. The blast furnace industry, the smelting and refining of copper, the manufacture and refining of sugar and molasses, the manufacture of butter and cheese and condensed milk, the refining of petroleum and the smelting and refining of lead are other industries which rank higher in gross value of products than in number of wage earners or the value added by manufacture.

There are several industries, the rank of which, according to the number of wage earners and the value added by manufacture, is decidedly higher than the rank according to value of products; in other words, the cost of materials is relatively a smaller, or the wages relatively a higher, part of the total value of products for these industries than for most others. Among the industries of this class are the making of women's clothing, the manufacture of automobiles, furniture, electrical machinery, apparatus and supplies, hosiery and knit goods, and agricultural implements, and the confectionery and marble and stone work industries.

The foundry and machine shop industry, the lumber industry, the steel works and rolling mills, the printing and publishing industry, the manufacture of cotton goods, of men's clothing, and of boots and shoes all

rank among the first ten industries of the country on each of the three bases shown in the table.

The figures for both value of products and value added by manufacture in the case of the brewery and distillery industries include a very large amount of tax paid to the Federal Government, and are, therefore, misleading as an indication of the relative importance of these industries from a purely manufacturing standpoint. Their importance is best shown by their rank in number of wage earners; in this respect the brewery industry ranks twenty-fifth among the industries of the country and the distillery industry forty-third.

By far the highest percentages of increase are shown for the automobile industry, the gross value of products of which increased more than fifty fold during the decade. Other industries which show exceptionally large increases are copper, tin and sheet iron; oil, cottonseed and coal; clothing, women's; electrical machinery, etc.; smelting and refining copper; bread and other bakery products; confectionery; gas, illuminating and heating; liquors, distilled; paper and wood pulp; butter, cheese and condensed milk; hosiery and knit goods; petroleum refining; chemicals; printing and publishing; malt liquors; cotton goods; silk and silk goods, and furniture and refrigerators. It is interesting to note that the group of "all other industries," which includes the less important industries of the country, shows greater percentages of increase than all industries combined, thus indicating possibly an increased tendency toward diversification in manufacturing industries.

* Amount expressed in thousands.

Statistics respecting manufacturing in Canada appeared in last week's *Monetary Times*. A comparison of the figures will prove interesting.

The total imports into Canada from the United States for the fiscal year ended March 31st, 1911, were \$284,465,437, an increase of 145.29 per cent. over 1901. Last year, the United States obtained 61.57 per cent. of our total import trade.

SMALL CHANGE

James J. Hill seems to give as many farewell performances as an Italian prima donna.

* * * *

Have the Hudson Bay advocates inquired as to what insurance rates they can obtain on that route?

* * * *

Now that the Canadian Pacific Railway telegraphers have obtained a twelve per cent. wage increase, living on tick will not prove so strenuous.

* * * *

This continuous talk of cementing Imperial ties should look good also to contractors, cement men and investors in cement stocks.

* * * *

The British Columbia Doukhobors may trek to Colorado, but unfortunately for Canada they will not take with them the Industrial Workers of the World.

* * * *

A Nicaragua mining engineer, visiting Niagara Falls, says he does not believe any vessel will ever pass through the Panama Canal. Is this a case of extreme pessimism or of desire for a Nicaragua canal route?

HALIFAX ELECTRIC TRAMWAY

Montreal Financiers Seem Interested—Over Two Hundred and Fifteen Thousand Carried to Surplus Last Year

Montreal, September 25th.

There have been rumors here recently to the effect that E. A. Robert, president of the Montreal Tramways Company, W. J. McConnell, vice-president of the same company, and other allied interests, have taken over, at 160, the shares of the Halifax Electric Tramway Company which have been accumulated by Mr. F. B. McCurdy during the past year. The Robert-McConnell interests maintain reticence concerning the matter, but the rumor finds general acceptance in local financial circles.

The deal in question, whether it has actually taken place or not, has a sufficient basis in the association which has existed between the McCurdy and the Robert-McConnell interests for some time past. This association was formed in connection with the Nova Scotia Power Company, which was organized a year ago or so for the purpose of consolidating the various public utility concerns of Halifax. F. B. McCurdy, a director of Halifax Tramway, was the organizer, it being his intention to consolidate the Halifax Tramway Company with the Guysboro Power Company, and a power company which owned the power rights at Liverpool, thus obtaining control of the principal public utility companies, and the sources of power in the vicinity of Halifax.

The deal progressed until several of the directors of the Halifax Tramway objected. After a prolonged discussion, these carried their opposition to the legislature and blocked the deal by certain powers which they obtained, temporarily at any rate. By these, the sale of the company was prevented and, by an arrangement with the city of Halifax, the company was restricted from paying more than a certain dividend, it being arranged that all in excess of the amount to pay an 8 per cent. rate, was to be divided equally between the city and the company.

Authorized Capital is one and a Half Millions.

Mr. McCurdy began buying the stock of the company when it was slightly over par and continued to accumulate it gradually until it was above 150, so it is understood. Owing to the opposition which has developed to his programme, however, it is stated that he at last decided to sell out his interests to Messrs. Robert and McConnell. The price mentioned, namely 160, would net him a nice profit on the deal. Altogether, it is thought that he had accumulated something more than 40 per cent. of the stock.

The Halifax Electric Tramway Company is a prosperous concern. Its authorized capital amounts to \$1,500,000, while the subscribed and paid-up capital is but \$1,400,000. Only

Flaxseed upon a greatly increased acreage of 1,677,800 acres (allowing for deduction of non-productive areas) is expected this season to yield 23,145,000 bushels, or at the rate of 13.74 bushels per acre. These figures compare with a total of 7,867,000 bushels from a productive area of only 682,622 acres last year when so large a proportion of the area sown in the North-West Provinces was not harvested in consequence of the late and stormy season. Saskatchewan is the great flax-producing province, and it seems to be a favorite crop for the new settler.

* * * *

The argument is frequently advanced that Canadians should invest their money in enterprises at home rather than in South America, the West Indies and elsewhere. A true analysis of the situation, however, shows that Canadians have comparatively little money so invested. The Mexican, Brazilian and other companies have Dominion charters, head offices in Canada, and many Canadian directors. When it comes to the actual financing, the British investor supplies the bulk of the funds. For instance, last year more than \$26,000,000 worth of bonds were issued of Canadian corporations operating in foreign countries. Of that total, Great Britain bought 98.80 per cent., Canada taking the remaining 1.20 per cent. It is, therefore, a question of Canadian enterprise and British money, with doubtless some stock market profits also for the Canadians.

\$600,000 bonds have been authorized and issued, the interest on these being at the rate of 5 per cent. per annum. The company controls the railway and all the electric and gas lighting in the city. The railway franchise runs till 1916 and the payments to the city amount to 4 per cent. of the gross tolls from the operation of the tramway and a license fee of \$1,000 as well as the regular taxes upon real estate. In addition to this is paid 2 per cent. on electricity and gas sold. Gross receipts last year were \$502,399, while operating expenses were \$256,874 and bond interest \$30,000 while \$215,525, or over 15 per cent. on the common stock, was carried to surplus.

New Contract Offered as Solution.

The suggestion is heard at the city hall that the only solution to the difficulty in reaching a settlement with the Montreal Tramways Company is to draw up a new contract. The report from the public is that the council has tried its hand at a new contract and failed. From the standpoint of the city is the fact that the cars are overcrowded and the service inadequate. From the standpoint of the Tramways Company is the claim—which is probably a fact—that they are running cars more frequently than the contract calls for. Also, it is only a few weeks since President Robert placed before the council his suggestions for the betterment of the service. In this was included the granting by the city to the railway of the right to run lines on several new streets, both north and south streets, and east and west streets, together with the suggestion that certain tunnels or subways under the Lachine Canal, and to pass the railway tracks should be provided to save unnecessary delays.

Leading aldermen meet this suggestion by saying that of the streets demanded by the railway, one would cost the city a great deal of money to expropriate, while as soon as the other is mentioned, a deluge of letters of opposition come in to the city hall.

How the matter can be settled is hard to say. Solutions offered by the city would no doubt not be acceptable to the company, so that a settlement is difficult.

HUDSON BAY RAILWAY RISKY

"The Hudson Bay Railway undertaking is of so risky a nature and its ultimate success is so problematical that it should be operated by the Dominion Government until its real value has been demonstrated," said Sir Donald Mann at Winnipeg. "When the Canadian Northern started we had the choice of going north to the Bay or east and west. We chose to go east and west, and I think the result has justified our judgment. But you can never tell, and the result is uncertain. Undoubtedly, there will be a large fish trade from the north and valuable mineral deposits may be found along the right-of-way, as happened in the case of the Ontario Government road, making the line of incalculable worth. Add to this that there is bound to be considerable through traffic, freight and passenger, the element of risk is materially reduced. But I think that the right course is being pursued."

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

XI.—COALING STATIONS ON THE CANAL ROUTE

The opening of the Panama Canal will stimulate the development of the coal deposits of Alberta and British Columbia. Capital and enterprise have not by any means exploited, to the fullest degree, the coal fields of those provinces. There is scope for much expansion of the industry.

The effect of the new waterway on the coal trade may be considered in two divisions—first, in regard to coaling stations, and second, in regard to the general trade. Proposals have already been made to improve the harbor accommodation at Kingstown, Jamaica, and at St. Thomas in the Danish West Indies, and to establish coaling stations there in preparation for the great tonnage of shipping which the new route from the Atlantic to the Pacific, and the Pacific to the Atlantic is expected to attract. The United States are considering the establishment of coaling stations on the Canal itself, and the prices at which it will be possible to supply bunkers. The coaling facilities will be as important as the amount of the tolls charged in defining the commercial future of the Canal, and encouraging traffic.

Government Coaling Stations.

The Panama Canal bill recently introduced in the United States Congress proposed that stations should be established by the Government, and that the Government should sell the coal to the vessels bunkering during their passage through the Canal. The question of price is vital, and it is not expected that much revenue will be derived from this business, profits on it being regarded as of secondary importance to the attraction of traffic by the offer of cheap supplies. It is even reported that bunkers will be obtainable at about cost.

In New York, it is understood that plans are being perfected for acquiring and equipping a considerable number of coaling stations along routes that will be traversed by hundreds of steamships which will use the Panama Canal. None but American steaming coal will be kept at these stations. The provisional estimate as to the cost of docks, coal-conveying machinery, coal pockets of steel construction and ship-repairing plants at seventeen points where it has been decided that large supplies of American coal shall be maintained calls for the expenditure of \$24,000,000. Conservative estimates of the amount of domestic steaming coal which can be sold to vessels traversing the Panama Canal routes vary from \$14,000,000 to \$18,000,000 per annum, figured at the ruling prices for prime coal at tidewater in the United States.

Within a year, the world's largest coaling station, it is stated, will be built at one of the terminals of the Panama Canal by a powerful syndicate of American bankers, coal mining and coal carrying companies, which will also build and operate a line of coal carrying ships to supply coaling stations in the Pacific Ocean.

What of British Columbia?

No definite announcement as to endeavors of British Columbia coal owners to participate in a similar trade, have been made. An unconfirmed report states that the interests backing the coal producing mines of Vancouver Island, and also steamship companies, are preparing to establish a large coal depôt in the vicinity of the Pacific end of the Panama Canal, having associated with them United States capitalists, who see in the United States control of the Canal an opportunity to secure strategic positions for the bunkering of steam vessels, both on the Pacific and the Atlantic coasts. The coal bunkers at the eastern terminal of the Canal would be supplied

from the Atlantic coal range, and the Pacific coaling station largely from British Columbia mines. The coal from Washington State does not meet the requirements for steam coal, it is said, and examinations of the Alaskan coal have shown that the coal there cannot stand shipment.

Importance of Stations.

The establishment of such stations is naturally of great importance, as steam vessels westward through the Canal bound for Pacific coast ports along the North and South American continents, and also to Australia, to Asia and the Philippines, will desire to take on bunker coal at or near the western end of the Canal in order to save the proposed payment of \$1 charge per ton on all freight, presumably including coal passing through the Canal, and to allow more cargo capacity by recoaling at intervals enroute.

A United States government expert recently emphasized the contention that it was more important to have coal easily available at different points along the route of a ship, even if it cost a good deal, than to start out with a large load of cheap coal. If freight was abundant and prices were good, the shipowner would rather pay more for coal and take it on frequently. At present ships bound around the Horn took on the whole load at the point of starting. They could coal only at Coronel, on the west coast of South America. The coal there was not very good. In general, he thought the Panama route would have great advantage over Suez.

Suez and Panama Coal Prices.

At present the price of coal in the Suez Canal was normally \$5.10 to \$5.35. In Panama coal at the end of a ship's tackle was worth about \$3.80. To this, however, had to be added fifty cents a ton for overhead charges and depreciation and fifty cents a ton for taking it through the Canal from the eastern to the western end.

This made \$4.80. On the whole, he thought that coal could be sold at about \$4.50 a ton at the east end and about \$5 at the west end of the Canal, these rates being for the Pocahontas coal.

Loading, unloading, etc., were other important items, he said, taken in the case of a ship going from New York to Japan via the Suez Canal and back again, and found that its total fuel bill was about \$20,868. Working out the cost of the fuel for the trip of this ship, if it had gone through the Panama Canal, gave a figure of \$18,222. This was a ship of 3,000 tons net, and the fuel prices were on the basis of 1911. More recent prices gave even greater advantage to the Panama Canal. The current advantage would work out at about \$1 per net ton of registered tonnage.

(To be continued.)

TARIFF SUGGESTION FROM WESTERN GRAIN GROWERS

The Grain Growers' Guide sent the following by wire to President Curry, of the Manufacturers' Convention, in session at Ottawa, this week:—

"The Western grain growers are anxious to know if the Manufacturers' Association will join hands with them in an effort to bind Canada closer to the motherland, by urging the Government to reduce the tariff on British imports to one-half that charged American imports, to complete free trade with the motherland in ten years.

"The grain growers feel that this would be a tangible form of showing their patriotism and would develop a much greater trade with the motherland and thus strengthen the ties of the Empire and show the world that Canada's loyalty to the motherland is deep and abiding and not merely words. It would also show the world that Canada stands behind the motherland to uphold the traditions of the Anglo-Saxon race and keep the Union Jack in the proud position it has held for a thousand years. Such an action would also be undoubted proof that Canada has no desire for political union with the United States. Would you kindly bring the matter before your annual convention now in session at Ottawa and ascertain if the manufacturers present are willing to join hands with the grain growers in this great Imperial scheme?"

GREAT PLANS FOR PACIFIC COAST

Railroads and Government Have Big Things in View —Development of False Creek—British Columbia Electric Situation

(Staff Correspondence).

Vancouver, September 21st.

News comes from Ottawa that the Department of Marine is about to inaugurate an era of great development on the Pacific Coast. In this connection it is announced that False Creek is to be dredged from its mouth to Main Street, that is the whole length of the creek; public wharves are to be built at North Vancouver, and dredging is to be done at the head of Howe Sound, so that the mouth of the Squamish will be cleared for navigation purposes. These things are only a beginning, for the policy of the department it is hoped is to become more busy in the West where rapid development has made its needs imperative. Everyone has thought False Creek was a fine body of water at high tide. Even Captain Vancouver was of that opinion as far back as 1792, when he entered the Creek, just as the tide had turned and judged that the outgoing current betokened a large river which might indicate the existence of the northwest passage which was much sought for about that time. He named it False Creek, but if the dredging is carried out as proposed it will have to be called Vancouver's Second Harbor. With industries and warehouses on either side of it, this harbor will be as busy as Burrard Inlet, with its larger interests.

False Creek Development.

Ten years ago, when the city began to develop, interest in False Creek was renewed. Mr. Roy, engineer from the department of works, made a complete survey, and it was thought at that time that the department had realized Vancouver's future needs and was about to make a channel in False Creek for low tide. Mr. Roy has been forgotten, and talk of False Creek development has recurred a dozen times. The recent decision of the present department of works may be the cumulative effect of all this discussion and preliminary work. Anyway, there is no necessity now to make a survey or seek for information. All this is ready. The announcement is that a channel 300 feet wide and 20 feet deep at low tide will be dredged. This will give excellent fairway for the craft that seek the creek, and will enable warehouse and property owners to construct wharves.

Moreover, the Canadian Northern has signified its intention to co-operate with the city and the government in the dredging of False Creek. It is almost a certainty that the city and the railway company will get together in the matter of the latter securing the remainder of the land in the False Creek basin at its head, namely 114 acres, for the company has shown that it is willing to meet the city in almost any way. It will mean an immense change in the large area lying directly east of the Main Street bridge, for all improvements must be completed within five years and three-fifths in three years. It looks as if this new railway, young and aggressive, will beat the Great Northern to it, despite the fact that the Great Northern has had a good start. It is beginning to find that it has to rush things along.

Canadian Pacific Railway's Intentions.

Sir Thomas Shaughnessy was on the coast recently and announces much development on the part of the Canadian Pacific Railway. Sir Thomas is no more prone to talk than most railway presidents, but now that a start has been made on what it is proposed to do, he is not unwilling to tell something. Three or four years ago, when The Monetary Times announced that a new Canadian Pacific Railway depot was planned for Vancouver, a vigorous denial came from Canadian Pacific Railway officials, yet to-day work is being pushed on the exact site then mentioned. Perhaps these things are kept in the background that other railways might not know what their competitor has in view. Anyway, this work is being done, the line is being double-tracked to Calgary, and Sir Thomas announces that more steamers are to be supplied for the coastwise business, equipment will be installed here to take care of grain for export, and new steamers are in hand for the trans-Pacific route. When the Grand Trunk Pacific was first talked of, the remark was heard that that railway might outshine the Canadian Pacific Railway. At the rate the Canadian Pacific Railway is going, the Grand Trunk Pacific will be quite a small little line compared with its older competitor. It will, however, have a fine territory to itself and what is being done in the southern part of the province will doubtless be duplicated in the north as development proceeds and occasion warrants.

With Vancouver, New Westminster and Prince Rupert looking forward to being centres from which grain will be exported in the next few years, comes the reassuring statement

of a ship captain, who has carried grain for years that the voyage via Panama would not damage cargoes, a report to that effect being published some time ago. He has carried grain in every clime and on every trade route and declares that temperature will not affect the grain when it is properly shipped.

Now that Point Grey has settled the tram franchise question, Burnaby is having a tilt with the British Columbia Electric. Point Grey, or rather a certain section of its people, insisted upon their rights, with the result that the municipality lost a season's development and in the end started again just where it left off. Burnaby has not so much to lose if it wins out in the court in its attempt to invalidate the franchise granted by the council, since it has not so many miles of railway to be stilled. An interesting point in connection with the Burnaby test case is advanced, namely, that the British Columbia Electric has no right to operate lines in any part of British Columbia. Counsel for the municipality is arguing that the British Columbia Electric is an English company which has obtained a license to carry on business in this province and therefore comes under the Provincial Companies Act and is restrained from operating street railways or trams in the province. The defence is that in the early days of Vancouver when tram companies were formed, a charter was obtained from the provincial government. An other charter was secured for the interurban line, and when the British Columbia Electric bought out the stock it took over all the privileges awarded in successive acts.

Lumber and Pulp Interests.

Mr. J. Hamilton Benn, M.P., for Greenwich, and Mr. J. Flowerden Lowson, of London, have been inspecting the works of the Ocean Falls Company, of which Mr. Benn is a director. The plant is located at Ocean Falls, and lumber and pulp is manufactured. Mr. Benn is identified with several other Canadian industrial enterprises, holding directorships in the Canadian Iron Corporation, Limited, and the Canadian Car and Foundry Company, Limited, of Montreal, the Western Canada Trust Company, Limited, of London, and Price Brothers, Quebec, lumber exporters. Mr. Lowson is a director of leading British paper mills and is therefore interested in the pulp end of the Ocean Falls plant. Mr. Benn stated while here that the congestion of Canadian securities is wearing away on the London market, and that investors are displaying more caution. Money shows a dearer tendency and a higher rate of interest is looked for.

Messrs. Price and Pierce, Limited, London, realizing the possibilities in the British Columbia export lumber trade, will shortly transfer Mr. Allan Dougharty from London to manage a branch of the company on the Pacific coast. The firm has a branch in New York.

CHARTERED ACCOUNTANTS STUDENTS' ASSOCIATION OF ONTARIO

The Chartered Accountants Students' Association of Ontario, under the auspices of the Institute of Chartered Accountants, commence their 1912-1913 session in the main building of the University of Toronto on Monday week. The syllabus covers fifty lectures which will be given on Mondays and Thursdays at eight o'clock, the course being as follows:—Instruction in accountancy will be given by Mr. Bryan Pontifex, C.A. The ordinary course will cover company accounts, executorship, partnerships and municipal accounts, with a special course in factory and mill accounts, costs accounts and contractors accounts, a total of twenty-five lectures.

The other twenty-five lectures will cover ten lectures on commercial and company law by Mr. James E. Day of Messrs. Day, Ferguson and O'Sullivan, barristers; six lectures on commercial arithmetic (sinking fund, etc. calculations) by Mr. Arnold Morphy of Upper Canada College, five lectures on auditing by Mr. H. J. Welch, C.A., and two lectures each on systems by Mr. F. E. Roberts, C.A., and on business investigations by Mr. G. M. Mullholland, C.A.

Test papers are set during the currency of the course, which are examined and returned with criticisms. There is a good library of books on accountancy subjects and text books of commercial law. The education of their students is treated as a matter of the greatest importance by the council of the institute. The president of the Students' Association is Mr. Percy Roden, of Messrs. Thorne, Mullholland & Company, and the honorary secretary is Mr. F. C. Hurst, of Messrs. Gunn, Roberts & Company, 25 Toronto Street, Toronto.

The Maritime Nail Company manufactured 1,032 kegs of nails and had them ready for dispatch in one day. This is a record production for the Dominion but was not the result of extra effort, and the company expects to continue this rate of manufacture.

TRANSPORTATION IS THE GREAT NEED

So Says Mr. N. Curry, President of Manufacturers' Association—Questions of Reciprocity and Workmen's Compensation

"The great need of Canada to-day is not wider markets, but an equipment and a service that will enable us better to supply the demands of the home market. In other words, what we want is transportation, more transportation, and better transportation." This was the statement of Mr. N. Curry, president of the Canadian Manufacturers' Association, at their annual convention this week at Ottawa.

Dealing with the question of reciprocity, Mr. Curry said:—"We were told that reciprocity would be the salvation of the West. Wherein, may I enquire, would it have benefited the West this year, with cash grain ruling at from 5 to 12 cents a bushel higher in Winnipeg than in Minneapolis? As I pen these lines the market report of the day is before me, and I find No. 1 hard (American standard) quoted at 90 cents Minneapolis, while No. 1 Northern (Canadian standard) is bringing 98½ cents in Winnipeg—the same grade of wheat, to all intents and purposes, yet to the farmer on our side of the line it is worth 8½ cents a bushel more than to the farmer on the American side of the line. Lower grades vary in about the same proportion; the Minneapolis quotation on No. 1 Northern (American classification) is 87½ to 89½ cents, as against Winnipeg's quotation of 94½ cents on No. 2 Northern, the corresponding grade in the Canadian classification.

Western Grain Grower.

"Had reciprocity carried a year ago, the Western grain grower would plainly have been the loser. One cannot but wonder, in view of the easy indifference with which treaty obligations have been violated in the case of the Panama Canal, how long a reciprocity treaty would have lasted once it began to operate to the disadvantage of the United State.

"The proposal to make workmen's compensation definite, sure, and prompt, to free it as far as possible from law costs, and to make the expense of carrying it a charge upon the whole industry concerned is one that never fails to commend itself the longer it is deliberated, and I trust that legislation based upon this principle will be speedily effected, not only in Ontario but in every other Province of the Dominion."

Suggests Conference With Laurier.

Dealing at length with the Navy question, Mr. Curry said:—"If criticism can be obviated and party feeling assuaged by the Government taking into its confidence the leader of the Opposition and his lieutenants, so much the better. By all means let such a conference be had, and had quickly. But in any event let us have action; let us sink our individual likes and dislikes to the end that something may be accomplished."

Reports, Papers and Discussions.

A series of valuable reports, papers and discussions occupied the members of the Canadian Manufacturers' Association in convention at Ottawa during two lengthy sessions which were held on Wednesday. Of particular interest was the address by Dr. J. W. Robertson on technical education, in which he made plain the great practical benefit accruing to the employer from making sure that his working staff has a proper equipment of knowledge. The attitude of R. D. Fairbairn, of Toronto, on the subject of Western freight rates also brought out important expressions of opinion.

The feature of the evening's meeting was a speech by F. H. Wentworth, of Boston, president of the National Fire Protective Association, who vigorously condemned the use of any but safety matches in residences.

It was announced that R. S. Gourlay, Toronto, would be the new president, while C. B. Gordon, president of the Dominion Textile Company, Montreal, will be the new vice-president.

Based on One Way Only.

"The rates to the West are based on one way only," said Mr. Fairbairn. "It is a well-known fact that it costs as much to send goods to, say, Saskatoon or any other place in the West, from the east, as it does to Australia. The railroads can carry freight at a good deal less than at present. The sole object of railroad companies seems to be to increase their rates all along the line."

In the report of the parliamentary committee the question of the validity of the Extra-Provincial Licensing Acts was reviewed at some length. No particular change has taken place in the situation, the report says, and the majority of provinces continued to deny the status of Dominion companies to carry on business unless virtually re-incorporated under provincial laws. The report continues:—

"It should be clearly understood that while manufacturing and other commercial companies are no more anxious than other classes in the community to pay taxes and license fees, it is not with the fiscal aspect of the questions that they are concerned, but the irritating restrictions which the acts purport to place upon inter-provincial commerce, and the uncertainty as to their constitutionality and their interpretation and scope."

CROPS IN SOUTHERN ALBERTA

Mixed Farming is More Favored—Calgary's Financial Position—Shortage of Labor

(Special Correspondence).

Calgary, September 25th.

The further assurance of good crop returns has had an enlivening effect upon business generally. Any hesitation is fast passing away, as the weather, except in some few localities, permits rapid harvesting and threshing. While the season started early and grain was cut at the beginning ten days earlier than last year, the fall rains have probably delayed work sufficiently to make the bulk of the harvesting in this district about the same time as last year. However, everything is going along nicely, elevators are receiving grain, and there are at the moment plenty of cars available to transport it.

Calgary's Financial Situation.

The special committee of the city council dealing with the municipal financial situation intimates a satisfactory solution within a very few days. In addition to the sum of \$1,500,000, to be advanced by the Bank of Montreal on the unsold debentures, a further \$500,000 is desired, and which, if included in the new arrangement will bring the total loans from the Bank this year up to \$3,500,000. No conclusion has yet been reached regarding the recent hospital by-law for \$150,000, of which the ratepayers did not approve. Considerable diversity of opinion exists on the advisability of converting the institution into a purely municipal undertaking, whereas now, it is operated without the intervention of the city, though receiving financial support therefrom. Municipal improvements by day labor are past the rush period, and more than \$30,000 less was required for the last fortnightly pay roll than for the same period a month ago. No new work, unless absolutely necessary, is being undertaken. Ex-City Engineer Child's successor is being sought by advertisement, the vacancy being meanwhile filled by Mr. Dewis, formerly assistant engineer.

Shortage of Labor.

Owing to its position as a distributing centre Calgary has had until quite recently, all the labor required. Within the past few days, however, a decided shortage is noticeable and more harvest hands could be placed, to say nothing of a long list of demands for the construction camps. Forty to fifty dollars per month with board; \$2.50 per day and board, 25 cents per acre for stooking; fifty dollars per month and board for teamsters, and \$6 per day for threshing engineers, indicates the demand among the farmers.

Outside work is offering at \$3 per day without board for laborers on some municipal jobs. Bricklayers on special contracts have been offered as high as 75 cents per hour. Men and teams \$6.50 to \$7.50 per day.

Favor Diversified Farming.

Fruits from British Columbia and south of the International boundary are cheaper in this city now than ever before. British Columbia fruit men allege discrimination against their product in favor of the United States article, chiefly owing to difference in freight rates, and as this item alone is sufficient to make the United States goods more profitable to handle by dealers, British Columbia is undoubtedly suffering for a larger market.

The tendency of Alberta farmers to respond to the educational campaign in favor of diversified farming is demonstrated in the supply of vegetables, which, for the time being, are quite ample. British Columbia potatoes are quoted at almost double the price of "Alberta's," \$1.25 as against 65 cents per bushel, the plea being that the British Columbia's are much better. However, the consumer is fast learning that Alberta Potatoes, grown by men who know a potatoe, are as fine in quality as anything produced in Canada.

The capital stock of Algoma Produce Company, Limited, has been increased from \$50,000 to \$250,000, such increase consisting of 200,000 shares of new stock of \$100 each.

ROBB ENGINEERING REORGANIZATION

Corporation Agencies, Limited, Made Two Offers—Atlas Glass Works Finances and Prospects

Monetary Times Office,
Montreal, September 25th.

The reorganization of the Robb Engineering Company, Limited, is nearing completion under the guidance of the Corporation Agencies, Limited, of this city. In future the business will be carried on by a company to be known as the International Engineering Works, Limited, which has been formed by the Corporation Agencies, Limited, for this purpose.

It may be recalled that after many years of successful operation, the Robb Engineering Company, of Amherst, N.S., was compelled to pass its bond interest some months ago, notwithstanding that it was doing an excellent business, and that its product was well and favorably known throughout the whole of Canada. Corporation Agencies being approached by some of the bondholders to suggest a means out of the difficulty, eventually made two alternative offers to the bondholders.

Two Offers Were Made.

One offer was to pay them, in cash, 63 per cent. of the par value of their bonds, the other offer being to pay the interest due, amounting to 3 per cent., or \$30 for each \$1,000 bond—and, in addition, to give in exchange for each bond the par value in 7 per cent. preference shares in a new company to be formed. The new company has subsequently been formed, the name being the International Engineering Works, Limited, and the capital being \$1,500,000.

Last week the Supreme Court of Nova Scotia in foreclosure proceedings commenced by the Montreal Trust Company, acting as trustee of the bondholders of the Robb Engineering Company, sold the assets at auction to the Corporation Agencies, Limited, and it is now engaged in carrying out the agreement with the bondholders according to the plan selected by them. Almost all the issue of \$650,000 of Robb bonds have now been turned in to Corporation Agencies for either exchange or cash.

United States Plant to be Sold.

In addition to the Amherst plant, the Robb Engineering Company owned a plant at South Framington, Mass., and this plant is shortly to be sold after the manner of the Amherst property.

The International Engineering Works, Limited, will commence operation under excellent auspices. A sufficient amount of capital will be provided and a dispatch from Nova Scotia intimates the possibility that certain competitive firms will join with the new concern and thus reduce the costs of operation and remove some of the factors which have been found disadvantageous in the past.

The International Engineering Works will start off with a good list of orders on hand, among these being one from the Canadian Car and Foundry Company for an engine for its new rolling mill, the weight of which will be in excess of 200,000 pounds. The Hudson's Bay Company has also placed an order for three new engines for its new stores at Calgary, and the Dominion Coal Company has ordered three boilers for its new docks at Halifax, while the Ottawa Electric has ordered watertube boilers, and the Dominion Iron and Steel and other large concerns have ordered large quantities of material which will keep the plant busy for some time to come.

New Glass Works.

The promoters of the Atlas Glass Works, Limited, are now offering \$350,000 of the authorized issue of \$750,000 of six per cent. bonds of the company to the public, at par, a bonus of 50 per cent. in common stock being included. The remaining \$400,000 of bonds will be left in the treasury for the future requirements of the company. The capital of the company consists of \$750,000 common stock, all of which is being issued.

The company will have as its managing director Mr. David Pugh, who for the past nine years has been general superintendent of the Diamond Glass Company and who originally came from the United States where he acquired a wide experience in the manufacture of glass. Mr. Pugh has left for a trip to some of the glass factories of the United States where it is expected certain advantageous arrangements will be made. At the same time he will arrange for the shipment of the most modern glass manufacturing machinery obtainable.

The site of the plant of the Atlas Glass Works, Limited, is St. Pierre, formerly Blue Bonnets, immediately west of Montreal West and within a mile or so of Montreal City. The

company has acquired an extensive area of land, consisting of 700,000 square feet, and will erect a large plant and either use the portion of the ground not required for workmens' cottages, or subdivide it and dispose of it. The site is only a short distance from the Lachine Canal and close to the Canadian Pacific Railway and Grand Trunk Railway tracks.

The company will engage in the manufacture of glass bottles, lamp chimneys and dishes of the usual variety and it is estimated that the profits should amount to over \$190,000 per annum after all charges and interest.

The directors consist of Messrs. George L. Kavanagh, O. L. Brunelle, financial agent, who is attending to the sale of the securities, J. Whitesell, L. G. Morin and David Pugh.

PERSONAL NOTES

Mr. R. B. Lamb has resigned his position as consulting engineer with the Crown Chartered Mine.

Mr. J. C. McGavin, of the Royal Canadian Agencies, Winnipeg, was a recent visitor in Eastern Canada.

Mr. H. A. Harvey has assumed duties as superintendent of eastern branches of the Bank of British North America.

Mr. W. E. Brough is to be admitted as a partner of the stock exchange firm of Messrs. Richardson and Company, Montreal.

Mr. J. Stuart McCuaig has been admitted to partnership in the firm of Colin M. McCuaig and Company, stock brokers.

Mr. J. M. Watkins, of the London Statist, has been looking over Canada during the past month, going as far as the Pacific Coast.

Mr. Ralph Stokes has been selected as assistant to consulting engineer Mein of the Canadian Mining and Exploration Company.

Dr. W. A. Chappell, M.P., of London, recently invested in Vancouver real estate to the extent of several hundred thousand dollars.

Mr. J. B. Ambrose has this week commenced his new duties as manager of the Quebec branch of the Bank of British North America.

Mr. R. A. Lyon, of the Toronto Stock Exchange firm of Messrs. Lyon and Plummer, has returned from a two months' trip to the Pacific Coast.

Mr. Geo. O. Somers, manager of the Canada Bond Corporation, Limited, is on a business trip to the Western Provinces and Pacific Coast.

Sir Edward Richardson, who with his associates have already made investments in Alberta, has been on the Pacific Coast looking over things.

Mr. R. H. Eden, of Temple Cowley, Oxford, England, has been touring the West with a view to investing money. He has placed considerable money in Argentine for those he represented.

Mr. T. B. Parkinson, joint Ontario manager of the Aetna Life Insurance Company, has had a severe attack of typhoid fever. His numerous friends will be pleased to hear that he is now on the road to recovery.

Mr. Lucien Courtois, of Paris, is so impressed with possibilities on the Pacific coast that he will induce French investors to place money in British Columbia. He says that a big financial house of Paris has agents on the coast looking over the field for investment.

Mr. S. Ducharme, a well-known resident of Essex County, has been appointed manager of the Bell River, Ont., branch Home Bank of Canada. Before assuming his present duties, Mr. Ducharme was a notary public and conveyancer in Belle River, and several years ago was town clerk. He was manager of the Belle River Canning Company before its amalgamation with the Dominion Canneries.

Hon. J. W. Sifton, president of the Free Press Publishing Company, and one of the foremost old-timers of Winnipeg, died on September 19th. Mr. Sifton, who had been ailing for some time, was one of the oldest inhabitants of Winnipeg. Apart from the fact that he was the father of two distinguished Canadians, Premier A. L. Sifton of Alberta, and Hon. Clifford Sifton, the late Hon. John Wright Sifton was prominent in the public eye for many years.

Mr. H. C. M. Bourke, of London, has been telling people in the West and on the Coast that there is too much unjustified optimism in Canada, and that the price of land and labor is too high. He says that British capitalists were bitten in Johannesburg, and the same thing might happen here. Much surplus money has been coming from the Mother Land of late, but things would change once the Unionists were in power, He declares Prince Rupert to be even a more glaring proposition than Vancouver, since the town is built on a rock and has not even its own docks.

LONDON SURFEITED WITH TREASURY BILLS

Many Canadian Municipalities Are Appealing to Overseas Public for Funds—Notes of Municipal Financing

London is becoming surfeited with treasury bills of Canadian cities of third rank, says a cable to The Montreal Star. Moose Jaw has placed a large line at six per cent., while Burnaby, Point Grey and others are in the market. The city of Montreal renewed treasury bills at 4½.

How the market stands is best shown by the following facts: The Chinese Government is placing six months' treasury bills at 5½; high-class American railways are placing short dated notes yielding about 5. The market is expecting a Rio Janeiro loan at 5, and Christiania at 4¾.

Leading Canadian bankers' comment is this: Large Canadian cities can secure money as heretofore if the issues are made more attractive to British investors. Third rank cities will probably find it difficult to raise money here on any terms in reason.

British and Canadian Municipal Loans.

The following table, compiled by "Canada," is interesting, as it shows the comparative yields between British and Canadian municipal loans, and illustrates that although the return is higher in the case of Canadian municipalities, the rate of interest is in most cases too low in proportion to the respective populations.

TOWNS IN GREAT BRITAIN.

Prince Albert Bond Guarantee.

Prince Albert, Sask., ratepayers ratified the draft agreement which provides that the city give fifteen acres for a site and guarantee the bond issue of the Great West Iron, Wood and Chemical Company to the extent of \$125,000. The directors of this company include Mr. D. B. Hanna, vice-president of the Canadian Northern Railway, and Mr. F. H. Phippen, chief counsel of Canadian Northern Railway. For these concessions they will bring to Prince Albert four flourishing industries from Dorchester, N.B.

For the \$67,500 debentures of Red Deer, Alta., three bids were received from Toronto bond firms. As previously noted, the award was made to Messrs. Goldman and Company.

Two offers were made for the \$100,000 5 per cent. 30-year school debentures of Prince Albert. The bid of Messrs. Morton, Bartling and Company, Prince Albert, was accepted.

Must Pay More for Money.

That we must pay more for money in England is the opinion of Mr. A. H. B. MacKenzie, of Messrs. C. Meredith and Company, Montreal, who has just returned from Europe. "A large amount of the Canadian municipal bonds being issued are for work done, not for work contemplated," said Mr. MacKenzie. "The municipalities have put themselves in the position of having to raise the money to pay their development debts. If it was for new projects that they needed the money, these projects could be held over, but as it is they have to get the money, and John Bull knows he can make them pay for it."

"The day of the four per cent. bond is past. By that I mean the bond to yield four per cent. We have been getting our money very cheaply in the past, but that day is gone, and from now on we shall have to be prepared to pay a materially higher figure."

Favors Fiscal Agents.

Speaking of the methods adopted by cities and municipalities to float their bonds, Mr. MacKenzie criticized the practice of sending mayors and attorneys over to England to raise money. He favored the plan of employing regular financial agents, say leading banks or financial houses

of recognized standing. In this way cities were able to get expert advice as to when to issue their bonds, from persons in close touch with conditions, and the most advantageous arrangements could be made. Mayors and lawyers were not as a rule closely in touch with financial matters, and were unable to handle an issue in a business-like manner.

VALUE OF CANADA'S NICKEL DEPOSITS

Ninety Per Cent. of World's Supply—What the Prohibition of Exporting Some Would Mean

"It has just been discovered that Canada possesses the key to the European naval problem," states a leading article in Conservation, the bulletin of the Commission of Conservation of the Dominion Government. "When Schneider, in 1889, introduced the use of nickel into the manufacture of steel armorplate, he little realized that he was placing in Canada's hands a great means for maintaining the peace of the world."

"Battleships without nickel-steel armor would be utterly helpless before modern guns. If nickel were no longer obtainable, armor construction would go back a quarter of a century."

Main Sources of Supply.

"Canada to-day produces about 90 per cent. of the world's supply of nickel. Practically all of the remainder comes from New Caledonia, an island in the south-western Pacific, controlled by France."

"In 1910 the value of nickel ore and matte exported from Canada to the United States was approximately \$3,450,000. As the only refineries are in the United States, nearly six-sevenths of the Canadian nickel was refined to the south of the border. The refining process raised the value of this Canadian ore to nearly \$12,000,000. The major portion of this refined nickel is used in the manufacture of nickel steel."

Nickel Steel Industry Would Decay.

"Consequently, if Canada were to prohibit the export of nickel, the nickel-steel industry of Europe would fall into decay, and high-grade armorplate for battleships would be an impossibility."

"Naturally such a course would be a bit hard on the Canadian nickel producers, but then see what it would do to the world's expenditure on navies."

"In these times of wars and rumors of wars it is assuring to know that Canada possesses such a potent weapon making for world peace."

DEPARTMENTAL STORE STOCK OFFERING

An offering of \$140,000 eight per cent. stock of The Arcade, Limited, Hamilton, is being made by Messrs. Campbell Thompson & Company, Toronto. The assets of the firm consist of real estate, a departmental store at Hamilton, and merchandise amounting to \$298,419, which with proceeds of issue make the total assets \$436,908.15. It is intended to enlarge the Hamilton premises and to form a chain of stores at good points.

The general manager and president is Mr. J. P. Whelan, and the vice-president is Mr. George Sweet, manager of W. E. Sanford Manufacturing Company.

MINISTER OF TRADE LEAVES FOR ENGLAND

Hon. G. E. Foster leaves at the end of the week for England to attend the meetings of the Imperial Trade Commission, and will be absent until Christmas.

The commission resumes its sittings on October 9th, and the list of subjects of enquiry as previously published includes a general investigation into trade conditions, a survey of the national resources of the dominions, their facilities for production, manufacturers, source of supply, a general investigation into migration of population and efficiency of the agencies now employed, and how present methods can be improved.

New Zealand and Australia will be visited next Spring, but the order of going to the other dominions will be determined later.

The superintendent of Edmonton municipal street railway recommends that thirty-five new cars be ordered for early delivery to supplement the forty-five now in use. In August the system carried 6,803,005 passengers as compared with 5,768,004 in the same month in 1911.

CANADA'S CREDIT TRADE

Protection of Manufacturer and Wholesaler by Work of Credit Men's Association—Education and Benefit Are Accorded the Retailer

The Canadian Credit Men's Association is composed of manufacturers and wholesalers only, but the very accomplishment of its purposes to improve the conditions under which credit is extended, work a definite advantage to the retailer, stated Mr. L. J. Ball, secretary of the Ontario division of the Canadian Credit Men's Association, before the Canadian Manufacturers' Association at Ottawa recently. The operation of the association makes it easier for the honest retailer to get the credit to which he is entitled and harder for the dishonest retailer to get any credit at all. As with the Canadian Manufacturers' Association, any line of work is taken up; as an organization, results can be accomplished which could not be accomplished by the members individually, but specialization matters that pertain directly to the credit end of business is our first obligation.

In each centre there is a branch office, a local legislation committee takes up any matters pertaining to improved commercial legislation. Already there has been placed on the statute books of Manitoba and Saskatchewan an act known as the "Bulk Sales Act." A similar act was introduced before the Ontario Legislature by Mr. W. D. McPherson, K.C., M.P.P., after consultation with our Ontario Legislation Committee. This bill passed its second reading last spring but has not yet passed its third reading, although it has received the approval of the legislative committee of the house.

Owing to some misunderstandings which have arisen among the members of the house from outside of Toronto, a certain amount of opposition to the bill has developed. Before going further with the matter, a consultation with the Retail Merchants' Association will be arranged and the bill worded so as to meet with their entire approval.

Does Not Work Hardship on Retailer.

Briefly the provisions of this bill are that when selling out his stock of goods in bulk if a merchant fails to obtain the consent to this sale of 60% in number and value of his creditors the sale can be upset and the creditors can file a claim against the goods themselves. This does not, as some seem to think, work a hardship upon the honest retailer who intends to make a bona-fide sale of his stock. The creditors are not likely to upset the sale so long as they know that a reliable man has bought out the store and will continue in business, thus keeping an outlet for their goods; neither are they liable to upset the sale so long as they know the merchant to whom they originally sold the goods is honest and will pay their claim against him. This is only intended to provide against cases similar to the one which I have mentioned and which, unfortunately, are altogether too frequent. As the matter now stands, although you may be convinced that the sale was fraudulently made you have no claim whatever against the goods that have been sold even though they may have been sold at much less than their actual cost unless you can actually prove conspiracy between the seller and the buyer and that, as you know, is a very difficult matter to prove.

The general board is having prepared, and it hopes to bring before the Dominion Government, a bill with reference to the issuing of fraudulent statements by retailers for the purpose of obtaining credit, no matter whether made direct to the wholesalers, through the mercantile agencies, or through any other channel. The passage of such an act of parliament should have the heartiest approval of business men everywhere in Canada.

Educational Fire Insurance Campaign.

Many thousands of dollars in new policies have been taken out during the past year by local merchants as a direct result of our educational campaign in reference to adequate fire insurance in this direction. The association offers to have the policies of any dealer examined by experts, without charge, so as to show him whether he is actually getting the protection for which he is paying.

A large fund has been raised for the investigation and prosecution of fraud. Through our activities several persons have been detected in the wilful defrauding of their creditors and punished. It is not often that any one creditor is willing to assume the cost or the natural unpleasantness which would ensue of punishing what seems to be a very clear case of fraud. Through the association, however, the result is obtained and the consequent cost instead of being borne by one or two of the principals, is distributed pro rata over the entire list of creditors interested.

Adjustment work at all its branches has been taken up, and a large number of insolvent estates, as well as trusteeships, extensions, etc., are being handled. The purpose of this work is to give the members a maximum of service at

a minimum of cost. This department is to be self-supporting only, not profit-making. If any one interested in estates which are being handled by the association they may know that the estate will be adjusted with the greatest possible speed, without waste and at the least possible expense. A complete report is issued periodically covering the estates which they are handling.

Does Not Conflict With Agencies.

It should be distinctly understood that the Canadian Credit Men's Association does not, in any way, deprecate or conflict with the service of the mercantile agencies. The service given is not intended to replace that of the agencies, but to supplement it. It sometimes happens that the reports of the different agencies on the same customer will differ materially. The trade clearing reports, secured through the Canadian Credit Men's Association, can, in all cases, be depended upon absolutely to show which mercantile agency is correct in its statements. No ratings are furnished nor opinions as to the standing of any customer. Trade clearing reports are made up of the ledger figures on an account and show the actual history of that account.

Through the clearing house department trade reports can be secured on any customer anywhere in Canada. These reports are contributed to by the members themselves and show the line of goods purchased, how much owing, how much overdue, the highest credit, how long sold, and the manner of making payment. It frequently happens that 30, 40, 50 and sometimes as high as 75 houses report on a single account.

In connection with the clearing house department we issue weekly what is called the turn down list. This is not, in any sense, a black list, but it is a list of names to whom members of the association have actually been obliged to refuse credit during the previous week, giving the name and address of the customer, the name of the house turning down the account and the reason for so doing.

The association was first organized in Winnipeg with but a few members who met and agreed to co-operate with each other in weeding out the crooks and eliminating the bad accounts. Each member pays an annual fee of \$100.00 to cover the operating expense and is registered as the owner of one share of the capital stock of the corporation.

Beginning and Aims.

From a membership of thirty which started three years ago with headquarters in Winnipeg, we now have upwards of six hundred members, with offices in St. John, N.B., Montreal, Toronto, Winnipeg, Regina and Calgary. Negotiations are also under way for the opening of a further branch in Vancouver. In the meantime, British Columbia reports are furnished through our Calgary office. There have been a number of associations among the different trades undertaking the interchange of ledger information, several of which are already affiliated with our association, as they have found that the broader field which we cover is a distinct advantage over their system which has been confined in each case to a single trade.

The entire purpose of our association is first to instil among the wholesalers and manufacturers more confidence in each other and a greater willingness to co-operate along lines of mutual interest; second, to educate the retailers to more business-like methods and to encourage them in all their efforts to properly treat their supply houses. Ninety-five per cent. of the business of this country is done on credit, and any action that we can take, therefore, to improve the conditions under which ninety-five per cent. of the business of this country is done is sure to be of very definite and practical value to both parties to the transaction.

Steel on the Tofield-Calgary branch of the Grand Trunk Pacific has been laid as far south from the main line as Irricana, and that the grade is now ready for entry into the latter place. A bridge at the Bow River, about four miles out of Calgary, is likely to delay track laying a little. This bridge is of steel construction and is to be erected by the Canadian Bridge Company.

One of the largest individual land sales ever effected in Great Britain has just been completed in London. The purchaser, the Canadian Associated Press is informed, is Lord Joicey, the coal mine owner, and one of the wealthiest Liberal peers in Great Britain. His lordship purchased nearly 24,000 acres of mixed farm and dairy farming land in the vicinity of Fort George, British Columbia, for which he paid \$450,000. Lord Joicey is chairman and managing director of James Joicey and Company, Limited, and the Lambton Collieries, Limited, the two largest colliery companies in the county of Durham. Captain Hulton who, it will be remembered, was responsible for the Duke of Sutherland and Lord Desborough transactions, is negotiating for the sale to a Dutch merchant of 50,000 acres in Saskatchewan.

ONE CANADA FOR ALL CANADIANS

Premier Borden Seeks to Unite East and West— Protection of Trade Routes

"We speak of the east and west in Canada, in sentiment and ideals. Let there be no east and west but one Canada for all Canadians," was an appeal of Premier Borden in his address at the non-partisan reception and banquet tendered to him by the Toronto board of trade on his return from England, and which was attended by over seven thousand persons on Monday night.

"We realize we have great problems vital to a country like Canada. The necessity of getting our products by cheap methods of transportation, whether at home or abroad is one. No country in the wide world is endowed as Canada is with facilities.

"Our inland waterways are unequalled and unrivaled throughout the world. We in Canada have one great question of transportation between the east and the west. I hope it will never be forgotten that there are now 500 or 600 miles of territory between the east and west which for many years will have no population. We have the problem which confronted the United States forty years ago in an intensified form. Within the humble capacity of myself and my colleagues that great problem to bring the inhabited east in touch with the inhabited west will be dealt with with a view to prevent all divergence of sentiment, because after all there is no divergence of interest.

Highways Are Necessary Links.

"What is good for the east is good for the west, and what is good for the west is good for the east. It is an absolute duty to bring them together, and our duty in that regard will not at any time in the future be neglected, nor will other great problems which confront us at the present time.

"One thing, it seems to me, is the necessity of seeing to it that the facilities afforded by our great lines of railway and our great waterways shall be supplemented by great highways.

"Of what avail is it to have these great railways if a farmer, a merchant, or a manufacturer has to haul produce ten or twelve miles on the worst roads in the world? It costs more to get it to the railway station than to get it six hundred miles to market, all difficulties considered. Highways are the necessary link in any well considered scheme of transportation.

"So I hope in the future it will be the aim of provincial and federal governments to grant to the people of all the provinces in Canada such assistance in the years to come as is necessary for a system of highways which will bear comparison with those in Europe and those also being created at so rapid a rate to the south of the line in the great neighboring republic. The government does not intend to abandon any proposal it has made in the past in that regard.

Utilize Resources for Manufacturing Purposes.

"I realize also the opportunity for great industrial development. I am sure all Canadians, whether they live in a great industrial city like Toronto or not, would realize it was part of our national work to take these great resources, and manufacture as far as might be every article required in every-day life for use of the Canadian people, and hope to build up national life of this country. It is not the duty of Canadians to bury their talent.

"I realize that great things have been done in Ontario in the development of natural resources, particularly in harnessing that great force which accompanies the roar and rush of the Niagara River through the gorge. It is one of our grandest natural resources. I trust the day will come when every farmer will have an abundance of electric energy, with every comfort and convenience to be found in urban districts. Perhaps no greater step has been taken than that which has harnessed our waterways so that not only may our homes be lighted, but heated as well, from rivers throughout the country.

"While duty and industry are the body of the nation, there is something beyond all that," said Mr. Borden. "Have we not to consider the ideals in public and private life, the conception of duty not only to our neighbors, but to our country? Are not these the very soul of the national, and shall not we in Canada see to it that not only the body is developed, but the soul of our nation is developed also? In these days of high prosperity and increased luxury, there should be heart-searching among Canadian people.

"It is not for me to make any announcement to you, for although an audience like this is a great temptation to a speaker to be indiscreet, I will stand by the rules of the constitution. And I must delay any announcement until the Governor-General calls us together at Ottawa and permits us to deliberate on matters of state."

Mr. G. T. Somers, president of the Toronto board of trade, read the address of welcome. "I recognize it as an honor," he said, "that I should be called upon to act as chairman at this magnificent gathering, drawn together to do honor to the first citizen of our great Dominion. The board of trade of the city of Toronto rejoices in the opportunity of welcoming you to this city upon your return from a most memorable visit to the capital of the Empire."

Block one trade route and what happens? asked Hon. George E. Foster, Minister of Trade and Commerce. Confusion. Block every trade route and the blood of empire ceases to flow, and the empire ceases to exist.

"Put Germany aside for the time being. Say nothing about the menace. See that those trade routes are protected by a police force of the ocean."

A new post office for Toronto is to be built, said Hon. L. P. Pelletier.

MINISTER OF FINANCE IS OPTIMISTIC

"You will naturally ask me what is the condition of the finances of Canada, and I say to you that the condition was never so satisfactory before in the history of the nation," remarked Hon. W. T. White at the banquet tendered to the Premier at Toronto on Monday. "Our revenues were never so buoyant as to-day. If I were a member of the opposition I would attribute this to Providence. That is the trick of all well-trained oppositionists. As a member of the government I say it is providence, but providence always acts through human instrumentality."

Mr. White continued that he hoped to pay out of consolidated revenue not only the current expenses and expenses on capital account, but also to leave a substantial surplus in the reduction of the national debt.

"Hon. Dr. Reid and Hon. Dr. Pelletier collect the revenues and hand them to me. I get the cash and I get the credit, and you know what a combination cash and credit make in this world."

Mr. White said at the present time it is extremely fortunate that the Dominion is able to make that showing and he referred to the congestion of Canadian securities in the London markets. This he characterized as "a passing phase."

The congestion was due to the progress this country has been making. There had been a great demand for money owing to the need for public services and our London friends know the securities offered by Canadian municipalities are the best and the pocket of the greatest financial country in the world was deep." A re-active effect was his wish and hope.

Mr. White touched upon the problem of transportation for which Canada needs a large and growing revenue. There were more and more demands for railways, rolling stock and shipping. In the West, with the opening of the Panama Canal, may come further requirements. Having regard to all that he believed the resources of Canada would be able to take care of all the necessary expenditures and still have a substantial balance.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Alberta.

Naco, No. 2656, \$2,000. A. Riddle, Wiste.
Langdon, No. 220, \$1,500. R. Conn, Langdon.
Dover, No. 2725, \$800. G. W. Mainer, Kinnoull.
Nicolls, No. 2703, \$1,500. S. L. McClean, Delia.
Larch Tree, No. 2759, \$800. W. E. Wood, Millet.
Webster, No. 2592, \$2,500. E. E. Davies, Cereal.
Syson, No. 2707, \$1,700. E. Geise, Lake Thelma.
Buffalo View, No. 2635, \$800. M. Brogan, Buffalo View.
Cassell Hill, No. 2772, \$1,000. W. H. Erant, Verdant Valley.
Goose Creek, No. 2782, \$1,500. F. O. B. Mundy, Loughheed.
Rush Centre, No. 2769, \$1,200. E. C. Willock, Alaska, Sask.
Box Springs, No. 2749, \$1,400. N. C. Larson, Box Springs.
Shelburne, No. 1038, \$1,200. Miss S. E. Anderson, Round Hill.

The capital stock of the Hallett-Weinberg-Bedard Company Limited, has been increased from \$20,000 to \$50,000, such increase consisting of 300 shares of \$100 each.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Locomotive Company.—Dividends on Canadian Locomotive Company preferred stock, which hitherto have been paid half-yearly, are now to be paid quarterly.

Rio de Janeiro Tramway, Light, Heat and Power Company.—Rio gross earnings for last week as received by cable were \$295,504, against \$256,634 for the same week last year, an increase of \$38,870.

Canadian Rubber Company.—The Canadian Rubber Company have decided to issue \$2,000,000 of new stock early in the new year. The money will be used for needed extension to the company's plant.

Twin City Rapid Transit Company.—In the second week of September Twin City passenger earnings showed the first decrease for some time, falling off \$7,621 from those of the same week in 1911. Last week earnings were \$160,558, against \$168,180 last year. For the year to date earnings have increased \$217,902.

Duluth, South Shore and Atlantic Railway Company.—The report of the Duluth, South Shore and Atlantic Railway Company, which is controlled by the Canadian Pacific Railway, for the year ended June 30th, 1912, shows a deficit after charges of \$361,547. Net earnings were \$757,314, against \$879,477 in 1911.

Toronto Paper Company.—The directors have declared a dividend at the rate of 5 per cent. The first payment is due on October 15th for the period ended September 30th. The present earnings of the company are equal to about 12 per cent. on the common stock. Stock of this company to the amount of \$750,000 was listed on Tuesday on the Toronto Stock Exchange.

International Nickel Company.—The directors of the International Nickel Company have declared a dividend of 2 per cent. on the common stock. This is the first dividend on the new common stock. The quarterly dividend of 1½ per cent. was declared on preferred stock, payable November 17th; books close October 14th, re-open November 2nd. The common dividend is payable December 2nd; books close November 13th, and re-open December 3rd.

Quebec and Saguenay Railway Company.—At the annual meeting of the Quebec and Saguenay Railway Company the following officers were elected: President, Mr. O. B. Daoust; vice-president, H. G. Matthews, manager of Quebec Railway; directors, Sir Rodolphe Forget, L. G. Morin and L. E. Morin. It was anticipated that some announcement with regard to the continuation or otherwise of the works of construction now suspended would have been made, but nothing was given out at the close of the meeting. Sir Rodolphe Forget was not at the meeting.

Spanish River Pulp and Paper Company.—Notice has been sent to the shareholders of the Ontario Pulp and Paper Company, notifying them of the agreement for the exchange of the securities for those of the Spanish River Company, stating that 10,000 shares of the Spanish River Company have been set aside and now are available for distribution on the basis of two shares of Spanish River for three shares of Ontario Pulp. Arrangements have been made with Messrs. Lyon & Plummer, members of the Toronto Stock Exchange, to buy or sell all shares necessary to adjust the fractions.

Sao Paulo Tramway, Light and Power Company.—The Sao Paulo Tramway, Light and Power Company, Limited, statement of earnings and operating charges, etc., for August, 1912, is as follows:—

	1912.	1911.	Increase.
Total gross earnings	\$ 387,486	\$ 303,796	\$ 83,690
Operating charges, etc ..	147,888	114,037	33,851
Gross earnings from January 1st	2,963,831	2,271,490	692,341
Net earnings from January 1st	1,795,784	1,423,281	372,503

Northern Ontario Light and Power Company.—The British-Canadian Power Company has been absorbed by the Northern Ontario Light and Power Company. The former company operated solely in Cobalt, manufacturing electric power at the Matabitchouan and using part of it at their present station on the Cobalt Lake to manufacture compressed air for the mines, while they also supplied electric power. The present amalgamation marks the close of a long series of amalgamations, whereby the present situation in the north is being improved. The Northern Ontario

Light and Power Company now supplies power all over the north, having franchises in Sturgeon Falls, Cobalt, Haileybury, New Liskeard, Porcupine, and Cochrane.

British Canadian Lumber Corporation, Limited.—The British Canadian Lumber Corporation, Limited, statement of operations is as follows:—

	Aug., 1912. Feet.	Year to date. Feet.
Lumber—		
Manufactured	7,344,228	38,680,415
Sold	4,665,317	32,736,872
Shingles—		
Manufactured		
Sold	3,882,750	19,090,300
Lath—		
Manufactured	1,526,050	8,339,300
Sold	1,411,950	7,932,500
Average price for manufactured lumber, \$17 per M.		

Mexico Tramways Company.—The statement of earnings and expenses from traffic only, as in Mexican currency, for August, 1912, are as follows:—

	1911.	1912.	Increase.
Total gross earnings	\$ 537,944	\$ 578,658	\$ 40,714
Operating expenses	258,214	266,347	8,133
Net earnings	\$ 279,730	\$ 312,311	\$ 32,581
Aggregate gross earnings from January 1st	\$4,023,435	\$4,420,698	\$397,263
Aggregate operating expenses from Jan. 1st..	1,944,559	2,107,765	163,206
Aggregate net earnings from January 1st	\$2,078,876	\$2,312,933	\$234,057

Kerr Lake Mining Company.—The annual statement of the Kerr Lake Mining Company for the year ended August 31st shows the income account, with the changes from the previous year, as follows:—

		Decrease.
Total income	\$1,044,418	\$186,828
Expenses	275,242	18,625
Balance for dividends	\$ 769,176	\$168,203
Dividends paid	762,000	576,000
Surplus	\$ 7,176	*\$407,797
Previous surplus	709,817	400,621
Profit and loss surplus	\$ 716,993	*7,176

* Increase.

The foregoing dividend total is exclusive of the dividend of \$150,000 paid on September 16th last.

The balance sheet as of August 31st last shows cash on hand \$491,615.

The Kerr Lake Mining Company of New York reports a total income of \$762,679 and a surplus, after dividends and charges, of \$6,034. Profit and loss account shows a surplus of \$140,461.

The gross production from all ores for the year was 1,855,494 ounces of silver, against 2,388,420 ounces in the previous year. The cost of production per ounce of silver was 18.30 cents, compared with 14.69 cents in the previous year, and 13.27 cents two years ago.

The estimated ore reserve on September 1st, 1912, was 6,690,091 ounces, of which 5,610,500 ounces were high-grade and 1,040,591 mill and dump ore. The increase in cost of production over last year is principally due to the greater amount of development work per ton of ore mined and larger proportion of lower grade product shipped. The greater cost of treatment is also due to the increasing proportion of low-grade mill rock handled.

The directors have elected William G. Nickerson, of Boston, president in place of Julius A. Lewisohn. S. S. Rosenstamm was elected second vice-president. Other retiring officers were re-elected.

The following branches of the bank of Nova Scotia have been recently opened:—St. Patrick-Spadina branch, Toronto, with Mr. J. H. Prescott, as manager; at Moose Jaw, Sask., where Mr. W. H. Wood, is manager; and at Fort William, Ont., where Mr. L. G. Irons has been appointed as acting manager.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Edmonton, Alta.—The by-laws for parks, bridges, drive-ways and warehouse site were carried.

St. Agnes R.C. S.D., Sask.—The issue of \$30,000 5 per cent. 40-year debentures are still unsold.

North Battleford, Sask.—The granting of a street railway franchise may be referred to the ratepayers.

Dominion, N.S.—Dominion is still open for tenders for its issue of \$20,000 5 per cent. 30-year debentures.

Peterboro, Ont.—The money by-law for hydro-electric power may be submitted to the people this year.

Langdon S.D. No. 220, Alta.—For sale \$15,000 10-year school debentures. R. Conn, secretary-treasurer, Langdon.

Brantford, Ont.—A by-law to raise \$115,000 for the installation of a hydro-electric plant will be voted upon October 25th.

Simcoe County, Ont.—Until October 15th, for \$20,000 20-year 5 per cent. debentures. Daniel Quinlan, treasurer, Barrie.

Stornoway Station, Sask.—Until October 3rd for \$4,000 6 per cent. 10-year school debentures. F. Thomson, secretary-treasurer.

Rosetown, Sask.—Until October 1st for \$12,000 20-year 6 per cent. local improvement debentures. N. M. Aseltine, secretary-treasurer.

Lindsay, Ont.—Lindsay ratepayers voted a loan of \$12,000 to the Fitzsimmon Automobile Company, and to grant a free site and exemption from taxes.

Swan River, Man.—Until November 1st for \$4,000 6 per cent. 20-year debentures. B. E. Rothwell, secretary. (Official advertisement appears on another page.)

Melfort, Sask.—Until October 18th for \$125,000 6 per cent. 30-year debentures. J. E. Durnin, secretary-treasurer. (Official advertisement appears on another page.)

Cudworth, Sask.—Up to October 1st, for the purchase of \$7,000.00 (seven thousand), 15-year 6% (six per cent.) village improvement debentures. F. G. Exel, Cudworth, Sask.

Imperial, Sask.—Until October 1st for \$6,000 15-year 6 per cent. skating and curling rink debentures. J. J. Hobman, secretary-treasurer. (Official advertisement appears on another page.)

Chester Rural Municipality No. 125, Sask.—Until October 10th for \$5,000 5% per cent. 20-year road debentures, government guaranteed. J. B. Lupton, secretary-treasurer. (Official advertisement appears on another page.)

Estevan, Sask.—Until October 15th for \$110,000 5 per cent. 25 and 30-year manufacturing establishments, school and waterworks debentures. L. A. Duncan, secretary-treasurer. (Official advertisement appears on another page.)

Strathmore, Alta.—Until November 1st for 5,000 15-year 6 per cent., cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer. (Official advertisement appears on another page.)

Lambton, Ont.—The county of Lambton offers for sale debentures amounting to sixteen thousand dollars, bearing interest at four and one-half per cent., and payable in ten equal instalments of principal and interest. J. Dalziel, county clerk, Sarnia.

Kamsack, Sask.—The four by-laws voted upon by the ratepayers were carried. There were \$13,000 for cement sidewalks, \$2,000 to assist in the erection of a local hospital, \$20,000 for a town hall and site, and \$5,000 for street grading and road improvements.

Wetaskiwin, Alta.—Until October 30th for \$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445.06 5 per cent. 20-year concrete walks; \$2,069.41 5 per cent. 30-year sewers; and \$819.56 6 per cent. 7-year plank walk debentures. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

Sir Max Aitken is applying to Medicine Hat for a twenty-year street railway franchise.

In all manufacturing concerns the actual cost of production is the foundation for the regulation of selling prices, and information regarding the elimination of waste. Indeed manufacturing is becoming more and more exacting in detail, and practical courses for the commercial man similar to those in cost accounts and business efficiency offered by the Dominion School of Accountancy and Finance, Winnipeg, must prove of great value and help to those who invest in them.

NEW BOND FIRM

Organization of the Canada Bond Corporation Completed—It Has a Strong Directorate

With authorized capital of \$2,000,000 in 2,000 shares of \$100 each, and a Dominion charter, the organization of the Canada Bond Corporation has just been completed. The company will buy and sell bonds and debentures of the government and municipalities, and public utility and industrial corporations of Canada, underwrite and assist bond and stock issues of high grade Canadian industrial companies, conduct a financial, investment and brokerage business, and issue bonds against securities placed in trust as collateral therefor.

The following gentlemen will act as directors and trustees:—Sir William Whyte, director of the Canadian Pacific Railway Company; Mr. John C. Eaton, president T. Eaton Company; Sir John Gibson, Lieutenant-Governor of Ontario; Mr. George E. Drummond, Montreal; Sir Hugh Graham, proprietor of the Montreal Star; Mr. J. A. M. Aikins, Member of Parliament, Winnipeg; Mr. G. T. Somers, president of the Sterling Bank of Canada; Hon. Geo. W. Brown, Lieutenant-Governor of Saskatchewan; Hon. James A. Loughheed, Senator, Calgary; W. K. George, president Standard Silver Company; Hon. Thomas W. Paterson, Lieutenant-Governor of British Columbia; Hon. James Hamilton Ross, Senator, Regina; and several prominent financial men of Great Britain.

The rapid agricultural, commercial and industrial development of Canada affords excellent opportunities for a profitable business by the new company. It will be directed by well-known men of Canada and Great Britain, who by reason of their financial experience, present business association and intimate knowledge of the growing needs of Canada should insure a conservative but aggressive administration of the corporation's affairs.

The head offices of the company will be at 59 Yonge Street, Toronto, with branch offices in London, England; Montreal, Winnipeg, Vancouver, and other important cities in the Dominion. The Bank of Nova Scotia and the Bank of British North America will act as bankers. Mr. T. Watson Sime, C.A., has been appointed auditor, Messrs. Thomson, Tilley and Johnston, Toronto are solicitors, and Mr. George O. Somers has been appointed manager.

Mr. Somers, the manager, a former Torontonion, has an intimate knowledge of the business conditions in Canada, the United States and the Tropics, the result of actual experience in those countries while living in Winnipeg, St. Paul, Chicago and New York. He was engaged in Canadian Pacific Railway service in Winnipeg for several years, afterwards associated with Mr. James J. Hill in the development of the Great Northern properties in both Canada and the United States, leaving him when assistant vice-president to become supervisor of purchases and general traffic manager of the United Fruit Company with headquarters in New York. His business training, broad organization experience and acquaintance in financial circles will be of great assistance to him in the management of the corporation.

DEBENTURES AWARDED

Laird Village, Sask.—\$3,200, to Messrs. Nay and James, Regina.

Red Deer, Alta.—\$67,500, to Messrs. Goldman & Company, Toronto.

Colonsay Village, Sask.—\$1,500, to Messrs. Nay and James, Regina.

Chilliwack, B.C.—\$62,500, to Sun Life Assurance Company of Canada.

Francis, Sask.—\$5,000 6 per cent. 10-year, to Messrs. Curran Brothers, Regina.

Watson, Sask.—\$2,000 6 per cent. 20-year, to Messrs. Curran Brothers, Regina.

Brownlee Village, Sask.—\$6,000 6 per cent. 15-year, to Messrs. Curran Brothers, Regina.

Loreburn Village, Sask.—\$2,000 6 per cent. 10-year, to Messrs. Curran Brothers, Regina.

The Cap R.M., Sask.—\$10,000 6 per cent. 20-year, to Messrs. Curran Brothers, Regina.

Montreal, Que.—\$334,000 4 per cent. 30 years, to Royal Securities Corporation, Montreal.

Calgary, Alta.—\$750,000 4% per cent. 30-year, to Messrs. G. A. Stimson & Company, Toronto.

Niagara Falls, Ont.—\$41,470 5 per cent. 20 years, to Messrs. Wood, Gundy & Company, Toronto.

Selkirk, Man.—\$13,000 5 per cent. 20 instalments, to Messrs. Wood, Gundy & Company, Toronto.

Prince Albert, Sask.—\$100,000 5 per cent. 30 years, to Messrs. Morton, Bartling & Company, Prince Albert.

North Toronto, Ont.—\$50,000 4% per cent. 30 instalments school bonds, to Messrs. Wood, Gundy & Company.

LARGE NUMBER OF NEW COMPANIES

**One Hundred and Fifty-eight New Concerns Receive
Charters—Their Aggregate Capital Exceeds
One Hundred Million Dollars**

The following is a list of charters granted during the past two weeks in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Red Deer, Alta.—Red Deer Nurseries, \$150,000.
Brooks, Alta.—Hotel Newell Company, \$60,000.
Tofield, Alta.—Tofield Clothing Company, \$1,500.
Rumsey, Alta.—Rumsey Hardware Company, \$10,000.
Daysland, Alta.—Canadian Threshing Company, \$10,000.
St. Paul des Metis, Alta.—St. Paul Mercantile, \$100,000.
Lethbridge, Alta.—Lethbridge Masonic Temple, \$100,000.
Kamloops, B.C.—Inland Sentinel Publishing Company, \$50,000.
Standard, Alta.—Standard Coal and Development Company, \$500,000.
Woodstock, Ont.—Hay and Company, \$200,000. T. Lyall, M. Douglas.
Brandon, Man.—Cook Brothers, \$40,000. J. G. Cook, S. W. Cook, W. More.
Port Credit, Ont.—Port Credit Club, \$25,000. J. E. Hall, D. C. Cotton, W. C. C. Innes.
Galt, Ont.—Crescentwood, \$24,000. A. K. Goodman, D. G. M. Galbraith, H. McKean.
Sifton, Man.—Kennedy Mercantile Company, \$20,000. W. Barrie, J. Kennedy, J. Reid.
Stouffville, Ont.—Office Fittings, \$150,000. J. L. Gallo-way, J. C. Colling, T. M. Mulligan.
Prince Rupert, B.C.—Prince Rupert Experimental and Development Company, \$50,000.
Guelph, Ont.—Guelph Brick and Tile Company, \$50,000. H. Westoby, F. V. Samwell, P. Stuart.
Petite Riviere, Que.—La Compagnie le Girard, \$49,950. L. Girard, J. Larochelle, J. F. Vachon.
Kingston, Ont.—George Robertson and Son, \$150,000. B. W. Robertson, H. N. Robertson, W. Gill.
London, Ont.—Consumers' Co-operative Society, \$40,000. J. H. Struad, H. Hogg, J. Webster.
Niagara Falls, Ont.—Urban Realities of Niagara Falls, \$50,000. G. P. Ash, E. R. Dewart, W. L. Barker.
Morrisburg, Ont.—Canadian Steel Package Company, \$5,000,000. A. Flynn, B. B. Tucker, F. H. Broder.
Brantford, Ont.—Paris Brick and Clay Company, \$100,000. D. N. Hare, R. Hamilton, A. St. C. Towers.
Cardale, Man.—Cardale Building Company, \$5,000. D. N. Morrison, J. C. Reid, Cardale; T. Henry, Oak River.
St. Gregoire, Que.—Compagnie d'Aqueduc de St. Gregoire, \$49,000. A. Dessautels, N. Ricard, T. Turcotte.
St. Hyacinthe, Que.—Duhamel Rattan Furniture Company, \$50,000. J. A. Duhamel, P. E. Isabelle, P. Troie.
Southampton, Ont.—Southampton Lawn Bowling and Tennis Club, \$10,000. C. M. Bowman, W. C. Cone, J. Clark.
Sherbrooke, Que.—Compagnie d'Immeubles du Plateau Camirand, \$49,000. L. C. Bachand, C. E. Bachand, L. H. Olivier.
Neepawa, Man.—Laurentia Milk Company of Manitoba. \$400,000. A. F. McLaren, T. J. Dillon, Toronto; J. Crawford, Neepawa.
Megantic, Que.—Compagnie de Granit de Megantic. \$20,000. T. M. Craig, Sherbrooke; L. Bolduc, Megantic; E. Huard, Megantic.
St. Sylvere, Que.—Compagnie Industrielle de Saint Sylvere, \$99,000. J. A. Bourbeau, Quebec; O. Hardy, St. Sylvere; H. Mailhot, St. Gertrude.
Quebec, Que.—Eastern Gas Engine Company, \$4,500. C. H. Lenage, G. A. Bergeron, L. Robitaille. La Compagnie Le Parc St. Charles, \$90,000. M. Fiset, A. Dion, V. Martin, Levis.
Medicine Hat, Alta.—Strathcona Park Company, \$60,000. Medicine Hat Loyal Order of Moose Temple Company, \$150,000. F. M. Ginther Land Company, \$250,000. Brier Land Company, \$75,000.
Hamilton, Ont.—Chadwick Brass Company, \$800,000. A. L'E. Malone, A. Mearns, F. L. Whatley. Alberts, Limited, \$200,000. L. Carr, W. T. Snyder, A. Ross. Winona Gardens, \$40,000. T. Hobson, O. D. Peat, H. S. Lees.

Vancouver, B.C.—Amalgamated Trust and Trading Company, \$1,000,000. Peace River Securities Corporation, \$10,000. Pacific Coast Auto and Transportation Company, \$500,000. Walsh, Ogilvie, \$25,000. Lotus Hotel Company, \$100,000. Burrard Heating and Sheet Metal Works, \$10,000. Dunhill's (British Columbia), \$100,000.

Toronto, Ont.—McAlpine Tobacco Company, \$100,000. T. A. Rowan, H. A. Newman, N. Sommerville. Toronto Electric Motor Car Company, \$300,000. J. A. Riordan, A. E. Adams, E. C. Coleman. International Hygienic Corset and Accessories Association, \$50,000. E. Knox, H. D. Anger. Electrical Utilities, \$50,000. J. Fowler, J. A. Macdonald, R. V. Hunter. Hayden Gold Mines, \$2,000,000. J. G. Shaw, J. Montgomery, H. P. Edge, American Cement Tile Manufacturing Company of Canada, \$40,000. D. M. Robertson, J. N. Black, A. A. Adams. Strachan, Burden and Plaskett, \$40,000. R. J. Plaskett, E. L. Burden. E. P. Brown. Canadian Manufacturers' Agency, \$20,000. F. Hannan, F. E. Earl, C. E. Sellery. Thor Iron Works, \$100,000. J. H. Malone, J. E. Russell, C. H. Cunningham.

Edmonton.—Investments, \$500,000. Presto Heater Company of Alberta, \$150,000. Dunvegan Securities, \$15,000. Edmonton-Prince Albert Investment Company, \$100,000. Boyle Progressive Concrete Company, \$200,000. Grouard Investment Company, \$50,000. Edmonton Gravel Company, \$100,000. William Sugarman Company, \$15,000. J. H. Lavallee Company, \$40,000. Mirrow Publishing Company, \$10,000. Carnegie Real Estate Company, \$15,000. Heath's, \$10,000. Standard Investments, \$50,000. A. F. MacLaren Cold Storage Company, \$300,000. Royal Alexandra Hotel Company, \$250,000. Athabasca and Edmonton Investment Company, \$10,000. Edmonton Loan Company, \$10,000. Winnipeg Safe Works, \$10,000. Glasgow-Alberta Investment Company, \$100,000. John W. Currie, \$10,000. Nakamun Asphalt and Oil Company, \$1,200,000. Canada Lands, \$100,000. Great West Supply Company, \$50,000. Leland Temperance Hotel Company, \$10,000. Arctic Ice Company, \$100,000. Lenox Dining Room, \$10,000. Harkin Company, \$25,000.

Montreal, Que.—Catherine Realities, \$65,000. R. B. Hutcheson, A. M. Vineberg, L. G. Robinson. Hillcrest Park, \$200,000. T. M. Papineau, A. Angers, G. H. Flawn. Rousseau Brothers, \$100,000. F. G. Bush, G. R. Drennan, M. J. O'Brien. Motor Service Company, \$500,000. J. A. Bonin, J. Morin, A. Laramee. Structural Engineering Company, \$50,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. International Engineering Works, \$1,500,000. G. H. Cahan, Jr., O. B. MacCallum, M. Lewis. Midland Investment Company, \$99,000. S. W. Stevenson, W. E. Bolton, A. Chase-Casgrain. Ice Manufacturing Company, \$1,500,000. T. S. Owens, P. S. Conroy, H. MacIntyre. Cote Saint Luc Realty, \$150,000. C. A. Smart. Westmount; C. E. Archibald, Montreal; M. H. Day, Westmount. Eastern Canada Realty Company, \$20,000. S. G. Tritt, A. S. Goldstone, M. Marcus. Independent Shoe Company, \$49,000. E. L. Patenaude, Z. Filion, G. Monette. Commercial Realty Company, \$20,000. W. G. Pugsley, J. Elmsly, W. Molson. Le Club des Voyageurs de Commerce, \$80,000. Y. Lamontagne, F. Marrie, E. Bouchard.

Calgary, Alta.—Calgary Baptist Church Extension Board, \$3,000. Anglo-Canadian Cattle Company, \$1,000,000. Canadian New Town Company, \$50,000. Commonwealth Trust Company, \$2,000,000. Wood, Valance and Adams, \$500,000. Occidental Oil and Gas Company, \$250,000. Banff Trail Land Company, \$10,000. MacLean Engineering Company, \$15,000. International Investors, \$30,000. Louis Petrie, \$150,000. Furniture Manufacturers of Calgary, \$50,000. Rose Copper, Mining and Exploration Company, \$100,000. Butchers' Supply Company, \$50,000. Western Steel and Ornamental Iron Works, \$100,000. MacKinnon Lumber Company, \$20,000. Westminster, \$250,000. Bow Crushed Rock and Gravel Company, \$30,000. Calgary Petroleum Products Company, \$150,000. Clover Bar Heights Land Company, \$100,000. Brick and Supplies, \$125,000. Chapman Drillers, \$25,000. Robinson's, \$75,000. Canadian North-Western Association, \$10,000. Mapes Company, \$100,000. Western Ideal Bedding Company, \$50,000. Budden, Beard and Cannon, \$10,000. Robertson and Carlile, \$25,000. Graham and Thompson, \$40,000. Alberta Pacific Grain Company, \$3,000,000. J. Black, J. B. Roberts, D. L. Redman.

Winnipeg, Man.—Reliance Land and Investment Company, \$100,000. W. K. Bagnall, M. Schneider, C. E. Reynolds. Queen Charlotte Land Company, \$20,000. W. H. Barbour, W. J. Rennie, F. R. Mitchell. National Mortgage and Finance Corporation, \$500,000. F. K. Hamilton, H. E. Johnston, A. Bernstein. Dominion Utilities Manufacturing Company, \$100,000. D. W. McKay, H. C. Crawford, F. W. Louthood. Brandon Securities Company, \$100,000. M. Anderson, T. J. Murray, A. Adams, F. A. Dunlop, \$100,000. A. C. Miller, R. W. Wydeman, F. J. Browne-Wilkinson. Industrial Development Syndicate, \$20,000. F. Leitner, J. S.

Stephenson, P. C. Samwell. Thompson Investments, \$100,000. W. J. Thompson, M. A. Thompson, W. J. Donovan. Hogle Garage Company, \$100,000. F. G. Hogle, W. M. Ingram, L. Dingman. Empire Traders Syndicate, \$100,000. A. W. Montgomery, H. Meekling, A. D. Campbell. Dominion Publishing Company, \$10,000. J. H. Black, S. L. Goldstine, L. D. Morosvick. Northern Realty Investments, \$40,000. H. M. Millman, W. M. Crichton, R. W. McClure, N. T. MacMillan, \$3,000. N. T. MacMillan, J. J. MacMillan, D. R. C. MacLean. Hargraft, Gooderham and Melady, \$100,000. A. R. Hargraft, H. D. Gooderham, H. E. Sellers. Wiltse Construction Company, \$10,000. J. H. Wiltse, H. Wiltse, E. L. Fisher. William Galloway Company of Canada, \$250,000. W. Galloway, J. W. Henderson, B. F. Swisher, Waterloo, Iowa. North Brazeau Coal and Coke Company, \$500,000. Hon. Hugh Armstrong, R. McLennan, D. G. McKay. Square Dean Grain Company, \$250,000. M. M. Perdue, W. E. Davidson, H. Ormond. Lee's, \$25,000. R. E. Oaks, J. H. Radford, S. L. Goldstine. George Velie Company, \$250,000. S. Velie, A. W. Stiefel, G. Williams. International Holding Company, \$100,000. J. C. Miller, P. H. Chapman, G. S. Francis. Horton Investments, \$100,000. G. E. Horton, N. R. Greer, J. S. Ferris. John Billings and Company, \$60,000. J. Billings, R. L. Billings, I. Salberg. Le Pas Townsite Company, \$100,000. R. Rosenblat, H. J. Riley, C. N. Jamieson. Archibald Kenrick and Sons (Canada), \$5,000. A. C. Jaconbs, D. McKenna, C. N. Jamieson. Canada Land and Loan Company, \$500,000. E. B. Eadie, R. Siderfin, J. Ledingham. E. H. Taaffe and Sons, \$5,000. E. H. Taaffe, H. W. Taaffe, H. P. Grundy. Great West Stock and Bond Company, \$5,000. C. H. Dickson, H. N. Streight. Wallingford Press, \$5,000. J. A. Warren, J. B. Harrison, A. Adams. Harry C. Bruce Townsite and Realty Corporation, \$50,000. P. J. Proctor, H. C. H. Brayfield, L. D. Smith. St. James Security Company, \$100,000. E. A. Conde, F. C. Kennedy, J. H. Cotter. Western Estates, \$60,000. J. M. Kane, J. W. McVey, R. R. McVey.

CROP OUTLOOK

Speaking of the crop outlook, Sir Thomas Shaughnessy says:—"The continued wet weather is unfortunate, as it is delaying the crop movement. We have cars distributed throughout the West waiting for the grain movement to start. The transportation situation this fall all depends on weather conditions. If it clears up there will be no great danger of a blockade on our lines but if it remains wet it will be bad."

"The crop of last year started to move later than ever before. I am sorry to say that this year's crop will be still later." That is the opinion expressed by George Bury, vice-president of the Canadian Pacific Railway Company.

"Owing to the wet weather this year the crop will all move together, and will place a greater strain than ever on the railways."

DEVELOP BRITISH COLUMBIA'S PORTS

(From the Victoria Times.)

An attempt is being made to attribute to The Monetary Times a spirit of jealousy because it has declared the Hudson Bay route impracticable for trans-Atlantic shipping. By so much as this attempt may be effective it amounts to a discouragement of those who would seize an opportunity to advance, freshly and forcibly, the claims of British Columbia to generous expenditure for Pacific coast ports. This is scarcely what would be naturally expected from newspapers interested sincerely in the development of the British Columbia shipping facilities.

The contention is, however, extremely illogical. No paper has ever said as forcibly and with as clear and convincing argument that the Pacific Coast ports are the natural ports for a large proportion of the grain shipments of the Middle West as has The Monetary Times in the articles from which this paper quoted. It is impossible to believe that a Canadian financial paper would declare the Hudson Bay route impracticable from motives of jealousy when the burden of its whole article is an urgent appeal to both the Dominion and provincial governments for generous expenditure in the development of the coast ports.

It seems regrettable that as soon as the Times newspaper should discover and publish a bona fide argument upon which the interested bodies in British Columbia could base an effective appeal to the governments for a more rapid development of coast shipping that such arguments should be belittled by attributing to them motives of jealousy. This is not a good way to secure for Victoria the recognition and material assistance it requires in the advancement of its shipping facilities.

RURAL DEPOPULATION AND CIVIC RESPONSIBILITY

How to Bridge the Gap Between the Farmer and the Consumer—Suggestions of a Correspondent

Editor, Monetary Times:—

Sir,—Your reference last week to the drift of the rural population to the cities and to the problem of lessening the gap between the farmer and the consumer, raises a question in which our cities have a direct interest. The answer appears to lie largely in the facilities afforded for transportation, more particularly by the interurban electric railways, and in the facilities which the cities afford to these railways in reaching central markets within the cities. The electric road alone can furnish, from nearby points at a reasonable cost, the necessary quick, frequent transportation with numerous stops, and at the same time meet the civic requirements as to cars operating on the streets.

Presently, when the weather and roads permit, market supplies are brought in by wagon by the farmer living nearby or by men who tour the country collecting such supplies. The large district within a radius of 25 to 30 miles of a city like Toronto should be dotted with market gardens, poultry farms, etc., but, as a fact, the want of quick, cheap transportation, independent of the state of the highways and the weather conditions, and the absence of three of four well situated markets in different parts of the city where the citizen and farmer could meet, do not specially encourage such gardens and small farms. Only by co-operation between the interurban electric roads and the cities, will the problem be solved. Thus far, no facilities whatever have been afforded these railways to reach convenient market points within any of our cities, and with the enormous cost facing each railway through having to cross the public streets and buy the right-of-way between these streets, there has not been fair encouragement to construct these roads.

Electric Lines and Civic Markets.

What is wanted in this respect in connection with these transportation problems and the cheapening of market produce, may be summed up as follows:—

1. The cities should provide within their limits, electric lines, or trackage facilities for such lines, to enable the interurban roads to reach central points where civic markets would be established to which the farmers could come to sell and the citizens to buy.

2. The larger cities should establish more than one of such markets and provide surface or tube lines to each from the city limits, or track facilities for such lines, the same tracks being also used for every day passenger traffic of the interurban roads using them.

3. The market buildings should be of such character that the specially constructed cars of the interurban companies could carry the farmer and his produce directly into the market building, where the city should, at a nominal figure, furnish the necessary room for the accommodation of the farmer in displaying his produce. This would bring the citizen into direct contact with the farmer from points as far as 25 to 30 miles away and would immensely encourage the establishment of market gardens, poultry farms, etc., along the line of each interurban railway.

Cheap Fares and Quick Transportation.

The interurban electric road would do more. The cheap fares and the hourly quick transportation would enable the farmer living at distant points, to visit the city whenever so disposed, and, through the use, also, of the rural telephone and the rural postal delivery, become more reconciled to the country, whilst, on the other hand, as the cities become more congested, and rents and other living expenses increase, the hourly, reliable service of the interurban road, will lead to city men living with their families at country points and coming into the city daily for business purposes. Thus these roads will contribute towards stemming the drift of population to urban centres.

Illustrating the business, chiefly special to themselves, which the interurban roads already have built up, the four leading interurban roads of Southwestern Ontario carried, last year, an average of 59,630 passengers per mile. It is not possible to obtain comparative figures for the steam roads, in the same district, but the average travel per mile of the steam roads of the whole of Canada is only 1,460.

Yours, etc.,

A. T. Drummond.

Toronto, September 25th, 1912.

The American Insurance Company, of Newark, N.J., with capital of \$1,000,000, has been registered in Alberta.

CHARTERED ACCOUNTANTS' CONVENTION

Proper Audit Would Have Saved Two Banks—Reports Presented from Provincial Institutes

The Dominion Association of Chartered Accountants held their annual convention in Toronto this week. The attendance of members with their guests of the seven provincial institutes which comprise the Dominion Association was: Nova Scotia, 3; Quebec, 9; Ontario, 112; Manitoba, 8; Saskatchewan, 3; Alberta, 1; and British Columbia, 1. Visiting accountants were Mr. A. E. Greene, of London, England; Mr. George Wilkinson, C.P.A., of New York; and Mr. J. P. Joplin, C.P.A., of Chicago, together making a total of 140.

After registration and reception of the visitors, the proceedings opened with the presidential address of Mr. George Edwards expressing his views on current professional affairs. The appointment of committees and auditors followed. In the afternoon session the principal work was the consideration of the report of committee of uniformity of standards amongst provincial societies. This aroused considerable discussion, but although the idea of examination papers on subjects of accountancy, common to the whole Dominion, is superficially attractive, maturer thought showed it to be not practical nor feasible in application.

Transportation for Men and Merchandise.

On Wednesday evening the members of the association held their annual banquet. The guest of the evening was the Hon. W. T. White, minister of finance, who was supported by Mr. D. R. Wilkie, president of the Imperial Bank, and the Hon. W. J. Hanna, provincial secretary. Other guests were President Falconer, of the University of Toronto; Mr. E. F. B. Johnston, K.C., honorary president of the Law Society; and His Worship Mayor Geary.

After dinner Mr. White addressed the company. He referred to the resources of the country and emphasized the primary, fundamental and overwhelming importance of good transportation for men and merchandise. He then touched on the enormous volume of the country's trade (Canada's manufactured products were \$1,200,000,000 per annum) and the urgency for more and more capital. From thence by easy stages to the necessity of controlling and safeguarding that capital which was "raison d'être" of the profession of chartered accountants. He insisted that what was required of them was primarily "force of character and integrity of character." "I don't know any occupation," he said, "that calls for finer judgment. A narrow minded auditor was a source of irritation to those with whom he had business relations; but a broad-gauge minded man as auditor was an essential to the good conduct of every business of size and complexity." He besought his audience to consider themselves, when auditors of a public company, as trustees for the public and to regard their responsibilities in that serious light.

Paid High Tribute to Accountants.

He paid the highest possible tribute to chartered accountants who were rapidly making themselves as respected and looked up to as their professional brethren in the mother country. "Good auditing," he declared, "would have saved the Ontario Bank and prevented the frauds in the Farmers Bank." The toast of kindred societies was responded to by Mr. George Wilkinson, C.P.A., of New York, and Mr. J. P. Joplin, C.P.A., of Chicago. The Hon. W. J. Hanna replied for the guests and paid tribute to the assistance he had received from the Ontario Institute in redrafting the companies act, and in other matters in which, he claimed, their assistance had been invaluable.

Business was resumed on Wednesday morning by the reading of an able paper on "The Audit of Real Estate Accounts," by Mr. C. R. Hegan, of Winnipeg. This dealt with the accounting under the deferred payments plan, the accounts of companies which make a business of purchasing sale agreements, the declaration of stock dividends to cover enhanced real estate values and other technical matters connected with the accounting of real estate finance. Discussion hereon was opened by Mr. Bryan Pontifex, of Toronto, who was followed by Mr. A. K. Bunnell, of Brantford (president of the Ontario Institute); President J. G. Ross, of Montreal; Mr. C. V. Gladwell, of Regina; Mr. Edmund Gunn, of Toronto; Mr. C. W. Baker, of Montreal; Mr. H. J. Welch, of Toronto and others.

Official Organ Popular.

In the afternoon there was a long discussion on the "Canadian Chartered Accountant," the official organ of the Dominion Association. Mr. G. U. Stiff, F.C.A., of Toronto, has been the honorary editor of this since the first issue two years ago, and has brought it to its present high pitch of utility. So popular is this magazine, which is subscribed to by every chartered accountant in the Dominion of Canada, that a demand was made on all sides for a monthly instead of

a quarterly issue, which was not insisted upon for the sole reason of throwing too much work on the honorary editor.

The need of professional libraries, both reference and circulating, and the best method of commencing, maintaining and administering such was discussed. This matter has too long been deferred considering the technical and varying work of latter day accountants and the association are indebted to the member who brought this matter up and insisted on its importance. At present only Winnipeg has such a library, although several of the students' associations were stated to have considerable libraries.

Winnipeg Chosen for Next Convention.

Reports were presented from the seven provincial institutes dealing with their legal status, their students, their examinations and other matters. The Montreal Association, incorporated in 1880, reported a present membership of 58 members; the Ontario Institute, incorporated in 1883, now 172 members; Manitoba, 1886, 42 members; Nova Scotia, 1900, 19 members; British Columbia, 1905, 29 members; Saskatchewan, 1908, 23 members; and Alberta, 1910, 18 members—a total membership of 361 in the Dominion.

The annual meeting of 1913 was fixed for Winnipeg, on the invitation of Mr. W. A. Henderson, of the Manitoba Association, who supported his request of the meeting being held in his city, by producing a telegraphed invitation from the Mayor of Winnipeg. Mr. H. M. Cherry, Mr. C. R. Hegan, and Mr. H. T. Reade, all of Winnipeg, supported the invitation, which was cordially accepted. Halifax was proposed for the 1914 meeting and Vancouver for 1915.

Mr. W. A. Henderson, of Winnipeg, was elected president for the ensuing year, and Mr. E. Kaulbach, of Halifax, vice-president. Mr. George Edwards relinquished the office of president under full appreciation of his services.

Among the leading Toronto practising accountants present were:—Mr. Henry Barber, Mr. G. T. Clarkson, Mr. W. H. Cross, Mr. W. C. Eddis, Mr. Bryan Pontifex, Mr. T. W. Sime, Mr. Osler Wade, Mr. J. H. Young, and Mr. R. E. Young. That so much business was smoothly carried through in a convention of only two days, was undoubtedly due to Mr. J. I. Sutcliffe, secretary of the central committee on arrangements.

NATIONAL STEEL CAR COMPANY

The National Steel Car Company has been incorporated for the purpose of building and operating a plant for the manufacture of wood and steel freight cars. The location of the plant will be at Hamilton, Ont., and the head office at Montreal. The authorized capital is three million dollars seven per cent. cumulative preference stock, and three million dollars common stock, of which \$1,500,000 par value preference and \$2,000,000 par value common will be issued. The amount issued is considered adequate for the building, equipping and operating of a thirty-car plant, while sufficient stock is retained for future growth. The principal Canadian railroads experience considerable difficulty in placing orders with existing firms for a quick delivery, and this the National Steel Car Company begins business with an existing demand for its products. The estimated average earnings working at sixty per cent. of its capacity is given as \$400,000, which is sufficient to pay the 7 per cent. dividend on the preferred stock, and leaving \$295,000 available for common stock dividend.

The management of the company will be in the hands of Mr. Basil Magor, president of the Magor Car Company, Passaic, N.J., who is resigning that position which he made a success, believing in the possibilities offered in Canada. Mr. A. Butze, for many years purchasing agent of the Grand Trunk Railway, will act as the company's purchasing agent.

The cost of construction of the plant has been estimated by Messrs. Barclay, Parsons and Klapp, consulting engineers, as \$649,730. The house of issue is Messrs. Brouse, Mitchell, members Toronto Stock Exchange, Colborne Street, Toronto. Sir John Gibson, Sir Henry Pellatt, C.V.O., Toronto; Messrs. W. K. Price, New York; C. H. Cahan, Montreal; M. H. Coggeshall, New York; M. Davis, Montreal; Basil Magor, Montreal; W. Barclay Parsons, New York; W. G. Ross, Esq., Montreal; J. J. Scott, and W. Southam, Hamilton, have consented to act as directors.

The name of Shearer, Brown and Wills, Limited, has been changed to that of The James Shearer Company, Limited.

A meeting of the Allan Line directors held in London was of a private nature, but it is understood that arrangements were made consequent upon the retirement of Sir H. Montagu Allan from the board. The new directors include Mr. Frederick Williams Taylor, London manager of the Bank of Montreal; Mr. Hugh Allan, chairman, and Mr. Andrew Allan, continues to represent the Board in Canada.

PREFERENCE IN INVESTMENT

Of the Cosmopolitan Investor—Patriotism Not Equal to Minus Two Per Cent.—Dr. Vrooman's Address

That British money was better invested where it would build up the British Empire than where it would build up a possible enemy and certain competitor of the British Empire—provided the Empire offered a better economic security in the natural resources and the people behind the investment; provided, further, it offered a better political security for the protection of that investment, and provided, once more, that it would earn a better dividend, was the assertion of Dr. Vrooman, of Vancouver, in an address given in London. If he claimed that 6 per cent. under the British flag was better than 4 per cent. anywhere else, he should not like to be thought of as reckoning patriotism as equal to minus 2 per cent.; for his claim, simply, was that it was better to be building up the Empire where it did not cost them anything. Nevertheless, the time had come when it was an Imperial necessity to organize the business and finance of the Empire with reference to the Empire. There were vast quantities of the nation's wealth which were no longer Imperial assets.

As to the Cosmopolitan Investor.

The cosmopolitan investor sought what would make him the most money. He did not always find it. But this frankly was his aim, and he never mixed patriotic sentiment with business interests. He looked over the field and said to himself, "If I put my money yonder, I will get such and such a dividend. 'It is so denominated in the bond.' To be sure my money is alienated from my own race; it will go out to pay wages to alien races and not to the men of my own stock; it will never help to build up the institutions to which I was born; it will contribute nothing to the stability of the Empire which is the bulwark of my belongings and the guarantee of my investments, but I never mix sentiment with business."

The other type of man was called a narrower type, but he knew that if he invested his money within the Empire he was helping to build up that Empire. He was helping to develop its resources. He knew the money would be coming back to the industries of this country to buy its goods and pay its wages and support its commerce, its shipping, and its banking, and that all these large industrial and commercial inter-relations were directly dependent upon his own and similar investments, for these interrelations held the Empire together. They furnished security not only within the Empire for his own investment, but in keeping up the Army and in keeping the British Navy afloat they guaranteed the integrity of his own and his cosmopolitan neighbor's investment, so that he also might be safe, and so that he could invest selfishly with impunity.

Financier as Statesman.

The financier who was also a statesman could not possibly consider an investment merely in the light of the present and immediate dividend. He must consider the social and political aspect of investments in all their large and reciprocal relations. In the case of a choice, for example, between foreign and British railroads: in the one case all the reciprocal and interrelated advantages of capital were lost—were not only lost, but were actually building up competitors; and in the other case all these advantages were assets in the building up of British Imperial wealth. When British investments were diverted into unrelated parts of the world outside the Empire all this strength and interrelation were lost. The momentum of increment was lost. The future of that investment was lost to the Empire, and they drew nothing but a dividend at Imperial expense. For example, their fifty-eight or sixty millions invested in Japan were building up their keenest rival on the Pacific Coast, threatening the supremacy of both their shipping and their industries; while the billion and a half in the British colonies overseas constituted the keystone of the arch of Imperial prosperity.

To Draw an Incidental Dividend.

It would be hard to imagine the growth of the nineteenth century without the three and a half billions sterling, more or less, which they had sent out from these islands as their contribution towards world-development—to draw an incidental dividend. This dividend of about 5.2 per cent., which had been returned to them, it was the main object of his paper to show, was not the only fruit of their sowing. Roughly speaking, perhaps more than half of the £775,000,000 which had gone out in the last five years had been directly or indirectly invested in railroads at about two pounds to foreign railways to every pound for British railways. For example, in round numbers, in 1908 the proportion was 43 to 21 millions in favor of foreign railways as against India, Ceylon and the Colonies. In 1909 the proportion was a trifle more in their favor, while in 1910 it was 42 millions as against 14 millions. Now, if the world at large had depend-

ed so much on British capital for its development, how much more had the colonies depended on that support? The railways they had invested in had done more than all else to develop the Empire up to date. There were other resources now to be developed besides bringing the ends of space together. Was it idle to ask what Canada would have done without its transcontinental roads, and, indeed, where outside the Empire had they found such railway investments as, for example, in the Canadian Pacific Railway—that was the railway which made Canada famous—the Grand Trunk, and the Canadian Northern, which were to-day the pride of the business world?

Element of the Future.

He wished briefly to illustrate his general argument by referring to that part of the Empire with which he was most familiar; not only as to the earning power of an investment, but as to the economic security of an investment. The element of the future was an essential consideration in investments, and to be able to look ahead the economic power of a country must be predetermined. The very little that was known of Canada, with all of its natural resources, must be supplemented by a very large faith and a profound optimism. They must remember in the first place how overwhelmingly the march of events in Canada for fifty years had outstripped the swiftest wings of early optimistic dreams, and they must remember also how every croaking Jeremiah had been put to shame by the cold facts which had been revealed in this, probably the most phenomenal development within its time limit in the history of the world. Here was a fundamental proposition which must be kept in mind in all the consideration they gave to Canada with regard to its past, past or future—that no reputable person in the history of the Dominion within the last forty or fifty years had been able in looking forward for any considerable time to make any predictions as to the future growth and development and prosperity of Canada, which had been bold or daring enough to keep up with the actual development of the country. There had been no dream which had not been overtaken by the facts.

What Made Canada Great?

In the discussion which followed Dr. Vrooman's paper, Mr. W. R. Lawson asked what had made Canada great, and to whom did Canada owe its greatness? The power which had been given to Canada to develop itself came from the United Kingdom. It made a free gift to the Canadians of 3,000,000 square miles (2,000 million acres) of land, some of which was now being bought back at £40,000 an acre. In addition to that, these islands had put £227,000,000 in Canadian railways, the Ordinary Stock of the best known of these railways standing at 29½. For every 29½ that was represented the United Kingdom 60 years ago paid £100 in gold. The next thing which Canada obtained from the United Kingdom was about £300,000,000 for industrial investments—opening up of its magnificent coalbeds and lumber forests which had always paid good dividends. That was pretty fair for a community of about 8,000,000 to get from the United Kingdom. It had also to be borne in mind that Canada so far had not contributed to the defences of the Empire. As to the question of preference for the sake of the British Empire, he would like to point out to Canadians that they had had a most valuable preference during the last sixty years, Canada being able to raise money in the United Kingdom at a cheaper rate than any other country in the world, and at the present time some Canadian securities stood actually at a higher level than British Consols. After referring to the fact that the Canadians were investing British money to the extent of 460,000,000 dollars in South America, and quoting extracts from the American Consular Reports to confirm his statements, he said it must be recognized that England had not dealt with Canada on hard and fast business lines. There had been a great deal of sentiment in our relations with the Dominion. British capital had been used for the development of the wheat-growing provinces, much to the detriment of the British farmer, he not having had a fair chance in this country since that development had begun. Finally, as to preference, Mr. Lawson said that Mr. Chamberlain, when he launched his Imperial preference policy, should have told Canadians and Australians that Great Britain had given them a preference of 2 per cent. on their borrowing, and that if they in return gave a substantial preference on imports from the United Kingdom they would be only doing that which was proper.

Survey is being made for an electric line from Port Haney, on the main line of the Canadian Pacific Railway 26 miles east of Vancouver, and also on the Fraser River, to Lillooet Lake. It is presumed that this is being carried on by the British Columbia Electric which has water rights on the river and lake, and which it will develop. This company is rapidly extending its interests on the lower mainland and at Victoria.

RAILROAD RATES

Factors Upon Which They Should be Based—Railroad President's Views

"The only just method of determining the reasonableness of transportation charges is to measure them by the service performed." That was a recent statement of Mr. W. W. Finney, president of the Southern Railway Company. "This is all right as far as it goes," replied a newspaper editorial, "but will not Mr. Finney tell us how to apply this yardstick?" Subsequently, the railroad president did so, and in response to a request, he has forwarded his views on the matter to *The Monetary Times*.

At the outset, he says, it should be borne in mind that the railways of the United States—although public highways, and, as such, properly subject to such governmental regulation as will insure to all citizens equality of rights on them, under similar circumstances and conditions, and as will prevent unreasonable or extortionate charges—have, nevertheless, been built with private capital and are the private property of their owners.

Safety of Capital.

It is a fundamental economic truth that the investment of funds in any class of property is dependent on the safety of the principal and the rate of profit that may be expected as compared with the rate that can be earned on investments in other kinds of business. In other words, the flow of capital into any particular business will be retarded unless it may be expected to earn a reasonable profit as compared with the earnings of capital in other enterprises.

The question of what is a reasonable charge for a specific service is complicated by the fact that neither as a matter of transportation policy or of public policy can charges on all classes of traffic be uniform. Commodities of great weight or bulk in proportion to their value must be carried at rates substantially lower than those which may properly be charged for the carriage of commodities which are of high value in proportion to their weight or bulk.

As a result of the necessity for different rates on different classes of commodities, each individual rate or each rate applying to a class of commodities must be considered on its merits in its relation to the particular service performed. The cost of performing the service, as nearly as it can be ascertained, must certainly be taken into consideration. No rate should be made so low as not to pay something more than what Mr. Acworth, the eminent English economist, has aptly termed "the actual out-of-pocket cost" of moving that particular traffic. If it pays this cost and contributes, even in a small measure, toward the general expenses and fixed charges of the carrier, it is a profitable rate, provided the carrier has a considerable volume of traffic moving at higher rates. The low-class traffic moved at these low rates is not a burden on the higher-class traffic, for, by just so much as it contributes to general expenses and fixed charges, it reduces the amount which the higher-class traffic must contribute. In practical rate-making the question of the cost of the service has a controlling bearing only as determining the level below which a rate can not properly be made.

Value of Service Performed.

The value of the service is another important factor in rate making and in determining the reasonableness of a rate that may be challenged. Transportation enables those engaged in any given industry to carry on their business in those localities best suited for it and to market elsewhere the surplus not needed for consumption at the point of production. By moving commodities from places where the supply exceeds the local demand to places where they are scarce and are wanted, additional value is given to the whole volume of production—including the proportion consumed locally, as well as to that carried to other markets. As affecting the consumer of, let us say, cotton goods—by way of illustration—the carriage of the raw cotton to the mill and the transportation of the finished goods to his market, is a process of production. This transportation gives added value to the raw cotton produced on the farm and to the goods procured in the cotton mill, and the carrier is, therefore, entitled to fair recognition for its service in the process of producing the finished cloth and placing it in the hands of consumers, just the same as is the farmer and the cotton mill owner.

The increased value given to a commodity by transportation is the measure of the value of the service to the owner of the commodity. It is not, however, the absolute measure of a reasonable rate, for, if the transportation charges were so high as to absorb all of this increased value, the owner would have no incentive to ship and the traffic would not move. This may be illustrated by referring to the rail movement of a very low-grade commodity, such as ordinary sand—a commodity which is found in abundance in most localities and the value of which, generally speaking, can be very little increased by transportation. It is manifest that it would

be impossible to make a practical rate on sand for any such distance as from Philadelphia to Chicago, for the reason that the out-of-pocket cost of performing the service would be far in excess of the value of the service to the shipper.

As transportation has contributed all of the increased value which is given a commodity by its carriage to market, which, as we have seen, is a factor in effective production, the carrier is entitled to a reasonable share of that increase. The value of the service is, therefore, a most important factor in determining what is a reasonable charge for a specific transaction. Out of the intimate relation of the cost of the service and the value of the service to the reasonableness of a transportation charge grows the fact that, in an era of generally advancing prices, when both the cost of the service and the value of the service are increasing, the level of the reasonable charge for the service thus affected also advances.

In determining the proportion of the value of the service which the carrier may reasonably and justly charge for its part in creating that value, intelligent consideration must be given to comparison with rates charged by the carrier for other similar services, to comparison with the rates of competing carriers, to comparison with the rates at which carriers in other localities move the same commodity under similar circumstances and conditions, to comparison with the rates on similar commodities which might be substituted in use for the one in question, to the intrinsic value of the commodity, to the risk of breakage or other injury in transit, to the insurance risk, to the effect of the rate on the volume of traffic, and to the general condition of the business to which the special traffic is related. When the reasonableness of a rate is called into question, consideration and great weight must be given to expert testimony.

Effect on Traffic.

Of all these guides for determining the reasonableness of a specific rate, the effect on traffic is perhaps the most important, for an increasing volume of traffic is *prima facie* and almost conclusive, evidence that the rate is not unreasonably high, though it may be unreasonably low.

It will be seen that, in the final analysis, the reasonableness of a transportation charge is largely a matter of expert judgment. So is the reasonableness of any price or charge that may be called into question. If one of you employs a lawyer, without any agreement as to what his fee shall be, and, after the service has been performed, you decline to pay his bill on the ground that it is too high, he sues you for the amount of his bill. The question raised is what would constitute a reasonable charge for the service performed. and, on this, testimony will be introduced to show, primarily and principally, the value of the service to you. Testimony will also be presented as to the usual fees which this lawyer and other lawyers receive for similar services, as to the amount of time consumed, and the skill which he displayed in rendering the service. Based on this testimony the jury will form a judgment as to what is a reasonable charge for the specific service performed.

The same method is followed in condemnation proceedings when a railway company seeks to acquire land for railway purposes and fails to reach an agreement with the owner as to the price to be paid. The question here presented is as to the fair and reasonable present value of the land to its owner and as to the fair and reasonable amount to be allowed him for the damage, if any, that may result to his remaining property by the construction of a railway through it. Evidence will be considered as to the value of that particular strip of land, as to the profitability of the uses to which it has been put by its owner or of the uses to which it might be put. Evidence will also be considered as to the prices at which other tracts of land in the same locality have been sold, and on all these points expert testimony will be considered. The amount which the owner paid for the land, if bought sufficiently near the time of condemnation to be pertinent, may be introduced in evidence and will be considered, but it is not controlling on the jury, which, from all the evidence introduced, must determine what is the just and reasonable compensation to its owner at the particular time when it is taken.

In view of the growing importance of British Guiana as a market for foodstuffs, writes Canadian Trade Commissioner E. H. S. Flood, at Barbados, and of the fact that the legislature of the colony has passed the reciprocity agreement, which will come into force in the near future, Canadian exporters should as far as possible endeavor to take advantage of the favored market. Firms in Canada which have not already business connections in British Guiana may obtain lists of importers in their particular lines of business, and general information regarding the colony by corresponding with Mr. Flood's office.

AUGUST BANK STATEMENT

Chartered Banks are in Stronger Position Than Was The Case Twelve Months Ago.
Total Deposits Continue Large

	Aug. 1911.	July, 1912.	Aug., 1912.	Year's Inc.	Month's Inc. or dec.
Deposits on demand	\$311,111,663	\$372,012,494	\$360,575,425	+ 15.6	— 3.07
Deposits after notice	575,740,956	640,592,345	643,663,596	+ 11.7	+ 0.4
Current loans in Canada	743,683,962	852,256,651	852,045,624	+ 14.5	— 0.02
Current loans elsewhere	33,689,196	35,741,996	37,846,222	+ 12.3	+ 5.8
Call loans in Canada	65,106,110	70,407,734	75,194,735	+ 15.4	+ 0.7
Call loans elsewhere	101,713,820	117,961,437	114,847,864	+ 12.9	— 2.6
Circulation	90,630,530	95,827,534	101,501,270	+ 11.9	+ 5.9

The above are the principal figures and changes shown in the August bank statement. Compared with the July statement, few important changes have occurred during the month. The greatest increases are in circulation which shows a gain of about six million dollars or 5.9 per cent., current loans abroad exhibiting a gain of two millions, or 5.8 per cent., and call loans in Canada expanding five millions, or 6.7 per cent. The three accounts showing decreases from the figures of July are demand deposits, Canadian current loans and call loans elsewhere than in Canada. The losses are 3.07, 0.02 and 2.6 respectively. Compared with a year ago, the statement is far stronger, as a glance at the above table will show.

The following figures show the course of the loan account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1911—August	\$734,683,962	\$65,106,110
September	740,007,607	67,717,991
October	768,492,008	69,088,467
November	770,356,419	72,033,493
December	774,909,172	72,640,526
1912—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,040,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735

Only once during the thirteen months' period have current loans in Canada declined, and that was last month, when the loss was about \$200,000. This account has shown continued expansion and reflects a broad banking policy towards legitimate business. Brokers have complained of the lack of funds for their operations recently, but call loans in Canada, through which account most of their business is done, were extended during August by more than five million dollars, or 6.7 per cent. They were 15 per cent. greater last month than in August, 1911. The table at the foot of the page shows the expansion of the loan account for the past five years. From this it will be seen that current loans have changed from approximately 518 millions to 852 millions since August, 1908. Call loans in Canada have practically doubled, appreciating from 39 millions to 75 millions. Current loans abroad have grown from 23 millions to 37 millions, and call loans abroad from 62 millions to 114 millions. The following table shows the course of the domestic deposits accounts for the past thirteen months:

	Aug., 1908.
Current loans in Canada	\$517,984,921
Current elsewhere	23,729,816
Call in Canada	39,511,570
Call elsewhere	62,764,972

	On demand.	After notice.
1911—August	\$311,111,663	\$575,740,956
September	313,584,893	577,591,045
October	331,953,562	586,451,045
November	341,712,265	588,942,142
December	335,020,693	591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,180	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596

Five times since August, 1911, have demand deposits decreased, but they were approximately \$49,000,000, or 15.8 per cent. greater last month than in the preceding August. Deposits after notice continue to grow. Not once during the past thirteen months have they shown a decline. Total deposits in Canada are still maintained at over one billion dollars. The following figures show the growth of deposits since 1908:—

Aug.	On demand.	After notice.	Total.
1908	\$175,947,237	\$407,481,904	\$583,429,141
1909	228,397,679	472,591,818	700,989,497
1910	256,613,172	545,357,452	801,970,624
1911	311,111,668	575,740,956	886,852,624
1912	360,575,425	643,663,596	1,004,239,021

Demand deposits since August, 1908, have increased from 176 millions to 360 millions, a gain of 184 millions, or 104.5 per cent. Those after notice have changed from 407 millions to 643 millions, an increase of 236 millions, or 57.9 per cent. Total deposits in the same period have expanded from 583 millions to \$1,004,000,000, a gain of 421 millions, or 72.2 per cent.

Now that the time for financing the western crop has arrived, the bank statement has additional interest. Our chartered banks are in a stronger position now than twelve months ago, so far as concerns the crop movement. Paid-up capital since August last year has increased by more than 10 millions; reserve fund, by 13 millions; circulation, by nearly 11 millions; and total assets, by over 180 millions.

While the ordinary business of the country has made an increase in circulation necessary, still there is a margin of nearly ten million dollars between the amount of the notes outstanding and the paid-up capital, and after the ordinary limit is reached there will be power in the banks to issue emergency notes to the extent of 15 per cent. of their combined capital and reserve, which, if the occasion demands it, can be used to add \$30,000,000 to the amount of the circulation.

	Aug., 1909.	Aug., 1910.	Aug., 1911.	Aug., 1912.
Current loans in Canada	\$543,154,663	\$657,813,770	\$734,683,962	\$852,045,624
Current elsewhere	30,661,437	38,609,568	33,689,196	37,846,222

At Winnipeg, Man., a by-law for a supply of water from Poplar Springs was defeated.

The Canadian Talc and Silica Company, which owns a talc mine and mill at Eldorado, has purchased a property just east of the village of Madoc, Ont., owned by Mr. J. H. Curley, and known as the Conley property. The president of the company is Mr. H. Hungerford, of Chicago. The intentions of the company regarding the newly-acquired deposit are not made known, but it is supposed that another mill will be erected in Madoc, and ground talc shipped from there.

All motor vehicles propelled by steam, with the exception of pleasure automobiles, are prohibited from being used in the streets of Montreal.

The officers of the Accountants Students Society, Montreal, for the ensuing year are as follows: Hon. president, Mr. J. G. Ross, C.A.; hon. vice-president, Mr. A. K. Fisk, C.A.; president, Mr. L. Brimacombe; vice-president, Mr. G. McCarthy Jones; secretary-treasurer, Mr. J. W. Shaw, care of Macintosh & Hyde, C.A.; assistant secretary-treasurer, Mr. R. H. Pope; librarian, Mr. A. D. Hooper; executive committee, Mr. J. G. Birnie, Mr. E. Ross, Mr. H. S. Piper.

T. C. BOVILLE,

Deputy Minister of Finance

SHIPBUILDING INDUSTRY FOR BRITISH COLUMBIA

Canadian-built Ships Quicken the Pulse of Industry— Strong Arguments from the Pacific Coast

Canada should awake to the fact that the building of ships is possibly the most remunerative form of business in which any country can engage. This opinion was expressed by Mr. G. G. Bushby at a meeting of the Vancouver Board of Trade. From a national point of view it is most beneficial, he added, but from the standpoint of the individual or corporation desirous of actually engaging in the enterprise the outlook is not so alluring, as such a large amount of money is required to embark in an undertaking of this nature, that unless a steady flow of work can be obtained there can be no assurance to invested capital that the venture will be successful.

"It must be borne in mind that the establishment of shipbuilding yards is of the utmost importance and in the course of time these yards will become one of Canada's most valuable assets.

Interests Many Industries.

"There is not a single business man represented on this board of trade that will not be called up directly or indirectly to cater to the building of a ship. Just think what that means. The actual builder of the ship is mostly a sort of distributing agent for the activities and products of a thousand and one various trades, manufacturers and merchants.

"Build your vessel in Canada and you, in the broad sense of the term, will find a new market for your wares in supplying the shipbuilding with either home-made products or duty-paid imported goods. At the same time the workmen of Canada will find a new avenue of employment at good wages, which wages will eventually filter back into the channels of domestic trade, your own good selves again, and so the ball will keep rolling and the money spent for the Canadian-built ship will continue to circulate in the country of its origin for the benefit of Canada, her merchants, men and manufacturers.

Advocates a Bonus.

"Is it good business to withdraw a sum of money from circulation in this country for the purchase of a vessel abroad, when this money, in active circulation at home, will be available to further develop your own business and that of your commercial neighbors.

"It must be understood that we are not asking the government to place a protective tariff on British ships and are not attempting to force through legislation that might be objectionable to Great Britain. We are merely asking that the industry of shipbuilding in Canada shall be justly encouraged by means of a bonus of some description."

When Public Works Expenditure Lessens.

Mr. J. J. Shallcross, president of the Victoria Board of Trade, thought that the establishment of a shipbuilding industry in coast cities would be a great gain when the time came that their public works expenditure was diminishing. The first great difficulty was that the British ship was allowed to engage in trade here free of duty, but when a ship was built here the construction materials were subject to duty, in some cases of 51 per cent. It would therefore be impossible to build here under such conditions.

The reason for the privilege was found in the regulations of the Merchant Shipping Act. They could find no remedy by asking the Dominion Government to impose a duty on British ships. The remedy would have to be found in some other directions.

Lower Rate of Wages.

At present an order for two cruisers for the coast had been given a Dublin firm. They would, he felt sure, support him in considering that the government should not allow a British shipbuilder to take advantage of a lower rate of wages. All government work should be given to Canadian builders, and all work, so far as this province was concerned, should be given to British Columbia shipbuilders.

It appeared that it had not been the practice of the government to consider that Canada had existed so far as shipbuilding was concerned. It was the duty of British Columbia to build shipbuilding yards if they were given sufficient encouragement.

Pacific Coast Should Get the Work.

As to the contract of the two cruisers, for which an Esquimalt firm and the Black and Wallace shipbuilding yard were, he believed, the only tenderers, and who had only six weeks in which to tender, the contract went to the Dublin firm. The whole of the coast should demand a favorable reply to a request for that kind of work, and he considered they should get it, as they had justice on their side. Also they had a right to demand that as far as shipbuilding was concerned, Ottawa should recognize that British Columbia existed.

WOOL IN SOUTHERN ALBERTA

Southern Alberta's wool clip this year was about 160,000 pounds larger, and worth about \$16,000 more than that of any other year for the past five years, as the following table shows:—

	No. of pounds.	Price per pound.	Valuation.
1908	411,500	11 cts.	\$45,265.00
1909	416,565	13 ¼ "	55,179.86
1910	449,920	14 ½ "	65,238.40
1911	420,983	14 "	58,937.62
1912	604,053	13 ½ "	81,547.15

LIFE INSURANCE IN NORWAY

At present life insurance companies with Norwegian capital and about twenty foreign companies are operating in Norway. Of the Norwegian companies, the oldest dates from 1861 and the youngest from 1890. As to the amount of business done by the foreign companies, there are at present no statistics available, but it is safe to say that the insurance in effect totals up to a considerable amount.

While in the year 1890 the average life insurance on every inhabitant of Norway amounted to only about \$5, the year 1910 can show as high as \$28. This only refers to insurance in the Norwegian companies. The premium income for the same companies in 1910 amounted to about \$2,250,000 and the capital disposed of to more than \$20,000,000.

TRADE WITH TRINIDAD

Great Britain and the United States supplied to Trinidad in 1911 together about two-thirds of the imports for home consumption, Canada's share being only 7 per cent. of the total.

The following list shows the amount supplied by each of the principal countries contributing in the last two years:

	1910.	1911.
United Kingdom	£ 936,427	£1,026,070
United States	860,903	806,921
Canada	134,609	190,287
Venezuela	233,086	294,257
Others	405,844	437,865
	£2,570,869	£2,755,400

FOUNDING A SHEEP FLOCK

Since the new addition of the bulletin "Sheep Husbandry in Canada" was issued a few weeks ago, there has been a constant stream of requests for it flowing into the publication branch at Ottawa. A great many of the applicants state that they are just commencing, or are about to commence, sheep raising, and that they wish to learn how to handle a flock successfully. This bulletin contains a chapter specially prepared for such persons, describing how best to establish a flock of commercial sheep. The author, Mr. J. B. Spencer, recommends a flock of fifteen ewes as the minimum for a farm of one hundred acres. Such a flock can be increased with experience, but not beyond twenty to twenty-five unless it is desired to make a special business of sheep raising. With the management and care described in the bulletin, an increase through lambs can be expected of from 150 to 175 per cent., and it should be the latter. The early weeks of autumn is stated to be the best time to purchase ewes, as then one can select those that have raised good lambs. Before the present edition of the bulletin is fully exhausted a still further one will be ordered so that no one need hesitate about ordering a copy, which will be sent free to all who apply for it to the Publications Branch, Department of Agriculture, Ottawa.

Messrs. Maxime Beauvisage, Antony Thierree, Louis Galliard and Charles Michel, the four Paris directors of the Quebec Railway, Light, Heat and Power Company, who resigned prior to the recent annual meeting, made a statement of their position to the French shareholders, of the conditions, which led up to their determination to retire. Insufficient attention, they stated, had been paid to the advice given by them, and important steps were taken in opposition to their opinions. Unsatisfactory answers are alleged to have met their questions. They suggested the appointment of an engineer at the company's expense to report on the present condition of the company's property and the conduct of its affairs. The report, say the Parisian directors, had been greatly delayed.

CANADA'S PROGRESSIVE PACIFIC COAST

Railway Termini at Vancouver—Prince Rupert's Land Sale—Lumber Industry's Activity

(Staff Correspondence).

Vancouver, September 23rd.

Vancouver and the Canadian Northern Railway will probably soon get together regarding a location for the company at the head of False Creek. The company shows every desire to meet the city, and the more the subject is discussed, it is seen that in the establishment of Canada's new trans-continental line there will be a great advantage. When the Canadian Northern extension to the Pacific coast was first discussed in these columns, it was pointed out that the shipping terminus would not be other than at Vancouver, since navigation via the Fraser River to Port Mann was not convenient. This is borne out by the definite statement this week of Col. A. D. Davidson, representative of the railway company, who said that this city would be the headquarters of the shipping business done by the company on the Pacific coast and the home port. Colonel Davidson stated also that the company's depot would be the finest of any in Canada, and one of the best in America. When the point arose regarding the employment of white labor, he pointed out that Messrs. Mackenzie and Mann had never yet employed Orientals, neither had they asked that immigration barriers be taken down.

Transportation at Point Grey.

Point Grey ratepayers were decisive in their approval of the tram franchise agreement last Saturday, the vote being six to one in favor. This municipality has been without adequate transportation for several months and of late residents there have been very strongly in favor of something being done to provide street cars before the rainy weather sets in. The British Columbia Electric started cars running within a day or so after the vote was taken, showing its desire to meet the people when it was shown that the people were not all antagonistic to the company. Perhaps if the ratepayers of Vancouver had an opportunity of voting on the question of consolidation of all tram franchises in Greater Vancouver the vote in favor might be just as decisive.

Much prominence has been given this week to the enterprise of the Canadian Pacific Railway in revising its line through the Rockies now that a double track is to be installed. Perhaps the principal feature of the construction will be the eight mile tunnel under Rogers Pass. That this would be built was mentioned in The Monetary Times several weeks ago. The work is one of great magnitude, but it is expected that the double track will be run through in four years.

Consummation of the deal whereby the Vancouver Breweries, Limited, have sold their interests, is announced by Mr. C. M. Marpole, who has returned from New York. That this sale was pending was announced in these columns a couple of weeks ago. The amount is stated to approximate five million dollars, but the names of the purchasers are not given, it being simply stated that it is a London, England, syndicate. Half a million dollars will be spent in remodelling the plants here and in building a plant at Prince Rupert.

Land Sale was Successful.

The second sale of Prince Rupert real estate has been successful. When the first auction was held a couple of years ago, only certain lots were disposed of, it being felt at that time that better values would obtain in the future. That this turned out to be correct was shown by the interest taken in the recent sale, when the government cleaned up about a million dollars. When the sale opened, Mr. C. D. Rand, who acted for the government, had deposits of \$277,000 in hand, this amount having been placed by purchasers and covered the required ten per cent. payment on the fall of the hammer. Before the end of the first session this amount had increased to \$292,000. Of this amount, \$150,000 had to be returned to parties who attended the sale, but who could not get any of the lots offered. Purchases were made in the names of people residing in different parts of the United States and Canada and even in Australia and Great Britain.

The lumber industry in British Columbia is faring well this year. Trade not only has been good locally, and in the Northwest, but the foreign trade also has shown improvement. Activity in the industry is indicated by the cut of timber. All through the spring and early summer months, the cut each month surpassed previous figures, and last month the big production was maintained. In August, the output was 67,540,000 feet. Receipts in the timber department here for July was \$44,000, being \$6,000 in advance of the amount for the same month last year, and constituted a record, but in August the figures were over \$60,000.

SASKATCHEWAN'S NEW CABINET MINISTERS

The Honorable George Bell and the Honorable George Langley have been sworn in as members of the Saskatchewan Provincial Cabinet, the former gentleman taking the portfolio of the treasury department, and the latter that of municipal affairs.

The Honorable George Bell is a clear, cogent and effective speaker, and being a man of great business acumen and wide experience will no doubt render valuable service in his new capacity. The Honorable George Langley is an exceptionally quick and hard-hitting debater, and has already proved himself in many public positions as one with a wide grasp of affairs.

The Bureau of Public Health, which was formerly administered by the Department of Agriculture, will in future be in charge of the Honorable George Langley, in the Department of Municipal Affairs.

The reconstructed cabinet is as follows: President of the Council and Minister of Education, Honorable Walter Scott; Minister of Railways and Telephones, Honorable J. A. Calder; Attorney General and Provincial Secretary, Honorable A. Turgeon; Minister of Agriculture, Honorable W. R. Motherwell; Minister of Public Works, Honorable A. P. McNab; Provincial Treasurer, Honorable George Bell; Minister of Municipal Affairs, Honorable George Langley.

FIRE LOSS OF UNITED STATES AND CANADA

The fire loss of the United States and Canada for the Month of August, 1912, as compiled from the records of the New York Journal of Commerce, aggregates \$14,158,800, as compared with \$12,662,650 for the same month last year. The losses by fire since the first of January this year total \$163,750,650, about four million dollars less than for the first eight months of 1911. The following table gives a comparison of the losses by months thus far this year with the figures for the same months in 1910 and 1911, together with the losses for the balance of those years:

	1910.	1911.	1912.
January	\$15,175,400	\$21,922,450	\$35,653,450
February	15,489,350	16,415,000	28,601,650
March	18,465,500	31,569,800	16,650,850
April	18,091,800	17,670,550	16,349,400
May	18,823,200	21,422,000	21,013,950
June	13,183,600	20,601,950	16,103,450
July	26,847,900	25,301,150	15,210,100
August	21,570,550	12,662,650	14,158,800
Total for year..	\$234,470,600	\$234,337,250	

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Saskatchewan.

Yola, No. 946, \$2,050. F. J. D. Smith, Duff.
 Barholis, No. 746, \$1,500. B. Innis, Pontivy.
 Alba, No. 881, \$2,000. G. B. Sturdy, Salvador.
 Spencer, No. 495, \$1,600. H. Marsh, Glenbryan.
 Keeler, No. 491, \$2,500. H. W. Groutage, Keeler.
 Ravine, No. 365, \$1,400. N. A. Nicholson, Leross.
 Blue Hills, No. 782, \$1,200. G. C. Lawson, Hanley.
 Flaxland, No. 694, \$1,600. G. V. Wiggins, Tezorton.
 Thunder Bird, No. 762, \$1,200. R. Brown, Whitebeech.
 Wise Creek, No. 753, \$1,500. J. H. Torgerson, Blairville.
 Whitebeech, No. 761, \$1,200. T. E. Figgess, Whitebeech.

The London Stock Exchange has listed £200,000 Hudson Bay Company's 5 per cents.

Cost of living in Sao Paulo, as throughout Brazil generally, is very heavy and tends to increase. A commission lately appointed by the federal government to study the matter in question has reported that the reasons for such heavy cost of living are mainly threefold, namely:—(1) Exorbitant duties upon imports of an indispensable nature. (2) Existence of inter-state duties. (3) Heavy cost of transport. The commission has recommended a threefold remedy, namely:—(1) Reduction of import duties in connection with a large number of articles. (2) Abolition of inter-state duties. (3) Cheap rates for conveyance of meat, cereals, fruits, vegetables and all agricultural produce.

NEWS AND NOTES

The Diamond Flint Glass Company, Limited, of Toronto, have purchased a site for the building of a glass factory at Redcliff, Alta.

Only seventy per cent. of the qualified electors exercised their franchise in the Federal elections of last September. Out of a total of over 1,850,000 electors whose names were on the voters lists, 1,307,528 cast their ballots. Of these 669,567 voted for Conservative candidates, 625,096 voted Liberal, and 12,865 voted for Independent Labor and Socialist candidates.

Plans for a tunnel under the city of Vancouver, beginning at the foot of Burrard Street on Burrard Inlet and running to the False Creek yards are being drawn by the Canadian Pacific Railway preparatory to their being presented to the railway commission for approval. This tunnel has been mentioned several times in conferences between the Canadian Pacific Railway and the city. It is being considered as a means of doing away with the present street crossings in the middle of Vancouver.

Early development of the coal resources of Central Alberta is expected. Mr. Andrew Laidlaw, of Spokane, and associates interested in the Jasper Park Collieries, have just returned from an inspection of their property. Over two hundred men are employed on the property, the entire output being taken by the Grand Trunk Pacific Railway for use on its locomotives. Mr. Laidlaw states that on completion of the installation of additional equipment at least five hundred men will be employed, and the output will be two thousand tons daily.

Continental bankers are said to be considering a quick mail and passenger service from Galway, Ireland, to Canada. The mayor of Dublin has received a proposal from Mr. T. M. Kirkwood, Toronto and London financiers that the Dublin Council should guarantee 6 per cent. interest on a bond issue of \$1,500,000 for 20 years, the Toronto people to establish a fast line of steamers from Galway to North Sydney, in Nova Scotia, giving a ten-day service between the two ports, the water transit not to exceed four and a half days. In return for the interest guarantee the Toronto people will carry all mail matter in and out free for 20 years.

The Lethbridge board of trade are investigating the utilization of flax straw and probably will send one ton of it to Ireland for an experimental process. Southern Alberta is growing thousands of acres of flax this year. The flax seed will be very carefully saved, but thousands of tons of straw will be burned. This looks like poor economy, and the board of trade has been considering for some time the proposition of getting a mill established here for the purpose of using this waste to manufacture twine, or any cloth of a rough nature which might be made without too great an original outlay. So far their enquiries in this direction have not met with any great progress, but it is hoped the efforts will meet with success.

A bank run by the city of Montreal which would pay four per cent. interest on deposits is the scheme advanced by Alderman Martin. In an informal discussion of the matter several objections were raised. Comptroller Pelletier and City Treasurer Arnoldi pointed out that this left no margin for administration, but Alderman Martin replied that they could administer the bank with what they paid in commission to agents for placing the loans. Then the financial critics of the city hall wanted to know what would happen when the deposits in the bank were greater than the amount required for loans, and it would be necessary to pay interest on them just the same. Alderman Martin thought the bank might invest in the bonds of other municipalities with this surplus. Then Mr. Arnoldi pointed out that money might be a lot cheaper than four per cent. and the city would lose on per cent. in interest or more on all deposits. Mr. Pelletier asked what would happen if there was a run on the bank while all the money was tied up in permanent works.

The chambre de commerce du district de Montreal is inaugurating its second quarter century of existence with an important project to have a Canadian mission, formed of representatives of all the boards of trade and important commercial bodies in Canada, spend seven weeks next summer in Great Britain, France, Germany, Switzerland, Belgium, Holland and Italy, to open up trade routes and develop friendly relations that will bring capital and business to the Dominion. The mission to France will be in some part a return of the visit made this year by the party of distinguished Frenchmen to Montreal and Quebec. A committee will visit or communicate with the other commercial bodies of Canada with the object of getting as many important men of affairs as possible to join in the trip, the mission to be conducted under the auspices of the minister of trade and commerce. The delegation will be composed of representatives of all the great financial, industrial and commercial organizations of the country, as well as a representative from each board of trade.

To enable the commencement immediately of the construction of a new structural steel plant at Weston, which will be the largest in Canada, the Toronto Structural Steel Company is being refinanced. Their present capital of \$100,000 common and \$100,000 preferred stock will be increased to \$500,000 common and \$500,000 preferred, which will be disposed of privately by the Royal Securities Corporation. Mr. George Gouinlock is president of the company, and to the board of directors has been added Messrs. F. B. Jones and R. M. White.

The quantity of spirits produced in Canada during the fiscal year, 1912, was 4,784,396 proof gallons, nearly half a million gallons less than the production of 1911. The Ontario distillers produced 3,769,038 gallons of whiskey, or nearly three-fourths of the output of the Dominion; Quebec turned out 971,619 gallons; Winnipeg, 38,484 gallons, and Victoria, B.C., 101,260 gallons. From the distilling and brewing business the Government during the fiscal year reaped a revenue of \$10,470,969. Tobacco and cigars, with a yield of \$8,848,616 came next as an excise revenue producer.

A new avenue for Canada's trade is being indicated to the government by five Spaniards from South America, who request a trade arrangement between Canada and Uruguay. They say that the city of Montevideo is anxious to have a trade established with Eastern Canada. It is pointed out that Canadian manufactured articles can be profitably sold in South America while the wheat, hides and beef of South America can be marketed in Eastern Canada provided a steamship service can be arranged for and a traffic agreement made. The delegation will meet Premier Borden and Hon. Mr. Foster.

In the report of a commission instituted to enquire into the cost of living in New Zealand, it is estimated that the cost has increased 16 per cent. in the last 17 years. Rent, food and clothing have increased 20 per cent.; household necessities have remained unchanged; domestics' wages have doubled. The prices of exports have increased 40 per cent., and those of imports four per cent. The rise in the standard of living has been considerable. The chief practical recommendations of the commission are the abolition of duties on all foodstuffs and on necessities used in the primary industries, and stricter control of the trusts.

At the annual convention of the Union of Alberta Municipalities, held at Innisfail, the following officers were elected: Hon. president, Mayor Mitchell, Calgary; president, Mayor Lawlor, Camrose; first vice-president, Mayor West, Innisfail; second vice-president, Mayor Sutherland, of Fort Saskatchewan; secretary-treasurer, Mr. George Kinnaid, Edmonton; executive committee, Secretary-treasurer Mack; of High River; Mr. Galbraith, of Red Deer; G. D. Plunkett, of Pincher Creek; Mr. Phipps, of Edson; A. F. Grady, of Macleod, and Mayor Bentley, of Stettler; secretary, Mr. Fasquhar, Edson. It was decided to hold the convention next year at High River.

Mr. R. W. Reford, president, who in company with Messrs. Hugh A. Allan, W. M. Botsford, George E. Drummond, had attended the eighth congress of the chambers of commerce of the empire held in London last June, reported to the Montreal board of trade that his resolution at the congress, that the scope of British consuls should be enlarged as to make their duties imperial, was cordially received, and had been referred to the imperial council of commerce. The congress also re-affirmed its position as being favorably to preferential trade. The following appointments were made to the committees: Export trade committee—Messrs. W. W. Hutchison, John A. Gunn, Alex. McLaurin, H. J. Fuller, Vincent A. Ward, D. W. Campbell and L. L. Henderson. Interprovincial trade committee—Messrs. W. K. Graftey, Armand Chaput, A. Hamilton Gault, W. F. Angus, Geo. F. Benson, Wm. Lyall, and Jas. Elmsley. The council decided to become a member of the Canadian chamber of commerce, London, a body formed for encouraging trade between Britain and Canada.

The Montreal Board of Trade has appointed the following committees, suggested by the Hon. Mr. Foster, at a special general meeting of the board which he addressed on May 15th:—Export Trade Committee—Messrs. W. W. Hutchison, John A. Gunn, Alex. McLaurin, H. J. Fuller, Vincent A. Ward, D. W. Campbell and L. L. Henderson. Interprovincial Trade Committee—Messrs. W. K. Graftey, Armand Chaput, A. Hamilton Gault, W. F. Angus, George F. Benson, William Lyall and James Elmsley. The following were admitted to membership in the Montreal board:—Hiram L. Piper, of the Hiram L. Piper Company, Limited; Edward W. Parker, of Findlay and Howard, Limited; John Wilson, of Matthews, Limited; A. Gibb McArthur, of Gibb and Company, Limited; I. W. Steinboif, of Swift Canadian Company, Limited; O. W. Dettmere, of Willis, Faber and Company, of Canada, Limited; Edward Fitzgerald, Purchasing Department of Canadian Pacific Railway; James Birchenough, Merchants Bank Building; Fitzjames E. Browne, of The House of Browne, Limited.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Saskatoon, Sask.—Mr. J. McNamara, residence, Polbown. Loss and origin unknown.

Yarmouth, N.S.—September 19.—Bayview Hotel. Loss and origin unknown.

Arcadia, N.S.—September 18.—Mr. N. A. Wyman's barn. Loss and origin unknown.

Victoria, B.C.—September 19.—Mr. Rithet's ricks of grain. Loss and origin unknown.

Belleville, Ont.—September 22.—Mr. Nelson Lingham's barn. Loss \$4,000. Origin unknown.

Calgary, Alta.—September 23.—Mr. T. Burns' clothing store. Loss \$10,000. Origin unknown.

Ennotville, Ont.—September 16.—Mr. L. Smith's threshing machine. Loss and origin unknown.

Peterborough, Ont.—September 20.—Quaker Oats Company premises. Loss \$10. Origin unknown.

Toronto, Ont.—September 22.—Bathurst Street street car. Loss unknown. Origin, switch blew out.

Winnipeg, Man.—September 19.—Mr. P. M. Marshall's garage and automobile. Loss \$1,500. Origin unknown.

Cananogue, Ont.—September 21.—St. Lawrence Steel and Wire Company's works. Loss and origin unknown.

Parkhill, Ont.—September 19.—Franklin House stables and Mayor Harrison's barn. Loss \$2,000. Origin unknown.

Niagara Falls, Ont.—September 19.—Mr. R. Leach's Bridge Street restaurant. Loss \$2,000. Origin lightning.

Toronto, Ont.—September 24.—Messrs. W. and J. G. Greey's premises, 2-6 Church Street. Loss \$1,500. Origin unknown.

St. Catharines, Ont.—September 15.—Mr. F. Wilson's house. Loss \$800. Insured with Scottish Union Insurance Company.

Ottawa, Ont.—September 14.—548 Gilmour Street, shed containing automobile. Loss, building \$400; insurance \$500. Origin, torch being used.

Ridgetown, Ont.—September 23.—Mrs. J. E. Kindree's barn and contents. Loss unknown. Insured with Howard Mutual Insurance Company. Origin unknown.

Point Grey, B.C.—September 18.—British Columbia Building Trust Company's four bungalows, Thirteenth Street and Alma Road. Loss, \$12,000. Origin, suspected incendiary.

New Westminster, B.C.—September 5.—Messrs. Thompsons Brothers' block. No loss. Origin, chimney set alight. September 10.—Mrs. Bell's residence. Loss \$10. Origin, hot ashes.

Vancouver, B.C.—September 17.—Vancouver Brass Foundry, 749 Keefer Street. Loss \$5,000. Origin unknown. September 17.—Mrs. P. Scully's residence, Wilson Road. Loss \$2,000. Origin unknown.

Montreal, Que.—September 24.—Mr. J. N. W. Duncan's lumber factory, 1833 Ontario Street East. Loss about \$5,000. Origin, chemical action caused by rain falling on bags of lime. 574 Chambord Street. Loss unknown. Origin, boys playing with matches.

Hamilton, Ont.—September 8.—403 King Street West. Chicken house. Loss \$10. Origin, matches.

September 9.—258 Herdimer Street. Loss slight. Insured with Hartford Phoenix. Origin, matches.

September 12.—Hennessy's drug store. Loss \$95. 7 King Street. Loss \$150. Insured with nine companies. Origin, defective gas connection.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Gillies' Depot, Ont.—Mr. A. B. Gillies' launch. Loss \$1,300. No insurance. Origin, gasoline ignited.

Ottawa, Ont.—Mr. A. L. Florence's sheds. Loss \$4,000. Insured with Royal and Monarch Insurance Companies.

Winnipeg, Man.—Patterson Manufacturing Company's saturating plant and warehouse. Loss \$50,000. Origin unknown.

Chatham Township.—Messrs. J. and G. Rumble's barns, &c. Loss \$2,000. Insured with York and Hudson Bay Companies.

Caradoc, Ont.—Mr. A. Holmes' barn and contents. Loss \$1,200. Insurance \$800. Caradoc Farmers' Mutual. Origin lightning.

Coderich, Ont.—September 13.—Hodgins Brothers. Loss \$31,000. Fully insured. Cause, defective wiring. Adjusted by Ross and Wright, Toronto.

Halifax, N.S.—Dr. R. Evatt's automobile. Loss, \$1,500. Insured with Springfield Fire and Marine Insurance Company. Origin, overheating of brake.

Toronto, Ont.—September 7.—Dominion Crown Cork Company, 150 Pears Avenue. Loss \$11,000. Fully insured. Adjusted by Messrs. Ross and Wright, Toronto.

St. Thomas, Ont.—September 12.—Mr. E. O. Pound's garage and taxi. Loss \$3,310. Insurance, Hartford Company, \$1,250; Hudson Bay Company, \$610. Origin, spontaneous combustion.

Toronto, Ont.—September 17.—Messrs. Ewing and Murphy, 18 Cameron Street. Loss \$4,500. Insurance \$3,850. Mr. Ewing—Loss \$2,000. Insurance \$900. Messrs. H. L. Wood and Company—Loss \$4,000. Insurance \$3,000. Origin unknown. Adjusted by Messrs. Ross and Wright, Toronto.

PANAMA CANAL'S COMPETITOR

That the Tehuantepec National Railway will be able to compete on almost even terms with the Panama Canal is the opinion of A. W. Donly, Canadian trade commissioner to Mexico, who is in Ottawa for a few days on leave. Mr. Donly is a Norfolk County man, and has been trade commissioner in Mexico for 23 years. The Tehuantepec National Railway was built by the Mexican Government, and is operated partly as a public and partly as a private enterprise. It connects the two oceans from Port Mexico to Salian Cruz, and is about 200 miles in length.

The road, Mr. Donly says, is now carrying a million tons of freight annually, including most of the sugar destined for the refineries in the Eastern States. The terminal and other facilities are sufficient for all the traffic for some time to come. There is, the cost of transshipment, but this is likely to be largely offset by the tolls of the new canal and the necessarily lengthy passage of ships through the locks. A considerable quantity of Canadian trade goes from ocean to ocean via the Tehuantepec, there being a Canadian customs official on the ground, who looks after the shipment of goods in bond.

The trade of Mexico has suffered during the last couple of years, Mr. Donly says, from the internal unrest. The foreign commerce of the country amounts to a hundred and fifty millions (in gold), of which 70 per cent. is with the United States.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended September 7th:—

	1911.	1912.	Increase or decrease.
C.P.R.	\$2,230,000	\$2,649,000	+ \$419,000
G.T.R.	1,033,652	1,082,457	+ 48,805
C.N.R.	336,500	376,400	+ 39,900
T. & N.O.R.	39,787	29,610	— 10,177
Halifax Electric	8,553	5,627	— 2,925

The Canadian Northern Railway earnings and expenses for August with comparisons were as follows:—

	August, 1912.	August, 1911.	Increase.
Gross earnings	\$1,745,800	\$1,420,600	\$325,200
Expenses	1,375,000	1,105,000	260,100
Net earnings	370,800	314,700	56,100
Mileage in operation	4,297	3,711	586

For the months of July and August net earnings of the road increased \$189,100 over the same two months of 1911.

From July 1st to date gross earnings were \$4,720,400, an increase of \$753,500.

The net earnings of the Toronto and Northern Ontario Railway from the beginning of the financial year, November 1st, to the end of June, as reported to the provincial treasurer, have been \$350,022, as against \$314,814 for the same period last year. The gross receipts have been \$1,178,839 against \$1,024,382 for the same months of last year. The net earnings include or royalties of \$98,436 this year, compared with \$18,391 from the same source last year.

The increase in mileage for the period of nine months has been 264.24. The mileage increase last year in the same period was 174.28. The ore royalties for June this year were \$26,427, while a year ago in the same month the ore royalties were nothing.

The Great West Permanent Loan Company of Winnipeg has been approved of by the Lieutenant-Governor of Ontario after a report thereon by the assistant registrar of loan corporations for the investment of trust funds.

PHOENIX, B.C., IS IMPORTANT COPPER CAMP

It Has Been Well Prospected—Main Ore Bodies Have Been Located

Phoenix is the most important copper camp in Canada and the mines, up to July 1, 1910, have produced and shipped over 7,000,000 tons of ore.

The ore bodies occur in a mineralized zone which represents a portion of the Brooklyn limestone replaced by epidote, garnet, etc. The zone is separated into isolated areas which occupy trough-like basins in the jasperoids and limestones.

The ore bodies lie at different horizons in this zone though generally favoring the lower and outer portions, and may be considered simply as portions of the mineralized zone in which the copper ore has been sufficiently concentrated to form workable deposits. The ore bodies range in size from lenses about 100 feet long and 20 feet thick to extensive masses like the main ore body of the Knob Hill-Ironside mine, which is about 2,500 feet long and has a maximum thickness of 125 feet and a known width of 900 feet, is the report of Mr. O. E. Le Roy to the Department of Mines, Ottawa. The altitude of the ore bodies varies in different bodies, and at different points in the same body, from vertical to almost horizontal. There is a pronounced flattening of the dip with depth. The foot-wall is usually jasperoid, occasionally limestone, and, in one instance, the quartzose rocks of the Knob Hill group. As a rule, the commercial footwall coincides with the structural. The hanging-wall is almost invariably a commercial one, though the pay ore is usually sharply marked off from the lower grade by a gouge-filled fissure or "slip."

Ore Is Remarkably Uniform.

The ore throughout is remarkably uniform and is almost self-fluxing. It consists of finely disseminated chalcopryrite, with pyrite and hematite (specularite), in a gangue composed essentially of epidote, garnet, quartz, calcite, and chlorite. Magnetite occurs in distinct masses, or lense-like bodies, both in, and along the borders of the main ore bodies. In the case of the Monarch deposit magnetite forms one of the main ore bodies. The chalcopryrite carries all the copper, gold, and silver values, the average ore containing from 1.2 to 1.6 per cent. of copper with about \$1.00 in gold and silver to the ton. The mineralized zone comprises a portion of a zone of contact metamorphism in the limestone of the Brooklyn formation. In the absence of any closely associated masses of igneous rocks, the hypothesis is advanced, that the metasomatic replacement of the limestone, and the deposition of ore have been brought about by solutions, derived from some unit of the granodiorite batholith. The solutions, given off at temperatures above the critical, and carrying silica, alumina, and ferric iron with copper and iron sulphides at a later stage, traversed the limestone in lateral and lateral descending directions, gradually replaced the limestone by epidote, garnet, etc., and deposited the ore uniformly over extensive areas, thus forming the large low grade bodies. The overlying rocks were subsequently removed, which left portions of the ore bodies outcropping at the surface.

Comparatively Shallow and Give Out Sharply.

The fact that the ore bodies are comparatively shallow, and that they give out rather sharply with depth, tends to confirm the view that the solutions were descending rather than ascending. The probable age of their formation is provisionally placed in the Jurassic.

In the commercial development of the ore bodies the initial work is done by diamond drilling by means of which the broad outlines of the bodies are ascertained. The ore is mined by a system of glory holes and quarries along the outcrops, and by the pillar and room method in the underground workings.

The mineralized zone of the Phoenix has been well prospected and by such methods as to render it impossible that any large body remains undiscovered. The main ore bodies of the camp have all been located, though closer intervals in prospect drilling may result in the discovery of smaller bodies which, if favorably situated, may be worked to advantage.

In other localities throughout the boundary district where limestone occurs associated with a mineralized zone of similar character ore bodies may yet be found by intelligent and scientific prospecting. They cannot, however, in the initial stages be attacked by the ordinary tunneling and shaft methods, but should first be proved by diamond drilling, especially as it is known some bodies do not outcrop at the surface. The average prospector has not the capital necessary for developing ore bodies of this class; this must be left to companies of large capital who can afford to prove or disprove areas of apparent promise.

OWNERSHIP OF SUEZ CANAL

British Government is a Shareholder — Underlying Obligations Take the Form of Bonds

During the discussions respecting the Panama Canal much has been said of the other great waterway, the Suez Canal. That canal is an Egyptian company, authorized by a decree of the Khedive, March 19, 1866; it is governed from Paris. The British government does not own it, but is merely a private stockholder, and does not own even a majority of the shares. It has, in fact, an equity which might, in conceivable circumstances, be extinguished altogether. On the board of directors there are twenty-one French members, one Egyptian member, and ten English members who constitute what is called the "London Committee." The manager and secretary, together with the president, and even the manager of the London office, are all French.

The capital of the company, authorized and issued, is 200,000,000 francs, in 400,000 shares, of which 378,231 shares of 500 francs each, fully paid, were in issue at December 15, 1911, 21,769 having been redeemed. These shares are redeemable at par within 99 years from 1869 by annual drawings on December 15.

Are in One Sense a Mortgage.

They are, in one sense, a mortgage, because they are entitled to 5% interest and dividends up to 71% of the surplus profits. The redeemed shares are replaced by certificates which relinquish the 5% interest.

In 1875 the British government, at the instance of Mr. Disraeli, purchased the holdings of the Khedive of Egypt, who was in urgent need of money at the time, and was practically an independent ruler, in spite of the nominal suzerainty of the Sultan of Turkey.

Redeemed by Annual Drawings.

There are 176,202 of these shares, and these may be all redeemed between now and 1968 by annual drawings, although they will retain their right to the dividends but not to the 5% interest. This amount does not constitute a majority of the capitalization, to say nothing of the 400,000 shares of capital stock.

Underlying obligations take the form of bonds or shares. Of the latter there are 372,531 of 85 francs each, redeemable up to November, 1922; 99,994 of 5% bonds of 500 francs each, redeemable on or before July 1, 1918, by annual drawings; 62,944 first series 3s now outstanding, redeemable annually up to 1935; 232,592 second series 3s, redeemable by annual drawings up to August, 1963; while an authorized issue of 150,000,000 francs of the third series of 3s is now in course of issue and is redeemable at par in fifty-three years, the company reserving the right of expediting the redemption. It is understood to have this right in all the issues with the exception of the original shares.

Majority of Shares Held in France.

So far as any rebate of the tolls is concerned, neither the British government nor the French government, which, incidentally, is not a stockholder although a majority of the shares is owned in France, rebate the tolls, or have the right to do so, says the Wall Street Journal. No doubt, like other maritime nations, they subsidize for mail purposes, and possibly for use in war, vessels which use the canal. But these subsidies are not paid from Great Britain's dividends on its Suez Canal shares, and are extended to other vessels which do not use the canal at all.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended September 20th:—Trethewey, 55,300; Cobalt Townsite, 95,300; O'Brien, 65,973; La Rose, 87,277; Nipissing, 64,110; Chambers-Ferland, 64,000; Buffalo, 121,651; Temiskaming, 53,063; Casey Cobalt, 87,180; Cobalt Lake, 153,480; total, 847,334 pounds or 423 tons. The total shipments since January 1st are now 31,680,140 pounds, or 15,840 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

At the ninth annual convention of the Western Canada associated boards of trade, held at Moose Jaw, the following officers were elected:—President, Mr. M. Isbister, Saskatoon; first vice-president, Mr. R. Loney, Moose Jaw; second vice-president, Mr. D. Martin, Winnipeg; third vice-president, Mr. E. A. Dagg, Calgary; fourth vice-president, Mr. A. Wilson, Fort William.

HUDSON BAY ROUTE

Many Think it is a Practicable Scheme—Safe Commercial Route is Available for Three Months

The Monetary Times has previously expressed the opinion that Western Canada's grain transportation congestion can be better solved by concentrating attention on existing ports, especially those on our Pacific Coast rather than on the Hudson Bay. The Ontario Bureau of Mines has just issued a report dealing with the district of Patricia recently added to that province. It contains interesting references to the Hudson Bay route. The report quotes several optimistic views tending to favor the inauguration of steam vessels on this route. While the question of the feasibility of navigation of the Hudson Bay route for the shipment of grain, cattle and other products is not so important to Ontario as it is to the western prairie provinces, it says, still if this route can be made into an important commercial highway it will be of great value when railways are extended from the northern part of this province to James Bay, or to Nelson on Hudson Bay.

Northern Ontario, which has now a sea coast of over six hundred miles on James Bay and the adjacent part of Hudson Bay to the westward, possesses vast agricultural resources, great supplies of pulp wood and other timber, and wide mineral areas. The Hudson Bay route will, if it proves a commercial success, afford an alternative route to that via the St. Lawrence for the export of our merchandise. Moreover, it will serve as a route by which imports can be brought, at a comparatively low cost for freight, to the provinces northern and north-western districts. For instance, the freight on Nova Scotia coal to the James and Hudson Bay Coast, being all by water, will be low.

Literature on the Route.

A compilation of the literature bearing on the Hudson Bay route was published in pamphlet form by the Department of the Interior, Ottawa, in 1908. This pamphlet contains an account of the more important observations made up to that time, together with conclusions as to the commercial feasibility of the route. Starting with the earliest period, it is said: "In the course of a century and three-quarters (to 1870), seven hundred and fifty vessels, ranging from seventy-gun ships to ten-ton pinnaces, crossed the ocean, passed through the straits, and sailed the bay in the service of the (Hudson's Bay) Company. Only two were lost. A marvelous record, when it is remembered that all the craft were sailers, and most of them small and of crude construction, and that the bay and strait afforded none of the modern accessories to navigation in the way of coast aids."

The opinions of a number of captains, in the service of the Hudson's Bay Company or in command of whaling ships, are given. Then follow quotations from reports by Dr. Bell, Commander Gordon, who commanded the Neptune expeditions of 1884 and 1885, which were undertaken by the government with the view of ascertaining the actual conditions pertaining to the bay and strait; Commander Wakeham, under whom the Diana expedition of 1897 was despatched for the purpose of making a further test over a longer season, both spring and fall, than those from which Commander Gordon had made his deductions; Lieutenant Schwatka, of the United States Navy, who spent about two years and a quarter in Hudson Bay and Strait, and adjoining country, and Mr. A. P. Low, who accompanied the expedition of 1897 and commanded the Neptune expedition of 1904-5.

Three Months' Navigation.

The summing up is as follows:—"The reports and opinions quoted evidence quite a diversity of view as to the period of safe navigation. Doubtless some are too optimistic, while others are too cautious. But leaving aside the sanguine opinions and considering only the conservative views, the conclusion is clear that Hudson Strait and Bay afford a safe commercial route to Europe for at least three months in the year, from towards the end of July to about the end of October. It would not be a feasible route compared to that via Montreal, but it would be an adequate subsidiary one—a means of relief from grain blockades such as now endanger the continued development of the West."

During the past three or four years, since it has been decided to build a railway to the mouth of the Nelson River, or to Churchill, investigations have been undertaken by the Dominion Department of Railways and Canals concerning the character of the harbors and the navigation of Hudson Bay and Strait. The results of these investigations are given in the annual reports of the Department.

The distance from Port Nelson to Liverpool is 2,966 miles; Montreal, via the Strait of Belle Isle, is 2,761 miles, and via Cape Race, 2,927; New York, by the northern route, is 3,079 miles distant from Liverpool. Winnipeg, by the Canadian Pacific Railway, is 1,422 miles from Montreal.

The length of the railway line to be built from the Saskatchewan River, at the Pas station on the Canadian Northern Railway, to Port Nelson, is 410 miles.

From Cochrane, the present terminus of the Temiskaming and Northern Ontario Railway, to Port Nelson, the railway can be extended in a line continuous with that of the part of the government railway already constructed. It is to be hoped that mineral areas will be found in the more distant parts of older Northern Ontario and in the district of Patricia that will justify the extension of the railway to Port Nelson. The people of Ontario will, in that event, possess a semi-transcontinental railway ending at a seaport.

While the harbors in, at least, the southern part of James Bay are poor, it is likely that within a few years they will be utilized as terminals for one or more railways. Examinations are being made of the mouths of the Nottaway and the Rupert, and of the coast of the bay farther to the south and west, concludes the Ontario government's report.

But do three months' navigation make the scheme worth while?

EXPENSE OF GETTING INSURANCE BUSINESS

Permanent and Effectual Reform is Taking Place in Every Branch of Producing End of Business

The expense of getting business should be looked upon by young companies, especially those with a small paid-in surplus, as the rock upon which frail barks usually go to pieces, stated Mr. O. S. Carlton, vice-president of the Great Southern Life Insurance Company in an address before the American Life Underwriters' Convention. The custom that has come to be well established among life companies of burdening the early premiums with all the expenses incidental to the procurement of business was undoubtedly carried to great excesses some few years back. This, as a natural consequence, brought the evils of rebating, twisting and other reprehensible practices on the part of unscrupulous agents. Various remedies for these evils were suggested, and many tried even to the point of legislation in many of the States. Agreements between companies as to commissions to be paid agents and a system of what might be termed black-listing were resorted to with but little success. We witnessed the worst period of demoralization just prior to the Armstrong investigation, from which time began the reformation in real earnest.

Only by Gradual Process.

Great changes are brought about only by gradual process, and we feel safe in asserting that we are now on the road to permanent and effectual reform in every branch of the producing end of the business.

The average existence of life policies has nearly doubled in this country in the past twenty years; the employment of representatives is on a more sane and satisfactory basis; facilities for selecting risks are better than have heretofore existed in any country, and life insurance is on a higher plane and is more generally respected than at any previous time in its history.

The gospels of efficiency and conservation are being universally preached throughout the length and breadth of the land. Both these doctrines are creeping into the colleges, the high schools, the common schools, and into every well-organized business. Evolution in business methods during the present generation has been as rapid as the advancement in other branches of world progress. Another generation will doubtless witness improvements even more wonderful. Life insurance will keep abreast with the times, never fear.

Since Armstrong Investigation.

The American people have absorbed more real knowledge of life insurance since the Armstrong investigation than they had acquired in 25 years theretofore. It is hardly a vain prediction to say that they are likely to become even better posted. This is the tendency of the times. There are now more stockholders in life insurance companies in Texas than there were policyholders when I sold my first policy in April, 1889.

We are learning, expanding, advertising. Our light is not being kept under a bushel. It is a question of the survival of the fittest. "Let us then be up and doing."

The expense of getting business is the most important question involved in all the branches of the life insurance business. We must get the business, and if we would endure, we must get it at a living cost. It is easy enough to find people competent to loan money without the risk of loss. In every city, town and hamlet, and even in the country where they are more or less ignorant, can be found men capable of making safe investments, but the finding of men who can get business in paying quantities is our most difficult task.

LAKE SUPERIOR CORPORATION

Earnings Considerably Larger Than Those of Last Year—Insufficiency of Labor Supplies—Financial Readjustment

The Lake Superior Corporation's annual report shows large increases in various directions. From the operations of all of the subsidiary companies of the Lake Superior Corporation there is a surplus, subject to depreciation and other charges, of \$1,579,377.59, to which has been added earnings brought forward from last year, including earnings of Lake Superior Iron and Steel Company, Limited, now released from sinking fund by refunding of notes, \$223,226.46; giving a total of \$1,802,604.05, which after deducting \$76,334.12 interest paid to bank in respect of advances, leaves \$1,726,269.93 as sum of year's operation.

The following application has been made by the subsidiary companies: Interest on bonds of The Algoma Central and Hudson Bay Railway Company, The Algoma Eastern Railway Company, Lake Superior Iron and Steel Company, Limited (now Algoma Steel Corporation, Limited), Cannelton Coal and Coke Company, and other subsidiaries, \$578,307.86; amounts set aside for redemption of capital on the Helen Mine, for sinking fund payments, and for sundry renewals, etc., \$191,262.17; reserved for doubtful debts and for losses of previous years, \$15,505.29; paid to The Lake Superior Corporation by subsidiary companies as interest on bonds, notes, etc., and as dividends, \$695,975.98; balance reserved for extensions and improvements, \$245,218.63; as above, \$1,726,269.93.

Mills Will Have Continuous Operation.

The steel company's mills have been in continuous operation. The output for the year compared with the previous year was as follows:

	1910-11.	1911-12.
	Tons.	Tons.
Pig iron	170,359	258,979
Steel rails	208,283	241,729
Merchant mill material		39,466

It will be seen that the production of pig iron and steel rails was the largest yet attained. The new blast furnace, as well as the coke ovens, are producing in accordance with expectations. The new construction is not yet completed and work is still being continued under somewhat adverse circumstances. Labor in particular is difficult to get on account of the demand in other directions, but it is expected all construction work now on hand will be completed before winter.

The result of Lake Superior Power Company's operation was satisfactory, and the sale of power continues to increase. The Lake Superior Paper Company has commenced operating under its contract and it is expected that the earnings of the power plant will, in consequence, be increased.

The output of the Helen Mine for the year was 166,362 tons, the entire quantity reserved for the Steel Company's operations.

Labor Scarcity Handicaps Construction.

The Algoma Central and Hudson Bay Railway Company reports increased earnings for the year. On account of the scarcity of labor, the extensions previously indicated were not completed at June 30th, but so far as the Hawk Lake-Hobon section is concerned the government have just made an official inspection and it is expected that this line will be passed for immediate operation. The main line from mile 68 to Hawk Lake Junction will also be completed this year. Of this only a small mileage remains to be ballasted, the steel being completely laid. Extensions to the north of the Canadian Pacific Railway are proceeding rapidly and it is expected that connection will be made with the Canadian Northern (50 miles north of the Canadian Pacific) before winter. This connection will be of very decisive benefit to the company as the Canadian Northern Railway Company has intimated its intention of taking in its rails and supplies via the Algoma Central.

The Algoma Eastern Railway Company will be completed through from Crean Hill to Little Current this year, and the subsidies and land grants duly earned. The results as compared with the previous year show an increase; but full benefit from this railway cannot be derived until such time as dock facilities are installed at Little Current. Full plans are under way in respect of these. The completion of the Algoma Eastern Railway will enable the district which this railway serves to have facilities for shipping by water. The importance of these to such as the nickel and paper industries in the district is evident.

The International Trans Company has to report very satisfactory progress, the net earnings showing an increase over the previous year of 75%.

The Trans St. Mary's Traction Company also shows improved results and these are likely to continue, in view of increased industrial activity on both sides of the river.

The Tagona Water and Light Company shows increasing results in both its electric lighting and water departments. With the development of Sault Ste. Marie, Steelton, and adjoining districts, there are good prospects for this undertaking.

During the year a very important financial re-adjustment took place. The Algoma Steel Corporation, Limited, (previously Lake Superior Iron and Steel Company, Limited), took over the plant, properties and business of The Algoma Steel Company, Limited, The Lake Superior Power Company, The Algoma Commercial Company, Limited, together with the full interests of Fiborn Limestone Company, and the control of Cannelton Coal and Coke Company. Short term notes of the steel companies have, under the new consolidation, been entirely repaid.

On account of the increasing demands for steel rails and in view of the directors' efforts to keep up with the demand, the old blooming and rail mills are being replaced with larger and more modern plants.

What Remains to be Completed.

The new construction yet to be completed consists of the installation of turbines for the development of surplus power, the 350 ton melting furnace which is almost finished, the new ironworks buildings which will be occupied and fully equipped next month, and other work of a minor nature, all of which will be completed before winter. The Magpie mine plant has been installed and is expected to be in operation in October.

MARKET FOR BALED STRAW

It is reported at Birmingham that Canadian farmers and others are reconsidering the possibility of baling straw, hitherto burned on the prairies, for export to Great Britain, states Mr. J. E. Ray, Canadian trade commissioner at Birmingham, England. It is worth while, however, once more to draw attention to the magnitude of this market for the benefit of those who contemplate reconsideration of the subject. Apparently, freight charges have been the chief impediment to the development of this trade. It is gratifying to learn from the under-quoted table, however, that Canada increased her exports of straw to Great Britain last year one hundred per cent. in comparison with the previous year.

Straw Imports.

Denmark, (including Faroe Islands)	\$ 70,710
Netherlands	5,070
Belgium	7,740
France	1,725
Other foreign countries	31,780
Total from foreign countries	\$117,025
Total from British possessions (Canada)	5,765
Total	\$122,790

The weight of bales of straw varies from 100 to 150 lbs. Baled wheat straw commands at British ports from \$12 to \$16 per ton of 2,240 pounds; but these prices naturally vary according to quality and length of straw. Short baled wheat straw from France commands about \$10 per ton at port.

Quotations forwarded to Mr. Ray's office will be placed in the hands of the leading buyers in this area.

NEW CASUALTY INSURANCE COMPANY

The Casualty Company of Canada, with head office at Toronto, is incorporated under a special act of the Dominion Parliament, with an authorized capital of \$250,000 and power to increase the same to \$500,000, and is empowered to carry on the business of accident insurance in all its branches, including fidelity guarantee. The shares are \$100 each, fifty per cent. paid up, and are issued at a premium of twenty-five per cent. with the object of providing an adequate surplus. Mr. Arthur L. Eastmure is the organizing director. The volume of this business in the Dominion, as shown in the official reports published by the insurance department at Ottawa, indicates a large increase, having advanced from \$3,000,000, in 1906 to \$5,000,000 in 1910. The figures for 1911 show an even larger gain.

The method of organization contemplates distribution of the shares in small holdings over the nine provinces of the Dominion, thereby creating a widely spread community interest and affording assurance of local support; with a reservation of one sixth for Great Britain.

INSURANCE UNDERWRITERS' ACTIVITIES

Automobile Accidents in Canada and United States—
Cities' Business—Hail Premiums

Mr. Bertrand A. Page, vice-president of the Travelers Insurance Company, has compiled some statistics of automobile accidents in the United States and Canada, based on his own company's experience, from which it appears that 21.8 per cent. of the total claims in 1911 were caused by accidents in this class. He says that the greater number of claims do not come from the reckless use of an automobile, but that the accidents are of a nature which might occur to anyone, however cautious and conservative. To illustrate the dangers attending the use of an automobile, a few specific cases of claims (fatal cases) against accident companies are given, showing the diversity of ways by which an accident may occur.

Specific Cases of Claims.

These are as follows:—

Lost control of auto which struck telegraph pole, throwing insured out and fracturing his skull.

Auto struck by street car, insured thrown out and instantly killed.

Auto struck by train, insured instantly killed.

Auto tire burst, car overturned, insured instantly killed.

Repairing auto—tire burst—rim of wheel struck head of insured, causing fatal injuries.

Auto struck sand and overturned, insured thrown out and instantly killed.

Wheel collapsed, auto overturned, insured thrown out and killed.

In collision with another auto, insured thrown out and killed.

Auto skidded and struck fence, insured thrown out and killed.

Filling gasoline tank, stepped on match, gasoline exploded, burns caused death.

Engine stalled, failed to throw out gears; while cranking auto, it started up, running over insured, causing fatal injuries.

While driving auto, chain jumped off sprocket wheel, allowing machine to run backward and overturn; insured's neck broken.

Lost control of auto, which hit pole, insured thrown out and killed.

Auto collided with wagon at railroad crossing, insured thrown out, nasal bones fractured—fatal injuries.

Mr. Page thinks that in view of the facts rates on those using automobiles daily should be raised.

Toronto's Municipal Insurance.

Toronto will soon be in the market for insurance. Three years ago, the sum of \$3,000,000 in insurance was placed on various civic buildings, including the city hall, the fire halls, markets, police stations, jail, and registry offices. Early in November the insurance will again be placed, although it has reached a larger sum since it was last placed. New fire halls and police stations have been built and insured. Fire halls alone under the next insurance will require \$200,000 insurance. The jail carries \$27,000 insurance. All the insurance companies in Toronto share in the proceeds. A division is made by city treasurer Coady according to the strength of the company. The entire \$3,000,000 or more will be divided into shares and the shares apportioned.

As the result of a visit from the secretary and the inspector of the Fire Underwriters to Brandon, and a delegation sent to Winnipeg to interview them from this city, headed by Mayor Fleming, the 15 per cent. rate recently added will be discontinued, and as soon as a certificate is issued by the city electrician succeeding Mr. Small,—resigned—a further 10 per cent. will be deducted from the insurance rates in Brandon.

Hail Insurance Premiums.

The total gross premiums of the Central Canada, the Saskatchewan, and the Alberta Canadian Insurance Companies from the hail insurance business transacted this year amounts to about \$1,010,000. Discounting at 20 per cent. all notes included in this total brings it down to \$840,000. The loss claims are not yet all adjusted, but the indications are that the total for the three companies will be approximately \$600,000.

At Lethbridge there were two applicants for the city council's accident insurance, the Alberta Loan and Investment Company representing the Guardian Insurance Company, and Messrs. Asquith and Lindsey, who were representatives of the Railway Passengers Insurance Company. The former company was awarded the business.

NEW OFFICERS FOR IMPERIAL LIFE ASSURANCE
COMPANY

The Imperial Life Assurance Company of Canada announce the resignation of the Hon. Sir Mackenzie Bowell, and the Hon. S. C. Wood, as president and vice-president respectively of the company.

Both of these gentlemen became associated with the Imperial Life when it was organized, being elected to the first board of directors.

Mr. Herbert C. Cox has been appointed to succeed Sir Mackenzie Bowell as president of the company. Mr. Cox has not only been identified with the life insurance business in Canada for many years, but he is also connected with several important financial concerns.

Mr. G. A. Morrow, vice-president of the Dominion Securities Corporation, who has been a director of the Imperial Life for many years, was appointed a vice-president. The other vice-president of the company is Mr. S. J. Moore, president of the Metropolitan Bank, who has been associated with the company as a director and as a vice-president since 1907.

QUEEN CITY FIRE INSURANCE COMPANY

The controlling interest of the Queen City Fire Insurance Company has passed into the control of Messrs. Joseph Walmsley and J. D. Chipman, who will continue the management.

The Monetary Times learns that the new interests acquired a majority of the shares, the par value of which is \$50. for \$156.

The controlling interest of the Queen City was held by the late Messrs. Scott and Walmsley, one of the largest non-tariff companies in Canada. It has been in existence for over forty years.

The subscribed capitalization of the company is \$100,000 and the authorized \$250,000; of the shares in existence the new owners probably acquired 1,100 or 1,200. The price was in the neighborhood of \$200,000.

In conformity with the will of the late Mr. Thomas Walmsley, who was the surviving partner of Messrs. Scott & Walmsley, the firm of Scott & Walmsley, Limited, will be formed.

EXCHANGE RATES

John Seath, Jr., exchange broker, Traders Bank Building, quotes local rates as follows:—

	Between Banks.		Counter.
	Buyers.	Sellers.	
Sterling, 60's	8 13-32	8 7-16	8 11-16 to 8 13-16

LIFE INSURANCE LEGISLATION

While Designed Primarily to Protect the Policyholder, Twelve Millions Are Collected Through Various Statutes as Revenue in Neighboring Republic

Laws enacted by the several states in 1911 brought the total number of statutory requirements affecting the institution of life insurance and its holders of thirty million policies up to about forty-five hundred, is how Mr. Robert Lynn Cox, president of the association of life insurance presidents, sums up the legislative situation in regard to life insurance. This figure does not include the requirements affecting domestic companies solely, with the exception of New York State. Were those to be added, the number would be much larger. Domestic laws should be considered in any general review of life insurance legislation, but there is no compilation of them, as it is not needed for practical purposes. No one company is subject to all the laws governing domestic and foreign companies in all states. But there are several which have to adjust themselves to the laws governing foreign companies in practically all the states, in addition to the domestic companies' laws of their respective home states. Therefore, there are some companies—the larger ones—which operate under nearly all the forty-five hundred requirements referred to. This gives one view of the present magnitude of the supervision of the business of life insurance by the states, in its practical application.

As to the character of these requirements, they range from broad principles of supervision to regulation of minute business details.

Laws Classified Under Groupings.

Laws dealing specifically with the business of life insurance might be classified under the following broad groupings.

Regulating the administrative functions of the companies, including election of directors and officers, apportionment and limitation of expenses, compensation to agents, investment of capital stock and assets, maintenance of reserves, distribution of surplus to policyholders, keeping of records and accounts, provision for medical examinations, preparation and filing of reports, including annual statement, etc.

Pertaining to the rights of the insured, including provisions that guarantee their use of the reserve accumulations on their policies in event of lapse or surrender; loans on their policies; phraseology that makes the policy clear and not susceptible of misrepresentation, etc.

Dealing with the conduct and ethics of the business, including prohibition of rebating by agents, and use of misleading statements or incomplete comparisons tending to induce policyholders to lapse, forfeit or surrender their insurance.

Many other Statutes of General Effect.

Regulation of companies in their organization stage, including various provisions designed to prevent deception in promotion and sale of stock to the public.

Taxation and fees.

Functions and powers of State Insurance Departments, including valuation of policies, examinations of companies and determining solvency of same, licensing of companies and agents, filing of various reports made by companies, collection of taxes and fees, enforcement of laws and penalties, etc.

In addition to these groupings of laws specifically applying to life insurance there are many other statutes of general effect which concern the business, including regulations with respect to investments generally and their taxation; corporation laws requiring annual and special reports to be made to State officials, in addition to those furnished to the insurance supervision authorities; acts relative to corrupt practices and registration of legislative counsel, and anti-trust legislation so broadly drawn as to require reports and statements from life insurance companies.

Many times Cost of Supervision.

While in theory all laws dealing with life insurance are supposed to be based primarily on the idea of protecting the interests of policyholders, as a matter of fact they are really approached from various viewpoints. Undoubtedly most of the legislation dealing with the administrative functions of the company, policy provisions, the conduct of the business and departmental supervision is approached from what is regarded as the viewpoint of the policyholder. However, the same cannot be said of the various statutes imposing varying rates of taxation upon policyholders' funds, for the twelve million dollars thus annually collected is exacted chiefly as a revenue proposition for the benefit of the public generally. This sum is many times more than the cost of insurance supervision. A calculation made on the basis of 1907 statistics shows that the ratio of expenses of State insurance de-

partments, including the supervision of life, fire and all other branches to the amount of life insurance taxes collected ranged from 2.6 per cent. to 20.2 per cent., with the exception of a exception of a single State which collected no taxes. The State whose ratio was 2.6 per cent. collected more than one and one-half million dollars in life insurance taxes in 1907, while the cost of its insurance department that year was little more than \$40,000.

Adds to Cost of Insurance.

Any expense that is added to the business increases the cost of insurance and therefore falls upon present or future policyholders. Not only is this true of the taxes and fees imposed, but also of the expenses caused by the diversity of statutory provisions in the States. If a general policy form which applies to most States has to be amended and specially printed for a certain State, that additional expense is borne by the policyholder. So it is also with respect to special forms of voluminous statements that may be required by some States. The preparation of a special report by a large company for one State recently involved the exclusive use of a band of clerks for several months. The present lack of uniformity among statutory requirements largely adds to the cost of insurance in many ways. At the home offices of all companies of considerable size there are various officials whose duties largely consist of keeping track of the statutory requirements in the different States and seeing that their companies conform to all of them. This is expensive, but it would be still more expensive to violate any of these provisions, even innocently.

SMALL FRUIT CULTURE

The failure of many who occupy land to grow an abundance of small fruits, at least for their own use, is due to a mistaken idea that it requires too much time to look after a garden. This is the view taken by Mr. W. T. Macoun, the Dominion Horticulturist, and expressed in a paper read by him last winter before the Senate Committee on Agriculture and Forestry. This paper, which constitutes a pamphlet of thirty-five pages, is an exhaustive treatise expressed in the plainest terms, on the culture of small fruits. The fruits dealt with are the strawberry, raspberry, blackberry, gooseberry, and the several classes of currants. Besides giving full instructions for planting and cultivation, notes are given on the relative merits of varieties.

This pamphlet contains an interesting table on the cost of growing and the returns from an acre of strawberries. At a selling value of five cents per box, a net profit of eighty-four dollars is shown. A section is devoted to the preparation and application of insecticides and fungicides that are useful in fruit growing. Having the information of this paper to guide him, there is no good reason why every farmer should not have a productive fruit garden. A large edition has been printed to be sent free to all who apply to the Publications Branch, Department of Agriculture, Ottawa.

CANADIAN CEREAL TO BE REORGANIZED

A special meeting of the shareholders of the Canadian Cereal and Milling Company has been called for Monday, to discuss a reorganization plan which will be submitted by the directors. The latter have issued a circular to the shareholders in which they say in part: Your directors regret to report that the profits estimated at the close of the last financial year have not materialized, and the additional capital which they at that time hoped to obtain was not received. The net loss from the company's operations for the fifteen months ended 31st August, 1911, including bond interest and dividends paid on preferred stock amounting to \$94,791.66, was \$168,399.58. For the four months from the 31st of August to the 31st of December, 1911, the business of the company showed a net loss, including bond interest, of \$121,492.49. For the seven months from the 1st of January to 31st of July, 1912, the period under which the present management has operated, the net loss from the company's operations, including bond interest, amounted to \$46,107.49. Under the plan of reorganization to be submitted to the shareholders on September 30, the capitalization of the new company would be \$2,000,000 seven per cent. cumulative preferred stock, of which \$750,000 would be issued and \$2,000,000 common stock, of which \$750,000 would be issued. Each underwriter would be entitled to one preferred share and three common shares for every \$100 paid.

The Richelieu and Ontario Navigation Company will apply for an act to amend its charter, authorizing the company to increase its capital stock to \$15,000,000.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

The Town of Swan River, Manitoba, offers \$4,000.00 worth of twenty-year equal annual six per cent. debentures. Tenders received up to November 1st. Highest tender not necessarily accepted. Enquire from

B. E. ROTHWELL, Secretary,
Swan River, Man.

TIMBER FOR SALE

Tenders will be received up to and including the first day of October, 1912, for the right to cut white and red pine and spruce, on timber berths on the upper waters of the Jocko River east of the townships of Garrow and Lockhart, in the District of Nipissing, Province of Ontario, the berths being designated "Jocko No. 1" and "Jocko No. 2," each containing twenty-five square miles more or less.

For maps and conditions of sale apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.
Toronto, July 17th, 1912.

TOWN OF MELFORT DEBENTURES FOR SALE

Sealed tenders will be received up to October 18th, 1912, for the purchase of \$125,000 town of Melfort, Sask., debentures in denominations of \$5,000 each at 6% payable annually, principal at end of thirty years.

Tenders for one or more will be considered. No tender necessarily accepted.

J. E. DURNIN, Secretary-Treasurer.

CHESTER, SASK.

Tenders will be received by the undersigned up to 10th October, 1912, for the purchase of 20-year 5¾ per cent. Government Guaranteed Debentures of the Rural Municipality of Chester No. 125, Province of Saskatchewan, amounting to \$5,000, for the purpose of improving main roads.

Debentures repayable in twenty equal annual instalments with interest.

The highest or any tender not necessarily accepted.

J. B. LUPTON,
Secretary-treasurer.
Kaiser, Sask., Sept. 13th, 1912.

COLEMAN, ALBERTA

Tenders for Debentures.

Tenders will be received by the undersigned to September 30th, 1912, for the purchase of \$3,500 five per cent. debentures of the Town of Coleman, repayable in ten equal annual instalments.

JAMES FORD,
Secretary-Treasurer.
Coleman, Alta.,
September 11, 1912.

Mr. H. S. Holt, president of the Royal Bank and Montreal Light, Heat and Power Company, returned to Montreal after a trip to Europe which extended over several months.

Mr. John F. Mallon has returned to his former associates in the sphere of banking and takes charge as manager of the Queen Street East and Ontario Street branch of the Home Bank of Canada in Toronto. Mr. Mallon had been associated with the Home Bank for seventeen years when he resigned six years ago owing to ill health.

Sir Richard Cartwright died at Kingston, Ont., on Monday. Sir Richard had not completed his seventy-seventh year, having been born at Kingston, December 4th, 1835. When only twenty-seven he was elected to the Old Legislature of Canada from the constituency of Lennox and Addington. From the formation of the Dominion Parliament at Confeder-

TENDERS FOR DEBENTURES

Sealed tenders will be received by the undersigned up to 8 o'clock p.m. the 15th day of October, 1912, for the purchase of one hundred and ten thousand dollars of debentures of the Town of Estevan, Saskatchewan, as follows:—\$35,000 waterworks extension 5 per cent. thirty years, \$50,000 High School debentures 5 per cent. thirty years, \$25,000 manufacturing establishments 5 per cent. 25 years; all repayable in equal annual instalments of principal and interest.

L. A. DUNCAN,
Secretary-Treasurer.
Town of Estevan, Sask.

STRATHMORE, ALTA.

Tenders will be received up to November 1, 1912, for the purchase of the following debentures of the Town of Strathmore, Province Alberta.

Local Improvement Cement Side-walk Debentures, Five Thousand Dollars, Six per centum. Fifteen years.

Local Improvement Plank Side-walk Debentures, Fifteen Thousand Dollars, Six per cent. Ten years.

Local Improvement Fire Wall Debentures, Six Thousand Dollars, Six per cent. Ten years.

M. EUGENE SLY,
Secretary-Treasurer.
Strathmore, Alta.,
September 11th, 1912.

IMPERIAL, SASK.

TENDERS FOR DEBENTURES

Tenders will be received by the undersigned up to October 1st, 1912, for the purchase of \$6,000 15-year six per cent., skating and curling rink debentures. Full particulars may be had from

J. G. HOBMAN,
Secretary-Treasurer.
Imperial, Sask., August 27th, 1912.

CITY OF WETASKIWIN

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned will be received up to 5 p.m., October 30th, 1912, for the purchase of the following debentures:—

Waterworks and sewers, 50 years at 5 per cent.	\$16,000.00
Electric light, 20 years at 5 per cent.	23,000.00
Local improvement-concrete walks, 20 years at 5 per cent.	6,445.06
Local improvement sewers, 30 years at 5 per cent.	2,069.41
Local improvement plank, 7 years at 6 per cent. ...	819.56

Waterworks and sewers debentures are dated March 29th, 1912, the local improvement debentures are dated March 1st, 1912. Repayable in equal annual instalments of principal and interest at the Imperial Bank of Canada, at the city of Wetaskiwin. Delivery to be made at the city of Wetaskiwin

Further particulars may be obtained from,

E. ROBERTS,
Secretary-Treasurer.

ation until 1878 he represented Lennox at Ottawa, and being then defeated he afterwards sat successfully for Centre Huron, South Huron, and South Oxford, the last named being the riding with which his name was familiarly identified. Just before the general election of 1904 he was called to the senate, and from 1909 till the defeat of the Laurier Administration was leader of the Government in that body. On the formation of Mackenzie Cabinet in 1874, Sir Richard took the portfolio of finance, and afterwards in opposition was the recognized financial critic of the opposition benches. In the cabinet of Sir Wilfrid Laurier Sir Richard held the portfolio of trade and commerce. During the periods when his party enjoyed power, he was entrusted with several political missions of importance. As a parliamentarian and debater he had few rivals in Canadian political life.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

ADVERTISER, 27, desires position as chief clerk or underwriter. Has had nine years fire insurance experience; past three years as inspector. Thoroughly acquainted with the various inside departments and has a sound knowledge of C.F.U.A. schedules. Box 75, The Monetary Times, Toronto.

WANTED.—Contracts from Board Fire Insurance Companies for City of Regina. Excellent connection. Write Cathcart, Price & Boyd, Limited, Regina, Sask.

WANTED.—Stock salesman to handle company with bright prospects. Nature speculative but better and safer than many so-called investments. No exaggeration necessary. Apply Box 85, Barrie, Ont.

WELL EDUCATED young man, 10 years' experience, capable to act as accountant or secretary, desires to change position. Excellent references furnished. Box 89, Monetary Times, Toronto.

WANTED.—Position of Fire Insurance Inspector in service of strong Tariff Company. Have eleven years experience in General Insurance work. Inspection and organization work. Apply Box 77, Monetary Times, Toronto.

FIRE INSURANCE AGENCY WANTED, for strong fire company. Can place \$60,000 preferred business immediately. Apply to H. H. Farman, 201B, Grain Exchange, Calgary.

BANK MANAGER seeks position of responsibility and trust with financial or bond house. Box 93, The Monetary Times, Toronto.

WANTED

Two high-class Stock Salesmen to handle a stock issue of an established successful company. Only men who can earn from \$3,000 upwards need apply. Send full particulars of experience and reference to Box No. 91, Monetary Times, Toronto.

DIVIDENDS AND NOTICES

DOMINION TRUST COMPANY, LIMITED

Dividend Notice.

Notice is hereby given that an interim dividend at the rate of 8 per cent. per annum for the quarter ending September 30th, 1912, will be paid on October 1st, 1912, to the members who are registered as shareholders at close of business on September 12th, 1912. The transfer books and register will be closed on September 13th and 14th, 1912.

By order of the Board,

A. H. BAIN,
Secretary.

Vancouver, B.C., September 3rd, 1912.

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

Dividend Notice.

A Dividend of two per cent. on the Preferred and one and one-half per cent. on the Ordinary shares of the Company for the quarter ending September 30th, 1912, has been declared payable October 15th, 1912, to shareholders of record of September 30th, 1912.

By order of the directors,

THOMAS GREEN,
Cashier.

New Glasgow, N.S., September 8th, 1913.

CANADIAN PACIFIC RAILWAY COMPANY.

Notice to Shareholders.

The Thirty-first Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors, and for the transaction of business generally, will be held on Wednesday, the second day of October next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

Special Meeting.

The Meeting will be made Special for the purpose of authorizing the issue of Consolidated Debenture Stock of the Company to acquire the outstanding securities of the Dominion Atlantic Railway Company and also for the purpose of considering, and, if approved, of authorizing an increase of the present authorized Ordinary Capital Stock of the Company by an amount not exceeding \$60,000,000 for the purposes of the Company, such increase of Stock to be issued according to the requirements of the Company and as may be determined by the Directors, and of adopting such Resolution or By-Law as may be deemed necessary in connection therewith in order to enable the Directors to give effect thereto.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 1 p.m., on Saturday, the thirty-first day of August. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the third day of October.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, August 12th, 1912.

"It is difficult adequately to measure the advantages that will accrue to New Brunswick from the operation of the new St. John Valley Railway. We expect that eventually the trains of the Grand Trunk Pacific will find their way into St. John over the steel of the St. John Valley Railway," says Hon. J. K. Flemming, Premier of New Brunswick.

The Scottish Union and National Insurance Company has received a Dominion license for the transaction of tornado insurance, in addition to fire insurance, for which it is already licensed. The chief agency of the company is at Montreal and Messrs. Esinhart and Evans, of that city, are the chief agents.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

We recommend these Bonds as a safe and remunerative investment.
Price par and accrued interest.

WOLVERTON & CO., LTD.
Suite 704 Dominion Trust Building, Vancouver, B.C.

The General Fire Assurance Company, of Paris, France, has been registered in Alberta.

AGENTS WANTED

One of the strongest and most reliable Loan Companies in Canada desires to appoint reliable agents in towns and cities throughout Ontario for the sale of its Short Term Debentures. Liberal commission will be paid. Address Box 81, The Monetary Times, Toronto.

GUESS & HAULTAIN
Mining and Metallurgical Engineers
123 Bay Street, Toronto

The Toronto police commissioners commenced an inquiry into the conduct of Inspector Duncan regarding the custody of papers in the Farmers Bank case. Considerable evidence was heard. "It comes down to this," observed Mayor Geary at the conclusion of this week's sessions, "a question of the inspector's veracity and of whether he committed perjury." The inquiry will be resumed next week.

WHAT IS CANADA DOING?

In October, 1913, navigation between the Atlantic and Pacific oceans, via the Panama Canal, will be inaugurated by a naval vessel of the United States. This is the anticipation of Colonel Goethals, who hopes also to save \$25,000,000 in the cost of the waterway. The estimated cost of construction was \$400,000,000. The formal opening of the Canal is to be on January 1st, 1915. European and Asiatic authorities are bestirring themselves in preparation of the event. The Hon. John Barrett, director-general of the Pan-American Union, has just returned to Washington from a trip abroad, where he has been studying the extent of commercial activity in relation to the Canal. Mr. Barrett, who recently contributed an interesting article to *The Monetary Times* regarding Canada's relation to the Canal, summarizes his observations as follows:—

1. Every important port of Great Britain, France, Germany, Holland, Belgium, Scandinavia, Spain, Italy, and Austria is being improved to the highest degree of efficiency for oversea commerce.

2. Every European shipbuilding yard of recognized standing is busy to its capacity constructing ocean-going merchant vessels. Old-established steamship lines are adding up-to-date vessels to their fleets, and new companies are being formed and ordering ships.

3. European governments are instructing their diplomatic and consular agents to study and report upon every phase of trade opportunity expected to result from the Canal. Their chambers of commerce and their commercial organizations are co-operating along the same lines, and the business schools are educating trained men for the field. Government officials and representative men in private life are showing particular hospitality and courtesies to the visiting representative

men of Latin America and all other countries whose trade they want. Their banking and investment houses are extending their foreign facilities. Their private business companies of already large established trade and their new companies are sending agents and scouts to Latin America and all parts of the world affected by the Canal to investigate trade possibilities.

4. In Japan three steamship companies are building vessels for the Canal. Japanese banks are considering the opening of branches in Latin America. A score of Japanese manufacturing, exporting and importing houses have numerous agents in Central and South America. One Chinese-owned steamship company is planning to operate a line from Shanghai and Hong Kong to Central and South America. Australia's commercial organizations are sending men to South America to develop trade, while Australia and New Zealand are planning to establish a Canal steamship line of their own. A new line of freight vessels is to run from Calcutta or Bombay to South America. Canada will run two new direct lines, respectively, from Vancouver and Montreal to the corresponding coasts of Latin America.

5. The west or Pacific coast of South America, reaching 5,000 miles south from Panama, is showing great preliminary activity. Chili, Peru and Bolivia are spending \$50,000,000 in opening up their interiors with railways. Chili is building at Valparaiso a new artificial harbor to cost \$15,000,000. Guayaquil, the principal port of Ecuador, and one of the best harbors of the Pacific Ocean, is to be made sanitary at a large expense. Callao, the chief port of Peru, is being improved. On the east coast the activity is even greater, for both Argentina and Uruguay will spend nearly \$30,000,000 in port improvements at Buenos Aires and Montevideo, respectively. Brazil is putting in first-class condition every port along her 3,000 miles of coast line from Rio Grande do Sul, in the south, to Para, at the mouth of

the Amazon. One hundred million dollars is being expended in constructing new railways into the interior of Brazil. Venezuela and Colombia, Central America, Mexico, Cuba and the other West Indian countries are awakening also to the significance and possibilities of the Canal, and are sending agents and appointing commissions to study the situation as it affects them.

After such a list of foreign activities, it is somewhat disappointing to review what little has been done by Canada to prepare for the opening of the Canal. We are told by Mr. Barrett that Canada will run two new direct lines, respectively, from Vancouver and Montreal to the corresponding coasts of Latin America. It has been stated also that a new line of steamers from Canada's Atlantic to Pacific coast will be inaugurated. The Department of Trade and Commerce at Ottawa, we understand, has asked its trade commissioners in various countries to report on the probable effects on Canadian trade, of the opening of the Canal.

Aside from belated and somewhat vague proposals to increase the commercial strength of our Pacific coast, little else is being done by the Dominion to meet new conditions. The railways are keeping their own counsel, but may be expected to be ready for the Panama Canal when that waterway is ready for them. The same argument, we fear, cannot be applied to our Pacific ports. Actual work should be in progress to place Vancouver, Victoria, and its "sister ports among the greatest and most attractive on that Coast. There is no excuse for the present inaction.

THE BRITISH PREFERENCE

There has never been any doubt as to the loyalty of Canada to Great Britain. Both political parties knew that at the time of the last Dominion election. The sentimental slogans played their part as election spice. The Western grain growers are as loyal as other citizens of Canada. They differ with the Eastern manufacturers on the question of tariff. Last week, while the manufacturers were in convention at Ottawa, The Grain Growers' Guide sent a telegram to the president of the Manufacturers' Association. It contained a pinch of the sugar of opinion and a pinch of political salt. The wire, to which a reply was sent by the manufacturers, and which elicited a further communication from the West, is worthy of reproduction with the other correspondence.

"The Western grain growers," it said, "are anxious to know if the Manufacturers' Association will join hands with them in an effort to bind Canada closer to the Motherland, by urging the Government to reduce the tariff on British imports to one-half that charged American imports, to complete free trade with the Motherland in ten years.

"The grain grower feel that this would be a tangible form of showing their patriotism, and would develop a much greater trade with the Motherland, and thus strengthen the ties of the Empire and show the world that Canada's loyalty to the Motherland is deep and abiding and not merely words. It would also show the world that Canada stands behind the Motherland to uphold the traditions of the Anglo-Saxon race and keep the Union Jack in the proud position it has held for a thousand years. Such an action would also be undoubted proof that Canada has no desire for political union with the United States. Would you kindly bring the matter before your annual convention now in session at Ottawa and ascertain if the manufacturers present are willing to join hands with the grain growers in this great Imperial scheme?"

This was the reply of the manufacturers: "The association acknowledges the receipt of the message from The Grain Growers' Guide dealing with the two questions: first, Canada's loyalty to the Motherland;

second, the question of a larger preference on British goods.

"Our association believes that all Canadians, regardless of their calling, are doing what they can to promote the feeling of loyalty and closer union between all parts of the British Empire.

"The attitude of the Canadian Manufacturers' Association on the British preference has been set forth in resolutions adopted after long and careful consideration of the varied interests involved. It believes that no adequate consideration of such a sweeping proposal as that embodied in your telegram, received only this morning, in the closing hours of the convention, is possible. If any organization or organizations representative of all producers in both the east and the middle and farther west desire a conference on any matter looking to the advancement of Canada as a whole, or as an integral part of the British Empire, this association will gladly co-operate.' "

That drew a further statement from the grain growers, in which it was stated that they "have repeatedly declared for an increased British preference and eventual free trade with the Motherland. If the Canadian Manufacturers' Association is prepared to assist the grain growers towards this end, there is no doubt but that the grain growers will be glad of the assistance of the manufacturers.

"Freer trade with the Motherland would reduce the cost of living to every Canadian and bind closer the greatest overseas dominion with Great Britain. Every loyal Canadian will be glad to know that the Manufacturers' Association is not opposed to lower taxes on British imports.

"If the association is prepared for a conference with the producers to assist in securing free trade with Great Britain in ten years it will be a welcome message to every Western grain grower."

Mr. R. S. Gourlay, the president of the Manufacturers' Association, said that it was somewhat typical of much of the discussion in regard to fiscal questions that it was apparently thought possible that the whole fiscal policy of the Dominion could be changed by the ready means of a night lettergram. That is quite true, and it would have been better had the grain growers arranged matters differently.

The manufacturers of Canada are as much opposed to free trade with Great Britain as they are to free trade with the United States, and little can be gained by shutting eyes to that fact. The Western grain growers probably want a greater preference to or free trade with Great Britain, within five or ten years, in order that their cost of living may be reduced. It is unfair to inject in either case the question of loyalty to Great Britain. Business comes first. Business bracketed with loyalty comes second. The interests of Eastern manufacturers and Western farmers despite all this, are not so far apart as would appear. Early steps should be taken to arrange the suggested conference. We think, too, that a close examination of the present tariff would reveal a fairly lengthy list of articles upon which the British preference could be increased to the benefit of the Canadian consumer and without any detriment to the Canadian industrial producer.

CANADA AND THE BRITISH TRUSTEE LIST

Another effort is to be made to have the securities of Ontario and the other provinces placed on the British Trustee List. This proposed innovation has been advocated by *The Monetary Times* for several years. We have been in communication with the provincial treasurers of Canada, and eight of the nine have assured us that they will co-operate to obtain the desired end. The borrowing operations of the ninth, Prince Edward Island, have been comparatively small, and no occasion

has arisen to seek loans in London. The subject was some time ago placed by us before the Dominion Minister of Finance, Hon. W. T. White, who also promised to give it consideration.

The Provincial Treasurer of Ontario, who has just returned from England, brings the news of the renewed effort to achieve the desired end. The fact that the matter is now in the hands of Lord Strathcona, Canadian High Commissioner in London, is a hopeful sign that success will crown persistent efforts by many of those interested.

ALLAN HAYNES, BUSINESS DOCTOR

"The announcement which Mr. Allan Haynes is making seems practically to establish a new profession, as far as this country is concerned, although it is one that is known on the other side of the Atlantic—Mr. Haynes himself has long practised there. He is a doctor of business. He claims that he is able to render invaluable assistance to business men of every description, and that he can be of service to large firms who desire to reduce their working costs, extend their operations, or secure increased efficiency. There seems no reason whatever why the profession of business doctor should not flourish. Many a business which has sunk into a groove might benefit by an intelligent diagnosis of its ailments and a little intelligent advice."

The above effusion from the columns of The London Daily Mail would indicate that Mr. Allan Haynes, formerly of Spokane, Washington, and of Edmonton, Alberta, is now active in London. In *The Monetary Times* of September 7th, we printed some details of the business career of Mr. Haynes. We question considerably the ability of that gentleman as a business doctor. His medical attendance upon The Inland Herald, a newspaper in Spokane, and promoted by him, did not save it from death. The Edmonton Portland Cement Company, another promotion of Mr. Haynes, is not at present in the best of health. He left this patient apparently at a critical time. Possibly the present management of the company prefer another physician rather than calling back "Dr." Haynes. In short, Mr. Allan Haynes should complete the diagnosis and cure of his American cases before beginning upon any overseas.

UNITED STATES COINAGE IN CANADA

A correspondent complains of the large amount of United States silver which is in circulation in Ontario, especially Toronto. "One hardly gets any change now which does not contain some United States silver or copper." He says: "In fact, I had to object to a bank lately paying me \$2 of United States silver in each \$10 roll of silver they gave me, which they must have done to others as well. Silver is entirely different to bills, which find their way back to New York through the banks. Silver passes from hand to hand, and remains in circulation to the exclusion of Canadian coinage. The government loses heavily by it, as, of course, it makes a large seigniorage on the coinage of silver and copper."

There is an arrangement in existence with the banks under which they ship all such coinage back to United States points, the government undertaking to pay the express charges and a small commission to indemnify them for their trouble. Under this arrangement large amounts have been shipped out of the country. During the fiscal year 1911-12 over a million and three-quarter dollars was so disposed. Parliament has granted an appropriation for the current year of \$15,000 to meet this class of expenditure.

SMALL CHANGE

The cost of living is a real artistocrat.

* * * *

Freight rates is becoming question Number One Hard.

* * * *

Money and living cost are walking upward, hand in hand.

* * * *

The question of nickel export is important, but not so much as the consistent circulation of prosperity.

* * * *

Preparations for the annual number of *The Monetary Times* is admittedly the first sign of winter.

* * * *

Thanksgiving Day is to be October 28th, and Canada is aching to unload its thanks for the blessings of Nought Twelve.

* * * *

Leather prices are to be advanced from 10 to 15 per cent. Can we wonder, at that price, that corporations have no souls?

* * * *

The reorganization of the Canadian Cereal and Milling Company is another reminder that the path of some mergers is hard.

* * * *

Some one suggested changing the fiscal policy by night lettergram. Settling the national debt that way is another laudable ambition.

* * * *

The listing of \$95,000,000 stock of the Brazilian Traction Company on the Toronto Exchange is one of the small, almost unnoticed incidents of the week.

* * * *

The Great Northern Life Assurance Company, of Winnipeg, promoted by one, Laurence Rosewald, was organized in the brilliant light of a promotion rocket—and came down like the stick.

* * * *

A Canadian magazine is giving away a real estate lot to every new annual subscriber. That is the worst of living in a country of 3,618,939 square miles of land and only 125,756 square miles of water.

* * * *

If the report is correct that Canada may place a part of its next loan with French investors, after the Forget incidents, Colonel Sam Hughes at the head of the Montreal boy scouts may be required to give assistance in the flotation.

* * * *

The official report of Mayor Geary and Treasurer Coady, of Toronto, regarding the temporary loan, tells that "the magnitude of the work entrusted to us entailed heavy and anxious responsibility." Nothing is said of their regrets at missing opportunities to sell the city's bonds at 95.

* * * *

The Minister of Finance feels satisfied that had the directors of the Ontario Bank employed a proper system of auditing, it would have been the means of preventing the institution closing its doors. This might likewise be applied to the case of the Farmers Bank, which might have been averted had its affairs been under the observation of a first-class auditor. There is much truth in those assertions. But in addition to auditing existing banks, we need to see that charters are not granted to any more crews like that which floated and wrecked the Farmers Bank.

CHINA'S LOAN AND THE MONEY DRAMA

Despite all protests, official and unofficial, the independent loan to China, which was discussed in these columns last week, has been placed in the London market at 95. Subscriptions were invited for £5,000,000 in Chinese treasury bonds. Applicants for allotment of the bonds appeared in a steady stream at the issuing banks, Lloyds, the London and Southwestern, the Capital and Counties, and the Chartered Bank of India. The loan was fully subscribed. Immediately prior to the issue of the bonds, Sir John Jordan, the British Minister to China, made an informal protest to the Chinese government against the conclusion of the loan. He advised President Yuan Shih-Kai seriously to consider the situation "before committing China to a course of action in regard to finance which would not meet the approval of the Six Powers, comprising Great Britain, the United States, France, Germany, Russia and Japan." Sir John also presented to President Yuan a detailed statement of China's floating liabilities, amounting to nearly \$50,000,000, which must be paid within a few months from the proceeds of any forthcoming loan. This action caused considerable nervousness among the underwriters of the loan, and it is said that Mr. Charles Crisp, the head of the syndicate and the hero of this money drama, went on the London Stock Exchange and offered to release the underwriters and to pay them $\frac{1}{2}$ per cent. to compensate them for their trouble. Several of the underwriters accepted the proposal, but a number of them later undertook to stand by their original agreement.

China, it is said, intends to pay the arrears of the Boxer indemnity out of the proceeds of the new loan. In addition to the salt tax the Messrs. Crisp have other securities producing the yearly income of £1,500,000.

The bankers of six nations, commonly known as the Six Power group, have definitely suspended all negotiations for a loan to China. Messrs. J. P. Morgan & Company, Kuhn, Loeb & Company, the First National Bank and the National City Bank of New York, constituting the American group for Chinese business, have furnished for publication the following explanation of their position:—

"In view of the fact that the Chinese Government has declined to accept the conditions upon which the British, German, French, American, Russian and Japanese groups, each with the approval of their respective governments, were willing to undertake a loan, and has now contracted with other parties to issue Chinese securities, it is desirable that the following facts should be made public:—

"The British, German, French and American groups, with whom China had in the past contracted numerous loans, were requested by the Chinese Government in February last to finance the Government's current administrative expenditures and the disbandment of troops during a period of approximately six months, within which it was estimated that it would be impossible for the Government to collect sufficient revenue to meet its running expenses, owing to the disturbed conditions following the revolution. The four groups were further requested to undertake the flotation of a loan of \$300,000,000 to be issued during a period of five years, the proceeds of which were to be devoted (1) to the repayment of the advances above mentioned, (2) to the liquidation of arrears in loan services and indemnity payments, which had arisen from the Chinese Government's inability to meet its obligations during the preceding four months, and (3) to finance administrative reforms and to inaugurate a programme of industrial development.

"At the suggestion of the governments and with the approval of the Chinese Government, Russian and Japanese groups were invited to participate with the

original four groups in these operations. It was, therefore, agreed by the groups concerned that they should co-operate in this business on a basis of absolute equality, thus precluding the possible domination of any one government or group in Chinese affairs.

"The governments were desirous that the groups should furnish a sum sufficient, with proper safeguards, to enable the Peking administration to establish its authority and to restore normal conditions throughout the country. Owing to the unsettled conditions in China and the world-wide importance of the business contemplated, the groups deemed it necessary to act only in consultation with and subject to the approval of their respective governments. From the inception of the negotiations, therefore, the six governments and the six groups have been acting in full accord.

"Notwithstanding the fact that, as the result of the revolution, there was practically no stable central government, and that China had defaulted in the service of several loans and had been obliged to request permission to suspend the Boxer indemnity payments, the groups were willing to finance the requirements of the Government under conditions which the governments and groups believed calculated, on the one hand, to restore Chinese credit and upbuild the newly organized Republican Government, and on the other to protect the prospective purchasers of Chinese bonds.

"These conditions were:—

"First—That the purposes for which the funds were required should be stated by the Chinese Government and approved by the groups.

"Second—That China should adopt a system of audit which would insure the effective expenditure of loan funds for the purposes specified.

"Third—That the salt taxes to be hypothecated for the service of this loan should be administered either by the existing maritime customs organization or by a separate service like the customs, under foreign direction, thus safeguarding the proper administration of the security despite the possible continuation or recurrence of unsettled conditions in China.

"The groups appreciated that certain funds were required immediately, and that a considerable time must elapse before the Chinese Government could prepare its programme for administrative and industrial reorganization. They desired, moreover, to be certain that each successive bond issue should be properly secured. The groups, therefore, proposed within the present year to issue a loan up to an amount of \$100,000,000. They were prepared, furthermore, when funds were required by the Chinese Government, and when adequate security was available, to take subsequent issues at a price to be ascertained by reference to the average net quotation in London of the immediate preceding series.

"In order to protect the bonds issued and the market for succeeding series, and to safeguard the security therefor, the groups, because of the magnitude of the contemplated operations, desired China to engage not to borrow from other parties until the reorganization loan was issued in entirety.

"The groups furthermore desired China to appoint them financial agents for a term of five years, the period within which the Chinese proposed to issue the entire reorganization loan. The groups believed it to be in the interest of China and of the investing public that they should be in a position intelligently to assist the Chinese Government in the preparation of its reorganization programme and to advise as to the expenditure of the loan funds in such manner as to secure its efficient operation.

"Between the end of February and the middle of June the groups advanced a total of about \$9,000,000 to meet the pressing needs of the Peking administration,

which during this period was able to collect practically no revenue from the provinces over which it was endeavoring to gradually establish its authority.

"The conditions upon which the groups were prepared to make the loan were submitted to the Chinese Government and were declined by it, not because of the financial terms, but because of the safeguards required by the groups to ensure the proper expenditure of the loan funds and the effective collection and protection of the security offered.

"After the most careful consideration of the conditions in China and the difficulties of the Chinese Government, these requirements were deemed by the six governments and the six groups to be essential. On these terms a loan would have been considered by the groups to be a sound investment despite the provisional character of the Chinese Government. But without such safeguards they would not feel justified in offering the bonds to the public. Neither were the governments willing to support nor the groups to undertake a loan which would so largely increase China's debt without insisting upon the inauguration of reforms which would enable her to sustain it."

In an interview published in London, Mr. C. Birch Crisp, head of the new English group of bankers, explains that when the loan was first proposed, he went to the Chinese legation, and told Dr. Morrison, the special adviser to the Chinese Government, that he was of the opinion that China was capable of furnishing sufficient security, but that he was unwilling to take up the loan without his (Dr. Morrison's) support. This support was accorded. Mr. Crisp then went to the Foreign Office and informed the officials there that his house expected to sign an agreement to float the loan. The affair was discussed in the most open manner by each side, and he was assured that it would be impossible to conclude any negotiations outside of the Six Power group. Therefore, he was invited to abandon the project as it could not be realized. Mr. Crisp demanded that the Foreign Office write a formal letter advising him to abandon the undertaking for reasons of State, as that office had already done in the case of another loan. The Foreign Office replied as it did not have the means to prevent him from undertaking the loan, he was free to act as he liked. Ten days afterward Mr. Crisp was again summoned to the Foreign Office and told that China would undoubtedly denounce the contract. But his advices from Peking being to the contrary, he again asked for an official letter requesting him to abandon the project, which was again refused. A formula, however, was drawn up to the effect that he would not proceed with the emission of the loan without forewarning the Foreign Office. He gave this notice, but received no reply and went on with the affair.

In London financial circles there is some nervousness on account of the opposition of the Foreign Office to the loan. The London Morning Post voices the sentiment of important British financial interests when it declares that "a most dangerous precedent has been established. The British Government has in the past used its influence to persuade other Powers into sanctioning no loan to China except on such terms as would provide adequate control over expenditure. Since it has failed to prevent British financiers from violating this principle, other governments will not improbably claim similar freedom of action for their citizens. The result will be that rival financial groups, throwing prudence to the wind in the quest for immediate profit, will compete with each other in offering loans to China on easy terms. The safeguards will be whittled away for a few glorious years until the Chinese Government finds itself at last able to draw without let or hindrance on the riches of the money markets of the world. Then will come the crash, and pressure exercised by the bondholders will force the various governments to intervene whether they like it or not."

In the meantime, Mr. Crisp has been responsible for a decided financial coup.

CANADIAN PACIFIC RAILWAY'S STOCK ISSUE

Sixty Millions to be Floated During Next Year at One Hundred and Seventy-five—Montreal's Transportation Troubles

Monetary Times Office,

Montreal, October 2nd.

The thirty-first annual meeting of the shareholders of the Canadian Pacific Railway was held on Wednesday. The most important item was the authorizing of the directors to increase the capital of the company by \$60,000,000, making the total capital to amount to \$260,000,000, and to issue the new stock to shareholders at \$175 per share, being a premium of 75% above par. This authorization was given immediately after the annual meeting adjourned and was resolved into a special meeting for the purpose of considering the new stock issue.

Both in his general address at the annual meeting and in his remarks before and after the vote at the special meeting, Sir Thomas Shaughnessy spoke of the proposals which have been discussed so fully of late. During the course of his remarks he explained that the proceeds of the new stock issue would be used in part to retire the company's 5% first mortgage bonds which fell due in 1915 and which amounted to \$33,766,000. In the past, it had been the policy of the company to issue 4% consolidated debenture stock to retire the bonds as they fell due, but upon this occasion it was deemed wise to issue ordinary stock in lieu of these debentures, this course being not only more attractive to shareholders but in every way more advantageous to the company itself.

Will be Offered in January.

It was also explained that the shareholders or the public need not be burdened by the issue, inasmuch as it was not intended to offer it till next January and payments would be spread well over the entire ensuing year.

Out of the proceeds of the sale, \$60,000,000, being the par value of the new stock to be issued, will be used for the purposes for which the company is authorized to issue consolidated debentures. The balance, being \$45,000,000, together with \$15,000,000 to be taken from the accumulated surplus, will be expended on road improvements. This surplus is now the property of shareholders and may properly be distributed among them but will, instead, be expended on capital account.

Low Fixed Charges Per Mile.

By pursuing policy outlined, President Shaughnessy pointed out that the debenture debt would be \$60,000,000 less than would otherwise be the case, while the fixed charges would be \$2,400,000 less per annum. He added that this, on the present mileage, would leave the fixed charges at the rate of about \$750 per mile, which was exceptionally low and only one-fifth as much as carried by many roads.

Speaking of crop prospects, the president said each year there was liable to be damage but this year results would be better than expected and that the amount of grain offering and to be offered would keep the road busy hauling for many months to come. There was every reason to think that the grain traffic and the general business of the company would be at least as large as it had been during the past year. He then spoke of the innumerable works of the company and the necessity of obtaining money to carry these out, and followed by outlining the policy of the directors with respect to the financing referred to above.

The president's recommendations were adopted unanimously. The four directors whose terms expire this year, namely, Sir William Whyte, Sir Sandford Fleming and Messrs. A. R. Creelman and W. D. Matthews, were all re-elected.

Montreal Tramways Company and City.

In connection with the transportation problem at Montreal, Controller Lachapelle said the Montreal Tramways Company was uneasy lest at some future time the city would establish independent car lines on the streets not given to it, so that President Robert and his associates were anxious to secure all the streets possible. These, however, would not be given until the company's officers met the board of control and negotiated a new agreement. Therefore it was for the Tramways Company to come forward and say what they were prepared to do for the required lines. Also it was for them to show that they would operate the present lines. The condition of the tracks was abominable; the company was not operating cars on all the present lines, and it was only replacing the old cars at the rate of about one hundred a year, and made the claim that it cannot do this any faster. In that case, it was hard to see how it could supply new cars for any new streets it might get from the city.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

XII.—WESTERN COAL AND THE CANAL

Respecting the coal trade generally, British Columbia should be one of the first regions to benefit materially from the operation of the Canal. Well-developed coal mines are on Vancouver Island and extensive veins are found on the mainland. To the end of 1910, British Columbia had produced coal and coke to the value of \$114,000,000. In 1876, the coal production of the province was 139,192 tons, valued at \$417,576, and in 1911 2,435,000 tons, valued at \$8,522,500.

The net production of coal in British Columbia in 1911, estimated at 2,435,000 long tons, is 365,000 tons less than that of 1910. Coke also shows a decrease—of about 140,000 tons; the output in 1911 was only about 78,000 tons as compared with 218,000 tons in 1910. The coal was produced in the several districts in the following approximate proportions: Vancouver Island, 1,785,000 tons; Nicola valley and Similkameen, 225,000 tons; and South-east Kootenay, 425,000 tons. Practically all the coke was from the last-mentioned district. The effects of the strike of the coal-mine and coke-oven employees on the production of coal and coke in the Crow's Nest district, south-east Kootenay, in quantities of products, brought about this position: There was a decrease (net) of 605,000 tons of coal and 140,000 tons of coke. As the net decrease for the whole province was 365,000 tons, it will be seen that in other districts the decrease from the Crow's Nest collieries was in part offset by increases in other parts—in the output of Vancouver Island, Nicola valley, and Similkameen coal-mines. Except for the strike factor, a total increase would have been recorded.

Average Yearly Value.

Of the average yearly value of the mineral production of the province for the last five years, the production derived from coal and coke has been about 35 per cent. of the whole, while for the year 1911 it was nearly 39 per cent., and this despite the decreased output of the Crow's Nest mines. The output of the collieries for 1911 is considerably less than for 1910, but the year 1910 was the record year in the history of coal-mining in British Columbia with a production valued at \$11,108,335. The output for 1911, with its total value of \$8,987,500, in the proportion of \$8,522,500 for coal and \$465,000 for coke, is second only to that of 1910, and is greater than that of any other year.

"No branch of the mining industry of British Columbia appears to have a better prospect for expansion and consequent enlargement of production than that of coal-mining." So says Mr. Wm. Fleet Robertson, provincial mineralogist of that province. "A gratifying feature in this connection is that the promise of extending operations and increasing output is general; that it appears evident that all the coal fields in which there has already been production may be expected to show a steady increase in output."

Gross Output of Mines.

The gross output of the coal mines of British Columbia for the year 1910 was 3,139,235 tons (of 2,240 pounds), of which 33,360 tons were added to stock, making coal disposed of 3,105,875 tons. Of this gross amount, 1,238,439 tons were sold for consumption in Canada, 1,114,809 tons were exported to the United States, and 60,290 tons were exported to other countries, making the total amount of coal sold 2,413,538 tons.

In addition to the coal sold, there were used in making coke 339,189 tons of coal, while 206,871 tons were consumed under colliery boilers and 146,277 tons

were lost in washing. From the 339,189 tons of coal there were produced 218,029 tons of coke, while 4,054 tons of coke were taken from stock, and 79 tons were used under colliery boilers, making the net coke sales 222,004 tons. Of this amount, 213,274 tons were sold for consumption in Canada, while the remainder, 8,730 tons, was exported to the United States.

Alberta's Coal Production.

The coal produced in Alberta in 1910 totalled 2,894,469 tons, valued at \$7,065,736. Bituminous coal forms by far the largest proportion of the total Canadian output, being mined exclusively in the Maritime Provinces, British Columbia and the Crow's Nest Pass region of south-western Alberta. There is but one anthracite mine in Canada, at Bankhead, near Banff, Alberta.

In 1910 an increased coal production was reported for every province with the exception of Saskatchewan, in which a decline of 10,969 tons was shown. As one or two small mines in that province neglected to furnish returns, it is quite possible that a complete record would have shown the output at least as large as in 1909.

Alberta's production has been increasing very rapidly, and is now close to that of British Columbia, having contributed 22.4 per cent. of the total in 1910 as compared with 25.8 per cent. by British Columbia. In 1905 that province produced 10.8 per cent. of the total and in 1890 only 4 per cent.

Of the Alberta production, about 84.8 per cent. in 1910 was used by collieries and sold for consumption in Canada, chiefly within the province; 8.4 per cent. sold for export to the United States, and 6.8 per cent. used for making coke which was marketed in British Columbia and in the United States.

In a recent article on the coal fields of Alberta in the Mining Journal of London, Mr. E. H. Cunningham Craig, B.A., F.G.S., said: "At present great areas of coal-bearing land, containing many seams of excellent steam coal or anthracite from 3 ft. to 9 ft. in thickness, areas that are already served by main lines of railway, and that can be opened up and brought to the productive stage with a minimum of expense and labor, are lying dormant awaiting the enterprise and capital that will convert them into teeming centres of industry."

British Columbia and Washington Coal.

British Columbia would export far more coal to California, had not the State of Washington such a grip of that market. At present, neither the State of Washington nor British Columbia is furnishing any considerable amount of coal to the coaling stations of the Pacific nor sending very much coal to Pacific countries generally. The supply of coal in this section of the United States and Canada is presumably large enough to make possible the development of an important coal export business. A large part of the coal thus far discovered and worked is either lignite or low-grade bituminous. But little bituminous coal equal to the best bituminous of the eastern part of the United States has yet been found. The best coal of Vancouver Island and the State of Washington, however, is satisfactory for steaming purposes, and is employed for industrial and commercial uses.

The Vancouver coal is excellently situated for transportation. As we have seen, most of the foreign sales of this coal have been in the United States, where it has competed successfully with other countries, without being able, however, to monopolize the market. The coal mines of the State of Washington, although the product is somewhat inferior to the better grades of the British Columbia output, have been developed more rapidly than have the Canadian fields.

Views of Coal Experts.

Several large consumers of coal, including the ocean steamship companies, have reported that the Puget Sound coal can be used to advantage for steaming purposes, although it is inferior to the product of the best

bituminous fields. The president of one of the steamship companies states: "The British Columbia coals that are now being mined are considered fair average steam coals. The Washington coals are lignites, semi-bituminous, and bituminous. The lignites are used principally as house coals, the screenings from such lignites being used at points close to the mines for steam purposes, as they are sold at a very low figure. The semi-bituminous and bituminous coals range from fair to good steam-producing coals."

One firm, using as much coal as any industrial concern on the Pacific, which ordinarily secures its coal from the Washington mines, and an authority regarding the sources of the coal used in California, wrote in reply to the question, Is the coal from Washington and British Columbia good for steaming purposes? "The lignite coals are not. Those of a more bituminous character are so used, but they have not the evaporative power of the better grades of bituminous used on the Atlantic seaboard, nor are they as good as the bituminous grade from Australia or the semi-anthracite coals from Cardiff and Wales."

Effect of the Canal.

The general conclusions of an investigation conducted by Professor Johnson for the United States Government, of the probable sources of the future coal supply for the commerce and countries of the Pacific, and of his inquiry into the effects which the Canal will have upon the coal trade of the United States, may be quoted here. Practically the same considerations apply, in varying degree, to Canada. Here are Professor Johnson's conclusions:—

"The coal consumed for commercial and industrial uses on the west coast of the American continents, in Hawaii, and in the coaling stations of the eastern half of the Pacific Ocean will be supplied in the future mainly from the mines of the United States and Canada, unless the opening of the Chinese mines should revolutionize the coal trade of the Pacific. It is not probable that coal from the Orient or Australia will in the future be sold on this side of the Pacific. In this case, however, China is, as usual, the uncertain and indeterminate factor.

"The Canal will enlarge the export markets for American coal, both by creating a demand for coal in Gulf, West Indian, and Central American stations to supply the steamers that will be engaged in our own and Europe's commerce through the Canal, and also by opening in the Pacific ports of the American continents a coal market that is now important, and which is certain to grow. We shall secure the larger share, and probably nearly all of a coal trade that is now possessed by Great Britain and Australia, and the industrial progress that will result from the use of the Canal will add to the volume of that trade.

Canada's Position.

"At present, the United States occupies an important place as an exporter of coal to foreign countries other than Canada and Mexico, and, while this promises to become less true in the future as the cost of the British product rises, and as the purchases of our high-grade steaming coal by foreign governments for their navies occur more frequently, nevertheless British coal producers will continue to have the great advantage which they now possess of abundant facilities for shipping their coal to all parts of the globe. The volume of Great Britain's total imports is so much larger than the volume of her exports that a large number of vessels are regularly obliged to start in ballast from the United Kingdom on their outbound voyages.

"This enables the coal exporters of that country to secure very low rates to distant and widely scattered foreign markets, and accounts for the fact that the foreign coal shipments from Great Britain have averaged 35,000,000 gross tons annually for the past five years.

"While the total exports from the United States will continue to be more bulky than our imports, there will be a large tonnage movement westward through the Canal of vessels with part cargoes or in ballast, and the Canal promises to develop an important foreign and domestic market for American coal. The ability to distribute the excellent coal of the United States extensively among the countries of the Caribbean Sea and the Pacific Ocean, will be of great benefit to the industries and commerce of those countries, and will redound to the advantage of our naval, maritime and industrial interests."

(To be continued.)

TORONTO'S TEMPORARY LOAN

Report of London Visit Published—Market Was Deluged With Bonds—Toronto's Finances

The following is the report of Mayor Geary and City Treasurer Coady, of Toronto, to the Treasury Board, and sent on to Council, relative to their trip to England in quest of money this summer:

"A delegation, consisting of the Mayor and treasurer, was authorized to proceed to Great Britain with a view to procuring the necessary permanent or temporary loans, or making other financial arrangements to meet our obligations. The magnitude of the work entrusted to us, namely, the marketing of about \$6,000,000 of bonds, entailed heavy and anxious responsibility.

Market Was Flooded.

"On arrival of the delegation in London it was found that the market was deluged with many millions of undigested bonds of other municipalities, and Canadian railway and industrial bonds, as well as those of foreign governments, many offering to yield a higher rate of interest than ours, but the underwriters of such issues had the great bulk of the bonds and stocks on their hands. This state of affairs constituted an impediment to the making of a regular issue, and under the conditions it was determined by the delegates, who were clothed with the necessary power, not to attempt to make a regular flotation of the securities, but to borrow for one year on treasury bills. Therefore treasury bills to the amount of £1,200,000 were issued by Lloyds Bank on behalf of the city at the rate of 4½ per cent. per annum.

Similar Rates Were Paid.

The city of Montreal and the kingdom of Belgium about the same time borrowed on treasury bills at similar rates, which were regarded as very favorable considering the state of the money market.

"The expenses of the delegation amounted to £345. These expenses, however, were offset by the large saving to the city in express charges, insurance, etc., through the personal delivery of the securities in London and the transaction of all business incident thereto."

City Treasurer Coady has issued his annual report on Toronto's financial status for 1911. The gross debenture debt on December 31st last was \$43,110,471.94, against which there were sinking funds amounting to \$9,907,203, leaving the net debt at \$33,203,268.94.

Debentures Authorized But Unsold.

During the last year debentures to the amount of \$6,454,829 were authorized, but not negotiated.

The gross receipts for the year, including a balance of \$1,101,116.08, brought forward, amounted to \$24,045,570.80, and the expenditures to \$21,914,796.10, leaving a balance on hand, including sinking fund deposits, of \$2,130,774.70.

There was a deficit of \$148,925 in the estimated revenue for the year and overdrafts amounting to \$6,312, making a net deficit of \$155,237.

The margin of the city's borrowing powers based on this year's assessment, was only \$4,000,000.

Assets in Property.

Against the debt the city has assets in property valued at over \$20,000,000, exclusive of public services and works, which have been provided at a heavy cost for the public use and convenience and are not available assets.

The receipts from the water works were \$822,637.23, and the expenditure \$778,592.47, showing a surplus of \$44,044.76. The board of education spent last year \$1,799,180 on maintenance and \$1,370,742.54 on new buildings. The maintenance of the separate schools cost \$108,567.

The arrears of taxes at the end of the year were \$77,921.48.

REVIEW OF THE MONTH

Flotations in London—Investment Offerings—Bank Branches Opened and Closed

CANADIAN FLOTATIONS IN LONDON

The following flotation was made during August:—

Canadian Middle West Trust, Limited.—200,000 7 per cent. preferred ordinary shares of £1 each at par.

NEW LISTINGS

The Canadian Locomotive Company has listed \$1,500,000 6 per cent. bonds on the Toronto Stock Exchange.

The additional issue of Northern Crown Bank stock, \$800,000, has been listed on the Winnipeg Stock Exchange.

The stock of the Occidental Fire Insurance Company, Wawanesa, Manitoba, \$500,000, has been listed on the Winnipeg Stock Exchange.

The Royal Bank has listed 33,600 additional shares on the Montreal Exchange.

Ten thousand additional shares of Shawinigan Water and Power Company have been listed on the Montreal Exchange.

The Toronto Paper Company have listed \$750,000 of stock on the Toronto Exchange.

Five hundred thousand dollars additional bonds of the Canada Car and Foundry Company, Limited, have been listed on the Montreal Exchange.

BANK BRANCHES OPENED AND CLOSED DURING SEPTEMBER

Twenty-five branches of Canadian chartered banks were opened during September and five closed. The following table gives details of the branches opened and closed during previous months this year:—

Month.	Opened.	Closed.
January	20	5
February	16	3
March	38	6
April	24	8
May	50	6
June	21	7
July	26	6
August	17	15
September	25	5

Houston's Bank Directory gives the following particulars for September:—

Branches Opened

Beaumont, Que.	La Banque Nationale.
Berwick, Ont.	Union Bank of Canada.
Brantford, Ont.	Royal Bank of Canada.
Calgary, Alta., East	
End	Bank of Montreal.
Cap-de-la-Madeleine,	
Que.	La Banque Nationale.
Hanna, Alta.	Canadian Bank of Commerce.
Hanna, Alta.	Merchants Bank of Canada.
Iberville, Que.	La Banque Nationale.
Invermore, B.C.	Bank of Montreal.
Longue Point, Que. ..	Banque d'Hochelaga.
Magog, Que.	Bank of Montreal.
Napierville, Que.	La Banque Nationale.
Piapot, Sask.	Sterling Bank of Canada.
Pointe Gatineau, Que. .	La Banque Nationale.
Port Rouge, Que. ...	La Banque Nationale.
Rockhaven, Sask. ...	Northern Crown Bank.
Roland, Man.	Union Bank of Canada.
Regina, Sask.	Sterling Bank of Canada.
St. Alban, Que.	La Banque Nationale.
St. Cyrille de Wen-	
dover, Que.	Banque Provinciale du Canada.
St. Julie-de-Vercheres,	
Que.	La Banque Nationale.
Spencerville, Ont. ...	Royal Bank of Canada.
Villeroy, Que.	Banque d'Hochelaga.
Waldeck, Sask.	Northern Crown Bank.
Youngstown, Alta. ...	Bank of Toronto.

Branches Closed

Central Park, B.C.	Northern Crown Bank.
Ingersoll, Ont.	Bank of Nova Scotia.
Midway, B.C.	Canadian Bank of Commerce.
St. Constant, Que. ...	Canadian Bank of Commerce.
St. Martins, N.B.	Bank of British North America.

DIVIDEND CHANGES

The Sao Paulo Tramway, Light and Power Company declared a special dividend of five-sixths of one per cent. on the common stock, payable October 1st, to shareholders of record August 31st. This dividend is for the month of July at the rate of 10 per cent. per annum.

The dividend of the Dominion Park Company, Limited, has been increased from 5 to 6 per cent. The dividends are now payable quarterly instead of half-yearly.

The directors of the International Nickel Company have declared a dividend of 2 per cent. on the common stock. This is the first dividend on the new common stock.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during September:—

Montreal House Construction Company, Limited.—\$50,000 7 per cent. preferred stock with a bonus of 25 per cent. common stock.

Toronto Paper Manufacturing Company, Limited.—\$300,000 6 per cent. first mortgage sinking fund bonds at 98.

Gordon, Ironside and Fares Company, Limited, Winnipeg.—\$1,250,000 6 per cent. first mortgage 15-year sinking fund gold bonds at 100

Office Fittings, Limited.—\$50,000 7 per cent. preference stock at par with bonus of 50 per cent. common stock.

The Arcade, Limited, Hamilton.—\$140,000 8 per cent. stock at \$5 per share.

Great Gulf Lands, Limited.—\$150,000 treasury stock at par (\$50).

Eastern Car Company, Limited.—\$500,000 6 per cent. cumulative preferred stock at 90.

Point Grey, B.C.—The unsold balance of \$1,200,000 5 per cent. one-year notes at 99½.

Montreal Motion Pictures, Limited.—75,000 shares of capital stock at \$1 per share.

Hackett Motor Company, Limited.—\$125,000 7 per cent. preference shares at par, with bonus of 50 per cent. ordinary stock.

DEBENTURES AWARDED

Cochrane, Ont.—\$30,000, to Messrs. Brent, Noxon and Company, Toronto.

Stoneberg, Sask.—\$12,000 5½ per cent. 20 instalments, to Messrs. Nay & James, Regina.

Lucille S.D.—\$13,500 6 per cent. 20 years, to Messrs. C. H. Burgess & Company, Toronto.

Melita S.D., Man.—\$6,000 5 per cent., to Messrs. J. G. Mackintosh & Company, Winnipeg.

Melfort, S.D., Sask.—\$25,000 6 per cent. 30 instalments, to Messrs. G. A. Stimson & Company, Toronto.

County of Northumberland, N.B.—\$35,000 5 per cent. 20 years, to Eastern Securities Company, Montreal, etc. The following particulars are given: Assessed valuation, \$2,800,895; estimated value of property, \$5,000,000; general debenture debt, \$35,000; net debenture debt, \$23,000; assets, \$100,000; population, 36,200. Annual taxes collected, 1911, \$27,457; rate of assessment, 75 cents; credit balance in bank, \$12,000.

Mr. Frank C. Cook, of Vancouver, who has purchased a controlling interest, will reorganize the British Canadian Fire Insurance Company of Victoria, B.C. The general manager will be Mr. William B. Bierce, the managing director of the Western Union Fire of Vancouver, who will operate the two companies as running mates.

Notices have been issued in Montreal by the leading banks announcing that on October 1st the rate for call money would be advanced from 5½ to 6 per cent. The increased rate, it is generally thought, will hold until the turn of the year. Criticism is advanced against the action of the Montreal Stock Exchange committee last week in advancing the minimum stock exchange rate to 6½ per cent.

The Tanners' Section of the Toronto Board of Trade have adopted the following resolution:—"Resolved, that in view of the unabated strength, in fact the record price of hides and skins in America and throughout the world, from which no relief is in sight, and in consideration of the great and world-wide shortage of cattle and hides, the decrease in range cattle alone being in proportion to the population about 34 per cent., this meeting deems it absolutely necessary and vital to the tanning industry that a further advance on all lines of leather of 10 per cent. to 15 per cent. be obtained."

REGULATING DEMAND FOR MONEY

Business Extensions Held in Check by the Interest Rate—Charges May Not be Relaxed This Year

By H. M. P. Eckardt.

One of the important functions of the great European state banks is the regulation of the money market. Each big state bank is supposed to keep a watchful eye on the trade, and financial conditions of its own country in particular, and of the rest of the world in general. If the governors or rulers of the bank consider that speculation is carried to excess, or that the mercantile community is becoming dangerously over-extended in its eager search for profits, they may endeavor to check the undesirable tendency through raising the rate of discount. The increase in the rate helps to bring about a more healthful situation. It is taken first as an intimation that danger may be ahead. Business men generally may be counting up their profits and planning extensions which are expected to yield additional returns. Such extensions necessarily mean increased lines of credit at the banks.

A sharp rise in the bank rate invariably causes a number of these parties to reconsider their positions. They become disposed to make more generous allowances for a possible set-back in business.

Reasoning of Cautious Borrower.

A cautious man of this class will reason with himself somewhat as follows: "Perhaps we better take in a little sail. For instance, there is that Jones' money coming in this week.—I had intended to put that, along with some new funds borrowed from the bank, into a deal which looks promising—but now I think it will be best to apply the money Jones gives us towards the reduction of our line at the bank. Our having to pay $\frac{1}{2}$ per cent. more on the whole of our loans lessens our profits quite noticeably. If there is later a further rise of $\frac{1}{2}$ per cent. in bank rate the effect may be important. So, all things considered, it may be best for us to merely mark time until we see how the situation develops."

If any considerable number of bank borrowers allow themselves to be influenced in this way by a rise in the interest rate, it is easy to see that the pressure upon the banks would be sensibly released. At the counters of the banks repayment of loans would be apt to proceed on a larger scale; and in the banking parlors the visiting business men would not represent so forcibly that they must have more money for purposes of enlarging their trade. There is no doubt that the slow, steady rise in interest rates in Canada is causing many of the business men to give the most careful consideration to the question of deferring plans for extension. There is no regularly published rate of discount applying to standard commercial paper. The paper offered to the banks by the merchants and manufacturers varies greatly in quality. Nearly every discounting customer has his nicely graded position in his banker's estimation. Safety of the advance, and certainty of its repayment on the agreed upon dates, are not the only considerations operating to cause the bank to establish a particular customer in a certain grade. The amount of collateral or auxiliary profits yielded by the account or the connection, sometimes figures conspicuously in the deliberations regarding the rate of discount to be charged.

Rates Being Gradually Raised.

But nevertheless it is certain that the rates applied to the mass of credits now in force are being gradually raised. The big borrower who has hitherto enjoyed a finely cut rate does not feel quite easy in his mind that the credit for the next ensuing season can be obtained on the same favorable terms. The banks lately completed their arrangements with the grain trade for the financing of the western crops of 1912. No announcements were made of an increased scale of banking charges; but it may be assumed that the agreements between the banks on the one side and the elevator and milling companies on the other reflected in some way the tightened monetary situation. Perhaps in some cases a higher rate of discount would be demanded; in others the banks might require their borrowers to pay for minor services formerly given without charge; and it is reasonably certain that in every case elaborate precautions would be taken to prevent the grain men holding the grain for speculative purposes.

And the same with other borrowers—they all have to give consideration in some way to the matter of tight money. The general opinion seems to be that there will be little or no relaxation during the remainder of 1912. It is recognized that the work of crop moving will occupy the attention of the banks in October, November, and December. And it is reasonable enough to expect that when the wheat movement is financed there will be more money available for other purposes.

In the United States January invariably sees a piling up of cash resources in the centres; and when the money market in New York has been tight in the preceding fall, relief is experienced in January. However, American conditions, as regards banking and currency, do not altogether apply in Canada. Their situation relaxes in January because a huge mass of actual money withdrawn from the centres in the fall and diffused over the harvesting districts, is then collected again and returned to the central reservoirs. To the extent that the Canadian banks pay out small Dominion notes for currency in the fall, the same thing occurs in Canada. The Dominion "ones," "twos" and "fives" are actual money, from the banks' point of view. When they pass into general circulation the cash resources of the banks depleted to that extent; and when they come back in the latter part of December and in January, in the form of deposits and repayments of loans, the bank position is strengthened. But invariably the Canadian banks provide a large part of the crop moving currency through greatly expanding the issues of their own notes, which are not actual money at all. When these notes come back they have to be redeemed, in part by specie or legals. So the redemption of note issues absorbs some part of the cash resources of the banks in January. And, a little later the banking institutions find that the dead loans required to carry the grain stored at Fort William, Port Arthur, and other terminal points, and the grain loans represented by wheat in interior elevators, reach a very large total. So it is quite possible that next spring, too, may see a very strong demand for all available banking funds.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week, ended September 27th:—La Rose, 236,600; Cobalt Townsite, 145,550; Drummond Mine, 105,500; Cobalt Lake, 39,600; J. S. Wilkensen, 82,570; McKinley-Darragh, 87,800; Kerr Lake, 60,600; Beaver, 61,733; Nipissing, 152,566; Dominion Red. Company, 113,298; Cobalt Townsite, 57,000; total, 322,864 pounds, or 161 tons. The total shipments since January 1st are now 32,003,004 pounds, or 16,001 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

NEWS AND NOTES

There is a report on the Paris Bourse that when Canada floats her next large loan, a large part of it will be placed in Paris.

Hamilton city council decided to join with other municipalities in petitioning the provincial government to allow each place to adopt whatever system of taxation it may wish.

Mr. B. J. McCormick, Welland's industrial commissioner, has concluded arrangements for the location at Port Robinson, Ont., of a steel industry to be known as the Standard Steel Construction Company, Limited.

Operations have commenced on the new building of the Edward Smith Paper Company at Beauharnois, Que., which will have modern machinery installed, and many improvements are taking place in the old buildings.

The Delaware Insurance Company, of Philadelphia, has ceased doing business in Manitoba and has re-insured all its outstanding policies in the Westchester Fire Insurance Company, of New York, which company has been registered in Manitoba.

Mr. A. C. V. Haglen, president of the United Flour Mills Company of Minneapolis, Minn., who has contracted to erect a flour mill at Moose Jaw, is looking for a site in Vancouver. He expects that a site will be donated and that local capitalists would invest in part of the stock of the company.

An establishment for dairying on a large scale, capitalized by Mr. J. D. McGregor, the well-known capitalist and stock breeder of Brandon, is being rapidly materialized. A large herd of pure-bred shorthorns will form a nucleus for this much-needed industry. It will be situated south of the city.

The Canadian Northern Railway has placed orders for 30 ten-wheel locomotives with the Montreal Locomotive Company, and 25 consolidation and 20 switching locomotives from the Canadian Locomotive Company. The Canadian Pacific has ordered 10 engines from the Canadian Locomotive Company.

SEPTEMBER MUNICIPAL BOND SALES

Show Increase of More Than Fifty Per Cent. Over
Any Previous Month This Year—New
Westminster's Issue

The municipal bond sales in Canada for September as compiled by The Monetary Times amounted to \$3,998,605, compared with \$1,649,547 for August and \$1,748,778 for the corresponding period last year.

The largest issues were made by New Westminster, B.C., Calgary, Alta., Regina school districts, and Montreal Protestant schools.

The following are the particulars by provinces:—

British Columbia	\$2,068,500
Alberta	893,600
Saskatchewan	425,835
Quebec	334,000
Ontario	153,970
Nova Scotia	99,800
Manitoba	22,900

\$3,998,605

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$ 881,838	1,037,287	\$ 2,133,531
February	1,272,977	1,037,287	2,596,378
March	1,169,730	6,271,925	1,726,716
April	6,805,078	3,910,288	927,160
May	5,964,896	3,946,047	1,928,748
June	2,187,588	3,983,670	1,690,344
July	1,536,424	1,594,566	1,967,376
August	1,312,953	1,493,507	1,649,547
September	2,841,486	1,748,778	3,998,605
October	2,211,461	1,730,075	
November	2,292,781	2,915,765	
December	566,113	1,243,593	
Total	\$29,043,325	\$30,295,838	\$18,618,405

The following are the details:—

British Columbia.

AMONG BRITISH COLUMBIA'S MINES

With a production of 26,683 tons for the third week in September the Granby Company at Grand Forks, B.C., set a new record for smelter treatment in one week and brought the company's total output for the year to 905,782 tons.

Blister copper shipments were also heavy, a total of 523,000 pounds being sent to the refineries. Another Boundary property, the Mother Lode mine of the British Columbia Copper Company, made an unusually heavy shipment, sending 8,201 tons to the smelter at Greenwood, B.C.

Among the silver-lead properties which continued to make the heavy shipments which are one of the striking features of this year's Kootenay and Boundary mining, a new shipper was the Panama near Kaslo which is being operated by Mr. Henry Giegerich and associates.

Work on the tramway at the Rambler-Cariboo mine is making rapid progress and when completed will result in a heavy increase in ore shipments from the property.

Ore production totalled 52,666 tons for the week and 1,764,904 tons for the year to date. Smelter receipts for the week were 47,451 tons and for the year to date, 1,607,190 tons.

Ore production in detail is as follows:—Slocan and Ainsworth production, week 2,472 tons, year 77,373 tons; Boundary production, week 42,332 tons, year 1,445,334 tons; Rosland production, week 5,519 tons, year 174,335 tons; East Kootenay production, week 1,069 tons, year 31,309 tons; Nelson production, week 1,274 tons; year 36,553 tons. Consolidated Company's smelter receipts, Trail, B.C., week 6,755 tons, year 224,918 tons.

British Columbia Copper Company's receipts, Greenwood, B.C., week, 14,013 tons, year 476,490 tons.

Granby smelter receipts, Grand Forks, B.C., week 26,683 tons; year 905,782 tons.

The Ottawa Assurance Company has ceased to transact business in Canada, and has re-insured all its outstanding risks in the London Mutual Fire Insurance Company, and has applied to the Minister of Finance for release of its securities on January 5th, 1913.

The Provincial Casualty Accident Insurance Company will apply for an Ontario charter. The company's head office will be at Toronto, and it will carry on a general accident and casualty insurance business. The capital stock is to be \$500,000, divided into 5,000 shares of \$100 each. Messrs. Montgomery, Fleury and Company, Canada Life Building, are solicitors for the applicants.

The Liverpool-Manitoba Assurance Company, with headquarters at Montreal, has been organized by a Dominion charter and has received its licenses for operations throughout the Dominion. It is owned and controlled and its liabilities are guaranteed by the Liverpool and London and Globe Insurance Company, Limited, and has been organized to take the place of the Manitoba Assurance Company. The Manitoba ceased business and the Liverpool-Manitoba commenced operations on Tuesday, when the former company transferred to the latter all its business, assets and liabilities.

MATURITIES OF CANADIAN MUNICIPALS

Different Periods in Single Loan Abroad is Unwise,
Says London Authority—Municipal Bond Notes

One of the largest municipal bond sales of the year is the purchase by Messrs. G. A. Stimson & Company, Toronto, of about \$2,000,000 4½ per cent. debentures of the city of New Westminster, B.C. The company has been appointed fiscal agents of the city.

Messrs. Wood, Gundy Company did not take up their option on the remaining \$638,000 of Lethbridge bonds. They offered to take \$15,000 worth and accept another month's option on the remainder at the same price. This offer was refused by the council. Manager McNeil, of the Bank of Nova Scotia, was present, asked for and was granted an option on the issue for one week at 90 and accrued interest.

Calgary's Large Loan.

The negotiations for the loan of \$2,000,000, for which the city of Calgary made application to the Bank of Montreal several weeks ago, have been consummated.

St. Boniface city debentures to the amount of \$37,543.62 formerly held by the Dominion Securities, Limited, are to be transferred to the trustees of the St. Boniface sinking fund association. On a motion made by Ald. Gauvin, chairman of the finance committee, at the meeting of the St. Boniface council, this motion was carried and the city will also raise an additional loan of whatever extra the fund has available for its note as guarantee at 6 per cent.

Prince Rupert's Finances.

The mayor stated at a meeting of the Prince Rupert, B.C., city council that the Bank of Montreal will not accede to the request of the city for further advances of money to carry on civic improvements. Also that they had not as yet given a decision as to the request that has been renewed to sell the treasury certificates. The plan at present before the council has created much discussion: it is to attempt to float the debentures that are to be issued to carry on local improvements and with the money pay off the Bank of Montreal and then endeavor to see if some other financial institution will not advance the necessary money to carry on the work.

Three bids were received by Stoneheng, Sask., for the \$12,000 5½ per cent. 20-year road debentures, which were awarded to Messrs. Nay and James, Regina.

Splitting of Canadian Municipals.

The splitting of Canadian municipal bond issues in London in different maturities is criticized by the London Economist. This journal suggests that our municipalities will have to adopt some method similar to that employed by British corporations, when the purposes for which the loan is required cover several works whose effective lives vary widely, namely, issue one loan for the required sum, to run for a term which represents the equated time of the unequal periods.

Our London contemporary says, in part:—Every British colony of importance has borrowed freely in London, and their loans have received the hall-mark of trustee stocks. Most of these loans are not dissimilar in some respects to British corporation stocks. The yields, in fact, are much about the same, the long-dated stocks returning about 3¾ per cent. interest. But the market for colonial stocks is much wider, and price anomalies are not so common as in that for British Corporation stocks.

More Than Half a Million Sterling.

Canadian towns, particularly the smaller ones, have appealed to the English investor very frequently in recent years, though the loans in the majority of cases have been small. An issue of less than half a million sterling cannot command a free market, and a number of issues, amounting to two or three hundred thousand, have been rendered less marketable by being split up into different maturities.

For example, the city of Hamilton issued £204,100 4 per cent. debentures in 1911, of which £63,200 was to be paid in 1930, £109,300 in 1931, and £31,600 in April, 1940. The bonds of the various maturities were specially designated at their issue, so that a holder knows exactly when his bonds will be repaid. But subscribers were allotted bonds in the three series in the proportions which the amounts of the three series bore to the amount of the whole loan. Thus the loan, as far as its marketability is concerned, is split up into three distinct portions.

The Ottawa 4 per cent. loan of £204,601, issued in May, 1909, is an even worse example, being split up into eleven maturities, the smallest being only £900. Only one quotation appears for all the bonds in the London list. This is all right as long as the bonds are very close to par, but, should the price move a few points above or below par, one quotation would plainly be absurd, for, owing to their different maturity dates, each series of bonds would give different yields.

LONDON MARKET CONDITIONS

Outlook is Not Good—Possible Canadian Northern
Railway Issue Reported

In view of the fact that several Canadian borrowings are imminent in London, the result of inquiries as to how those interested in such transactions regard the present position is still unsatisfactory, says a London dispatch. On the surface the situation would seem better as a result of the holiday rest, but when regarded closely conditions appear unimproved, if not worse.

The market is becoming saturated with treasury bills, which must presently be funded, and the bank rate will probably go higher. Uncertainty regarding the United States electoral affairs is also having an influence for financial depression.

May Be Canadian Northern Loan.

The London Standard prints a story on its financial page to the effect that there will be a debenture issue by the Canadian Northern. It is stated that the issue will be of 5½ income-charge convertible debenture stock to the amount of two millions sterling, at a price of about 96. The paper says: "Enquiries in good quarters tend to confirm the rumor." Sir William Mackenzie not long ago stated that adequate capital had been secured to complete the Canadian Northern lines across the continent.

Advice of Prominent Dealer.

The advice given at Victoria by Sir Thomas Skinner, a prominent London financier, is that it is better for Canadian municipalities in raising funds to pay the rates of the day rather than wait for a better time. "You are developing so rapidly that even six months' delay often means much," he said. "It may mean that you have missed your chance of getting your money at the current rate, that your work may have been held up for the lack of the money; and that in the end you will have to pay a higher rate and still have your work to do. Your wants do not stand still. And delay but adds to the burden you have to carry, and it is better to take what you can get now rather than wait in the hope of getting better terms."

Despite the recent slackening of the offering of new securities on the London market, the total of such applications for the calendar year to date is \$55,000,000 ahead of 1911, an increase of nearly 9 per cent., and exceeds all other corresponding periods except 1910 and 1909.

GUARANTEE LIFE INSURANCE COMPANY

Steady progress is being made with the organization of the Guarantee Life Insurance Company of Canada, of which Mr. J. McLenaghan is president, Mr. J. O. McCarthy is managing director, and Mr. W. B. Unsworth is secretary. The company's stock so far has been placed without payment of commission, and this policy will be continued except for some small amounts in two or three outside places. The company will adhere to its original intention of doing non-participating business only.

ABOUT EDMONTON'S SURROUNDINGS

Captain McLeod, of the steamer Slave River, operating on Little Slave River and Lesser Slave Lake, reports at Edmonton that the crops about Lesser Slave Lake and the Peace River settlements are most excellent, and have been safely harvested. Captain McLeod also reports the traffic on the Athabasca and Lesser Slave Lake route as very heavy. Traffic on the Athabasca Landing Branch line has been correspondingly heavy, and this week the tri-weekly service has been increased to a daily train on the lower part of the line.

Edmonton's gas expert has been sent to Pelican Rapids on the Athabasca to investigate a heavy flow of natural gas which has been struck by a company boring for oil there. The company has made the city a tentative proposal to pipe the gas down and deliver it into the city distribution mains at the city limits. Apparently there is a great flow under a pressure approximating 700 pounds. The gas engineer has gone to verify these reports, in which case the company's proposal is likely to receive serious consideration. The project would entail a pipe line 170 miles in length as against 40 miles from Tofield.

The harvest is practically over so far as cutting is concerned. The previous reports of very heavy yields and high average grade are confirmed by later observations. No threshing is reported in this neighborhood yet.

The Newark Fire Insurance Company has been licensed to transact business in British Columbia. Mr. Robert E. Brett, Victoria, has been appointed the company's attorney.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Brazilian Traction, Light and Power Company.—The Brazilian Traction, Light and Power Company have listed \$95,000,000 of their securities with the Toronto Stock Exchange.

Twin City Rapid Transit Company.—For the third week in September Twin City passenger earnings were \$158,501, an increase over the same week last year of \$10,704. For the month to date earnings have increased \$35,973.

Richelieu and Ontario Navigation Company.—The directors of the Richelieu and Ontario Navigation Company will make a tour of inspection over the great lakes route from Sarina to Fort William and Port Arthur, then returning to Montreal.

Chicoutimi Pulp Company.—The Chicoutimi Pulp Company has just entered into a large contract and has agreed to supply Edward Lloyds Company, newspaper publishers, London, with 50,000 tons of pulp annually for a term of ten years.

Moose Jaw Electric Railway Company.—At a special meeting of the shareholders of the Moose Jaw Electric Railway Company, the by-law which was passed at the annual meeting authorizing the increase of the capital stock from \$500,000 to \$1,000,000 was ratified.

Spanish River Pulp and Paper Company.—The production at the Espanola plant of the Spanish River Pulp and Paper Company continues to increase. In August the output of pulp was 4,197 tons, which shows an increase of 263 tons over the total produced in July past.

Price Brothers, Limited.—The new paper mill at Kenogami will have an annual capacity of 45,000 tons of news print. For the two years since the consolidation of the various companies the average annual net earnings of the company were \$425,212. The new paper mill is expected to add \$500,000 to net from other sources.

Beaver Consolidated Mines Company.—The report of the Beaver Consolidated Mines Company for the quarter ended August 31 showed a cash surplus of \$26,954, with \$65,976 due from smelters September 1, or a total of \$81,930. From this is deducted \$8,576 for the August pay-roll, and \$4,801 for representing accounts payable, leaving an available balance of \$68,553.

Buffalo Mines, Limited.—The Buffalo Mines, Limited, mill report for August shows that the mill ran 591 hours and milled 4,475 tons of ore. The average assay per ton before milling was 65.23 ounces, and the silver recovered amounted to 259,283 ounces, the largest in the history of the company. Silver paid for during the month (shipped previously) aggregated 148,576 ounces.

Ames Holden Company.—The statement submitted at the recent meeting of the directors the Ames Holden Company, showed that the total output of the company had now crossed 8,000 pairs of boots per day, which represents a very large increase per day as compared with some months ago and is the result of a general plan of systematizing which has been carried out through the factories.

Tooke Brothers, Limited.—"I strongly deprecate the present movement in the common stock," said Mr. Tooke, the president of the company. "If it were a movement in the preferred stock of the company I could understand it. The company is in excellent condition; we are doing a large business, and everything is satisfactory. But we have already announced that our policy will be to build up a reserve of good proportions, and for that reason the question of dividend on the common stock has never been considered. A dividend on the common stock will depend on the profits for the year ended May 31 next."

Canada Atlantic Railway Company.—At the annual meetings of the Canada Atlantic Railway Company, the Canada Atlantic Transit Company, and the Ottawa Terminals Company, directors and officers were elected as follows:—

Of the Canada Atlantic Railway directors, Messrs. E. J. Chamberlin, William Wainwright, H. G. Kelley, J. E. Dalrymple, R. S. Logan, W. H. Biggar, K.C., and Frank Scott.

The Canada Atlantic Transit Company elected the same set of officers, as did the Ottawa Terminals Company, with the exception that the name of Mr. M. M. Reynolds replaces that of Mr. J. E. Dalrymple on the list of directors.

British Columbia Copper Company.—August net earnings of the British Columbia Copper Company approximated \$36,000, as compared with \$46,000 in the preceding month. The decrease was due to extremely low grade of ore treated.

For the first twenty days of September the company's operations showed a vast improvement both in the grade of ore production and earnings.

It has recently been costing the British Columbia Company nine cents a pound to lay its copper down for market, as compared with approximately seven cents some months ago.

Crown Chartered Mining Company.—The affairs of the Crown Chartered Mining Company have been practically settled by an agreement whereby Messrs. Henault and Hefernan agreed to do their part in the reorganization by liquidating their claim against the company of \$140,000 by taking stock at 25 cents per share to the whole extent of the above-named sum. The old board of directors also agreed to resign and allow a new board to be elected.

The head office of the company is to be removed to Toronto, and the transfer book will also be removed from New York to the head office. Mr. C. F. Dike has been engaged as engineer in charge of the development of the property.

Granby Consolidated Mining, Smelting and Power Company, Limited.—The stockholders of the Granby Consolidated Mining, Smelting and Power Company, Limited, at the annual meeting voted to reduce the number of directors from 15 to 13 and to amend the by-laws to the effect that salaries of the officers should be determined by the board, instead of by the stockholders, as formerly. Thirteen members of the old directorate were re-elected, the retiring members being Messrs. A. L. White and Arthur James. Granby's August figures show a production of 1,970,388 pounds of copper, the largest monthly yield since March, 1911, when output totalled 1,988,341 pounds. The gold recovery was 4,626 ounces against 3,989 ounces in the previous month, while silver yield totalled 28,731 ounces as compared with 25,348.

Rio de Janeiro Tramway, Light and Power Company.—The Rio de Janeiro Tramway, Light and Power Company, Limited, statement of combined earnings and expenses of the tramways, gas, electric lighting and power and telephone services, operated by the company, as received by cables for the month of August, 1912, is as follows:

	1912.	1911.	Increase.
Total gross earnings	\$1,272,527	\$1,149,851	\$122,676
Operating expenses	626,117	530,173	95,944
Net earnings	646,410	619,678	26,732
Aggregate gross earnings from January 1	9,509,277	8,403,562	1,105,715
Aggregate net earnings from January 1	4,891,200	4,361,257	529,943

Canadian Cereal Company.—The shareholders of the Canadian Cereal Company at Toronto unanimously adopted the plan of reorganization submitted. The new company will be known as the Canadian Cereal and Flour Mills, Limited. A quarter of a million dollars will be raised as additional working capital by means of 7 per cent. cumulative preference shares. This amount has already been subscribed. The new company will have \$2,000,000 authorized preferred stock, of which \$750,000 is to be issued, and \$2,000,000 authorized common stock, of which \$750,000 is to be issued.

The present company will transfer all its assets in consideration of \$500,000 preferred shares of the new company. The ordinary shares will be used as a bonus to the underwriters in consideration of their taking \$250,000 of preferred at par.

Lake of the Woods Milling Company.—At the annual meeting of the Lake of the Woods Milling Company held this week reports were presented showing profits for the year ended August 31st of \$457,011, an increase of \$45,000 over the figures for the previous year. As was expected, the year's business showed a considerable improvement over that of the previous year.

No changes were made in the dividend, nor was there any bonus given, as was the case on one or two former occasions. The company have now but \$900,000 of bonds outstanding, having redeemed \$100,000 during the year. Preferred dividends absorbed \$105,000, and dividends on the common stocks \$168,000. The directors were re-elected, and at a subsequent meeting Col. Meighen was elected president and managing director, and Mr. W. W. Hutchison vice-president.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail Smelter for week ending September 11th, and from July 1st to date, in tons:—

Company's Mines—	Week ending Sept. 11th.	July 1st to date.
Centre Star	2,902	33,907
Sullivan	497	6,186
Molly Gibson	162	778
Le Roi	115	8,469
Richmond-Eureka	72	318
No. 1	24	153
St. Eugene	1,091	218
Other mines	1,091	12,939
Total	4,863	62,968

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company, of Canada, Limited, ore receipts at Trail Smelter for the week ending September 19th, and from July 1 to date, in tons:—

Company Mines—	Week end. Sept. 19.	July. to date.
Centre Star	3,654	37,561
Le Roi	653	9,122
Sullivan	531	6,717
Molly Gibson	...	778

No. 1	...	153
St. Eugene	...	218
Other mines	1,897	14,836
Totals	6,735	69,703

East Canada Power & Pulp Company.—The interest due on the bonds of this company will be paid almost immediately, says Sir Rodolphe Forget. Mr. William Whyte, the manager of the company, since its inception, who has had a lengthy experience in Scandinavia with the Great Northern Paper Company, and other concerns, states that by November 30th the four dams under construction on the lakes for some time past, would be completed, thus giving them three months' storage and enabling the plant to turn out 145 tons of pulp per day during the months of May, June, July, August, September and October. The spring and fall rains will provide the rest of the water needed thus ensuring, he says, an output of 25,000 tons per annum. Mr. Whyte also says that the company will be able to pay the bond interest of the company out of the May, June and July operations, and he considered this satisfactory. The company, he added, would develop 9,000 horse-power. Its limits extended over 400 square miles, 80 per cent. of the cut being black spruce, and Mr. Whyte further claimed that the dry wood pulp produced was the best in the country, and he had seen a great many plants. A contract for a five-years cutting of logs has just been signed, at a low rate; the quantity to be used being about 32,000 cords a year. The bond issue of the East Canada Pulp & Power Company is \$1,500,000, with the same amount of common stock.

Floyd Silver Mines, Limited.—The annual general meeting of shareholders of the Floyd Silver Mines, Limited, in liquidation was held at Montreal yesterday, for the purpose of receiving an account showing the manner in which the winding up has been conducted and the property of the corporation disposed of.

The following is the account referred to:—

Receipts.

Temagami Reserve Mines, Limited	\$ 207.79
42,137 shares of Temagami Reserve Mines, Limited, sold by public auction	890.00
	\$1,097.79

757,863 shares of Temagami Reserve Mines, Limited, to be distributed among the shareholders of the Floyd Silver Mines, Limited.

Debts and Charges.

Newspapers, advertising	\$ 50.80
Auctioneer	25.00
Sundries	7.18
Liquidator's fee	300.00
J. W. Michaud, salary	140.31
Chauvin Baker and Walker, claim	201.25
J. Lucas and Company, claim	18.25
Chauvin Baker and Walker, Attorneys, bill of cost	137.00
Montreal Mining Exchange, claim	5.00
Gazette Printing Company, claim	2.50
Notices to meetings, statements of administration, postage, stationery, contingencies	210.50
	\$1,097.79

The assets of the Floyd Silver Mines, Limited, were sold to the Temagami Reserve Mines, Limited, the consideration being 800,000 shares of the latter. Of this 42,137 shares were sold by auction and the price realized has been entirely used to pay the costs and debts of the company, leaving 757,863

shares which is equal to half of the number of Floyd Silver Mines, Limited, shares outstanding. The shareholders of the latter, will therefore obtain one share of Temagami Reserve Mines, Limited, in exchange for two shares of Floyd Silver Mines, Limited, and they are requested to send their certificates to Wilks & Burnett, 205 St. James Street, Montreal, for this purpose. A charge of 25 cents will be made for each certificate and if these are to be sent by mail 7 cents is to be added for postage and registration.

At the expiration of thirty-six months from date, all unclaimed certificates will be sent to the Ontario Government, Toronto, according to law.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

West Vancouver, B.C.—The ferry by-law to borrow \$100,000 was carried.

Yorkton, Sask.—By-laws authorizing the expenditure of \$177,000, were endorsed by Yorkton ratepayers.

Swan River, Man.—Until November 1st for \$4,000 6 per cent. 20-year debentures. B. E. Rothwell, secretary.

Regina, Sask.—The council passed a scheme for extension of street railway during 1913 involving \$750,000.

Calgary, Alta.—A by-law for \$10,000 to provide expert city planning. Advice may be submitted to the ratepayers.

Melfort, Sask.—Until October 18th for \$125,000 6 per cent. 30-year debentures. J. E. Durnin, secretary-treasurer.

Simcoe County, Ont.—Until October 15th, for \$20,000 20-year 5 per cent. debentures. Daniel Quinlan, treasurer, Barrie.

Harriston, Ont.—The ratepayers of Harriston carried a by-law to raise \$11,000 for the purpose of installing an electric light plant.

Forest, Ont.—Until October 5th for \$20,000 5 per cent. 30-year electric light debentures. Wm. Lawrie, chairman Finance Committee.

Hamilton, Ont.—The council agreed to submit the proposal to buy the face of the mountain at a cost of \$130,000, to the ratepayers next January.

Acton, Ont.—Until October 7th for \$8,500 20-year 5 per cent. sewer, and \$1,668.85 20-year 5 per cent. walks debentures. A. J. Mackinnon, treasurer.

Kingston, Ont.—The city council have decided to have a by-law submitted to the people authorizing the expenditure of \$10,000 for alterations to city hall.

Sudbury, Ont.—Until October 12th for \$32,000 5 per cent. 30-year school debentures. George Elliott, treasurer. (Official advertisement appears on another page.)

Marquis Rural Municipality No. 191, Sask.—The council board has been authorized to borrow \$5,000 for permanent improvements. F. E. Hurd, secretary-treasurer, Marquis.

Chester Rural Municipality No. 125, Sask.—The council board has been authorized to borrow \$5,000 for permanent improvements. J. B. Lupton, secretary-treasurer, Kaiser.

Chester Rural Municipality No. 125, Sask.—Until October 10th for \$5,000 5½ per cent. 20-year road debentures, government guaranteed. J. B. Lupton, secretary-treasurer.

Lake of the Rivers Rural Municipality No. 72, Sask.—The council board has been authorized to borrow \$6,000 for permanent improvements. R. B. Morine, secretary-treasurer, Leveille.

Estevan, Sask.—Until October 15th for \$110,000 5 per cent. 25 and 30-year manufacturing establishments, school and waterworks debentures. L. A. Duncan, secretary-treasurer.

Strathmore, Alta.—Until November 1st for 5,000 15-year 6 per cent., cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer.

Wetaskiwin, Alta.—Until October 30th for \$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445.06 5 per cent. 20-year concrete walks; \$2,069.41 5 per cent. 30-year sewers; and \$819.56 6 per cent. 7-year plank walk debentures. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

Saskatchewan.—The following villages have been empowered to borrow money. The particulars are given in order, name of village, amount and name of secretary-treasurer:—Cudworth, \$7,000; F. G. Exel. Leross, \$1,000; F. W. Hilton. Simpson, \$3,000; A. Boyd. Strongfield, \$2,000; L. M. Seller. Southey, \$1,500; A. Rodger. Colonsay, \$1,500; W. Spencer. Marquis, \$1,000; F. E. Hurd. Sheho, \$2,000; F. R. White. Mortlach, \$2,500; V. H. Ricci. Hawarden, \$4,000; M. Brown.

NINETY-ONE NEW COMPANIES

Large Number of New Concerns Have Received Dominion and Provincial Charters—Black Lake Asbestos Reorganization

Ninety-one new companies have received charters this week, helping to lengthen the list of new incorporations during 1912, which will probably prove a record year. Their aggregate capitalization is \$18,290,000. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following result:—

Province.	No. of companies.	Capital.
Ontario	32	\$9,271,250
British Columbia	17	1,622,000
Quebec	16	2,501,900
Saskatchewan	13	755,000
Manitoba	12	1,340,000
Alberta	1	2,800,000
	91	\$18,290,150

The largest companies this week are as follows:—

Company.	Capital.
Black Lake Asbestos and Chrome Co., Toronto..	\$4,000,000
Calgary Clay, Coal and Coke Co., Calgary	2,800,000
Fleur de Lis Silver Mining Co., North Bay	1,500,000
Dominion Automatic Train Control Co., Montreal	1,000,000

The new asbestos company is a reorganization of the Black Lake Consolidated Asbestos Company, with properties in Quebec province.

The following is a list of charters granted during the past two weeks in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Yorkton, Sask.**—Yorkton Ice Company, \$20,000.
- North Vancouver, B.C.**—Realty Financiers, \$10,000.
- Roseland, B.C.**—A. S. Goodeve and Company, \$10,000.
- Watrous, Sask.**—Farmers' Machine Company, \$100,000.
- Swift Current, Sask.**—Riverside Park Association of Swift Current, \$10,000.
- Calt, Ont.**—Narrow Fabrics, \$40,000. G. Turnbull, G. Hancock, Jr., P. F. Fitch.
- Pembroke, Ont.**—Pembroke Shook Mills, \$100,000. J. T. Stuart, H. S. Lees, J. M. Telford.
- Fort Erie, Ont.**—Beulah Land Company, \$40,000. W. T. Damon, W. J. Chown, F. E. Peters.
- Harriston, Ont.**—Harriston Casket Company, \$40,000. R. F. Dale, A. Harford, H. Scane.
- Kingston, Ont.**—Hotel Frontenac Company, \$40,000. J. McFarland, J. McKelvey, J. Redden.
- Milton, Ont.**—Milton Fruit Growers' Association. J. F. Richardson, T. C. Dales, W. J. Hartley.
- Prince Rupert, B.C.**—S. W. Gidley Company, \$10,000. Ritchie-Agnew Power Company, \$100,000.
- Grand Mere, Que.**—Laurentide Shoes and Leather Company, \$49,000. O. Gendron, A. Ferron, P. Lachance.
- St. Thomas, Ont.**—St. Thomas Cold Storage Company, \$100,000. J. Lyle, J. C. Ponsford, A. E. Ponsford.
- North Bay, Ont.**—Fleur de Lis Silver Mining Company, \$1,500,000. J. H. Macduff, L. Lemieux, J. A. Drapeau.
- Lyster, Que.**—Lyster Wood Box Turning Enameling Company, \$99,000. H. Moisan, T. Leclerc, E. Lamontagne.
- Sarnia, Ont.**—G. S. Blakeslee and Company, \$40,000. G. S. Blakeslee, G. R. Blakeslee, Chicago; N. S. Gurd, Sarnia.
- Calgary, Alta.**—Calgary Clay, Coal and Coke Company, \$2,800,000. F. L. Shouldice, F. S. Albright, J. E. A. Macleod.
- Baumeville, Que.**—Compagnie Immobiliere de Baumeville, \$49,000. Hon. B. Letellier, F. Georges Fortier, B. Deroches.
- Dunville, Ont.**—Buffalo and Dunville Oil and Gas Company, \$100,000. S. N. Amm, C. E. McKenry, L. K. Bogert, Buffalo.
- Three Rivers, Que.**—Compagnie d'Imprimerie et de Publicite, \$20,000. J. G. Delage, La Tuque; B. Marchand, E. F. Penne-ton, Three Rivers.
- Moose Jaw, Sask.**—Nehaco Land Company, \$40,000. Moose Jaw Tent and Mattress Company, \$20,000. Moose Jaw Moose Temple, \$200,000.
- Victoria, B.C.**—Colwood Sand and Gravel Company, \$250,000. Tamerton Water Company, \$7,000. West Coast Development Company, \$50,000.

Guelph, Ont.—C. Klopfer, \$250,000. C. Klopfer, G. A. Scott, W. Dawson. Sterling Rubber Company, \$40,000. A. McGladrey, J. Hiddleston, A. Holm.

Regina, Sask.—The Scottish Provincial Investment Company, \$100,000. Western Transfer Company, \$100,000. Waterman Waterbury Manufacturing Company, \$15,000.

Saskatoon, Sask.—Western Co-operative Agencies, \$25,000. Butler, Byers Brothers and Codere, \$50,000. F. E. Guppy Harness and Leather Goods Company, \$50,000. Watts-Argue Investors, \$25,000.

Sault Ste. Marie, Ont.—St. Joe Island Fruit Lands Company, \$40,000. A. G. Duncan, Marksville; M. J. Burke, J. A. McPhail, Sault Ste. Marie. Italian Provision Company, \$40,000. G. Marotta, F. Carignano, P. Scigliano.

Hamilton, Ont.—Rosemount Gardens of Hamilton, \$40,000. T. Hobson, L. F. Stephens, R. S. Lees. Keswick Gardens, \$40,000. R. B. Harris, W. H. Daniels, W. T. Elliott. Dominion Steel Castings Company, \$500,000. J. S. Lovell, W. Bain, C. D. Magee. Meakins and Sons, \$100,000. Mrs. E. C. Meakins, W. G. Meakins, Miss I. M. Meakins.

Vancouver, B.C.—Columbian Pulleys, \$25,000. James Thomson and Sons, \$250,000. Assets Realization and Investment Company, \$50,000. E. R. Rickett's Amusement Company, \$100,000. Comox Canning Company, \$200,000. City and Provincial Estates, \$100,000. Johnston Paint and Varnish Company, \$50,000. Vancouver Realty Company, \$100,000. Pender Construction Company, \$160,000. Mollison Sisters, \$150,000.

Montreal.—C. E. Deakin, \$500,000. L. A. David, H. J. Elliott, L. J. M. Dugas. Montreal Cut Stone Company, \$100,000. H. J. Elliott, L. A. David, G. L. Alexander. Siemens Company of Canada, \$100,000. G. E. McCann, A. G. Ross, A. T. Struthers. Allner, Limited, \$50,000. J. W. Richards, J. A. Trotwood, P. du H. Richards. Canadian Industriegaz Company, \$100,000. P. De Serres, Cartierville; L. P. Seville, R. Delfausse. Dominion Automatic Train Control Company, \$1,000,000. A. L. Ruthven, H. S. Ross, W. Russell. Canada Realty Company, \$15,000. A. Asselin, J. A. Berthiaume, J. O. Lefebvre. Compagnie d'Epicerie St. Denis, \$10,000. C. Landreville, H. Magnan, F. Pare. Garage McDerne, \$49,000. A. Berthiaume, E. Berthiaume, A. Labbe. Mariotti Marble Company, \$90,000. P. Surveyer, J. C. B. Walsh, H. C. G. Mariotti. Empire Securities Company, \$20,000. F. G. Bush, G. R. Drennan, H. W. Jackson. La Caisse Hypotheaire, \$250,000. D. L. Desbois, L. O. Delage, J. N. Cabana.

Winnipeg, Man.—Winnipeg Concrete Construction Company, \$100,000. F. E. Sprague, H. F. Kidder, A. L. Webb, H. P. Grundy. Fort Garry Security Corporation, \$125,000. F. E. Sprague, E. M. Counsell, A. G. Williams. Canadian Syndicate Investments, \$100,000. J. H. Hicks, D. M. Macdonald, C. M. Wisenden. Fred. L. Cains Company, \$20,000. G. M. Newton, F. L. Cains, R. Lewis. Lombard Building Company, \$800,000. L. W. Leisner, W. H. Trueman, J. Wright. Kelvin Investment Company, \$60,000. T. R. Billett, R. Bingham, J. R. Young. McQuarrie-Naylor Company, \$20,000. J. McQuarrie, J. L. Naylor, Mrs. E. G. McQuarrie. Farmers' Tractor Sales Company, \$50,000. W. H. Newton, H. Baxter, Minneapolis; A. W. Wilcox, Winnipeg. Winnipeg Hebrew Free School. I. I. Kahanovitch, A. Asovsky, M. Blankstein. Proposker Hebrew Society of Winnipeg. A. Slotin, J. Krolik, A. Boroditsky. Tudhope Automobiles, \$60,000. W. G. Chater, H. Anderson, G. H. Ross. Winnipeg Rotary Club, \$5,000. L. J. Rumford, W. J. Clubb, A. W. Morley.

Toronto.—Beaver Auxiliary Mines, \$500,000. R. McKay, G. Grant, G. A. Urquhart. Sterling Silver Mines, \$1,250. W. M. Wallace, J. C. Stewart, R. B. Law. Forsyth Pulverizer, \$250,000. W. F. Gouinlock, J. A. Byers, C. E. Davies. Toronto Distributing Company, \$40,000. E. S. Beynon, E. M. Dillon, T. Enright. Johnston-Sutherland, \$100,000. R. Johnston, J. Sutherland, E. E. Wallace. Bulldog Tire Company, \$300,000. W. G. Moffatt, A. H. Crichton, W. J. Tubman. Dome Lake Company, \$500,000. H. Rilev, D. A. MacRae, G. W. Morley. Motion Plays, \$100,000. E. P. Bentley, H. Cornelius, W. Spaulding. R. H. Cosbie, \$40,000. R. H. Cosbie, W. M. Cosbie, W. H. Steley. Kieselguhr Company of Canada, \$40,000. E. J. Freyseng, A. A. Smith, H. E. Tremain. Fradette, Thomson and McKay, \$50,000. D. F. Fradette, J. H. Thompson, J. W. McKay. Mount Dennis Brick Company, \$200,000. J. J. Bayliss, J. A. Bayliss. Mount Dennis; C. McMaster, Toronto. Collie Cockerill Manufacturing Company, \$100,000. J. F. Lennox, C. W. Plaxton, W. J. Quinn. Black Lake Asbestos and Chrome Company, \$4,000,000. G. M. Kelley, J. D. Calconbridge, D. W. Cooper.

A transfer has been made of the Port Moody Sawmill, log boats, cut lumber and timber limits belonging to the Emerson Lumber Company, Limited, to the National Finance Company and the Thurston and Flavell Lumber Company.

NEW BRUNSWICK IS FORWARD FACING

Industries, Natural Resources, and Agriculture Are Buoyant—Norton Griffiths Company Will Continue Work Through Winter Months

(Special Correspondence).

Saint John, New Brunswick,
27th September, 1912.

New Brunswick's commercial conditions are satisfactory. Labor is fully employed and this condition promises to continue. Wholesale merchants report difficulty in obtaining merchandise fast enough to fill their numerous orders promptly. Farm produce is generally a little higher than it was a year ago, but there are some exceptions. Potatoes have been selling in Carleton County at 75c. per barrel. Crews are being sent into the lumber woods, and as far as can be learned the cut will be at least as large as that of last year. The fishermen generally have done well, and those around the islands down the bay have been especially fortunate, which is in notable contrast to conditions last year. They will be further helped by the big new factory of the Canadian Sardine Company, at Chamcook, which is almost ready for business and will employ some 600 girls and is said to have its pack sold in advance.

The apple crop will be short this year. Dominion fruit inspector Peters says that he would not be surprised if the crop was only 50% of what was expected.

Harbor Improvements and Railways Responsible.

St. John's activity during the last year is due chiefly to the enormous expenditures being made on harbor works, but there is also an increase in the number of factories. The Norton Griffiths Dredging Company are bringing in a fleet of powerful dredges to work in Courtenay Bay, and there are already five dredges and a stone lifter at work in the western harbor and the channel. The Norton Griffiths Company are steadily enlarging their mammoth plant at the site of the breakwater and dry dock in Courtenay Bay, and work will be continued throughout the winter. At West St. John work has been begun on the foundation of the Canadian Pacific Railway grain elevator, and this work will be steadily continued throughout the winter, as well as also the work of constructing new wharves at that point.

The Canadian Pacific Railway finds it necessary to erect a large addition to its office building at West St. John. It has also asked the city for a considerable strip of land at Fairville for an extension of its railway yards. The Intercolonial Railway is adding to its yard capacity storage room for 300 additional cars. The street railway company will extend its line in the direction of East St. John and its electric light system the whole way.

Coldbrook and Woodstock's Activities.

Interesting developments are taking place at Coldbrook, three miles out on the line of the Intercolonial Railway. Formerly there were extensive rolling mills at this point, and it was quite an industrial centre, but of late years industry there had ceased. The Maritime Motor Car Company is building an automobile factory to be ready by February 1st, and has discovered on its property a deposit of fine brick clay and a brick-making establishment will be added. The Coldbrook Realty and Development Company, which has planned a garden suburb there, will erect before spring several cottages for workpeople.

Woodstock will have the car shops and will be a divisional point for the Quebec and St. John Railway. Fredericton is its rival for the car shops and divisional point of the St. John Valley Railway. Both anticipate growth as a result of the construction of this line.

The Canada West India Company state that they expect to charter a steamer to go on the route between St. John, Cuba, and other ports this winter.

Agriculture in Alignment With Progress.

The farm settlement board announces that it will have many farms ready to be disposed of to intending settlers from the old country during the next year, under the ready-made farm scheme of the provincial government. One hundred new settlers were brought into the province from the old country during August, and the provincial immigration department anticipates a considerable movement this way during the next year.

Work has been begun fitting up the experimental farm to be established by the federal government two miles from Fredericton. Mr. W. W. Hubbard, secretary for agriculture, has been appointed superintendent.

FRUIT GROWING AND FREIGHT RATES

Inadequate Facilities in Transportation and Distribution Evokes Protest from Growers—Vancouver and Seymour Creek Watershed

(Staff Correspondence).

Vancouver, September 28th.

British Columbia has its own transportation trouble, apart from the interest it takes in the grain blockade on the prairies. Protest is made by fruit-growers and others because of inadequate facilities, both in transportation and distribution, which has resulted in much fruit grown in the province remaining unmarketed. This is not the first time this complaint has been made, but this year not only those directly concerned in the fruit growing industry are protesting, but officials of the government are joining. The Okanagan and mid-provincial districts have a railway, but the line is by no means operated for the benefit of the district or the province. Two years ago, fruit canners in the Okanagan and grocers on the coast protested because it cost nearly as much to bring a carload of canned fruit from the Okanagan to Vancouver as it did from Ontario, which meant that the fruit canning industry out here could hardly make it pay.

Fault Not in the Produce.

A very small reduction was made at that time in the charges. This year, with a large crop, it is stated that much was not picked because of the inability to get it marketed. As pointed out by the provincial inspector of fruit pests, the fault does not lie with the quality of fruit, for the product of this province has secured the highest honors from time to time in competition with other fruit at the biggest exhibitions. It costs more to bring apples from Vernon to Vancouver than it does from Wenatchee in Eastern Washington. This is due to unfair transportation rates, lack of co-operation among the growers and poor delivery. The provincial government has made a great feature in recent years of the possibilities of the fruit-growing industry, and its campaign along this line has induced many settlers from Great Britain to take up land, and also British companies to invest in fruit farms. The government should take the matter in hand, see that the growers are organized so that the fullest benefits of co-operation are secured, and also see that delivery is perfected and a more reasonable freight rate granted.

Transportation of Coal.

Freight rates are also the principal point in the transportation of coal from interior mines to the coast.

Mr. Ernest Waterman announces this week that he will try and bring coal over the Great Northern to Vancouver, and he expects to be able to compete with Vancouver Island coal, which is sold at an enhanced price. Mr. Waterman's company is backed by English capital, and he has a mine near Princeton, in the Similkameen, a long way from Vancouver compared with Nanaimo. The Great Northern may grant a better rate than the Canadian Pacific Railway did from the Nicola coal mines, when one of the companies in the latter place tried to place its coal on the market in this city. This rate was so high that it effectually prevented any getting here.

Aldermen Visit Seymour Creek.

Representatives of a Seattle firm, who were in Vancouver this week, stated to The Monetary Times that an attempt is being made to secure control of a timber area in the Seymour Creek watershed with the intention of bonding it. The city of Vancouver secures a large portion of its water from Seymour Creek, and a year or more ago a movement was made to secure the whole of the land in the watershed, most of which is privately owned, so that the supply would be forever conserved. Moreover, the city would secure some very fine timber, which might either be used to advantage or a fine park made in the Seymour valley. Owing to a change in committee chairmen at the first of the year, negotiations were not continued, and it is not improbable that the owners, who live in Seattle, may dispose of it to the syndicate which is after it.

Taking Up Timber Limits.

Americans particularly have taken up the bonding of timber limits, forming a company and selling stock to the people at large. Now that timber is becoming of greater value than ever, this form of investment appeals to many, and the companies do not find it hard to make sales of stock in the United States because all through the west, middle west and south much money has been made out of timber. The cost would be approximately \$650,000, possibly \$500,000.

LIFE UNDERWRITING IN CANADA

Metropolitan's Canadian Business—Japanese Insurance
—Suggestion to British Companies

That twenty-five per cent. of all insured people in Canada were insured in the Metropolitan Life Insurance Company, that in 1911 there were half a million insured, and that if they took the corporations, whose charters were granted by the various provinces, the Metropolitan had policies equal to 75 per cent. alone, were statements of Mr. Haley Fiske, vice-president of that company, at a gathering of 400 of its representatives and employees at Montreal. If that did not make a Canadian corporation, he asked, what would?

In Canada last year the company collected \$3,368,000, said Mr. Fiske. Of that \$900,000 went in expenses, and to Canadian agents and employees there was paid \$800,000.

What the Metropolitan Company Are Doing.

To widows and orphans there went half a million, and \$40,000 went in dividends, that meant into the pockets of policy holders. In the industrial department they not only kept contracts, but paid over \$60,000 free bonuses. Also they nursed hundreds of people at a cost of over \$25,000. They reserved, according to legal requirements, a sum equal to the reserve on the policies in force, and that reserve increased \$1,800,000, all of which added together meant the company disbursed more than \$200,000 over total receipts. Taking all that had been paid out for claims, nursing, bonuses, dividends, etc., the company had put in the country \$900,000 more than had been collected. No company incorporated in Canada had done that, and the Canadian companies did not have to put up the reserve. All they had to do was to put up \$50,000.

Buying Bonds and Canadian Securities.

While these Canadian companies made investments in England, the Metropolitan was buying bonds and Canadian securities. This investment in Canadian stock meant that their money went for Canadian trade and labor. "Every dollar we get from the Canadian workingman," declared the vice-president, "goes back into the pockets of the workingman."

Mr. Fiske proceeded to show why the Metropolitan was successful, explaining its methods of doing business, and emphasizing the fact that it was not a great money-maker like certain British companies, one of which paid fifty-six per cent. He described the advantages of the industrial department system, pointing out that this though sneered at years ago, had now been adopted by England and Germany. He also told of the work being carried on by the company in the matter of giving sick help both to policyholders and employees, pointing out that the company had been compelled to go before the courts to prove its right to do this.

Life Insurance in Japan.

Accompanying the annual statement of the Nippon Life of Osaka, Japan, is a brief resumé of the life insurance business transacted in that country during 1911. The Nippon is one of the oldest of Japanese companies and experienced a very successful year last year, writing 30,797 new policies, for \$10,104,465 of insurance. During 1911, 2,322 death claims, amounting to \$443,701, were paid. The company had 198,047 policies, or \$47,549,746 of insurance in force on December 31st, 1911. The total business in Japan for that year follows:—

Status of the Life Insurance Business in Japan at End of 1911.

Number of companies	31
New business in 1911	\$95,886,878
Insurance in force at end of 1911	341,199,828
Gain in insurance in force over previous year....	54,367,993
Premium income for 1911	13,208,408
Total income for 1911	15,441,637
Claims paid in 1911	3,353,435
Expenses of management in 1911	4,048,846
Total reserve at end of 1911	41,897,568
Assets at end of 1911	48,825,938

Besides the above, the business of the four foreign life insurance companies doing business in Japan is reported as follows by the Government Insurance Bureau. The figures are for 1910, those for 1911 not yet being published by the government.

New business in 1910	\$5,501,248
Insurance in force at end of 1910	26,924,933
Gain in insurance in force over previous year....	3,282,752
Premium income for 1910	1,568,218
Claims paid	336,836

SHERBROOKE RAILWAY REPORT

Scope of Operations Extended—New Contracts Will
Yield Considerable Revenue

Monetary Times Office,

Montreal, October 4th.

"During the year," states President C. J. McCuaig, of the Sherbrooke Railway and Power Company, in the annual report, "some important steps have been taken in connection with the company's affairs, and the scope of its operations has been extended by the acquisition of several companies, with established businesses, in the district between Sherbrooke and the international boundary line. Legislation was obtained at the last session of the Quebec legislature ratifying these contracts and still further extending the company's powers. The companies acquired consist of the Eastern Townships Electric, the Stanstead Electric and the controlling interest in the Lennoxville Light and Power Companies.

Revenue from Sale of Additional Power.

"To provide funds for the purchase and extension of these properties, building transmission lines, and the extension of the company's main system, the company issued \$348,500 additional bonds and \$348,500 stock, which they have sold.

"The coming year, in addition to showing the full year's revenue from the above mentioned sources, will include the revenue from the sale of additional power, which, when connected up, will yield an increased revenue of about \$20,000, contracts for which were signed in July and August. The company has also purchased from the city of Sherbrooke its light and power business, franchise and rights in the town of Lennoxville, which has been paid for.

"Negotiations are pending for the sale of another large block of the company's power and it is reasonable to expect that a market will be found for the greater portion of the remainder of the power developed before the expiration of the year.

Profit and Loss.

The following is the statement of profit and loss for the year ending June 30 last:—

Railway and power operations:—	
Gross earnings	\$64,500.71
Operating expenses	43,616.98
Net earnings	\$20,883.73
Real estate:—	
Rentals	\$ 990.65
Stanstead and Eastern Township's Electric Company's	
Gross earnings	\$23,148.58
Operating expenses	12,975.63
	\$10,172.95
Lennoxville Light and Power dividend	\$ 800.50
Net profit for 1912	\$32,847.83
Balance at credit, 1911	3,694.46
	\$36,542.29
Less:—	
Bond interest	\$41,077.06
Less interest charged to portion of system under construction	8,000.00
	\$33,077.06
Accidents written off:—	
Railway department	\$ 552.86
Power department	570.82
	\$ 1,123.68
Balance carried forward to the credit of profit and loss	\$ 2,341.55

Converters Rapid Improvement Shown.

Reports recently made public concerning the business of the Canadian Converters Company, Limited, illustrate the rapidity with which business conditions improve. The Canadian Converters Company, previous to a couple of months ago, had not paid a dividend for several years. Some years ago, the stock paid dividends at the rate of 4% per annum, but after paying them for perhaps a year was compelled to desist. Shortly afterwards, the annual report showed that the company had experienced a deficit for the year, and although the earnings have since had their ups and downs, they were never sufficient to justify the resumption of the one per cent. per quarter. At the last annual meeting, however, the situation showed a very considerable improvement, and the dividend was resumed in August. Now it is rumored on the street that the concern has earned its dividend for the entire year already, although the year is only five months gone.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Hamilton, Ont.—October 1.—Dump fire. Loss and origin unknown.

Winnipeg.—September 24.—630 Home Street. Loss small. Origin, oven set alight.

Windsor, Ont.—September 28.—Mr. Stephen's barn. Loss \$3,000. Origin unknown.

Windsor, Ont.—September 28.—Mr. C. Stephens' hotel. Loss \$1,700. Origin unknown.

Middle Stewiacke, N.S.—September 25.—Mrs. R. Turner's residence. Loss and origin unknown.

Paudash Lake, Ont.—September 19.—Messrs. Hubbell Bros. Loss \$1,000. Origin unknown.

Almonte, Ont.—September 29.—Mr. R. W. Lee's shoddy mill. Loss \$25,000. Origin unknown.

Galt, Ont.—October 1.—Galt Robe Factory. Loss \$150,000. Insurance \$99,000. Origin unknown.

Dundalk, Ont.—October 1.—Messrs. McDowell & Russell's hardware store. Loss and origin unknown.

Ingersoll, Ont.—September 27.—Mr. A. Upfold's barn. Loss unknown, partly insured. Origin unknown.

Coburg, Ont.—September 29.—Provincial Steel Works. Loss unknown. Origin, overheated smoke stack.

Portage la Prairie, Man.—September 26.—East Ward School. Loss small. Origin, supposed incendiary.

Chatham, Ont.—September 9.—Mr. A. Jimmerson's barn. Loss \$105. Origin unknown. No insurance.

Nelson, N.B.—September 27.—Messrs. Flett Bros. store. Loss \$4,000. Insurance \$2,000. Origin unknown.

Simcoe, Ont.—September 26.—Mr. W. P. Innes' residence. Loss \$100. Origin, gas jet too near ceiling.

Fredricton, N.B.—September 25.—Messrs. Clements and Company's warehouse. Loss \$500. Origin unknown.

North Toronto, Ont.—September 30.—Dovercourt Land Company's barn. Loss \$5,000. Origin unknown.

Welland, Ont.—September 30.—Mr. Arkins' store and Mr. A. Jones' residence. Loss \$1,500. Origin unknown.

Calgary, Alta.—September 30.—Capital boarding house, 1443 Cornwall Street North. Loss and origin unknown.

Sparta, Ont.—September 28.—Mr. W. Mills' apple evaporator. Loss \$4,000, insurance \$1,200. Origin unknown.

New Westminster, B.C.—September 18.—Messrs. Buck & Culter's boiler room. Loss \$200. Origin, heat from boiler.

Belleville, Ont.—September 30.—Mr. W. H. Baker's residence, Albion Street. Loss \$200. Origin, overheated stove.

Deseronto, Ont.—September 25.—Mr. H. Goodman's residence. Loss \$500, no insurance. Origin, defective chimney.

Vancouver, B.C.—September 28.—Felix apartment house, corner Melville and Jervis Streets. Loss \$300. Origin unknown.

Winnipeg, Man.—September 30.—Steamer "Winnitoba," two barges, pavilion, etc. Loss \$127,000, partially insured. Origin unknown.

Burnside, Man.—September 22.—Mr. R. J. Sharp's residence. Loss \$1,050. Insurance, Farmers' Mutual, \$500. Origin unknown.

Cypress River, Man.—September 17.—Mr. W. E. McLeod's residence. Loss \$1,500; partly insured with Farmers' Mutual. Origin, upset lantern.

Orangeville, Ont.—September 26.—Business block. Loss, Dr. D. H. Campbell, \$600. Mr. E. J. Hunter, \$400. Origin, supposed crossed wires.

Moose Jaw, Sask.—September 24.—Mr. J. Grey's residence. Loss, building \$1,800, contents \$500, no insurance. Origin, defective pipes.

London, Ont.—September 26.—Mrs. A. McCutcheon's residence, 142 Queen's Avenue. Loss \$1,000, partly insured. Origin, supposed hot ashes.

Fort William, Ont.—September 29.—Mr. W. Cameron's residence. Loss \$200. Insured with National Fire Insurance Company. Origin unknown.

September 29.—Mr. W. Bennett's barn at Thurlow Township. Loss unknown. Origin, supposed tramps.

Edmonton, Alta.—September 18.—Loads of hay. Loss \$20.

September 19.—Mr. Cameron's hotel. Loss \$20. Origin, supposed smoking in bed.

September 19.—Shack. Loss \$300. Origin, gas explosion.

September 20.—Outbuilding belonging to Mr. W. Rogers. Loss \$4. Origin unknown.

Toronto, Ont.—September 29.—126-8 Bay Street; building owned by Messrs. Baillie, Wood and Croft. Loss, approximately \$2,000; fully insured. Tenants, Kramer Brothers, loss \$200; Sterns, loss \$300; T. Eaton Company and W. H. Johnston, loss on goods in process of manufacture about \$5,000; Shapiro, fur manufacturer, loss unknown; H. Schiller, restaurant, loss \$550, insured for \$2,500 in the General. Schiller's loss adjusted by Messrs. Ross and Wright, Toronto.

Toronto, Ont.—September 21.—285 Sackville Street. Loss \$28. Insured with Merchants Fire Insurance Company. Origin unknown. Gold Leaf Refining Company, 261 Wilton Avenue. Loss \$25. Insured with Royal Insurance Company. Origin unknown. 116 Miller Avenue. Loss \$50. Insured with Caledonian Company. Origin unknown. 118 Miller Avenue. Loss \$125. Insured with Caledonian Company.

September 24.—686 Queen Street East. Loss \$30. Insured with Merchants and Economical Companies. Origin, boys playing with matches.

September 25.—196 Sherbourne Street. Loss \$150. Insured with Merchants and Norwich Union. Origin unknown.

September 29.—648 Lake Shore Avenue, Island. Loss \$800. Insured with British Crown. Origin, defective fireplace. Stable. Loss, Mr. Glioura, \$150; Messrs. F. Calderone, J. Scaletta, G. Gatte each lost a horse and harness. Total value \$390. All insured with Royal Insurance Company.

Sackville, N.B.—September 30.—Conflagration. Loss \$60,000. Origin unknown. The principal losers are: Captain Porter Hanson, two buildings, loss \$12,000, insurance \$4,500; A. B. Copp, building damaged \$1,500, insurance \$2,500; Copp and Fawcett, building damaged \$1,000, loss insured; Mrs. Charles A. Doull, building loss \$6,000, insurance \$1,000; C. W. Cahill, drygoods, loss \$8,000, insurance \$4,000; Geo. Wry, paints and furniture, loss \$2,500, insurance \$2,000; Jas. H. Teare, bakery, loss \$2,000, partially insured; Fawcett Bros., footwear and groceries, loss \$7,000, insurance \$4,000; R. G. Henderson, druggist, loss \$4,000, insurance \$3,000; W. H. Tracy, building and furniture, loss \$5,000, insurance \$2,575; Leslie Carey, laundry, loss \$2,500, insurance \$1,000; C. G. Steadman, jeweller, stock damaged, no insurance; Sackville Book Store, stock insured; Alex. Ford, hotel and stables, loss \$3,000, partly insured; Tribune Printing Company, and Post Printing Company, had paper stock damaged about \$1,000; other tenants in the building lost their household effects.

Halifax, N.S.—September 27.—Business section. Loss, G. C. Cook, about \$30,000; Corkum and Ritcey, about \$4,000; Anti Dust Company, furniture, etc., \$3,000; R. B. Seeton and Company, \$4,000; Bryant and McDonald, \$1,500; A. J. Grant and Company \$10,000; A. M. Bell and Company slight; Pickford and Black, slight; James Simmonds and Company, slight; Henry Flowers, slight. Insurance, the G. C. Cook building was insured for \$26,500 in the following companies: Fidelity Underwriters, \$2,500; British Crown, \$5,000; Acadia, \$2,000; Springfield, \$4,000; United London and Scottish, \$5,000; Phoenix of London, \$2,500; Fidelity-Phoenix, \$5,500; Springfield, on G. C. Cook's office fixtures and stock, \$600; Corkum and Ritcey, N. S. Fire, stock, \$1,500; Corkum and Ritcey, A. J. Bell's agencies, stock and office fixtures, \$1,650; A. J. Grant and company, Continental Insurance Company, \$8,000; R. B. Seeton and company's losses fully covered by insurance in A. M. Jack's agencies, Halifax Fire, N. S. Fire and Acadia Fire company's. Bryant and McDonald, losses by smoke fully covered by insurance in A. J. Bell and company's, Saunders and Duffus, and W. R. McInnis and company's agencies. Origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Ennotville, Ont.—September 11.—Mr. J. Smith's threshers. Loss \$1,000. Insurance Nichol Mutual \$650. Origin unknown.

Drury Cove, N.B.—September 10.—Drury Cove Lime Company's three houses. Loss \$2,000. No insurance. Origin unknown.

Galt, Ont.—Galt Robe Company, loss \$110,000; insurance reported, \$99,000. Insured with Scott and Walmsley, \$40,000; Factories Insurance Company, \$10,000; Central Canada Manufacturers' Mutual, \$10,000, and other companies.

Letters patent have been granted to the Canadian Northern Montreal Tunnel and Terminal Company, allowing an increase of capital from \$50,000 to \$5,000,000.

The Montreal harbor commissioners new grain elevator, the largest in the world, was formally opened for business on Wednesday, by Hon. J. D. Hazen, Minister of Marine and Fisheries.

CALGARY'S COMMERCIAL CONDITIONS

Wheat Slow in Moving—Objections to Natural Gas Supply to Winnipeg—Dominion Railway Company

(Special Correspondence).

Calgary, September 30th.

Greater activity in commercial lines is characteristic of the present month in Calgary. Since the expectancy regarding the grain crop became a certainty of satisfactory returns, a large volume of business has been transacted as indicated by the bank clearings increasing 135 per cent. over the corresponding week of 1911. Grain is slower to start moving owing to the wet weather and probably also to the lesson learned from the experience of last year in the unprofitableness of handling damp grain. Fine weather prevailing now is being taken advantage of to rush out-door operations everywhere. In the city, though the corporation has concluded a number of the items on its programme of municipal improvements, and is fast reducing its pay roll, the labor is readily absorbed in other lines.

Satisfactory Sales and Reports.

There is reported to be a falling off in the sales of harvesting machinery, accounted for by the fact that in 1911 an exceptionally large number of sales were made. However, the business done is considered satisfactory.

Wholesale houses are having a reasonably busy time, the development here being shown by the number of commercial travellers, of whom 1,460 now make their headquarters in Calgary.

Buildings and Loans, Limited, held its statutory meeting this week. During the five months the company has been in operation it has completed and under construction thirty-seven houses. When this work is completed it will have first mortgages aggregating \$84,000, drawing interest at eight per cent. and repayable monthly.

Natural Gas, Street Railway and Transportation.

The proposed piping of natural gas to Winnipeg from the Bow Valley by Calgary capitalists, with four or five pumping stations, commencing somewhere about Swift Current, which would force the gas to Winnipeg, is meeting with various objections. Mayor Spencer, of Medicine Hat, objects to a charter being granted the new company, and the Calgary Herald demands either Provincial or Dominion prohibitive legislation.

The Interurban Railway Company is acquiring 13 acres of the industrial tracts owned by the city, for use as the site of a repair shop.

A mile of street railway track is to be built by the South East Calgary Corporation, from Ogden station to the city limits. This will be handed over to the city of Calgary in return for a service operated by the municipal system over the tracks of the South East Corporation.

Railway Plans Considered.

Plans of the Western Dominion Railway Company, considered by the board of trade this week, have the name of J. E. Askwith as president. This did not, however, convey enough information to the committee, and they decided to recommend approval of the map filed provided the promoters could assure them of immediate construction. The line is variously ascribed to the Canadian Pacific Railway, Canadian Northern Railway and Great Northern interests. It will open a country between the international boundary and the Peace district (passing through Calgary), which contains a vast area of clays, shales, coal, natural gas, tar, sands, and possibly oil.

Professor W. W. Andrews, of Regina, is engaged in making a study of the coal and clay deposits of the southern part of the province for the Saskatchewan government. In connection with the fuel problem the professor has succeeded in making briquettes from lignite and also from straw. In regard to the latter he claims that out of 800 tons of straw he can manufacture 300 tons of straw briquettes, which will be equal in all respects to the best firewood.

The Canadian branch of the Ocean Accident and Guarantee Corporation, Limited, has notified its representatives that on and after October 1, 1912, no plate glass policy will be issued for a longer period than twelve months. All existing three-year policies will be replaced by annual coverings at maturity. It is pointed out that while the charge will be higher pro rata, the difference is fully warranted, as the increase both in the cost of plate glass and labor has added greatly to the dealers' charges for replacements. At the last annual meeting of the Glass Underwriters' Association of Canada, it was unanimously agreed that only annual plate glass policies be issued in future.

FIXED PURCHASING POWER OF MONEY

Is a Solution of Cost of Living Problem, Suggests a Yale University Professor—Custom of Seigniorage

An international conference to consider a remedy for the increasing cost of living was advocated before the International Congress of Chambers of Commerce at Boston, by Prof. Irving Fisher, of Yale University, who suggested that the weight of the gold dollar should be increased enough to restore some of its lost purchasing power.

Professor Fisher said, in the course of his remarks: "I have said that my proposal is virtually to increase the weight of the gold dollar. But this increasing weight would not be added to the coins themselves, but only to the bullion out of which they are made. In other words, the proposal is to restore the ancient custom of a 'seigniorage' on gold coinage.

No Seigniorage at Present.

"At present there is no seigniorage. Coinage is free and the weight of a gold dollar is as great as the weight of the bullion which the miner takes to the mint and for which he receives back a dollar. The coined dollar weighs the same as the uncoined or 'bullion dollar.' My proposal is to increase the weight of the bullion dollar. The coined dollar would remain unchanged in weight.

"The difference in weight between the two would be the seigniorage. It would not be fixed once for all, but would be continually adjusted so as to give the dollar always a fixed purchasing power. As the coined dollar would be interchangeable with the bullion dollar, the two would always be equal in value.

Fixed Value and Variable Weight.

"The ultimate dollar would be as it now is—a dollar of gold bullion—but this dollar would no longer be of fixed weight and variable value, but of fixed value and variable weight. There is no virtue in a fixed mint price for gold, but there is virtue in a fixed purchasing power of money.

"The great fall of prices ending in 1896 was often referred to as an appreciation of gold, just as the rise of prices since 1896 is often referred to as a depreciation of gold. This continual variation in the real value of the dollar is the bane of business. It is one of the sources of booms, crises, contractions and depressions by which modern business men are perpetually vexed."

The cost of living will continue upward, and not go downward for several years, was one of the opinions expressed by Prof. Fisher at the conclusion of his report. His recommendation regarding a conference on the high cost of living was adopted.

A meeting of companies transacting casualty business in Canada is to take place at Belleville, Ont., to-day. This meeting will endeavor to put the business on a better footing in regard to rates, etc. Complaints are made on behalf of companies that owing to rate-cutting, and other conditions of the business, matters are in an unsatisfactory position, and at the Belleville meeting, which is an adjournment from a meeting held in Toronto a short time ago, it may be possible to arrange matters satisfactorily.

Stock of the Noiseless Typewriter Company is being offered at \$25 per share by Messrs. Keith, Balfour and Company, Toronto. Messrs. S. J. Moore, C. W. Colby, W. H. Brouse, and H. J. Fuller, directors of the company, have issued a statement in which they say that the circular respecting the stock offering issued by the brokers contains untrue statements, and that the company is not offering any of its shares for sale.

The Great-West Life Assurance Company reports an excellent business throughout the country. The total of applications received to the end of September already exceeds the total for the whole of 1911. The business in force now exceeds seventy-nine millions. The Great-West Life also reports brisk demand for loans on mortgage security. The rate of interest continues at the satisfactory figures prevalent for so many years, and the unlimited expansion occurring in the west assures a continued demand for money at desirable rates.

The government has let the contract for the last section of the Hudson Bay Railway which it is hoped to complete by 1914. The last section extending, from Split Lake to the bay, is 165 miles long to Port Nelson and 245 miles long to Fort Churchill. This last link is to be built by Mr. J. D. McArthur. It is said to be the intention of the Hon. Frank Cochrane, as the result of his visit to Hudson's Bay, to run a railroad to the bay by electricity. A plant may be built at White Mud Falls, on the Nelson River. The Nelson River, he reports, has wonderful power possibilities, and could supply electricity to the whole of the West. The total available power is estimated at 6,000,000 horsepower.

HINTS FOR MANUFACTURERS AND EXPORTERS

Boxed Apples Bring Better Prices—Hair and Wool Rags—Australian Duty Stamps

The trade at Liverpool reports, that from all information gathered through their own and government channels the indications are that the apple crops in the United Kingdom and on the continent will be much smaller than last year, hence there seems every prospect of a successful season for Canadian exporters. The success of Canadian apples on the British market will depend on the importance of shipments, and perhaps more than anything else on the quality and condition of the fruit which, as reported during last season, left so much to be desired.

Imports into Liverpool and Manchester, 1911-12.

Liverpool, barrels	961,465
“ boxes	143,452*
Manchester, barrels	122,578
“ boxes	2,531*

*These figures are included in the quantities opposite barrels. Three boxes to a barrel.

The above table shows the quantity of apples in barrels and boxes imported into Liverpool and Manchester during last season, and the figures indicate that there is a large export market for Canada in the box trade.

Canadian shipments of box apples have never been regular enough to this district to hold the market permanently. This is unfortunate, as there is a growing demand for the box trade, and much better prices could be secured in this trade for select fruit than is obtainable for apples in barrels.

In the Woolen District.

Considerable trade is done in the Leeds, England, district in cow and calf hair, which is used among other purposes for the manufacture of horse rugs, cheap carpets and mats. Canadian firms in a position to export hair would do well to communicate with the Trade Commissioner's office, East Parade, Leeds, sending samples and prices.

In regard to the shipment of hair, it may be stated that one thing which commends it strongly to spinners is its freedom from impurities, and on this account it should be well washed and dried before being baled. For export to the Leeds district and market, the hair should be press packed and put up in bales weighing from 224 pounds upwards. There is a brisk demand, and shipments from abroad are constantly occurring.

Large quantities of wool rags from Canada continue to arrive at Leeds, and the trade with shoddy manufacturers, who are the principal buyers, has now become firmly established. Further Canadian exporters have entered this trade in recent years and the imports from the Dominion are increasing. Last year the wool rags sent to the United Kingdom from Canada were valued at \$238,740, most of which were despatched to the Dewsbury and Batley districts. As showing how this trade has grown, it may be stated that six years ago the imports from Canada were only \$35,633 in value.

Australian Duty Stamps.

For some considerable time, manufacturers and exporters in Great Britain have enjoyed the advantage of being able to procure from the office of the High Commissioner for Australia in London such quantities of Australian duty stamps as they desired for the purpose of affixing them to packets of catalogues or other advertising matter of a dutiable nature transmitted through the mails to addresses within the Commonwealth. Hitherto no other country (outside the United Kingdom) had similar facilities.

The great convenience to Canadian manufacturers and others of having supplies of Australian duty stamps available in the Dominion was recognized by the Department of Trade and Commerce, Ottawa. As the result of negotiations carried out by Mr. Ross, the Canadian Trade Commissioner at Melbourne, supplies of Australian duty stamps will shortly reach Ottawa, and the necessary arrangements for their sale will be notified by the Department of Trade and Commerce in one of the weekly reports. Much advertising matter sent to Australia has been—and continues to be—destroyed by the postal authorities on account of the addressee refusing to pay the customs duty of 6d. (12 cents) per pound or proportion thereof. Obviously, advertising matter in many instances failed to reach the intended destination, and the object sought by manufacturers were thus completely frustrated. By affixing the required Australian duty stamp (in addition to the Canadian postage) every packet of printed matter directed to an Australian address is practically ensured of reaching its destination.

BRIQUETTING BITUMINOUS COAL

McKay Mine, Nova Scotia, Has First Plant—Several Companies Adopting This Method of Utilizing Slack Coal

In the modern methods of mining bituminous coal large quantities of slack are produced; and while in some sections of the country there is a market for the slack, for use in industrial plants provided with mechanical stokers, in other sections there is little or no market for it, states "Conservation." For this reason a number of the operators in Nova Scotia are considering the installation of briquetting plants for the purpose of converting this slack into a higher grade and more suitable fuel.

On account of the friable nature of the coal mined at the MacKay Mine much slack is made during mining operations. As there is little or no market for this slack coal the management installed a briquetting plant with a capacity of 10 tons of briquettes per hour.

First Canadian Plant.

This is the first plant to be installed in Canada for the purpose of briquetting bituminous coal. Unfortunately, it was damaged by fire during the month of July.

The same company are also installing two similar units at the Colonial Mine, which are expected to be in operation this year.

The briquetting plants are of Belgian manufacture and are of the roll press type.

The following is a short description of the MacKay briquetting plant:

The coal from the mine is screened over a $\frac{3}{4}$ inch screen; the lump coal (over $\frac{3}{4}$ inches) is sent to the market, and the fine coal is carried by a disc elevator to a 75 ton bin. The coal is discharged from the bin by chute into a 10 ton concrete pocket situated at the briquetting plant. The coal is then elevated by a bucket elevator to a 3 ton cone hopper. The coal is fed from the hopper to the disintegrator at any desired rate of speed by means of a revolving table and plough-shaped cutter situated at the bottom of the hopper.

Pitch Used as Binder.

The pitch after being crushed is fed into the disintegrator by means of a similar adjustable feed. From the disintegrator the coal and pitch is elevated to the mixer where superheated steam is added. The heated coal is then conveyed to the roll press by means of a spiral conveyer. The briquettes are usually soft as they come from the rolls but upon becoming slightly cool they become hard and withstand handling very well.

The pitch used as a binder for the briquettes varies from 6 to 8 per cent. of the weight of the coal. This pitch is one of the by-products obtained from the tar recovered at the Dominion Iron and Steel Company's oven plants.

Have Been Used With Success.

The briquettes are ovoid in shape and have been used with considerable success upon the Intercolonial Railway and for domestic purposes.

The Inverness Railway and Coal Company are also installing a briquetting plant at Inverness, C.B., for the purpose of briquetting the slack made during mining operations.

Briquettes when properly made with a suitable binder possess the several advantages over raw fuel.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer.

Saskatchewan.

Duff, No. 310, \$600. G. Loveridge, Duff.
 Druid, No. 702, \$3,000. J. Bailey, Druid.
 Knox, No. 826, \$2,000. C. E. Wright, Lang.
 Conger, No. 756, \$1,500. J. P. Klein, Truax.
 Gaudent, No. 742, \$800. R. Gareau, Garonne.
 Ardine, No. 816, \$1,200. J. Drinnan, Wawota.
 Smith, No. 061, \$1,500. H. L. Richter, Schmidt.
 Nygren, No. 077, \$1,200. J. R. Palmer, Estevan.
 Ormstown, No. 680, \$2,200. H. S. Pollock, Harwell.
 Prairie Flower, No. 080, \$750. A. H. Rogers, Laird.
 Hawarden, No. 2330, \$800. C. C. Stevens, Hawarden.
 Eggar Valley, No. 773, \$1,800. R. A. Wilkes, Assiniboia.
 St. Walburg, No. 590, \$1,200. R. Musch, St. Walburg.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended September 14th:—

	1911.	1912.	Increase or decrease.
C.P.R.	\$2,325,000	\$2,667,000	+ \$342,000
G.T.R.	1,026,449	1,110,000	+ 84,065
C.N.R.	378,300	360,300	+ 18,000
T. & N.O.R.	39,366	28,573	— 10,793

New records in both gross and net earnings are shown in the C.P.R. statement for the month of August, issued on Saturday. Gross exceeded by about \$200,000 the gross in July, when earnings for the first time passed the \$12,000,000-mark. Net profits were \$36,800 ahead of net in October of last year, the previous record month for the company in this respect. The gain in net in August as compared with the same month last year was \$642,354, or nearly 16 per cent. The statement for the month follows:—

	August, 1912.	July 1 to August 31, 1912.
Gross earnings	\$12,251,715.87	\$24,304,114.45
Working expenses	7,553,790.21	15,138,011.89
Net profits	\$4,717,925.66	\$9,166,102.56

In August, 1911, the net profits were \$4,075,571.01, and from July 1st to August 31st, 1911, there was a net profit of \$7,773,599.34. The gain in net profits for the same period last year is, therefore, for August, \$642,354.65; and from July 1st to August 31st, \$1,387,503.22.

A cable to The Montreal Star says:—"The Grand Trunk August statement shows that the net profits for the Grand Trunk increased £35,200 sterling. Canada Atlantic showed a net decrease of £2,550. Grand Trunk Western, net increase of £6,850. Grand Haven, net decrease of £1,950.

The total profit for the whole system increased £37,550, which is regarded by the market as a fine showing.

I believe that one of the chief benefits resulting from the opening of the Panama to Vancouver and province will be the greater facilities for securing immigrants direct from the Motherland, stated Mr. J. A. Mitchell, assistant industrial commissioner of Great Britain, who is visiting Canada with Sir George Askwith. Now, the land journey out here is so great that the large majority of incomers remain on the other side of the mountains. There is no doubt, I should think, but that the steamship lines plying from the Old Country to this coast via the Panama Canal will be able to carry immigrants at a very low rate and British Columbia will benefit largely.

DIVISION OF CALGARY'S LOAN

Comptroller's Woods tabulation shows a total of \$2,502,270 distributed among eight by-laws, covering sewers, paving, sidewalks, widening streets and grading at Calgary. By-laws not spent, \$1,759,327.74 estimated amount needed for remainder of 1912, \$1,052,852.29; total that should be borrowed against the several by-laws, \$1,874,583.23. Amount that should be borrowed for work on general by-law pledged to bank, \$32,000. This item includes No. 1, for use on asphalt plant, term of 15 years, total \$50,000, borrowed from bank \$20,000. By-law 1295, addition to city stables, term of 15 years, total \$12,000, borrowed from bank \$12,000, making a total of \$32,000. Going further in the tabulation, the comptroller shows that there is available for expenditure in January, 1912, \$2,487,584.87; amount already expended during 1912, \$736,456.26; holdbacks, 1912, \$68,264.71; expended, 1911, \$17,610.92; total expended for which no bonds have been sold, \$821,739.94.

The table setting forth the standing of the by-laws and conditions governing expenditures is as follows:

No.	Term.	Amount.	Balance in By-law Not Spent.	Estimated Amount Needed for Rest of 1912.	Total that Should be borrowed against Each By-law.	Amount Available for Expenditure in January, 1912.	Amount Already Expended During 1912.	1912 Holdbacks.	1911 Expended	Total Expended for which no Bonds have Been Sold.
1201—Sewers	20 yrs.	\$ 3,000.00	\$ 1,423.76	\$	\$ 1,575.28	\$ 2,023.72	\$ 598.00	\$	\$ 977.28	\$ 1,575.28
1208—Sewers	20 yrs.	29,000.00	6,964.01		32,560.92	15,292.15	16,528.23			23,560.92

Amount that should be borrowed to pay for local improvement work under preliminary local improvement bylaws pledged to bank..... \$1,874,583.23

The mortgage loan companies of Canada, are discussed in an unusually interesting way in the monthly letter of Messrs. A. E. Ames and Company, Toronto, just issued. The fact is recalled that the representative concerns in this class are experiencing a period of great expansion and prosperity; earnings are increasing, substantial additions are being made to reserve, foreclosures are most rare, the demand for loans is greater than the money available, rates of interest are being well maintained, property values are steadily advancing, and it does not appear as though the companies are now paying much, if any, more for deposit and debenture funds than they have for some years past.

The Western field, Manitoba, Saskatchewan and Alberta, has proved a most profitable and safe one and, as a result, an increasing proportion of funds has been placed there, continues the circular. While a 5½ to a 6 per cent. interest rate is obtained in Ontario and the east, in Manitoba the minimum rate is 7 per cent., and in Alberta, Saskatchewan and British Columbia it is 8 per cent. Not only have mortgage loans on Western farm lands proved remunerative, but as a result of the care exercised in making loans, the close inspection carried on from year to year, coupled with the steadily increasing value of farm lands, practically no losses have been experienced. Applications for loans have been so numerous that it has been impossible to accept all the good business offering, and the demand will certainly go on for many years to come.

When it is considered that Ontario has over 100 million acres of Crown lands, of which there are over 20 million acres of good arable land left for settlement south of the 50th parallel of latitude in New Ontario; that in Manitoba there are still unoccupied and suitable for cultivation, 20 million acres, in addition to the large acreage which will come into the province through enlargement of its boundaries; that in Saskatchewan there are still 50 million acres of unbroken prairie; that in the Province of Alberta only 2 per cent. of the arable land has as yet been brought under cultivation, leaving yet 100 million acres suitable for cultivation; and that in addition there are vast areas of uncultivated agricultural lands in the Peace River District and in the magnificent valleys of British Columbia; it will be realized that the field for operations is very large, and that there is every prospect that the present rates of interest will continue for many years to come. So long as immigration and the consequent development of the West continues, at anything like the present rate, there will continue to be a heavy demand for mortgage loans.

While most of the representative loan companies have done well for their shareholders, it cannot but be recognized that they have, at the same time, bestowed a distinct benefit upon settlers by furnishing funds for the purchase of additional holdings and for improvements to their properties, etc., and thus have assisted in the more rapid development of the agricultural districts. Unlike trading concerns, there is, of course, a limitation to the dividends which can be expected to be received. The margin of profit is represented by the difference between the interest obtainable on mortgage loans and that at which the loan companies can borrow moneys. They are, however, no signs that the companies will be obliged to pay higher rates on their debentures or deposits than those now ruling, namely, from 4 per cent. to 4½ per cent. on the former, and on the latter 3 per cent. to 3½ per cent.

An exceptionally well arranged stock list is also printed in the letter from which we have quoted. The circular is one of the best we have seen issued by any Canadian financial house.

Careless handling of gasoline, and numerous fires resulting therefrom, are becoming entirely too frequent, in the opinion of Regina's fire chief. It is now proposed to have the storage and handling of gasoline strictly regulated, and it is believed that if this is done, it will result in less fires from this cause. Fire chief White has asked the commissioners to take steps to have the necessary by-law drafted. This will be submitted to the council for its consideration.

SUMMARY: Amount that should be borrowed for work on general bylaw pledged to bank..... \$32,000.00

PERSONAL NOTES

Mr. George Burn, manager of the Bank of Ottawa, has been on a trip of inspection to the Pacific Coast.

Mr. J. H. Brock, managing director of the Great West Life Assurance Company, Winnipeg, is in Europe on a trip for his health.

Mr. T. B. Macaulay, managing director of the Sun Life Assurance Company of Canada, has returned to Montreal after a long stay in Europe.

Mr. Theodore Labharet, one of the two representatives of the Paris shareholders of the Banque Internationale, has sailed from New York for home.

Mr. A. P. Frigon, of Messrs. St. Cyr, Gonthier and Frigon, investment brokers, left yesterday for a trip to England, France, Belgium, Holland and Italy, in the interests of the firm.

Mr. W. F. Mahon, managing director of the Eastern Securities Company, Limited, St. John, has found it necessary to move to Montreal because of increasing business demands which make it necessary that he should be at the financial centre.

Mr. T. Watson Sime, C.A., (Scotland and Ontario), and Messrs. Stiff Brothers, C.A., (Ontario), have consolidated their business and will hereafter practise as Messrs. Stiff Brothers and Sime, chartered accountants, with offices in the Continental Life Building, Toronto.

Mr. Samuel Catlow, one of England's leading financial men, and president of the Bank of Liverpool, died in Toronto last week. The deceased, together with a party of British financiers, was in Canada having a look into local investments, in which he was interested.

Mr. Douglas MacLagan has been appointed as district manager of the Canada Life Assurance Company for Glasgow and the West of Scotland. Mr. MacLagan was formerly inspector for the Royal at Manchester, and has had a wide experience in insurance business in Scotland.

Mr. Clarence A. Bogert, general manager of the Dominion Bank, who has been touring the West, reports that values of real estate in most places are reaching a more proper level, though central properties in the larger centres and desirable farm properties are still too high.

Mr. G. C. Bateman, B.Sc., late of the staff of the Dome Mines, in Porcupine, has been appointed to succeed Mr. A. D. Miles as Canadian representative of the Canadian Mining and Exploration Company. Mr. Bateman is a graduate of Queen's University, and is an experienced mining man.

Mr. Frank W. Strathy, who has been for some years general manager of the Traders Bank of Canada in Toronto, has presented his resignation to the Royal Bank of Canada, the successors of the Traders Bank, and he will shortly become associated in a prominent position with Robins, Limited.

Mr. John Macrorie, of Edinburgh, who is making another trip through Canada to make investments for himself and associates, stated while on the coast that an increased amount of Scottish capital was coming to Canada. He added that the British Columbia enterprises of Messrs. Mackenzie and Mann were regarded with favor in Scotland, investments therein being large.

Mr. W. Westerman, president and general manager of the Rotterdam Bank, at Rotterdam, Holland, will visit Winnipeg early this month. The Rotterdam Bank is one of the largest banks in Holland and the most important bank associated with the Netherlands Trans-Atlantic Mortgage Company of Amsterdam. The latter concern have their head office for Canada in Winnipeg, under the management of Mr. L. D. Fortuyn, managing director of the company.

Mr. D. B. Seely has withdrawn from the firm of G. W. Farrell and Company, and taken over the stock exchange department of that firm, the new stock exchange firm to be known under the firm name of Farrell, Seely and Company. The firm of G. W. Farrell and Company, financial agents, will continue as formerly. Mr. John Black, Jr., formerly with the Bank of British North America in Montreal and Ottawa, will be office manager for the new firm.

Mr. S. S. Snider, formerly with the Northwestern Mutual Life in New York, under the famous John I. D. Bristol, has been appointed manager of the Equitable Life for Ontario, with headquarters at Toronto. Mr. Snider is a Canadian by birth. He was born in Prince Edward County in 1870, attended high school in Trenton, taught model school at Picton, came to Toronto in 1892 and was connected with Bradstreets for about five years. He then went to New York with R. G. Dun and Company as a reporter. In 1905 he entered the service of the Northwestern Mutual Life.

EXCHANGE RATES

Glazebrook & Cronyn, exchange and bond brokers, report exchange rates as follows:—

Between Banks—			
	Buyers.	Sellers.	Counter.
N.Y. Funds	Par.	Par.	½ to ¾
Montreal funds	Par.	Par.	½ to ¾
Sterling—			
60 days' sight	8 7-16	8 ½	8 ¾ to 8 ¾
do. demand	9 ¼	9 9-32	9 ½ to 9 ¾
Cable trans.	9 11-32	9 ¾	9 ¾ to 9 ¾
New York—			
		Actual.	Posted.
Sterling, 60 days' sight		4.82-15	4.83
do. demand		4.85-60-65	4.86 ½

Call money in Toronto, 6 per cent.

Bank of England rate, 4 per cent.

Open market discount rate in London for short bills, 3½ per cent.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of October 5th, 1911; September 26th, and October 3rd, 1912, with percentage change:—

	Oct. 5, '11.	Sept. 26, '12.	Oct. 3, '12.	Ch'g %
Montreal	\$48,818,954	\$59,515,883	\$65,929,944	+35.0
Toronto	37,805,546	38,940,762	44,127,780	+16.7
Winnipeg	26,138,775	25,024,289	30,561,514	+16.9
Vancouver	11,596,985	12,241,019	14,780,480	+27.5
Ottawa	4,503,818	3,569,071	4,338,115	-36.0
Calgary	4,166,006	8,445,201	5,856,519	+40.5
Quebec	2,823,902	2,938,511	3,428,052	+21.3
Victoria	2,455,637	3,620,066	4,120,615	+67.7
Hamilton	3,134,933	3,322,921	3,772,444	+20.3
Halifax	1,927,397	1,600,776	2,206,209	+14.4
St. John	1,609,799	1,822,242	1,621,950	+ 0.7
Edmonton	2,685,085	4,271,230	4,525,021	+68.4
London	1,547,249	1,565,678	1,885,988	+21.8
Regina	1,459,314	2,208,843	2,227,467	+52.5
Brandon	716,179	605,590	556,322	-22.2
Lethbridge	549,435	679,705	656,154	+19.3
Saskatoon	1,501,579	2,279,051	2,311,299	+53.8

Moose Jaw	852,175	1,657,151	1,386,441	+62.6
Fort William	409,855	734,682	712,016	+73.8
Total	\$155,225,717	\$175,654,742	\$195,628,092	+26.0

SEPTEMBER BANK CLEARINGS

The following are the clearing house returns for September, 1912, compared with September, 1911:—

	Sept., 1911.	Aug., 1912.	Sept., 1912.	Ch'g %
Brandon	\$2,158,161	\$2,508,703	\$2,204,383	+ 2.1
Brantford	1,855,493	2,250,882	2,287,497	+23.2
Calgary	16,965,562	22,486,030	24,137,286	+42.2
Edmonton	10,231,600	18,306,531	17,702,793	+73.0
Fort William		3,002,987	2,972,057	
Halifax	6,576,991	8,158,190	7,754,702	+17.9
Hamilton	9,506,300	13,870,307	12,899,707	+35.6
Lethbridge	2,245,619	2,671,035	2,652,185	+18.0
London	5,279,589	6,691,850	6,570,525	+24.6
Montreal	179,712,213	254,933,718	234,735,761	+30.6
Moose Jaw	3,384,972	5,118,419	5,413,522	+59.9
Ottawa	16,251,033	21,106,208	15,157,241	- 6.7
Quebec	10,342,726	12,976,297	13,248,970	+28.1
Regina	6,611,958	9,401,192	9,732,149	+47.1
St. John	5,495,413	7,837,351	7,503,553	+32.6
Saskatoon	5,456,902	9,122,020	9,043,007	+73.0
Toronto	140,784,761	167,989,004	158,122,421	+12.3
Vancouver	47,008,169	55,929,314	53,896,987	+14.4
Victoria	9,652,304	16,254,589	15,266,380	+58.1
Winnipeg	86,640,717	108,553,442	106,388,574	+22.6
Totals	\$566,157,483	\$740,168,060	\$708,098,500	+25.2

The Richmond, Drummond and Yamaska Mutual Fire Insurance Company of Richmond, Que., has decided to go into voluntary liquidation. The company ceased taking contracts from August 31. It is proposed to appoint Mr. Jean Tache, of Montreal, as liquidator, and a meeting of members for that and other purposes will be held at Richmond on October 4.

SEPTEMBER FIRE LOSSES

Show a Satisfactory Decrease—Matches, Lamps, and
Carelessness Responsible for Many Blazes—
Fewer Deaths

The Monetary Times' estimate of Canada's fire loss during September amounted to \$883,949, compared with August loss of \$1,164,760 and \$1,123,550 for the corresponding period last year. The following is the estimate of August losses:—

Fires exceeding \$10,000	\$607,500
Small fires	161,151
Estimates for unreported fires	115,298
	\$883,949

This is the smallest monthly loss since October, 1911. The following are the monthly totals of the losses by fire in Canada compared with 1910 and 1911:—

	1910.	1911.	1912.
January	\$1,275,246	\$2,250,550	\$3,002,650
February	750,625	941,045	1,640,153
March	1,076,253	852,380	2,261,414
April	1,717,237	1,317,900	1,355,055
May	2,735,536	2,564,500	2,251,815
June	1,500,000	1,151,150	4,229,412
July	6,386,674	5,384,300	1,741,371
August	1,667,270	920,000	1,164,760
September	894,125	1,123,550	883,949
October	2,195,781	580,750	
November	1,943,708	1,506,500	
December	1,444,860	2,866,950	
Total	\$23,593,315	\$21,459,575	\$18,530,579

Large Fires.

The fires at which loss was estimated at \$10,000 and over were as follows:—

Sackville, N.B.	Conflagration	\$ 60,000
Winnipeg, Man.	Steamer, barges, etc.	127,000
Windsor, Ont.	Hardware store	10,000
Halifax, N.S.	Business section	52,500
Almonte, Ont.	Shoddy mill	25,000
Winnipeg, Man.	Roofing plant	50,000
Saskatoon, Sask.	Furniture warehouse	50,000
Parry Sound, Ont. ...	Factory	56,000
Fort Francis, Ont. ...	Newspaper office, &c.	25,000
Leamington, Ont. ..	Sash and door factory	20,000
Calgary, Alta.	Clothing store	10,000
Toronto, Ont.	Cork manufactory	11,000
Goderich, Ont.	Business premises	31,000
Montreal, Que.	Sash and door factory	50,000
Elmira, Ont.	Flour mill	18,000
Point Grey, B.C.	Four bungalows	12,000

Property Waste Large.

The structures damaged and destroyed were 49 residences, 40 barns, 14 stores, 8 stables, 7 hotels, 6 factories, 5 workshops, 4 wood-working factories, 3 each business blocks, warehouses, garages, 2 each railway sheds, restaurants, foundries, 1 each bank, elevator, pavilion, post office, flour mill, apple evaporator, shoddy mill, school, icehouse, excelsior mill, newspaper office, brick yard, and rescue home.

There were 30,000 feet hardwood flooring destroyed, 1-100 tons hay, 2,150 bushels wheat, 500 bushels wheat, 50 bushels timothy seed, 12 horses, 2 each freight cars, automobiles, taxi cabs, motor launches, 3 mowers, 2 each binders, wagons, seeders, steamers, barges, 1 each tug, threshing machine.

Of the presumed causes 30 were attributed to lightning, 10 matches, 8 incendiary, 5 each gasoline, gas, electrical causes, defective flues, 4 each hot ashes, lamp explosions, 3 carelessness with lights, 2 each overheated stoves, spontaneous combustion, sparks, oil stoves, 1 each chemical action, heat from brakes, burning rags, resin pot, upset lantern, smoking in bed, oven set alight, while many fires are of unknown origin which probably is in many cases lack of precaution and proper care.

Coal Oil Responsible.

The number of deaths from fire is 6, making 132 for the first nine months of 1912.

The following are the monthly totals compared with 1910 and 1911:—

	1910.	1911.	1912
January	27	27	27
February	15	12	11
March	20	18	24
April	37	20	15
May	15	28	18

	1910.	1911.	1912.
June	52	13	6
July	15	110	9
August	11	22	16
September	10	13	6
October	16	17	..
November	19	20	..
December	19	17	..
Total	256	317	132

The fires at which fatalities occurred were as follows:—

Orillia, Ont.	Lamp exploded	1
Arnprior, Ont.	Clothes caught fire	1
Toronto, Ont.	Can of kerosene exploded	1
Belleville, Ont.	Gasoline set alight	1
Renfrew, Ont.	Upset lamp	1
St. Thomas, Ont. ...	Upset lamp	1

INSURANCE INSTITUTE OF TORONTO

The following is the syllabus for the 1912-13 session of the Insurance Institute of Toronto, which opens on October 16:

1912.
- October 16.—Open meeting. Address, N. W. Rowell, K.C.
- November 14.—“Lightning Rod Hazards,” W. H. Day, B.A., Professor of Physics, Ontario Agricultural College.
- “The Disability Feature in Life Policies,” S. H. Pipe, F.A.S., consulting actuary.
- December 19.—“The Relationship of Disease and Accident,” J. Ferguson, B.A., M.B., L.R.C.P. “Surplus, Its Importance, etc.,” P. C. H. Papps, F.A.S., actuary, The Mutual Benefit Life, Newark, N.J.

1913.
- January 20.—“The Ontario Insurance Act in Its Relation to Fire Insurance,” John H. Hunter. “Assignments of Life Insurance Policies,” D. Matheson, A.A.S.
- February 20.—“The Field Man,” Controller J. O. McCarthy. “But How About the Rest of Us?” T. L. Morrissey, Union Assurance Society, Montreal.
- March 20.—“Are Life Insurance Advertising Methods Effective?” J. K. McMaster. “Suretyship—Its Relation to Every Phase of Business Activity,” W. H. Hall.

TORONTO'S FIRE LOSS

The total fire loss last year was \$447,988, being \$188,247 more than that of 1910.

The fire department responded to 1,593 alarms last year, 326 more than in the year previous.

There was only one fire which caused a loss of more than \$50,000.

During the year nine citizens lost their lives through fire and 37 others were injured from the same cause.

There are 296 officers and men in the fire brigade. Two members of the fire department died in 1911. Twenty-four members of the brigade were injured in the discharge of their duties during the year.

Bonfires were responsible for giving the brigade seven runs.

The firemen were called out by fifty burning chimneys. One hundred and fifty-five false alarms were sent in. Defective electric wiring caused fifteen fires. More fires were due to burning rubbish and paper than any other cause, 129 being chalked up to this.

There were 23 supposedly incendiary fires. Gas jets, candles, lamp and torches coming in contact with curtains caused seventy-five fires. Carelessness with lighted matches was responsible for 59 fires.

Four oil and two gasoline stoves exploded and brought out the brigade.

The ignition of benzine or gasoline was responsible for the brigade being called out 56 times.

There were 15 cases of spontaneous combustion. Twenty-two oil lamps were upset, causing fires during the year.

The causes of 196 fires are unknown.

There were 321 fires where no loss was reported, 390 where losses were less than \$100, 219 from \$100 to \$500, 41 from \$500 to \$1,000, 50 from \$1,000 to \$5,000, 12 from \$5,000 to \$10,000, one from \$20,000 to \$25,000, and one from \$30,000 to \$50,000.

The greatest loss was the year of the great fire in 1904, when it was \$10,956,546. The second largest loss since 1885 occurred in 1895, when it was \$1,817,374.

The total amount of insurance on the buildings and contents where fires occurred last year was \$3,751,095

The fire chief again calls attention to the grave danger from overhead wires, and recommends that steps be taken to remove them.

DESCRIPTION OF PROPERTIES

The Toronto Paper Mfg. Company, Limited, was established in 1882 at Cornwall, Ont. The plant, consisting of twenty-one buildings, is located on the St. Lawrence River and the Cornwall Canal, with unusually favorable water and rail shipping facilities. It gives employment to from 175 to 200 hands and is operated day and night. The present average output is about 40,000 lbs. of high-grade linen, book, bond and lithographing paper a day.

ASSETS AND EARNINGS

Depreciated appraised value of plant.....	\$645,000.00
(Made by Canadian Appraisal Company, Limited)	
Surplus of liquid assets over liabilities	200,000.00
	\$845,000.00
Net earnings, year ended April, 1911.....	83,000.00
Net earnings, year ended April, 1912	77,000.00
(In addition to these earnings, special reserves of \$19,000 were created)	
Net earnings, year ending April, 1913 (estimated).....	100,000.00.
(July and August earnings were 25 per cent. in excess of this estimate)	

These net earnings are after deducting all expenses, interest charges, repairs and replacements.

FEATURES OF THE ISSUE

In recommending these bonds as combining all the points essential to a high-grade investment, we desire to call attention to the following features of the issue—

- Estimated earnings for the current year are three and one-third times the bond interest.
- A sinking fund which will become operative in 1915 is calculated to retire the bonds before maturity.
- Additional bonds can only be issued up to 63⅓ per cent. of the amount required for extensions or enlargements.
- Improvements and additions to the plant, already planned, should materially increase the output and add to the earnings.
- Application will be made to list the bonds on the Toronto Stock Exchange.
- Additional particulars will be furnished on request.*

DEBENTURES FOR SALE

Tenders will be received by the Treasurer of the Town of Sudbury up to Saturday the 12th day of October, A.D. 1912, for the purchase of debentures of the Town of Sudbury for \$32,000.00 for public school purposes. These debentures are payable in equal annual instalments during the period of thirty years and bear interest at the rate of five per cent. per annum.

The highest or any tender not necessarily accepted.

Dated at Sudbury this 28th day of September, A.D. 1912.

GEORGE ELLIOTT,
Treasurer of the Town of Sudbury.

"We need clear thinkers as well as information. We need men and women who think, and who think about the greatest things in human nature and in the world about us. This young country needs thinkers, and thinkers of high ability. The glimpse of a great thinker has in times past changed the career of a whole people."—President Falconer, Toronto University.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED.—Contracts from Board Fire Insurance Companies for City of Regina. Excellent connection. Write Cathcart, Price & Boyd, Limited, Regina, Sask.

WELL EDUCATED young man, 10 years' experience, capable to act as accountant or secretary, desires to change position. Excellent references furnished. Box 89, Monetary Times, Toronto.

FIRE INSURANCE AGENCY WANTED, for strong fire company. Can place \$60,000 preferred business immediately. Apply to H. H. Farman, 201B, Grain Exchange, Calgary.

ACCOUNTANT-SECRETARY, lady, seven years' experience as accountant, four years' secretarial experience, good address, financial and executive ability, open for responsible appointment in either or both capacities. Excellent references. Apply Box 95, The Monetary Times, Toronto.

NATIONAL LIFE INSURANCE COMPANY,
Montpelier, Vt.,
September 4, 1912.

The Monetary Times,
Church and Court Streets,
Toronto, Canada.

Gentlemen,—

Your favor of the 30th ultimo is received and also a sample copy of The Monetary Times, with special reference to the convention at Montreal. I desire to thank you for your courtesy in this matter, and to state further that the character of the paper, although we do no business either of insurance or investment in the Dominion of Canada, is of such a nature as to warrant our subscription to same, in full expectation that its advice and information will prove of use.

Will you kindly, therefore, send the paper for one year in my name and in care of the National Life Insurance Company, together with your bill for same.

Yours very truly,
JOS. A. DEBOER,
President.

WANTED

Two high-class Stock Salesmen to handle a stock issue of an established successful company. Only men who can earn from \$3,000 upwards need apply. Send full particulars of experience and reference to Box No. 91, Monetary Times, Toronto.

The first four months of the current fiscal year show an increase of nearly eighty million dollars in Canada's trade. The trade in the four months aggregated \$328,635,844, as compared with \$249,031,736 in the corresponding period last year. Exports totalled \$117,870,387, an increase of \$31,697,599, and imports for domestic consumption totalled \$209,334,046, an increase of \$52,366,666. Domestic exports totalled \$107,308,936, an increase of \$29,604,820. By nearly \$2,300,000 exports of agriculture increased; of manufactures the increase is two millions, and of minerals four and a half millions.

According to the report of the chief inspector of factories of Ontario for the year ending December 31, 1911, there were 985 accidents reported during the year, which is an increase over the previous year. One reason for the increase is that minor accidents are now reported and another is that the law regarding the reporting of accidents is better observed than formerly. The chief inspector states that a large percentage of the accidents were due to causes that could not reasonably be foreseen and could only be avoided by the exercise of care on the part of the employees themselves. The fatal accidents totalled 44, which was proportionately the same number as in 1910.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of three and one-half per cent. (3½%), (being at the rate of 7% per annum) on the preference shares of the capital stock of THE MEXICAN LIGHT AND POWER COMPANY, LIMITED, for the six months ending October 31st, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company for the preference shares will be closed from the 14th day of October, to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, London, England, Mexico City, Mexico, and its branches.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

MEXICAN TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of one and three-quarters per cent. (1¾%), (being at the rate of 7% per annum), has been declared on the capital stock of the MEXICO TRAMWAYS COMPANY for the quarter ending September 30th, 1912, payable on the 1st day of November, 1912, to shareholders of record at the close of business on the 12th day of October, 1912;

THAT the transfer books of the Company be closed from the 14th day of October to the 31st day of October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, Mexico City, Mexico, London, England, and its branches.

The holders of bearer share warrants on detaching from their share warrants coupon No. 14 and lodging such coupon or coupons at The Canadian Bank of Commerce in Toronto, Montreal, New York City, or London, England, on and after the 1st day of November, 1912, will receive in exchange for each coupon the sum of \$1.75 representing the amount of the dividend.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

FIDELITY TRUST COMPANY

The Fidelity Trust Company, with capital of \$1,000,000, has been organized with headquarters at Winnipeg. The company which began business on Tuesday, will not engage in such matters as administration of estates, etc. The policy of the directors will be to invest the capital almost exclusively in first mortgages and the purchase of other land securities. Most real estate transactions are carried through on the deferred payment plan and this gives rise to a considerable volume of the latter class of business, which, under careful management, opens up a good field for the safe and lucrative investment of funds.

The management of the company's affairs will be in the hands of Mr. Chas. M. Simpson, and he will have associated with him on the board, Messrs. D. R. Dingwall, Winnipeg, president D. R. Dingwall, Limited, director of The Equitable Trust Company; W. F. Hull, Winnipeg, Hull, Sparling and Sparling, Barristers; W. L. Parish, Winnipeg, president Parish and Heinbacher, Limited, president Superior Elevator Company; H. H. Beck, Toronto, president Anglo-American Fire Insurance Company, director, Union Trust Company, director Empire Loan Company; T. B. Keith, Eau Claire, Wis., director Eau Claire National Bank; T. Slagsvol, Eau Claire, Wis., merchant; Frederick C. Leonard, Eau Claire, Wis., lumberman; and A. J. Marsh, Eau Claire, Wis., attorney.

The stock is being issued at par value. No bonus or promoters' stock, neither commission nor fee for the selling of the stock, will be paid to anyone. The only expenses of flotation will be those incidental to the obtaining of the

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend of one per cent. (1%) has been declared on the ordinary shares in the capital stock of THE MEXICAN LIGHT AND POWER COMPANY, LIMITED, payable on the 15th day of October, 1912, to shareholders of record at the close of business on the 5th day of October, 1912;

THAT the transfer books of the Company for the ordinary shares will be closed from the 7th October to the 15th October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, Mexico City, Mexico, London, England, and its branches.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

By order of the directors,
THOMAS GREEN,
Cashier.

New Glasgow, N.S., September 8th, 1913.

A. E. REA AND COMPANY, OTTAWA, LIMITED

Dividend Notice.

Notice is hereby given that a dividend of one and three-quarters per cent. upon the paid-up preferred capital stock of the Company, has been declared for the current quarter, being at the rate of seven per cent. per annum, and the same will be payable at the office of the Company, or any branch of the Standard Bank of Canada, on and after the 30th day of September next.

By order of the Board.
GEO. A. WANLESS,
Secretary-Treasurer.

Ottawa, September 30, 1912.

charter of the company and other necessary disbursements common to the organization of any company.

Already the bulk of the shares has been subscribed for without advertisement or public announcement of any kind, the subscriptions coming mainly from the directors and their friends. Every director we are informed has subscribed and will pay for from ten to fifty thousand dollars worth of stock each.

The Metropolitan Life Insurance Company, through its counsel, Mr. A. G. B. Claxton, K.C., has just loaned \$1,400,000 to the Belgo-Canadian Realty Company, Limited, on the block of land owned by that company fronting on St. Catharine Street and between Bleury and St. Alexander Streets, Montreal. The Belgo-Canadian Realty Company will erect a \$3,000,000 departmental store building on the block.

During the five months, April 1st to September 1st, of the current fiscal year, 242,509 immigrants arrived in Canada. Of this number 163,300 arrived at ocean ports and 79,209 from the United States. These figures show an increase of fourteen per cent., as compared with the number of arrivals for the corresponding months of last fiscal year, which were 141,021 at ocean ports, and 71,833 from the United States, making a total for the five months, April 1st to September 1st, 1911, of 212,854 persons. During the month of August this year there were 32,867 arrivals, 19,558 of them having been at ocean ports, and 13,309 from the United States, as against 30,115 for August last year, 13,096 of whom were at ocean ports and 17,019 from the States.

Receipts and Shipments of Grain at Eastern Transfer Elevators for Eight Months ended April 30, 1912, with Comparisons for 1911.

INDUSTRIAL BOND MARKET

Several New Issues—Toronto Paper Flotation—Bonds of North Battleford Street Railway

The market for industrial bonds throughout the summer has been fair. Investment rather than speculative purchases have ruled. Scarcely a week has passed without several new issues and these have been pretty well absorbed. The outlook this winter season is for a large number of new issues.

A block of \$300,000 6 per cent. first mortgage sinking fund bonds of the Toronto Paper Manufacturing Company are being offered at 98 by the Dominion Bond Company. The company has capital stock of \$1,000,000 of which \$750,000 is issued. The authorized bonds total \$750,000 and of these \$500,000 are issued.

The depreciated appraised value of the plant is \$645,000 with surplus of liquid assets over liabilities of \$200,000. The net earnings for the year ending on the 1st April, 1913, are estimated at \$100,000 which is 3½ times the bond interest requirements. As a matter of fact it is understood that the earnings for the months of July and August of the current year were 25 per cent. in excess of this estimate.

Directors and History of Company.

The directors of the company are Messrs. G. P. Grant, President Dominion Bond Company, Limited; T. H. Watson, vice-president Spanish River Pulp & Paper Mills, Limited; the Rev. Dr. William Briggs of the Methodist Book and Publishing House; R. S. Waldie, director Victoria Harbor Lumber Company, Limited; Richard Brown, of Brown Brothers, Limited, stationers; R. A. Lyon, of Lyon & Plummer, director Spanish River Pulp & Paper Mills, Limited. The directors recently declared a dividend on the common stock at the rate of 5 per cent. per annum.

The Toronto Paper Manufacturing Company, Limited, was established in 1882 at Cornwall, Ont. The plant, consisting of twenty-one buildings, is located on the St. Lawrence River and the Cornwall Canal, with unusually favorable water and rail shipping facilities. It gives employment to from 175 to 200 hands and is operated day and night. The present average output is about 40,000 pounds of high-grade linen, book, bond and lithographing paper a day.

Marble Company's Issue.

First mortgage 6 per cent. bonds of the Missisquoi Marble Company will be made shortly. Owing to the expansion of business, enlargements to plant, etc., are necessary. The present \$150,000 6 per cent. bonds will be redeemed, and the new issue will be secured by a first mortgage on the property, which is valued at \$1,000,000. The company is to be put on

a much better earning basis by means of the new financing. The issue will be made early in the coming year.

British capitalists will purchase the bonds of the proposed street railway for North Battleford, and will also take some real estate mortgages there, the aggregate investment being \$670,000.

ANOTHER BOND ISSUE

The Riordan Pulp & Paper Company will make an issue of \$1,500,000 bonds. This company is a strong organization, being the result of a merger of the Riordan Paper Company and G. H. Perley and Company. The former have been in business since 1859, and the latter since 1899. These concerns combined have 1,184 square miles of timber limits in the province of Quebec, which have been valued by a competent authority at no less a sum than \$1,971,750. For the past three years the earnings of the company have averaged \$226,410, or over two and a half times the interest charges on the bond issue. The managing director estimates that the earnings for the current year will amount to \$300,000. The company's assets have been appraised at \$5,789,587, over 3 4-5 times the present issue of bonds.

The bonds offered will be in denominations of \$100, \$500, \$1,000 and \$5,000, and are subject to redemption at 105 at maturity,—5 points in excess of the issue price. Interest will be paid semi-annually on June 30th and December 31st, coupons being attached for that purpose. On the directorate are, Messrs. Charles Riordan, of St. Catharines, J. G. Riordan, of Toronto, F. W. Avery, of Ottawa, Charles E. Read, of Ottawa, Walter G. White, of New York, and Carl Riordan, the managing director, Montreal.

Hamilton now has a population of eighty-nine thousand, and assessment of sixty-seven million dollars.

A contract for 35,000 tons of structural iron for the new Equitable Life building at New York was recently announced in United States trade journals.

The English insurance Review makes the following suggestion to British companies:—"The prospects for insurance in the Dominion of Canada are indeed bright, and we need hardly repeat our advice to British companies to take a more active interest in doing business there."

About \$150,000 will be spent on new buildings for the Brandon fair. A Canadian Northern Railway spur will bring all exhibits into the grounds. The new concrete steel brick grandstand will cost \$30,000. A larger race track is being carried quickly to completion. This is the first time in ten years that Manitoba has been honored by the Dominion fair.

WHAT CANADA IS DOING WITH BRITISH MONEY

A London daily of repute thinks that signs have not been wanting recently of increasing uneasiness in financial circles in regard to the immediate future of Canada. "No one questions," says the writer who sounds the warning, "the great destiny which the Dominion will ultimately fulfil, with its enormous areas of fertile land and immense natural resources, but Rome was not built in a day, and Canadians, with their boundless energy and self-confidence, haven't laid the meaning of that proverb sufficiently to heart. They are in too great a hurry to realize their quite laudable ambition; they want to bridge the next decade or two in as many of their brief seasons. The natural consequence is that they seem to be outrunning the constable and have borrowed more than they can conveniently pay for."

As an emphasis to these conclusions, the borrowings of Canada are cited, but nothing else, An examination of our public borrowings in London since 1905 gives the following result:—

Year.	Amount.
1905	£13,530,287
1906	6,427,500
1907	11,203,711
1908	20,354,721
1909	37,411,723
1910	38,453,808
1911	30,855,517
1912 to date	23,248,641
	£190,485,908

This is admittedly a heavy borrowing record, but our London contemporary was scarcely fair in citing only

Canadian loans and telling nothing of what has been accomplished with the money. Broadly speaking, the funds have been used for railroad and industrial development and municipal improvements. Little of the cash has brought disappointment to the lender. Only in three or four cases have the borrowers not deserved the help of British capital. We venture to assert that the writer of the warning under review has never visited Canada. It needs a first-hand examination by the man from Great Britain of this country's vast area, its enormous undeveloped resources, its rapid growth, in order that the ideas naturally formed in an old country and one which has had centuries of civilization may be somewhat adjusted to those of a new country in the process of formation.

In a densely settled and well-served land, such as England, the building of new railroad mileage is a comparatively unimportant factor. In Canada, where the population is increasing by immigration by hundred thousands every year and unexploited areas are being brought into civilization, it is necessary to build thousands of miles of new railway every twelve months. That is but one instance. Railroad development in turn means the construction of rolling stock, rails, the purchase of plant and machinery, and so on. During the current calendar year, new railroad construction will probably involve an expenditure of approximately \$115,000,000. That alone would absorb the whole of our London borrowings of the past nine and a half months. The companies building locomotives have all been given big orders by the Canadian Pacific, the Grand Trunk and the Canadian Northern Railways. The car companies have also received orders which will keep them employed far ahead. The Canadian Pacific Railway has contracted with one concern for over 3,000 new cars to help move the 1913 crop.

The Western wheat crop is growing larger every year, and very shortly the normal harvest from the

prairies should be 200,000,000 bushels. With the greater acreage under cultivation each year, in 1920 the Western provinces should be growing 500,000,000 bushels of wheat. In turn, that means the purchase of a large amount of agriculture implements, the production of which employs thousands of hands.

The cultivation of the soil throughout Canada, one of the finest agricultural countries in the world, gives employment to another class. Both industrial and agricultural workers buy the necessities of life, and many of them are sufficiently well off to purchase the luxuries also. Therefore, the wheels of the factories from coast to coast are constantly humming. In short, while our borrowing has been heavy it has been imperative. We cannot develop without the aid of funds from abroad. Canada will likely be a heavy borrower for many years to come. The picture of industrial and agricultural activity and general prosperity which the Dominion presents to-day is the best possible reply to an unfinished criticism.

The Monetary Times admits that there are possible dangers in the situation. One is that unbridled optimism may lead to financial obligations which are not justified. But even allowing that every Canadian business man became unbalanced in his business judgment—an impossible happening—we have the bankers of Canada, who are invariably of the most conservative type, and act as the best possible check to undue speculation or bad financing. Our banks cannot prevent the periodical wave of depression, but they can prevent, as they have done in the past, any serious financial crash due to over-financing, excessive credits and similar flaws. Another danger is that in the host of Canadian applications for money in the London market, unworthy companies will see an opportunity of raising funds. That cannot be prevented. It is the duty of the British investor to investigate the merits of each proposal made to him. If a bad Canadian stock or bond offering is placed before him he will have no sympathy in securing in Canada the correct label for the offering.

CANADA AND THE NICKEL SUPPLY

While it seems unlikely that the Dominion government will prohibit the export of nickel from Canada except to Great Britain—a suggestion made recently—the hint is a key to an interesting story. Prior to the time of war crisis, such a prohibition might prove an effective weapon. The official reports of mineral production in Ontario show that in 1910, the latest year for which such figures are available, there were raised from the nickel-copper mines of Sudbury 652,392 tons of ore, of which 628,947 tons were smelted in the blast furnaces and put through the converters. The product was 35,033 tons of Bessemerized matte, 23.6 tons of ore being thus required on an average for one ton of matte. In this quantity of matte there were contained 18,636 tons of nickel, last year's output, 13,141 tons, being exceeded by 5,495 tons, or over 41 per cent. The production of 1910 was much the largest since the nickel mines of Sudbury were opened, a quarter of a century ago, and stamps this field as being the most important source of nickel in the world. The value of the nickel contents of the matte, on the basis of what it is worth—or estimated by the producers to be worth—at the point of production is \$4,005,961.

To the output of the Sudbury mines must be added, for the sake of completeness, the nickel contents of the silver ores raised at Cobalt, estimated to amount to 504 tons, bringing the total yield of nickel in 1910 up to 19,140 tons.

Monel metal, an alloy of nickel and copper, which has been placed on the market by the Canadian Copper Company, and which is produced by that company without separating the metals or either of them from the matte, has aroused great interest. It is asserted that the proportions in which the nickel and copper occur in the Canadian Copper Company's ores are almost pre-

cisely those required for the alloy, which are about 67 per cent. nickel and 27 per cent. copper, and that by careful attention to the furnace charge a Bessemer matte can be produced within one per cent. of that required in making Monel metal. Considerable quantities of this alloy are now coming into use. It is claimed to possess great strength and to be practically non-corrodible. It has been employed as castings in the manufacture of propellers for vessels of the United States navy and private yachts, in pump linings, steam turbine nozzles and valve fittings for superheated steam, in dairy machinery, refrigerating plants, and pickling apparatus in steel mills; in rod form, for pump rods, bolt and nut stock, steam turbine parts, stock for drop forgings, electrical apparatus, motor boat shafting, pickle pins and valve stems; as sheets, for roofing railway terminals and other large buildings, for mine screens and chutes, smelter roofs, skylights and window frames, boat sheathing, cooking utensils and chemical apparatus, also for steam turbine blades; in the form of wire for wire cloth, motor cycle spokes, rope for mine hoists and cableways, nails, screws, rivets, etc.; and many other applications where high tensile strength, combined with non-corrosive features are essential.

The use of nickel for coinage purposes is spreading. In 1909 the Government of Turkey was authorized to put out an issue of coins made of nickel or aluminium. The latter metal, upon being tested, not having given satisfactory results, nickel was decided upon, and it has been resolved to issue 120 millions of 5-para pieces, 120 millions of 10-paras, 70 millions of 20-paras, and 20 millions of 40-paras, in all 330 million pieces. The money is all to be coined in four years and issued in twenty.

The only other important source of nickel is the island of New Caledonia, whose output, however, in proportion to the whole, is now much less than that of Sudbury. Societe le Nickel, whose production is of New Caledonian ores, operates refineries in France, England and Germany. From 1900 to 1909 the French production fell from 1,700 to 1,200 tons, while that in England rose from 1,500 to 2,800 tons, and in Germany from 1,400 to 3,100 tons. Thus in 1909 the total output of nickel from New Caledonia was 7,100 tons. In the same year the yield from the Sudbury mines was 13,141 tons.

HUDSON BAY INSURANCE

A statement from Ottawa this week does not bode well for the success of navigation in Hudson Bay. The naval service department, it is said, has had to abandon the scheme to send coal to points in the Hudson Straits for steamers owing to the refusal of the insurance company to insure the vessel which was to be sent. The vessel chartered was the *Eric*, owned by the Job Brothers, St. John's, Nfld. It is a sealing vessel, strongly built and equipped for ice work, yet the insurance company would not take the risk, chiefly because in case of accident very few vessels are in the vicinity to render assistance. The Pacific Coast outlet for Western Canada has no such drawback.

INSURANCE COMPANIES AND WESTERN LANDS

A prominent life insurance manager gathered some interesting data while on an extensive tour in Western Canada this year. The figures were intended as a guide to the company's agents in determining the relative values for loaning purposes of farm lands in the various localities based on relative normal average production per acre of wheat crop.

The conclusions arrived at were that for loaning purposes cultivated land should be appraised at not more than one dollar per acre per bushel of normal average yield per acre, and that uncultivated land of good quality

is worth not more than two-thirds the value per acre of the cultivated land in the same locality. To these values must be added the value of the buildings on the lands in question.

Some deductions must be made for distance from the head of the lakes and from railways and local markets, in the case of remoter lands. These are interesting conclusions, being those of a conservative observer.

CANADA'S TARIFF COMMISSION

Little has been heard as to the appointment of the proposed tariff commission, since the bill was stopped by the Senate. The matter will be raised during an early session of parliament. Several names have been suggested regarding the personnel of the commission, but it is safe to say that the Dominion government has not yet seriously considered that phase of the question. No tariff board will be satisfactory to both Eastern and Western Canada unless a representative is appointed from each of those broad divisions.

The manufacturers last year expressed their desire for the early appointment of a commission. This action was not taken, they stated, with a view to obtaining a general revision of the tariff upwards, but with the idea that the manufacturers had nothing to fear from a thorough investigation by such an independent tribunal into the conditions of production in Canada. On the other hand, the manufacturers were satisfied an investigation would establish that the progress of the country could only be maintained by the various interests, such as agriculture, fishing, lumbering, mining and manufacturing, being afforded adequate protection, thereby encouraging the investment of capital and ensuring the employee a commensurate wage for his labor.

The United States has in operation a tariff board. It is entirely without compulsory powers, and depends for the success of its investigations upon the co-operation of the people in the lines of industry being investigated. It cannot call hearings and force the giving of testimony, nor can it demand the throwing open of the books of corporations for investigation. The experts of the board can only request that facilities be extended them. The board professes that it does not need coercive powers. To judge from experience to date the work of the board is welcomed by manufacturers—at least by United States manufacturers.

The United States board has recently been at work accumulating information, chiefly on the costs of production. The use of costs of production as a basis for tariff revision, and the fact that the tariff board is devoting so much of its time to research on such a line has met with criticism from writers in the economic journals. The board is primarily an information bureau on everything in the schedules of the tariff, finding the facts and making conclusions on them.

The scope and powers of the proposed Canadian tariff commission have already been defined by Hon. W. T. White, Minister of Finance, as follows:—

(1) To make, under the direction of the Minister of Finance, in respect of any goods produced in or imported into Canada inquiry as to: (a) The price and the cost of the raw materials in Canada and elsewhere, and the cost of transportation thereof from the place of production to the place of use or consumption; (b) the cost of production in Canada and elsewhere; (c) the cost of transportation from the place of production to the place of use or consumption, whether in Canada or elsewhere; (d) the cost, efficiency and conditions of labor in Canada and elsewhere; (e) the prices received by producers, manufacturers, wholesale dealers, retailers and other distributors in Canada and elsewhere; (f) all conditions and factors which affect or enter into the cost of production and the price to the consumers in Canada; (g) generally all the conditions affecting production, manufacture, cost and price in Canada as compared with other countries, and to report to the Minister.

(2) To make inquiry into any other matter upon which the Minister desires information in relation to any goods which, if brought into Canada or produced in Canada, are subject to or exempt from duties of Customs, and to report to the Minister.

(3) To hold, when empowered by the Governor-in-Council, an inquiry under section twelve of the Customs tariff, 1907, in the same manner as the Judge of the Exchequer Court or any other Judge therein referred to may hold inquiry when so empowered.

(4) To inquire into any other matter or thing in relation to the trade or commerce of Canada which the Governor-in-Council sees fit to refer to the commission for inquiry and report.

The commissioners are to be given power to summon witnesses and to take evidence.

In the meantime, several industries, notably the steel and woolen, are preparing important matter for presentation to the new tariff authority.

COST OF LIVING

The rise in the cost of living is still a problem on the North American continent. It has increased sharply during recent years, and is still rapidly rising. Mr. J. J. Hill has said that the cost of high living has been an important factor in the high cost of living; in other words, that extravagance is one of our faults. While there is much truth in that assertion, inquiries prove that, aside from reckless expenditure, the cost of necessities has risen considerably. In addition, the average income has not increased to a corresponding degree. There has just been completed under the auspices of the United States Labor Bureau of the Department of Commerce and Labor a survey of retail prices actually paid by consumers in the chief cities of the country. The statistics of this survey, when used along with the reports of the 1910 census, show that the average workingman could in 1909 buy with the results of a day's labor less than nine-tenths of the food he could buy with his day's labor in 1899. By a conservative estimate, he can to-day buy less than four-fifths. Without any indulgence in "high living," the cost of duplicating a wholesome week's regimen of 1899 are to-day 52.77 per cent. higher than they were then, and they are 21 per cent. higher than a man whose wages have been increased 25 per cent. could buy with as large a part of his whole income as he then used to pay the grocer and the butcher.

This is a considerable rise for a period covering ten or a dozen years, but the gradient that prices are taking in their upward course is steeper now than it has been before in the period, the Government's figures showing that between June 15th, 1911, and June 15th, 1912, prices of ordinary food increased 10.6 per cent.

Combining the important figures of that report with the census report in manufactures of the United States, the following illuminative table is obtained:—

	1899.	1909.
Wage earners	4,712,763	6,615,046
Wages	\$2,008,361,000	\$3,427,038,000
Average wages	\$426.15	\$518.07
Increase in wages.....		21.57 %
Amount added to value of raw materials by manufacture'	\$4,831,076,000	\$8,530,261,000
Average of each wage earner	\$1,025.10	\$1,280.32
Increase		25.77 %
Relative cost of food....	100.8	137.2
Increase		36.11 %
Increase in cost of food, relative to wages		11.96 %

Undoubtedly similar conditions, generally speaking, prevail in Canada. It would appear that all employers of labor have not yet shouldered their share of the problem.

LAKE OF THE WOODS MILLING COMPANY

Analysis of Annual Statement — Bonds to Extent of
One Hundred Thousand Dollars Were Matured
During Year—Better Position ShownMonetary Times Office,
Montreal, October 9th.

The financial statement presented at the annual meeting of shareholders of the Lake of the Woods Company, held here on October 2nd, was, by comparison with that of a year ago, an encouraging document. The earnings were more than sufficient to pay for the bond interest, the preferred dividends and the dividends on the common stock, the surplus over these charges being about \$83,871. The statement, after showing these deductions, then deducts appropriations, such as \$100,000 for depreciation of trade marks, good will, etc., and \$9,370 for premium on bonds retired, the result of which would have been a deficit of \$25,499, had it not been for the surplus brought forward from the previous year. The premium on bonds retired should no doubt be taken from surplus, but the depreciation on trade marks, if made at all, would seem to be rather a charge against the year's operations. No allowance was made for depreciation of plant, whereas a year ago \$143,150 was allowed for this.

Net Result Was Better.

The profits of the year were increased about \$45,000, being \$457,011, so that the net result was better than a year ago.

The following is a comparison of the statements of the two years:

	Year ending August 31, 1911.		Year ending August 31, 1912.	
Profit for year	\$	412,154	\$	457,011
Interest on bonds	\$	60,000	\$	55,140
Interest on Keewatin bonds	45,000	105,000	45,000	100,140
	\$	307,154	\$	356,871
Div. on pref. shares...		105,000		105,000
	\$	202,154	\$	251,871
Div. on com. shares...		168,000		168,000
	\$	34,154	\$	83,871
Depreciation property valuation	\$143,150			
Dep. goodwill, etc. ..	93,354	236,504		
Prem. on bonds retired.			\$	9,370
Dep. goodwill, etc. ...			100,000	109,370
Deficit for year	\$	202,350	\$	25,499
Brought forward		1,054,807		842,957
Carried forward surplus	\$	857,457	\$	817,458

At each annual meeting an appropriation of \$14,550 is made for directors remuneration and bonus to employees. This being deducted from the balance at the end of last year, leaves the amount shown brought forward to the year just ended.

Current Assets and Liabilities.

The following table shows the increases in the items shown in the current assets and liabilities:

	Aug. 31, 1912.	Increase.
Current liabilities.		
Accounts payable	\$ 298,115	\$155,466
Bills payable	500,000	500,000
Current Assets.		
Stocks in hand	\$1,163,402	\$464,269
Accounts receivable	553,874	122,186
Bills receivable	2,350	124
Cash in bank	42,521	11,731
Surplus for year		\$ 57,155

Bills payable amount to \$500,000 this year, while a year ago there were no bills payable. Stocks on hand are nearly 40% more valuable than a year ago. Accounts receivable are four times as great as a year ago. The net result is an increase of \$57,155 in excess of current liabilities over current assets. On the other hand, during the year the company retired \$100,000 of its bonds, so that it is in a better position in this respect.

Four bond firms bid for the \$6,000 5½ per cent. 20-year road debentures of Antelope Park Rural Municipality, Sask. As previously noted, the offer of Messrs. Brent, Noxon & Company, Toronto, was accepted.

QUEBEC PUBLIC UTILITIES COMMISSION

Its Effectiveness is Being Questioned — Reduction in
Price of Lighting in Montreal—Tramways
InquiryMonetary Times Office,
Montreal, October 9th.

It would now seem that both the public utilities commission of the province of Quebec and the Montreal Tramway Company are to go on trial to justify their existence. The public has been asking from time to time what the utilities commission has accomplished for the very considerable amount of money which has been expended upon it. The object of the creation of the commission was in reality to obtain for the public certain advantages to which they were entitled but which are now being absorbed by the public utility concerns.

Since the commission was brought into being in the province of Quebec it has had many sittings and has doubtless done something for the public. But in the affairs which loom big before the public mind, its action would not appear to have been very effective thus far. Montreal and Quebec are the two principal cities of the province, and if the commission has accomplished anything for these two cities it has not been of a sufficiently startling character to occasion wide-spread comment. All this, of course, may come about in time.

May Have Been Caused Partly.

Meantime, however, more people than ever are hanging on to the steps of the street cars and the people of Quebec are paying an extortionate price for their gas. In Montreal, reductions have taken place in the price of lighting, these reductions being voluntary on the part of the Montreal Light, Heat and Power Company, but having possibly been caused partly by the utilities commission. Now the commission is moving in the matter of the relationship between the citizens and the Montreal Tramways Company. A mass of evidence is being called for and the citizens are being called upon to co-operate with the commission to get to the bottom of the trouble and find a remedy for the undesirable situation. From the company, the commissioners are calling for an enormous amount of detail, such as the number of cars, seating capacity, date of construction, frequency of operation and almost everything which can be regarded as bearing upon the point. Even the question of the income of the company will be considered in connection with its annual expenditure on improvement, maintenance, dividends, wages, etc., and the city will be called upon to furnish such information as to the running of the cars as it may be in possession of.

Company's Right to Carry Freight.

Meantime, the question of the right of the company to carry freight has again come up for discussion. This time, however, instead of the company offending by carrying freight as in the past, it has, as it were, offended by paying heed to the instructions of the city and abstaining from carrying it. In other words, the attitude of the council now rather is that the company should carry freight but that it should first comply with the desires of the council and agree to pay the city a portion of its receipts from the carriage of freight. No doubt, this attitude on the part of the council is stimulated by the requirements for more revenue as well as by the difficulty of getting freight moved rapidly enough from one point to another throughout the city and the high prices charged by the transport companies.

Advance in Rates.

In this connection, an advance in rates has just been announced by the railways in Montreal and other Canadian cities, the advanced rate for cartage in these cities going into effect on November 11th. The situation is that problems of this character are piling up quicker than they can be disposed of, so that it is the earnest hope of Montrealers of all classes that the present enquiry of the public utilities commission will be of some effect and that the decisions will be reached without further long delays.

A new survey steamship for the hydrographic department of the Canadian Government, which has been ordered from Messrs. Swan, Hunter, and Wigam-Richardson, Limited, of Wallsend-on-Tyne, will be similar in many respects to the survey steamer "Cartier," delivered by the same builders to the Canadian Government in 1910. Instead of being a twin-screw ship like the "Cartier," the new vessel will have a triple expansion engine driving a single screw, and her dimensions will be 200 feet length, 30 feet beam, 12 feet 8 inches depth, speed 11½ knots. She will have special accommodation for members of the Canadian Hydrographic Commission.

GREATER VANCOUVER'S WATER SUPPLY

Seymour Creek Scheme—General Conditions on the Pacific Coast—Canadian Northern and City's Negotiations

(Staff correspondence.)

Vancouver, B.C., October 7th.

Figures for the past month showing the activity along various lines in Vancouver may not appear so large in comparison with those of the same month of a year ago. It must be remembered that for many months this city's statistics were higher than those of all cities in Canada, and of all except the very largest cities in the United States. This could hardly be maintained, and if figures now show a falling off in percentage it does not indicate that a slump has occurred. Conditions on the coast have been somewhat peculiar during the past summer. Work has been active in every line of industry, perhaps more so than for some years past, yet actual money has been scarce. In past seasons there was often some disturbing influence. Perhaps it was a difference between employers and employees, with a cessation of labor as a result, or it might have been a slackness in the demand for a commodity that British Columbia produces.

Money Stringency Is Felt.

This year it has been all the other way. The price of copper has been better than for a long time past, and metaliferous mines in the southeastern part of the province, and on the coast, have been in active operation. In the lumber industry, there has been a strong demand locally and foreign. Railway construction has been proceeding on a large scale all over the lower and upper mainland and on Vancouver Island, and a very large amount of money must have been put in circulation owing to this work, both in wages and supplies. Yet money has been scarce for four months past, and big firms which usually are not affected by these temporary stringencies, have had to resort to paper. The cause of this is said to be the numerous real estate subdivisions, which have taken a large portion of the ready money and diverted it into a few hands. Rather than forfeit payments, buyers have let merchants' accounts stand, and this has meant that other dealers have missed the circulation of the cash. The good conditions of the past few months are continuing and business is opening up better, and with a good crop on the prairie the outlook is exceedingly satisfactory.

Should Have Sufficient Supply.

The water committee of the city council has appointed a sub-committee to go into the matter of the Seymour Creek water supply and to report on same. It is proposed to construct a huge reservoir in the Seymour Creek Valley, the cost of which, with mains, etc., has been placed by the consulting engineers at \$632,000. This irrespective of expense in connection with the acquisition of land in the watershed which may be bought to ensure the city's supply of water for ever. The sub-committee will go into the whole problem and will consider what portion, if not all of the land in the valley, is to be purchased. There is talk this week of the Pacific Great Eastern taking a route along the Seymour, as has been suggested, and this will be protested by the city, for it would mean contamination of the water supply if a railway ran close to the reservoir and along the creek from which the water is obtained. If the city secured the whole valley by purchase it would probably exclude the railway. Once this water supply plan is carried into effect, Greater Vancouver should have a complete and efficient system. Not only will there be an abundance of water, but the pressure will be ample in all parts of the city.

Water Pressure Has Been Questioned.

Ratepayers have protested because of an insufficient supply and fire insurance underwriters have hinted that pressure is not what it might be. Now that the city has started to act in earnest, it is to be hoped that the work will be carried forward if a satisfactory report is obtained, and not allowed to lapse at the beginning of the year when the usual change will be made in the personnel of the water committee. Even if delays are absent, the scheme cannot be carried into effect for many months, for the work is a very large one.

Negotiations between Vancouver city council and the Canadian Northern are proceeding, and have reached the stage where the agreement as completed in committee will be submitted to the city council. The city has been successful in securing many of the concessions asked for, and the railway company's representatives, while not disguising the fact that they would like to get in on False Creek, have made very reasonable allowances. Already the ratepayers in one section of the city, through an association meeting, have approved of the plan as drafted, which indicates the satisfactory outcome of the negotiations.

EXPERT VIEW OF CHINESE LOAN

Latest Financial Episode Has Created Two Camps in London, One Supporting Free Finance and the Other Good Security

[The views of Mr. W. R. Lawson, of London, England, respecting the much discussed Chinese loan, have been obtained by The Monetary Times and are printed below. Mr. Lawson, one of the most notable, practical, and critical financial writers, is equally well known on both sides of the Atlantic. His analysis of the latest Chinese financing will prove unusually interesting.—Editor, Monetary Times.]

The latest Chinese loan has divided the City into two opposing camps. One party are for "Crisp and free finance," while the other is for the "six power group" and good security. The old hands will win in the end, no doubt, but the shaking up which the interlopers have given them will do them no harm. The saddest part of the commotion is the readiness of the City, as well as of the West End, to rush into any novelty which appeals to them with a fine catchword.

The Crisp loan is the most comic episode that has occurred in international finance for years. It originated with a smart Yankee, Wendell Jackson by name, who is said to be a cousin of the "Autocrat of the Breakfast Table." In the days of the Empire he went out to China to reconnoitre on behalf of a small syndicate consisting chiefly of sporting members of the British peerage. He got into touch with the entourage of the Dowager Empress and obtained from her a concession for some land scheme at Harbin. But both the Empress and the Empire collapsed before the concession could be carried through.

New York Turned Him to London.

Like the Vicar of Bray, the enterprising Mr. Wendell Jackson turned his face to the rising sun and made friends with one or more of the finance ministers of the republic. To a large extent through his influence, and that of Dr. Morrison of The Times, the Chinese ministers resisted the conditions which the "Six Power Group" were trying to impose in connection with the impending loan. He undertook to get ten millions for them without any inconvenient restrictions or conditions. They signed a contract with him and he returned to America with it. But New York and Boston would not look at it. The Morgan and the City National Bank interests were too strong for him there, and he came over to London.

An Ambitious Young Hustler.

Here he fell into the hands of an ambitious young hustler, Mr. Crisp, who got two or three banks to back him and, presto! the Thames was on fire. The first five millions of the loan was announced for immediate issue and in a few hours the whole amount was underwritten. It came out, in spite of the protest of the Foreign Office, and has been an apparent success. The underwriters could, of course, make sure of that, but it is hardly conceivable that such a coup can be repeated very often. Even the British investor is not fool enough to go on long sinking his money in securities under the ban of the Foreign Office and subject to all the hazards of a half-baked revolution. Anyhow, the incident is awkward as well as comical, and if carried too far may have grave consequences.

CONTROL OF TRUSTS

"Of the practical problems which the American people have to solve, one of the greatest is that of the control of vast corporations," is the opening sentence of a volume, "The Control of Trusts," which its authors claim is entirely constructive, since it advocates a positive policy for controlling trusts.

Some of the suggestive titles are: The People and the Problem, Competition versus Monopoly, What More is Needed? and Constructive Competition.

This book is another addition to the literature which will contribute its quota to the solution of the problem stated and should be in the library of the student of economics who is following the "great moral battle which separates the powers which make for the welfare of society from those which prey upon it." "The Control of Trusts," by J. B. and J. M. Clark, \$1. Macmillan Company of Canada, Limited, Toronto.

Canadian Pacific Railway officials report 100 cars of grain going forward now per day from Southern Alberta points. Inspections in Calgary are just treble what they were a year ago.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

XIII.—PACIFIC LUMBER, FISHERIES AND THE CANAL

With a forest area of 182,000,000 acres, estimated at 360 billion feet, British Columbia hopes to turn the Panama Canal to advantage with regard to its lumber industries. In 1910, the timber cut of that wonderful province was 1,620,000,000 feet, worth approximately \$25,000,000, nearly one-third of the entire cut of the Dominion. Lumber experts anticipate much greater activity in the industry. A Minnesota lumber operator—and United States citizens have a stronger grip and better appreciation of lumber possibilities on our Pacific coast than anyone else—expects so great an increase for shipping charters for lumber shipments from Pacific Coast points to the Atlantic seaboard, via the Panama Canal, that foreign steamships carrying British Columbia lumber shipments to the same ports will seek a share of the traffic, and their lower rates will equalize the duty charged on Canadian lumber entering the United States. This will place the British Columbia producer on a parity with the United States in the United States market, and he will have a good position in other British colonies and the British Isles, as well as easy access to the expanding domestic market on the Canadian prairies.

Depletion of Timber Areas.

Timber areas on the Atlantic coast of the United States are becoming depleted, and Canada is regarded as the future source of supply of any great value. That makes doubly important the work of conservation. Inquiries have been received at Vancouver from our neighbors' Atlantic ports for prices on British Columbia lumber. Canada's Pacific ports enjoy distinct advantage in regard to lumber shipments. Foreign vessels are able to accept freight at a much cheaper rate than the United States vessels because of the cheaper labor which they can procure to man the vessels, and because of the fact that shipbuilding in foreign countries costs considerably less than in the United States. This restriction upon United States shippers results in a difference to their detriment of from \$2.50 to \$3 per M. feet in the freight charges upon lumber. The duty upon lumber entering the United States is \$1.25 per M. feet, and, therefore, British Columbia manufacturers will be able to ship lumber to the Atlantic coast ports, pay the duty, and still undersell the lumber which is produced in the United States. There are prospects that in the comparatively near future the duty will be removed. That would help still further.

Lumber and Freight Rates.

At present, few mills in British Columbia are shippers of any consequence to Europe. Rates from Vancouver or the Fraser River to Europe through the Panama Canal will be about \$8.00 per 1,000 feet of lumber, as against \$16.00 through the Suez Canal to-day. Instead of costing \$300 or more to ship a carload of 40,000 pounds of lumber from the Pacific to the Atlantic seaboard by rail, it will cost only in the neighborhood of \$160 through the Canal, even with the payment of Canal tolls of between \$1.00 and \$2.00 a ton.

"Ships," as Mr. K. Meyers, of New Westminster, reminds us, "are not content to carry freight only one way. Lumber, wheat, canned fish, etc., will fill their holds when they leave the Pacific ports, but what will be there when they return again? To-day the West buys the bulk of its general merchandise in Europe and the East, even though it has to pay between \$34 and \$64 more for every ton than the stuff costs in the Eastern cities. The same is true of machinery. For carrying that manufacture across the continent the railways charge \$30 a ton and upwards for carload lots. To ship the same

stuff through the Panama Canal will cost only \$8 or \$9 a ton, with delivery in thirty days, instead of ninety, as would be the case if sent round the Horn. Rates halved or time divided by three. No freight routes, however firmly established, and nothing is firmly established in the West, could resist such competition."

Development of Fisheries.

In our Pacific Coast fisheries there is foundation for an important industry. The value of the output of the British Columbia fisheries in 1910-11 was over \$9,000,000. The yield and value of the British Columbia fisheries for the year 1909-10, the latest period for which details are available, were as follows:—

Kindꝯ of fish.	Quantity.	Value.	Total value.
Salmon, canned (in cases 48 lbs.)....	567,203	\$3,686,819	
Salmon, dry salted, lb.	3,500,000	175,000	
Salmon, dried (Indian con), lb.	2,500,000	125,000	
Salmon, smoked, lb.	200,000	20,000	
Salmon, fresh and frozen, lb.	2,800,000	140,000	
			\$4,146,819
Sturgeon, lb.	500,000		25,000
Halibut, lb.	19,460,000		973,000
Herring, fresh and salt, lb.	50,000	500	
Herring, smoked, lb.	5,000	500	
			1,000
Oulachons, fresh, lb.	70,000	3,500	
Oulachons, salt, brls.	100	1,000	
Oulachons, smoked, lbs.	5,000	500	
			5,000
Smelts, lbs.	250,000		12,500
Trout, lbs.	180,000		18,000
Cod, lbs.	560,000		33,600
Shad, lbs.	10,000		500
Mixed fish, lbs.	120,000		6,000
Fish oil, gals.	72,000		15,840
Guano, tons	487		13,636
Oysters (Eastern), boxes	1,667		8,335
Oysters (Native) sacks	1,500		6,750
Clams, crabs and other fish not included in above..			12,500

Total for 1909-10..... \$5,278,980

Large Volume of Export Freight.

Capital and enterprise are only just beginning to realize the immense possibilities of this industry on Canada's Pacific coast. Properly developed, it means the exportation of a large volume of valuable freight. The Dominion Government is taking active steps to protect adequately the three-mile limit against poachers. This is very necessary. The salmon pack in 1910 totalled 762,201 cases, made up as follows:—

Variety.	No. of cases.
Sockeyes	565,915
Red and White Springs	28,789
Chums and Pinks	92,975 ..
Cohoos	74,522

The salmon pack for the ten years to 1910 was as follows:—

Year.	No. of cases.
1901	1,236,156
1902	625,982
1903	473,674
1904	465,894
1905	1,167,460

Year.	No. of cases.
1906	629,460
1907	547,459
1908	542,689
1909	967,920
1910	763,201

Sail Around the Horn.

The shipments of salmon to the eastern part of the United States and to Europe from British Columbia are heavy. At present, these salmon exports by sea are shipped chiefly in English sailing vessels around the Horn, and the business is handled mostly by English houses.

In addition to the ocean shipments of salmon, there are fresh salmon, halibut and other kinds of fish shipped east by rail. In the open sea north of Vancouver a large quantity of halibut is taken each year. The halibut steamers bring the fish to Vancouver, where they are packed in ice and shipped to Boston. Here is a table showing the amount of halibut landed at the port of Vancouver during recent years:—

From vessels of United States:—

Year ended March 31st.	Pounds.
1909	8,992,000
1910	9,450,000
1911	9,510,000

From vessels of Canada:—

Year ended March 31st.	Pounds.
1909	3,396,000
1910	5,050,000
1911	7,100,000
*1908-9	2,500,000
*1910	2,400,000
*1911	2,500,000

50,898,000

* Landed at New Westminster.

The valuable resources in the shape of the fisheries the excellent ports and rail connections on our Pacific coast and the advent of the Panama Canal should combine to attract large sums of capital to place the fisheries and lumber industries in British Columbia, in the high places they should attain.

(To be concluded.)

APPENDIX.

Table of Distances from Vancouver, B.C.

(Vancouver Board of Trade Report.)

Eastwards—	Statute miles.
Vancouver to Rossland, Kootenay	563
" " Calgary, Alberta	641
" " Edmonton, Alberta	833
" " Regina, Saskatchewan	1,125
" " Winnipeg, Manitoba	1,482
" " Toronto, Ontario	2,769
" " Montreal, Quebec	2,906
" " Quebec, Que.	3,054
" " Halifax, Nova Scotia	3,660
Westwards—	Nautical miles.
Quebec to Liverpool, England	2,650
" " Plymouth, England	2,680
Halifax to Liverpool, England	2,355
" " Plymouth, England	2,400
Vancouver to Vladivostock (Russian terminus of the Siberian Railway) direct	4,460
Vancouver to Yokohama, Japan	4,270
Yokohama (via Nagasaki) to Dalny, Manchurian terminus of Siberian Railway, about	1,000
Yokohama to Shanghai, China	1,060
Yokohama to Hong Kong, China	1,600

Hong Kong to Singapore	1,440
Singapore to Calcutta, India	1,630
Singapore to Madras	1,630

Southwards—

Vancouver to Moreton Bay, Queensland	6,510
" " Honolulu, S.I.	3,435
Honolulu to Suva, Fiji	2,760
Suva, Fiji, to Moreton Bay	1,560
" " Sydney, N.S.W.	1,770
" " Auckland, New Zealand	1,170
Moreton Bay to Sydney	445
Vancouver to San Francisco, Cal.	833
" " Mazatlan, Mexico	2,311
" " Liverpool (via Tehuantepec)	7,000
" " London via Magellan	14,200
" " London via Panama	8,500

Statute miles.

Vancouver to Seattle, Washington	178
" " Tacoma, Washington	219
" " Portland, Oregon	405
" " San Francisco, Cal.	1,177

Northwards—

Vancouver to Prince Rupert by coast steamers	550
" " Skagway, coast steamer	891
Skagway to White Horse, Yukon Railway	111
White Horse to Dawson, river steamer	450
Vancouver to St. Michael by ocean steamer	2,660
St. Michael to Dawson City by river steamer	1,690

NEW TRUST COMPANY

Another trust company, to be called the Canadian Permanent Public Trustee Company, is being organized. It has not yet been decided what the capitalization will be, but the concern will be an adjunct of the Canada Permanent Mortgage Corporation, Toronto. Mr. Beverley Jones is the legal agent of the organizers of the new concern, and he will apply to Parliament for a charter.

RAW MATERIAL USED IN SLACK COOPERAGE.

To obtain an estimate of the amount of raw material consumed in Canada by the slack-cooperage industry the following 'experience figures' were used by the forestry branch of the department of the interior who invite criticism on the figures for the purpose of obtaining a fair average for the whole of Canada:

1,000 feet of logs produce 3,500 staves.

1 double cord of heading bolts (8 feet by 4 feet by 40 inches) produces 180 sets of heading.

1,000 feet of logs produce 4,200 hoops.

This would indicate that 29,367,714 feet of logs were used for staves in 1911, 24,466,666 feet for heading and 8,518,810 feet for hoops, making a total of 62,353,190 feet, board measure, of logs.

This rough estimate does not represent accurately the amount of raw material consumed in the industry. In making staves, for instance, short pieces are left over and are utilized by many of the factories in making heading. Some cooperages utilize smaller waste in other ways or sell it to other wood-using establishments. A successful effort has been made in the United States to utilize mill-waste for cooperage. It has been proved in many instances that a combination saw-mill and cooperage will effect a closer utilization of wood and result in a considerable saving to the manufacturer. To what extent this practice would apply to Canadian conditions is still to be proved.

The sources of loss and waste in Canada are given as follows:—

1. Allowing logs to dry and check in the woods results in a loss of about 4 per cent. on the average, due to warping, checking and staining.

2. Cutting logs into bolts two or more inches longer than the length of the staves required. The estimated loss from this source is 7 per cent.

3. Improper bolting and conversion of bolts into staves.

4. Seasoning the finished product.

It is estimated that forty to fifty per cent. of the raw material is lost during the process of manufacture. The three general remedies for loss and waste are:—

Increased care in the process of manufacture.

Introduction of more specialized machinery.

Closer utilization of waste material.

FREIGHT RATES INQUIRY

Water Competition is Important—Contentions of the Railroads

The railways contended at the inquiry before the Dominion Railway Commission at Ottawa this week that not only were the Eastern freight rates lowered by water competition, which was not a factor in the West, but that numerous reductions had been made in rates in the West also. Chairman Drayton stated that the scope of the investigation would be enlarged so as to include more than the question of discrimination.

Mr. G. M. Bosworth, vice-president of the Canadian Pacific Railway, stated that the competition of water traffic on the Ottawa River had kept rates low between Montreal and Ottawa.

Western rates were chiefly based on Great Northern and Northern Pacific rates, and were not affected by water competition. Quebec and Maritime Province rates were governed chiefly by St. Lawrence River competition, as well as by the Intercolonial Railway. The Canadian Pacific Railway did a large amount of business East and West in the United States, receiving this business from the other lines originally at St. Thomas, and now at Windsor and Detroit.

Iron and Coal Freight

Much iron and coal is also carried from the Eastern States westward by the Canadian Pacific Railway at rates the same as those over American roads. American grain, when Canadian grain was not seeking transport, was carried to St. John for export, but the Canadian was given the preference. The local American rate had a large bearing on through rates from one country to another. Rates in the American States were higher as one went West.

Mr. Bosworth spoke of the annual rush of grain from the West. Grain from Fort William to St. John was carried at a fluctuating rate, from 13 to 25 cents per hundred.

Considerable Water Competition

There was no other district in the world where railways encountered so much water competition as Eastern Canada. An effort had been made by the Grand Trunk Railway to make higher rates in winter to get away from this, but it had been prevented by an order of the board. It was a recognized principle in rate-making that higher rates would be charged for shorter hauls, even over the same rails, when affected by water competition.

Mr. W. R. McInnis, freight traffic manager of the Canadian Pacific Railway, gave evidence as to a number of rate reductions made by the Canadian Pacific Railway at different times in its Eastern and Western rates. The reductions as regards grain, oats, etc., had in some cases been as high as 60 per cent., while there had also been considerable reductions in coal, coke and a number of other commodities.

Density of Population

He gave population figures of American States where rates are higher than in the Canadian West, showing that they were much greater than those of the latter, which were comparatively thinly settled. More agricultural development in these States, Washington and Oregon for instance, gave them a larger local traffic than the Canadian Pacific Railway enjoyed on the other side of the border in British Columbia. As the result of an inquiry a 20 per cent. reduction had been ordered in these rates by the States, but the Great Northern and Northern Pacific had filed suit against this, urging that the new rates were confiscatory.

In the Western States

In some of the western States, Mr. McInnis admitted, local rates were lower than those in Canada for the same distance, but this, he explained, was due to the causes mentioned, density of population and development giving more local business. For distances shorter than 200 miles rates as a rule were lower on the American roads, while for hauls in excess of that the Canadian tariffs were the more reasonable.

That Canadian grain could profitably compete in Mexican markets with that of the United States, were it to be had, was a statement made to the commission. Owing to the inability of Alberta to supply the product no business of this kind has been done since 1909, but conditions this year may be different.

The Canadian Northern Railway commenced its case on Wednesday and submitted some evidence to prove that it was on a different financial basis from the Canadian Pacific Railway.

Mr. W. B. Lanigan, assistant freight traffic manager of the Canadian Pacific Railway, gave population figures, mileage, etc., along Canadian Pacific Railway routes in Eastern

and Western Canada. Taking the population per mile of railway of Manitoba, Saskatchewan and Alberta as 100 it indicated that the population per mile of railway in Ontario and Quebec was 226, and went into agricultural and produce statistics to show that the total of such production in Quebec was 8,013,510 tons; in Ontario, 16,628,455 tons, while in the three provinces of Manitoba, Alberta and Saskatchewan the total was only 2,511,385 tons.

Export Grain Rates.

The export rate from all points west of Swift Current to Vancouver was 19½ cents. The railways had no control of the rate from Fort William to St. John, but had control from Calgary to Fort William on account of the lack of water competition. The rate from Calgary to Vancouver on grain for export was 19½ cents per cwt., while the local rate was 32½ cents.

GRESHAM LIFE ASSURANCE SOCIETY

The Gresham Life Assurance Society, Limited, have opened a branch office at Toronto with Mr. A. K. Macdougall in charge. This society was named after Mr. Thomas Gresham, second son of Sir Richard Gresham, Lord Mayor of London. It carries on life insurance business with all kinds of policies, and offers non-profit bearing policies at attractive rates. Its funds exceed \$51,000,000, while the annual income is over \$7,000,000, and policyholders or their representatives have been paid \$125,000,000.

The advisory board in Canada are:—Messrs. F. W. Evans, chairman; Herbert B. Ames, M.P.; William Hanson, of Montreal; and J. A. M. Aikins, M.P., Winnipeg. And the head Canadian office is at Montreal, where Mr. Arch. R. Howell is manager.

ONTARIO HYDRO-ELECTRIC RATES

A general reduction in power rates which will benefit over half of the municipalities in the Niagara power zone, including Toronto, London, Hamilton, and other important industrial centres, has been decided upon by the Hydro-Electric Commission.

The following table shows the changes in detail:—

	Old rate.	New rate.
Toronto	\$18 50	\$16 50
Guelph	25 00	23 50
Seaforth	41 00	Unchanged
St. Thomas	32 00	Unchanged
Ingersoll	28 00	27 00
Norwich	30 00	Unchanged
Berlin	25 00	24 00
New Hamburg	32 00	Unchanged
Preston	25 00	23 50
Hespeler	26 00	25 00
Dundas	17 00	16 00
Waterdown	37 50	30 00
Weston	30 00	Unchanged
Mimico	30 74	30 00
London	28 00	27 00
Stratford	32 00	Unchanged
Mitchell	38 00	Unchanged

Seventy-seven per cent. of the Canadian Northern Railway ten million dollar debenture loan in London has been left with the underwriters.

Shareholders of the Farmers Bank are being notified that they must pay the double liability on their shares. Many holders will contest the order.

Judgment was reserved in the application by members of the Ancient Order of United Workmen for an injunction to restrain the society from putting into effect this month the readjustment of rates recently arranged.

From the British Columbia marine yards at Esquimalt will shortly be launched the steel steamship "Princess Maguinna," the largest vessel ever built in British Columbia waters. She will be employed in the coasting service of the Canadian Pacific Company. The engines and boilers are being built by British manufacturers. The vessel will be fitted as an oil burner.

HAMILTON'S VARIED INDUSTRIES

Reasons for Its Growth—Facilities for Transportation of Its Products—Many United States Firms Have Established Factories

Hamilton's claim as the city of four hundred varied industries is well supported by the booklet containing specific information, just issued by its commissioner of industries, Mr. H. H. Marsh. Some of the reasons for the following substantial advances are given below:—

From May, 1911, to May, 1912, there was an increase in population of 10,000; while value of building permits issued was \$5,102,625, and the value of building permits for new factories and extensions was \$1,149,300. One thousand seven hundred and five dwellings were erected.

Hamilton is so situated that its manufacturers have a big advantage over those of other cities, both in the matter of assembling their raw material and disposition of manufactured ware, to the North-West provinces, and European markets by rail or water.

The large bulk of the consuming population lies within what may be fairly called "short delivery distances."

Favorable for Freight Rates.

It is the regular port of call for all the steamship lines operating from Montreal to the head of Lake Superior; beside having direct connection with the principal railways of Canada, the Grand Trunk Railway; Canadian Pacific Railway; Toronto, Hamilton and Buffalo Railway; Michigan Central Railway; New York Central; Canadian Northern Railway, all operate through Hamilton. It is also the centre of a complete electric railway system. As to this favorable position as regards freight rates, Hamilton has a well supplied labor market, of the best type of skilled mechanics and laborers, and has been particularly free from strife, there having been no strikes of any consequence in several decades.

A practically unlimited supply of electric power can be obtained from large power companies economically generating power from Decew Falls 35 miles, and Niagara Falls 42 miles distant. The Hamilton Hydro Electric department is

municipally owned and sells power at cost, while the Dominion Power and Transmission Company, a public service corporation, is ever ready to serve manufacturers. Some large users of electric power claim this company supplies the cheapest power in Canada.

The present number of manufacturing establishments is 400, with invested capital amounting to \$50,000,000. Employees, male and female, number 25,000, with yearly wages and salaries totalling \$14,000,000. The yearly value of products amounts to \$50,000,000.

Much Canadian and United States Capital.

And it is claimed that more United States capital is invested in industrial pursuits there than any other Canadian city. Over twenty million dollars have been invested in the last ten years.

More than 35 American firms have chosen Hamilton in preference to all other Canadian cities, as the place to build their plants.

Every American concern that has come to Hamilton has prospered and increased its plants.

Several important Canadian industries, representing investments of over one million dollars, have preferred to remove their plants from other cities to Hamilton, on account of the advantages offered their business.

There are 28 banks and branches doing business.

Its fire department is one of the most efficient in the Dominion.

Hamilton's fine market is situated in the centre of the city, and here the consumer can deal directly with the farmer.

The De Laval Supply Company has agreed to erect a building of concrete and to move their two Canadian factories at present at St. John, N.B., and Montreal, together with the Canadian head offices, to Peterboro, Ont., and to have invested in the local factory by June 1, 1913, at least \$75,000. The company agrees to have 50 hands employed the first year and 75 hands the second year. The city gives to the company a free site and exemption of taxes except school and local improvement, for ten years, and pays the expenses of moving the plants from St. John and Montreal to Peterboro up to \$3,500.

Increasing The Efficiency of The Port of Montreal

The grain elevator opened at Montreal last week doubles the storage capacity and trebles the handling efficiency of the port. That alone is a handsome addition to Montreal's harbor facilities, but Major George W. Stephens, chairman of the Harbor Commission, says that the elevator is only half its ultimate size and is but the forerunner of vaster and greater efficiency to come. The port of Montreal is the second largest sea terminal in North America. Major Stephens stated that five years ago the Harbor Commissioners' elevator No. 1 handled slightly over half a million bushels in the entire season. Last year the same elevator handled in the same time almost fifteen million bushels, which constituted

a record for any single grain elevator in North America, of similar capacity.

"There are those," said Major Stephens, "who, finding such large quantities of better paying freight than grain available, are ready to declare that soon there will be no ships to carry the grain away. I do not share that opinion."

Ten years ago the largest vessel coming to Montreal was 5,000 tons. To-day the largest vessel is 15,000. In order to keep pace with the wheat and grain production of the Western provinces and with competition with United States ports, it is necessary that the highest efficiency in the matter of facilities be maintained at the port of Montreal.

General View of New Elevator, Montreal Harbor, from outer end of Jacques Cartier Pier.

CANADIAN PACIFIC RAILWAY PROGRAMME

Sir Thomas Shaughnessy States Purposes of Stock Issue—To Reduce Debt and Fixed Charges

"The most prosperous year in the company's history is covered by this thirty-first annual report," said Sir Thomas Shaughnessy at the Canadian Pacific Railway's annual meeting at Montreal. "The gross operating income exceeded \$125,000,000, and the net balance, after providing for fixed charges and making the usual deductions, being \$33,752,000.

"Each year there is apt to be some damage to the crops in one section or another of a country so vast as ours, and the cool weather and heavy rains that were so general during the past few weeks have, no doubt, had bad local effects, but in Western Canada there is the prospect that the grain crops will be larger than was estimated and of particularly good quality. Unfortunately, the weather conditions and the shortage of farm help interfered with the threshing, and, as a consequence, the movement of the grain to the markets will crowd the facilities of the transportation lines between this time and the close of lake navigation. We hope, however, to escape anything in the nature of serious congestion, and we have reason to expect that the grain traffic and the general business of the company during the next year will be at least as large as it was last year.

Important Works in Hand.

"A second main line is now being laid between Regina and Chaplin, in the province of Saskatchewan, and by the end of 1914 the double track should be completed and in use between Fort William and Calgary, a distance of 1,256 miles. The extension of the second track from Calgary to Revelstoke, where the line crosses the mountain ranges, will necessarily require most careful investigation and study at the hands of our engineers before a plan of operations can be determined upon, but a double track through this territory is urgently required to meet the demands of the traffic, and no unnecessary time will be lost in the commencement and prosecution of the work.

"Among other important works in hand are a second main line between Farnham and Montreal Junction, including the replacement of the bridge across the St. Lawrence River at Lachine by a double track structure designed for the heaviest train loads; a large sorting yard for freight trains at Montreal Junction; the Windsor Street passenger terminal at Montreal that will be finished about the end of the year and will provide more than twice the present station and yard accommodation; the warehouses and yards for local traffic that are being constructed on the government house property acquired by the company in Toronto; the additional freight yards at Transcona, five miles east of Winnipeg, where about 400 acres of land are being covered with tracks and buildings to supplement the existing Winnipeg yards, among the largest in the world, but insufficient to accommodate the company's traffic at that point; the large locomotive and car shops at Ogden, near Calgary, which will be ready for use in the course of the next three or four months; and the new station, overhead bridges and wharf facilities at Vancouver that it will take some time to complete.

Designed to Facilitate Transportation.

"Innumerable other works of lesser importance, but involving a large expenditure of money, all designed to facilitate the movement of traffic and to accommodate the public, have been executed or are in process of execution, and there would appear to be no limit to the demands of this kind that it will be necessary to meet if our business continues to expand as it has in the past. The most prudent and effective method of providing money for all these purposes has been the close and constant attention of your directors, and they believe that in the future, as in the past, the best interests of the company and of Canada will be served by giving an opportunity to the shareholders of the company to furnish from time to time the additional capital on a basis that makes the investment reasonably attractive.

Make Use of Authority Conferred.

"With the four per cent. consolidated debenture stock that your directors are now authorized to issue and sell, the products to be used in retiring outstanding bonds carrying a higher rate of interest, and in meeting expenditures for additional railway mileage heretofore constructed or acquired, and the consolidated debenture stock that may be issued in respect of the proposed construction or acquisition of the several railway lines described in the annual report, that you will be asked to sanction at this meeting, there will be a total of approximately \$90,000,000 four per cent. consolidated debenture stock, in excess of all heretofore disposed of, that the company will be authorized to issue and sell. Instead of going to the market with any considerable portion of this amount, your directors recommend that you make use of the authority conferred upon you by the Parliament of Canada to

issue ordinary shares of capital stock in lieu of consolidated debenture stock, for the purposes for which you are authorized to issue consolidated debenture stock, and to that end that you increase your ordinary share capital from \$200,000,000 to \$260,000,000 to be offered to the shareholders at the price of \$175 for each share of \$100, being at a premium of 75 per cent., at a time and on terms of payment to be fixed by your directors.

To be Supplemented From Surplus.

"The proceeds of this issue to the amount of \$60,000,000 will be used to meet expenditures for which the proceeds of consolidated debenture stock would otherwise have been utilized, including the satisfaction and cancellation of all of the company's outstanding 5 per cent. first mortgage bonds, amounting to \$33,766,000 on or before the date of their maturity, July 1st, 1915, and the balance will be devoted to such additions and improvements to the company's property, properly chargeable to capital account, as are in the opinion of your directors necessary from time to time. By this means the company will be getting money on its ordinary share capital at a low rate of interest, taking the present dividend rate as a basis, its bond and debenture debt will be \$60,000,000 less, its fixed charges will be \$2,400,000 per annum less than they otherwise would have been, and its available funds for the purposes of the undertaking will be increased by \$45,000,000. Your directors will recommend that this amount be supplemented by an appropriation of \$15,000,000 from your accumulated surplus, that might properly be distributed to the shareholders, but that will instead be expended on capital account in additions and improvements to your property."

ENGLISH MANUFACTURERS AND CANADA

The action of F. Maclure Sclanders, trade commissioner for Saskatoon, in addressing the Liverpool Chamber of Commerce, with the object of clearing away some of the causes that restrict British trade in Canada, has met with much approval in Anglo-Canadian circles. His letter has been reprinted by the Liverpool Chamber of Commerce. Mr. Sclanders expresses his surprise at the inexplicable apathy of English manufacturers, and speaks of the "unreasonable disinclination of your merchants and manufacturers to grant to our solid business concerns such terms of payment, etc., as our exigencies demand. Most British houses dealing half-heartedly with our merchants demand cash in return for bill of lading, the goods meantime being retained at Montreal. Consequently our people are required to pay for Old Country goods about three weeks before they arrive here."

Saskatoon, he says, has as yet not had a single commercial failure, and British houses can easily get information respecting the standing of its merchants through agents of Canadian banks in London. The lesson brought home is that the trade is going to America, and until British methods are altered this will continue.

BRITISH COLUMBIA COMPANIES ACT IS VALID

That the British Columbia Companies Act is intra vires and must be observed by all companies wishing to do business in this province, whether holding Dominion charters or not, is the effect of a judgment handed down recently by Justice Murphy, of the supreme court, in the suit of the John Deere Plow Company, of Winnipeg, against Agnew Bros., of Elko, B.C. The plow company are suing Agnew Bros. for value of two notes, aggregating \$5,000, given by the latter firm for agricultural machinery and implements, which they were selling in this province for the John Deere Plow Company, and His Lordship finds that as the John Deere Plow Company is not licensed to do business in this province it cannot collect the notes.

The action is of more than ordinary importance because it was taken by the Canadian Manufacturers' Association as being a suitable case to carry to the privy council in order to test before the highest British tribunal the British Columbia Companies Act. Thus far no case has gone past the court of appeals. In the action, Agnew Brothers did not raise any question of merits as a defence but sat squarely on the company's action, contending that the Plow Company had no right to appeal to the courts of British Columbia as they have not been licensed in the province.

The Dominion-Gresham Guarantee and Casualty Company has received a Dominion license authorizing the company to transact accident and sickness insurance, in addition to the business of burglary insurance for which it is already licensed. Mr. F. W. Evans, Montreal, is the chief agent.

RELATION OF BRITISH PREFERENCE

To Conservation and Utilization of Canada's Resources
—Increased Industrial Activity Needed

The question of British preference has rapidly assumed a prominent position in Canadian circles. As a conference of the Canadian Manufacturers' Association and the western grain growers seems likely in the near future, the remarks of Mr. R. S. Gourlay, president of the Canadian Manufacturers' Association, at the recent convention at Ottawa are of considerable interest:

"Earlier in the year, as the representative of the Canadian Manufacturers' Association, in welcoming the manufacturers' delegation from Great Britain, I urged them to cast in their lot with us, establish branch factories as so many of our United States cousins had done to their pleasure and profit in recent years, and assured them that though they would necessarily compete with us for the Canadian trade, and in a large measure share our trade, yet we would welcome them, believing that with our expanding trade and national development there was room for us all, and there was so much in our industrial life that ought to appeal to them as manufacturers who had inherited British ideals," said Mr. R. S. Gourlay.

Quality of Canadian Products.

In the first place quality occupied the foremost place in made-in-Canada products. This had not only been a privilege, but a necessity.

- (1) We entered a market already occupied.
- (2) We sought trade with our people prejudiced in favor of foreign or British-made products.
- (3) We sold to an intelligent, thoughtful and prosperous people who were prudent and careful in their buying so that they had always to obtain full value for their dollar.
- (4) There were but little if any shoddy products made in Canada.

As a result the Canadian-made product of to-day in any line that had been made in Canada for a few years was equal in quality with the best, and though here and throughout the world there might be in some lines an outstanding name by reason of past reputation or lower general average in that specific article in that country, yet the products of Canadian factories average in quality as high, if not higher, than in any other country.

As this can be proved, is it not the duty of every Canadian, price and terms being satisfactory, to give to made-in-Canada products the right of way in their purchases?

Solution was to Build Factories.

In the second place, as manufacturers inheriting British traditions, we strove to be worthy sons of the home land, and so ever sought to trade with honor.

In the third place, labor conditions were more fraternal in the matter of confidence and good-will between masters and men than could be found in any other part of the world.

In the fourth place we could not promise our British confreres a low wage rate, for here in Canada we gloried in well-paid service and a well-filled pay envelope.

During our conferences with the British manufacturers they asked us if we would favor an increase in the British preference on articles not made in Canada. Our reply was, that whilst the preference to Britain and other parts of the empire had met with our sympathy and support, even though it had crippled some of our industries and might have extinguished others as the preference was at first applied, we were not in sympathy with any such increase, for in our national industrial development it was of vital importance that the list of articles manufactured in Canada be increased and enlarged as rapidly as possible; in fact, each month saw developments in this direction, and the proper solution of the problem was for them to cast in their lot with us, establish branch factories, and with their capital, knowledge and experience carry a share of the manufacturers' problems and difficulties as we have each day to meet and solve them.

Enlarging Field of Industrial Activities.

At this time we were not prepared to admit that there was any article that could not at some point in Canada in time be successfully manufactured, and for our rapidly-growing population it was our bounden duty to provide profitable work for our people, which could only be done successfully by enlarging the field of our industrial activities.

It was pointed out to them that our total population per recent census was about 7,200,000 people; that our annual increase from natural causes is about 99,000, and our immigration increase last year 351,000, an increase in one year of about 440,000, almost equal to our entire industrial forces, and also though many came to our shores to go on the land the larger portion ultimately gravitated to our towns and cities, as evidenced by the slow growth of our rural population and the enormously rapid growth of our urban centres.

CANADA'S COKE SUPPLY

Its Industrial Value—For Cheapness, Quality and Quantity It Can Compete Successfully

The industrial value of Canada's coke supply is discussed in *The London Financier* by Mr. J. Lawrence-Hamilton, M.R.C.S. As neither anthracite nor lignite, when heated, coalesces, they are both incapable of making coke, he says. Bituminous coal, on the other hand, when strongly heated in the absence of air in suitably closed ovens, is gradually decomposed, yielding its water, gases, tar, oils, nitrogenous and volatile compounds, which are, of course, separated and collected.

Bituminous coals thus heated first fire, or melt or soften, and then, as decomposition progresses, they stiffen to produce a hard, light, porous, or cellular, coke, consisting chiefly of carbon combined with the contained ash from the original coal. The cellular or quasi-fossil, sponge-like structure of the coke is produced by the expansion of the heated escaping gases derived from the molten mass.

Blast Furnace Smelting.

In blast-furnace smelting for treating mineral ores and metals, coke is superior to coal as charcoal is to wood, because both coke and charcoal are rich in carbon. Hence, to manufacture this class of fuel it is necessary to spend time, trouble and money to convert the coal into coke.

For metallurgical and allied purposes a superior coke is required. Such carefully manufactured coke is strong, hard and does not soften or crumble, so that when burning in the blast furnace it can carry a heavy charge of ore without crushing or melting, which would obstruct the blast and diminish the heat required.

Good coke burns without producing tar, oils or smoke. It possesses a high calorific value.

As to Canadian Coke.

Experiments show, and experts know, that Canadian coke for cheapness, quality and quantity can successfully compete with the cokes from all other countries and Colonies most of which in the near future will be more or less dependent upon the Dominion's cheap coke, delivered like coal, which is practically inexhaustible. To develop Canadian mines and allied industries, cheap, abundant local coke is necessary. Carbonite, or natural coke, made nature's own laboratory by ingenious rocks cutting across bituminous coal seams, has not yet been discovered in Canada, where, however, it probably exists in large quantities.

Cheap, abundant, pure, solvent water of Canadian "white coal," washes the previously crushed, sized, screened and separated black coal on lines similar to the ordinary methods and machines employed in dressing and concentrating metallic ores.

The commercially valuable materials or products in metallic ores are heavier than the contaminating or containing rock. Coal is the lightest of all important commercial minerals, and its natural adulterants, or impurities, are heavier than the coal itself. In other words, in coal washing, the lighter coal escapes at the top, whilst its impurities, being heavier, are discharged separately at a lower exit. In metallic ore washing the lighter contaminating rock escapes above, whilst the metallic ores are discharged at a lower level.

Free Water in Coals.

Canada having generally a very dry climate, the quantity of mechanically (not chemically) included water or moisture in Canadian coal as bought or sold averages only about 3 per cent. Of course, during prolonged or excessive wet weather this amount of contained or free water would be augmented, especially where coal is stacked in uncovered yards, or where purposely adulterated or diluted with water from a hose. Evidently small soft coal and coal dust absorb far more moisture than larger harder coals. Damp or damped coal is additionally friable or liable to waste by crumbling. In other words, where coal contains, say, 5 per cent. of free moisture—as it usually does in the United Kingdom—then in every ton there is 1 cwt. of useless water, so that the consumer on every pound's worth of coal purchased gets only 19s. worth of coal and loses a shilling for the coal's contained free water or moisture, which must not be confused with the water chemically combined as a constituent of the native coal.

Good coals as sold in London seldom contain more than 8 per cent. of free water or moisture, with an average probably approximating 7½ per cent.

The Postal Fire Insurance Company will apply for a Dominion license. The head office of the company will be at Toronto. Messrs. Ritchie, Ludwig and Ballantyne, Toronto, are solicitors for the applicants.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

British Columbia Packers' Association.—By next spring all the preferred stock of British Columbia Packers Series "B" will have been retired. The whole of Series "A" will then be exchanged into common.

Twin City Rapid Transit Company.—For the last nine days of September the earnings of the Twin City Rapid Transit Company were \$196,132, an increase over the corresponding period last year of \$6,761.

Earnings for the month of September were \$723,285, an increase over September, 1911, of \$42,743, or 6.28 per cent.

For the year to date earnings are \$6,014,835, an increase of \$235,368, or 4.07 per cent.

Canada Gulf Terminal Railway Company.—At the annual meeting of the Canada Gulf Terminal Railway Company reports showed that thirty-six miles of road were being operated and as a result of the year's business, a small profit.

The shareholders decided to extend the line to the east as far as Gaspé, and to the west as far as Rimouski. Engineers are now busily engaged on the location of the road.

A pulp mill is also to be erected that will have a capacity of 50,000 cords of wood a year. M. J. O'Brien is president of the road.

Illinois Traction Company.—A steady increase in the business of the Illinois Traction Company is again shown in the statement of the earnings just published for the month of September and the eight months ending September 30th.

An analysis of the complete statement will reveal the expert and careful way in which the business is developed, while a glance at the following figures will give a fair idea of the headway made:—

Earnings for August:—

Total gross earnings	\$ 619,456	\$ 576,166
Total expenses and taxes..	350,985	346,371
Net earnings	260,438	221,330
Eight months to August 31st:—		
Total gross earnings	\$4,698,762	\$4,387,762
Total expenses and taxes..	2,819,305	2,676,950
Net earnings ..	1,829,114	1,656,661

Calgary Power Company.—Lake Minnewanka storage reservoir is now complete and a definite minimum flow of water is assured the year round. As a result, Calgary Power Company has decided to go ahead with the building of the fourth unit of their installation at Horseshoe Falls. The fourth unit will increase output from 13,000 horse-power, its present maximum, to 19,500 horse-power.

To provide for this extra development the company is issuing \$150,000 more bonds. These are being offered in Montreal by the Royal Securities Corporation.

In addition to the development at Horseshoe Falls, the company owns two other water-powers, one at Kananiskis, capable of generating 17,000 horse-power, and another at Radnor Falls, which will develop about 7,500 horse-power. Plans are at present being prepared for power development at the first-named place.

Earnings of the company for the last eight months have been considerably better than for the corresponding period last year.

Grand Trunk Terminals Warehouse Company.—One of the officials of the Quebec Savings and Trust Company, who placed the securities of the Grand Trunk Terminals Warehouse Company, Limited, in an interview regarding the proposed retirement of the bonds of the company, made the following statement:—

"It is proposed to sell the property of the company, situated on Grey Nun, King and Common Streets, at a price which will be sufficient to return to the underwriters the price paid for their bonds, with accrued interest, and a profit of one per cent.

"This plan has been approved by practically all the holders of the securities, and if the present negotiations are carried through, the matter should be settled early in November.

"We do not wish to make any statement for publication regarding the reason why this plan has been put before the underwriters as an alternative to carrying out the organization and comprehensive scheme of construction originally intended; suffice it to say that all those interested who have been approached have been satisfied that their best interests are being served in carrying it through, and have given it their approval."

Spanish River Pulp and Paper Mills, Limited.—It is understood that an early issue of additional preferred stock of the Spanish River Pulp and Paper Mills, Limited, will be made to provide for the installation of two new paper machines, which will double the output of the company, and also for an increase in the capacity of the pulp mill by about 25 per cent. The company recently listed 7,500 additional preferred shares on the Montreal Stock Exchange as a preparatory step to the new issue, the directors having decided some time ago that the paper output should be increased to meet the growing trade demand.

The capacity of the two paper machines which were started up this spring is 100 tons a day. Although only in operation for a few months, the machines are now averaging about 98 tons, or practically up to capacity. The two new machines to be installed almost immediately will bring the capacity of the paper plant up to 200 tons.

An issue of additional preferred stock was authorized some time ago, to be made when and as needed. No definite announcement has been made as to what part of the 7,500 shares will be issued immediately to provide capital for the additional installation, but it will probably be 5,000 shares.

Canada Furniture Manufacturers, Limited.—Earnings amounting to \$165,983 were reported at the annual meeting of the shareholders of the Canada Furniture Manufacturers, Limited, held on Monday in Toronto. No dividend was declared, however, the surplus profits being applied to the improvement of plant and equipment.

Mr. Harmer, the president, delivered an optimistic address, and the annual report was read by the managing director, Mr. J. R. Shaw, of Woodstock.

The report showed profits for the year, after provision had been made for bad and doubtful debts, of \$165,983, as compared with \$105,919 in 1911, and \$70,145 in 1910. After writing off \$35,000 as provision for depreciation of buildings, machinery, tools, etc., \$156,378 remains to be carried forward at credit of profit and loss account.

Total assets of the company stand at \$3,250,496, of which \$2,171,441 is real estate, plant and machinery, goodwill, patents, etc. Raw materials, supplies, etc., are valued at \$630,006. Accounts and bills receivable, etc., after provision for bad and doubtful book accounts, stand at \$392,184. Cash in hand amounting to \$2,873 and head office premises valued at \$37,541 complete the list of assets.

Accounts and bills payable, bank overdraft, reserves, and contingent account, are shown in a lump sum at \$281,604. Other liabilities other than to the shareholders are mortgages and interest amounting to \$40,500, and accrued salaries and wages \$12,413.

At the annual meeting a special committee was appointed to discuss with the officers of the company the question of reorganization.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of October 12th, 1911; October 7th, and October 10th, 1912, with percentage change:—

	Oct. 12, '11.	Oct. 7, '12.	Oct. 10, '12.	Ch'g. %
Montreal ..	\$51,906,863	\$65,929,944	\$60,745,808	+ 17.0
Toronto ..	37,264,516	44,127,780	44,935,176	+ 20.5
Winnipeg ..	26,973,197	30,561,514	31,230,895	+ 15.8
Vancouver ..	12,164,737	14,780,480	13,468,603	+ 10.7
Ottawa ..	4,499,879	4,338,115	4,428,783	— 1.5
Calgary ..	4,475,845	5,856,519	5,676,647	+ 24.5
Quebec ..	2,701,188	3,428,052	3,584,576	+ 32.3
Victoria ..	2,803,830	4,120,615	4,169,210	+ 48.6
Hamilton ..	2,562,872	3,772,444	3,894,065	+ 51.9
Halifax ..	1,797,129	2,206,209	2,673,289	+ 48.7
St. John ..	1,482,064	1,621,950	1,825,459	+ 23.1
Edmonton ..	2,403,525	4,525,021	4,434,958	+ 84.5
London ..	1,450,087	1,885,988	1,808,364	+ 24.6
Regina ..	1,603,705	2,227,467	2,831,482	+ 76.5
Brandon ..	643,236	556,322	656,759	+ 2.0
Lethbridge ..	615,918	656,154

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for
Bond Dealers and Municipal Officials

Swan River, Man.—Until November 1st for \$4,000 6 per cent. 20-year debentures. B. E. Rothwell, secretary.

Sudbury, Ont.—Until October 12th for \$32,000 5 per cent. 30-year school debentures. George Elliott, treasurer.

New Glasgow, N.S.—Until October 19th for \$19,000 4½ per cent. 42-year debentures. James Roy, town clerk.

Melfort, Sask.—Until October 18th for \$125,000 6 per cent. 30-year debentures. J. E. Durnin, secretary-treasurer.

Simco County, Ont.—Until October 15th, for \$20,000 20-year 5 per cent. debentures. Daniel Quinlan, treasurer, Barrie.

North Vancouver, B.C.—Ratepayers voted \$50,000 for street purposes and \$8,000 for the purpose of a park site in the Capilano district.

Bowmanville, Ont.—The waterworks and sewerage by-laws were carried. The estimated cost of the waterworks is \$111,000, and for sewerage \$40,000.

Galt, Ont.—A by-law to purchase the electric light and power plant has been carried. It has been suggested the next step will be for a municipal waterworks.

Forest, Ont.—Until October 26th for \$20,000 5 per cent. 30-year electric light plant debentures. R. Karr, town clerk. (Official advertisement appears on another page).

Estevan, Sask.—Until October 15th for \$110,000 5 per cent. 25 and 30-year manufacturing establishments, school and waterworks debentures. L. A. Duncan, secretary-treasurer.

Strathmore, Alta.—Until November 1st for \$5,000 15-year 6 per cent. cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer.

North Battleford, Sask.—Until October 21st for \$100,000 5¼ per cent. 30-year high school debentures. H. W. Dixon, secretary-treasurer. (Official advertisement appears on another page).

Brantford, Ont.—By-laws for the purchase of hydro-electric power and to provide for the installation of a distribution system and for the issue of debentures for \$115,000 will be voted upon October 25th.

West Vancouver, B.C.—Until October 29th for \$100,000 5 per cent. 20-year ferry, and \$75,000 5 per cent. 50-year road debentures. G. H. Peake, C.M.C., Hollyburn P.O., West Vancouver. (Official advertisement appears on another page).

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C. (Official advertisement appears on another page).

Wetaskiwin, Alta.—Until October 30th for \$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445.06 5 per cent. 20-year concrete walks; \$2,069.41 5 per cent. 30-year sewers; and \$819.56 6 per cent. 7-year plank walk debentures. E. Roberts, secretary-treasurer. (Official advertisement appears on another page).

Glencoe, Ont., has decided to purchase a chemical fire extinguisher.

During the year the following important buildings have been completed or are under construction at Weyburn, Sask.: —Department store, \$110,000; collegiate, \$75,000; post office and customs house, \$65,000; municipal hospital, \$60,000; Canadian Pacific Railway depot, freight sheds, etc., \$70,000; telephone exchange, \$30,000; Mitchell business block, \$40,000; Canadian City and Town Properties, Limited, business block, \$60,000; Weyburn Creamery Company, factory, \$25,000; Weyburn Bottling Works, \$10,000; Weyburn Sash Factory, \$15,000; theatre, \$25,000, together with a number of smaller premises.

Ashton-under-Lyne, England.

September 22, 1912.

The Monetary Times Printing Co.,
Toronto, Canada.

Gentlemen,—

Kindly send me a sample copy of The Monetary Times which has been recommended by Sir W. M. Aitken, M.P. for Ashton-under-Lyne. I am one of his constituents and a friend.

Yours truly,

JOSEPH HURST.

WESTERN CANADA

Good Reports of General Trade Conditions—Threshing
and Transportation of Wheat—Extension of
Municipal Power Plant

Monetary Times Office,
Winnipeg, October 9th.

Good weather prevails throughout the western provinces, and the past week was one of the best that farmers have yet experienced. Threshing machines are busy, and the wheat is being rushed to the head of navigation as fast as the railways can handle it. No serious congestion has yet occurred, but before many weeks pass considerable congestion is expected in moving the crop. If the weather continues good, it will greatly relieve matters, and the present outlook is encouraging. The past week gave new hope to all business interests, and the volume of trade in every line is good. Business men in all parts of the West are confident that there is no reason to worry. The grain has escaped injury so far, and nearly all wheat coming to hand is well up to contract grades.

Collections have been somewhat dull, caused by the delay in the crop movements and in making progress with threshing. Money, however, began to come in quite freely during the past week, and with the present good weather, this will continue. There has been strong demands for loans, but most of the companies are proceeding slowly.

The latest estimate of the present crop, based on a recent survey, places the wheat crop of the west at 191,000,000 bushels.

Western Grain Movements.

The shipment of the grain crop of Western Canada is in full swing. Every railroad is hurrying heavily loaded trains to Winnipeg for inspection and on to the lake head terminals. At the local yards the movement is swelling rapidly in volume. The struggle of the transportation companies, rail and waterway, is on against the possibility—every year growing more and more imminent as the cultivated area increases—of a grain blockade. So rapid has been the development of the agricultural west, that the problem is undoubtedly one of rare difficulty, when Western Canada's thousands of threshing machines begin their annual outpouring of grain. Threshing now general throughout the entire west, gives indication that the yield of 1912 will greatly exceed that of past years. Harvesters are offered \$3 to \$4 a day, and all found, and men are still badly wanted in many places. A suggestion that contractors and municipal councils should temporarily stop work and release men in order to have them help in the harvest fields has been mooted and is being given consideration. The railways are still allowing the special rate of one cent a mile for harvesters.

Civic Light and Power Department.

The civic light and power department of the city of Winnipeg is now considering the necessity of enlarging the capacity of the power-house facilities owing to the rapid industrial development of the city and the consequent demand for power. The horsepower now contracted for to be delivered this fall will necessitate extensions and additional transformer capacity to that provided in the present building. For the spring of 1913 the manager recommends that two extra units be installed. These turbines and alternators should be in operation by summer in 1914. The department is now getting 95 per cent. of the new business of the city, says Manager Glasco, in competition with a private corporation, which before the completion of the municipal plant last year enjoyed a monopoly in the supply of light and power.

Canadian Highways Convention.

Local interest in the convention of the Canadian Highways Associations, which is to be held in Winnipeg this week, is growing steadily. Mayor Waugh and members of the city council are assisting the efforts of the Manitoba Good Roads Association and the Winnipeg Automobile Club to make it a success, and many of the details are in their hands. Nearly all towns and organized districts in Manitoba are sending representatives to the convention, and boards of trade are also sending delegates. Mayor Waugh will welcome the delegates on behalf of the city, and also expects to attend all the meetings during the three days of the convention.

The North American Accident Insurance Company will apply for an Ontario charter. The company's head office is to be at Toronto, and it will carry on a general, accident and casualty insurance business. The capital stock is to be \$500,000, divided into 5,000 shares of \$100 each. Messrs. Montgomery, Fleury and Company, Toronto, are solicitors for the applicants.

CANADA IS NOW SECOND

In List of Countries Exporting Wheat to Great Britain

—Lancashire is Best Situated for Distribution

Some unusually interesting statistics are to hand from Mr. W. J. Egan, the Canadian Trade Commissioner at Manchester. He notes that from the returns, showing the value of imports and exports of merchandise of the various ports throughout the United Kingdom, that two Lancashire ports, viz., Liverpool and Manchester, occupy second and fourth positions respectively, Manchester easily retaining its place as fourth port in Great Britain.

The value of imports into Liverpool during 1911 amounted to £159,915,000, showing a decrease over 1910 of £10,355,000, her exports, however, which amounted to £176,524,000, show an increase of £6,124,000 over 1910.

The total value of imports into Manchester during 1911 amounted to £32,503,000, an increase over the preceding year of £2,558,000, while her exports totalled £21,641,000, an increase of £4,152,000 over the corresponding period of last year.

Increase in Food Products.

Some very satisfactory increases are shown over 1910 in the imports of food products into the respective ports of Liverpool and Manchester, as will be seen from the following comparative statement:—

Liverpool			
	1910.	1911.	Increase.
Bacon	£4,102,268	£4,517,870	£415,602
Hams	1,632,223	1,850,289	182,066
Cheese	1,141,834	1,277,169	135,335
Eggs	158,674	178,364	19,690
Apples	729,661	737,602	7,941
Condensed Milk	152,801	162,871	10,070

Manchester			
	£	£	£
Bacon	94,959	104,824	9,865
Hams	75,347	99,530	24,183
Cheese	171,680	195,613	23,933
Eggs	25,677	48,392	22,715
Apples	77,063	97,992	20,929
Condensed Milk	109,687	123,121	13,434

United Kingdom Cereal Imports.

The total quantity of wheat, oats, peas and maize, imported into Liverpool and Manchester during the year 1911 amounted to 32,116,108 and 9,128,800 cwts. respectively, and it is very encouraging to note that Canada's share in these totals amounted to 4,608,020 and 1,503,850 cwts. respectively.

Statistics issued recently contain the complete figures of the imports of grain into the United Kingdom during the past cereal year, which closed on August 31.

A considerable quantity of wheat passed into consumption before August 31 1911, and less than usual remained for the service of the past cereal year. The consequence was that this country had to import the comparatively large quantity of 27,433,396 quarters of wheat and flour during the past twelve months, or 653,869 quarters more than in the previous year.

Wheat and Flour Imports.

The total quantity and value of the imports into the United Kingdom during the past decade of wheat and flour (the latter being reduced to the basis of wheat by having 28 per cent. of its weight added, as is the custom of the Board of Trade, to allow for loss in milling), and also the average value per quarter are shown in the following table, viz.:—

	Quantity Quarters.	Value. £	Per Qr. s. d.
1902-3	26,077,621	37,499,127	28 9½
1903-4	27,927,170	41,204,840	29 6
1904-5	28,055,795	43,313,340	30 10½
1905-6	26,740,913	41,071,380	30 8½
1906-7	26,389,675	39,934,212	30 3½
1907-8	25,701,813	45,906,824	35 8½
1908-9	25,281,871	48,621,427	38 5½
1909-10	27,600,582	51,201,800	37 1¾
1910-11	26,779,529	45,109,165	33 8¾
1911-12	27,433,396	48,807,262	35 7½

Prices of wheat have again been fairly steady during the past twelve months, the fluctuations having been only 7½d. per cwt., the same as in the previous year, and comparing with 1s. 4d. in 1909-10, 1s. 6d. in 1908-9. The highest monthly average in the past year of wheat was 8s. 8½d. per cwt., in April, and the lowest was 8s. 0½d. in September last.

Statistics show that there are more than twelve countries exporting grain to Great Britain, and it is very encouraging to note that Canada occupies second place in both wheat, and

wheat meal and flour; the former being a gain in a year from fourth to second position.

The milling trade of Lancashire whose facilities are growing continually both in Liverpool and Manchester, are in favor of Canadian wheat, and state that the Lancashire market, which is the most direct and best situated for distribution, is prepared to handle all that may be shipped here, claiming that there is no limit to possible expansion.

The trade continue their praises of our wheat, system of grading, and export conditions from Canadian ports, and express the wish that in the near future all our grain would be shipped from our own ports and under Canadian regulations.

INDIVIDUAL RESPONSIBILITY FOR FIRE
WASTEVictim Must Prove Fire Was Not Due to Carelessness
—Municipal Laws and Building Regulations

If a building worth \$6,000,000, such as the Capitol at Albany, was ruined by fire that \$6,000,000 was a loss to the whole community. Insurance compensated the individual owner, but no power on earth could return the material value of the destroyed building, stated Mr. W. E. Findlay to the Montreal Electrical Association.

It was the custom, he said, to sympathize with the victim of a fire loss in America, but in Europe the people if not as sympathetic were more just. The fire victim there had to prove that the fire in question was not due to his carelessness or infringement of civic by-laws. In case he could not clear himself, he was liable for any loss to his neighbors, and would be charged with the expense of calling out the fire department.

Prevention rather than Cure.

As a result of this method which aimed at prevention rather than cure, the fire loss in European countries was equivalent to an annual tax of thirty-three cents per capita as compared with an imposition of three dollars per head per annum in this country. To make this comparison even more odious, the speaker went on to show that while we in America pay \$1.53 per head for the maintenance of our fire equipment, in Europe this protection costs the individual but twenty cents.

The question of fire waste resolved itself to one of individual responsibility, and by an appreciation of this fact in the daily routine, fire waste would in a short time be reduced by fifty per cent.

Six Remedial Recommendations.

In closing, the speaker summed up his address with several suggestions, calculated to reduce the fire waste and prefaced these with a repetition of the fact that fire waste means absolute destruction. The recommendations, six in number, were:—

- Proper municipal building regulations.
- Municipal laws that will reach the individual through whose negligence, uncleanness or carelessness a fire originates.
- Prohibition of the use of strike-anywhere-matches.
- Municipal laws regulating the storage and transportation of oils.

The introduction of fire extinguishing apparatus in all commercial and public establishments.

An appreciation of the individual of his responsibility, and co-operation of in education of the public as to the existing condition and the remedy.

CANADIAN TRADERS WILL ASSIST

The Canadian section of the London Chamber of Commerce elected Mr. J. G. Colmer to succeed the late General Laurie as chairman. It was decided to submit evidence to the Dominions Royal Commission, which commences sittings at an early date. Among the questions proposed for consideration thereat were the companies' laws in British Columbia and other provinces, the bankruptcy laws of the provinces and in the dominions, and the unsatisfactory position of British firms trading in Canada, owing to the import duty being charged upon the selling price of the articles imported instead of on the cost price.

In regard to these subjects, Messrs. G. T. Somers and W. K. George, of the Toronto board of trade, expressed a desire on the part of Canadian traders to assist in the redress of grievances which were detrimental not only to British companies, but to all concerned in Canadian trade, with special reference to the prevailing stringent regulations under the provincial companies' laws.

CANADIAN WOODS USED IN SLACK COOPERAGE

Exports Show Seventeen Per Cent. Increase—Elm Was Most Largely Used

The export of empty barrels and manufactured cooperage stock from Canada varies with the amount left on the different manufacturers' hands after their season's product has been shipped, and changes from year to year. According to figures furnished by the department of customs, exports of staves, heading and barrels in 1910 amounted to \$115,000, while for the year ending March 31, 1912, the amount was \$135,000, an increase of seventeen per cent. The figures for exports and imports were as follows:—

Imports.	
108,939 empty barrels	\$114,510
7,293,000 oak staves	215,482
Total	\$329,992
Exports.	
46,361 empty barrels	\$ 49,663
Staves and heading	85,800
	\$135,463
Excess of imports over exports	\$194,529

Suited for Most Canadian Products.

A total of 234 firms reported to the forestry branch of the department of the interior, the manufacture of cooperage stock during 1911, as shown in a bulletin compiled by Mr. R. G. Lewis, B.Sc.F. These firms were distributed among five provinces, as follows: Nova Scotia, 134; Ontario, 82; Quebec, 8; New Brunswick, 7; British Columbia, 3. While reports were received from only sixteen firms in Nova Scotia for 1910, the increase of 118 firms for 1911 does not necessarily indicate a proportionate increase in manufacture. In Nova Scotia, the industry is carried on by a few large factories and a large number of small portable cooperages. The portable mills move from place to place, locating near the source of supply and sometimes close down temporarily when the demand is small. Farmers, orchardmen and some fishermen manufacture barrels by hand for their own use and their activity in this direction depends upon the size of the potato and apple crops and the fish catch. It is evident that statistics from this source are difficult to obtain and very irregular from year to year.

Slack cooperage includes barrels for the shipping of dry products such as lime, potatoes, apples, dry fish, flour, cereals, and all products which do not require a watertight container. As most Canadian products are of this nature, and as Canadian woods are best suited for slack cooperage this industry is much more important than tight cooperage in Canada. The quantities of wood used for nail barrels are not included.

Spruce Becoming More Important.

During 1911 Canadian cooperages reported the manufacture of over one hundred and two million slack-barrel staves, a decrease of over two million from 1910, and a decrease in the average price per thousand from \$7.03 to \$6.91.

Of the fifteen kinds of wood reported, elm was still the most important, and elm staves formed over 50 per cent. of the total. Elm and spruce together made up over 80 per cent., as they have done in the past three years, but spruce is becoming more important each year. There were over eleven million more spruce staves reported for 1911 and over nine million fewer elm staves. Elm is becoming scarce, although, for cooperage, its price has not increased, and in time it will probably be used exclusively for hoops. Spruce is still fairly cheap and abundant. The other woods on the list change in quantity and shift in place from year to year. This is probably due, not so much to a general increase in the popularity of any particular wood, but rather to the movements of small portable mills which use whatever material is available.

There was an increase in the average price per thousand of staves in all the different woods reported, with the exception of elm, spruce, hemlock, basswood and cedar. Spruce remained at practically the same average price as it was in 1910.

One Particular Class of Stock.

Most of the factories confine their production to one particular class of stock, although many make heading from material left over from stave manufacture.

Basswood is the favorite material for heading when it can be obtained, and formed a third of the total amount of heading manufactured in 1911, at an average price of \$56.73 per thousand sets. Elm, spruce and basswood together formed 72 per cent. of the total. All kinds of wood reported for

heading increased considerably in price with the exception of elm, which remained practically the same as in 1910.

Hoops were made from eight kinds of wood. No hemlock hoops were reported for 1911. Elm, on account of its toughness and elasticity and comparative cheapness, is evidently the best material for hoops, and formed over 75 per cent. of the total. Spruce came next with only 12 per cent., and birch third with 9 per cent.

Some Materials Show Decrease in Price.

Birch was used for one million hoops in 1910 and increased to three million in 1911. Other woods are not used in any quantity.

The decrease in the total number of hoops made (from 38,244 in 1910, to 35,779 in 1911) is due partly to the substitution of wire hoops which are used in conjunction with patent wooden hoops. The use of wooden hoops on the bilge of a slack barrel is imperative, as they prevent the collapse of the barrel when stored on its side.

All materials but spruce, poplar and basswood, show a decrease in price, birch falling from \$9.05 to \$6. In time, birch will probably replace elm as a hoop material, as its toughness, elasticity and comparative abundance fit it for this purpose, while elm is becoming scarce.

SEPTEMBER'S COBALT ORE SHIPMENTS.

The following are the shipments of ore from Cobalt station during September:—

Mine.	Tons.
Beaver	55.1
Buffalo	124.9
Casey Cobalt	43.5
Chambers Ferland	32.0
Cobalt Lake	128.7
Cobalt Townsite	213.2
Coniagas	163.9
Drummond	52.7
Hudson Bay	5.0
Kerr Lake	30.3
La Rose	315.2
McKinley-Darragh	151.7
Millerette	20.0
Nipissing	102.9
O'Brien	107.6
Right of Way	32.6
Temiskaming	50.5
Trethewey	27.6
J. E. Wilkensen	41.2
Total	1,729.0

CANADA'S PROSPERITY HELPS SHIPPING COMPANY

The Manchester Liners, Limited, is a company whose sole interest is in the Canadian trade, and as the result of the volume and range of freights passing between Canada and England an excellent report has been issued.

The profit for the twelve months being returned at £89,000, while the corresponding figure for 1910-11 was £44,000, and after including £6,200 brought forward, there is now a credit balance of £95,200 to be dealt with. This will enable the board to pay three and a half years' arrears of dividend on the 5 per cent. preference shares, while £45,000 has been written off in respect of depreciation, as against £30,000 twelve months ago, leaving £10,000 to be carried forward. Out of the profits for 1910-11, only one year's dividend was distributed on the preference capital. It should be noted that an additional £16,400 of debentures have been cancelled and purchased during the period under review, leaving £134,900 still outstanding in respect of this matter, as against the original total of £300,000 and it is quite permissible to look for a satisfactory level of net earnings for some time to come. The period of prosperity through which the undertaking is now passing has enabled it to make a considerable recovery, and, all being well, the whole of the arrears of preference dividend should be paid off by June 30, 1913. The condition of the company's fleet is excellent, and the fact that the directors contracted for two new vessels in December last indicates the confidence of the board in the continued growth of the business.

The second failure of firms identified with the Consolidated Stock Exchange of New York was announced last week when Messrs R. B. Lyman & Company, of Buffalo, represented in Toronto by Messrs R. B. Holden & Company, at 56 King Street West, suspended business.

FIFTY-FIVE NEW COMPANIES

Two New Financial Corporations Receive Charters—
Year's Total Will be Large

Fifty-five new companies have received charters this week with an aggregate capitalization of \$11,665,000, making a further large addition to the year's total. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following result:—

Province.	No. of Companies.	Capital.
Ontario	18	\$4,495,000
British Columbia	14	2,915,000
Quebec	13	2,095,000
Manitoba	10	2,160,000
	55	\$11,665,000

The largest companies this week are as follows:—

West Canadian Mortgage Company, Vancouver.. \$2,000,000
Bowzan Mines, Haileybury 2,000,000
Bankers Bond Company, Toronto 1,000,000
La Compagnie Electrique Lamartine, Quebec 1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Haney, B.C.—United Farmers, \$25,000.

Kelowna, B.C.—B. P. Construction Company, \$10,000.

New Westminster, B.C.—Westminster Orange Hall, \$30,000.

North Vancouver, B.C.—Nelson Tent and Awning Manufacturing Company, \$25,000.

Sherbrooke, Que.—J. M. Nault, \$40,000. J. M. Nault, J. E. Noel, J. H. Poupard.

Fort William, Ont.—Johnston & Boon, \$200,000. C. W. Boon, R. C. Johnston, L. Johnston.

Haileybury, Ont.—Bouzan Mines, \$2,000,000. B. G. Killoran, A. McMillan, W. E. Wilson.

Victoria, B.C.—Alberni Investments, \$100,000. Reliance Investment and Building Company, \$50,000.

Petrolia, Ont.—Petrolia Motor Car Company, \$300,000. W. English, J. A. MacKenzie, A. M. McQueen.

North Bay, Ont.—Expanse Lumber Company, \$100,000. J. R. Moffat, R. M. Ratray, J. M. McNamara.

St. Boniface, Man.—Acme Sash & Door Company, \$100,000. A. T. Wilson, J. Sutherland, E. M. Counsell.

Minnedosa, Man.—Canadian Development Company, \$60,000. W. G. Brown, G. A. Grierson, G. T. Turley.

Alexandria, Ont.—Schell Foundry & Machine Company, \$100,000. J. T. Schell, J. C. S. Schell, J. A. Macdonell.

Russell, Ont.—Williams Chemical Company, \$100,000. W. F. Kenney, C. E. McCaffery, Russell; W. C. Howell, Ottawa.

Ste. Therese de Blainville, Que.—Dominion Brick Company, \$75,000. N. Robillard, St. Martin; N. Dagenais, Ste. Therese de Blainville; J. O. Lacroix, Montreal.

Quebec, Que.—New Quebec Realty Company, \$20,000. E. Simard, J. Lemieux, M. A. Lemieux. La Compagnie Electrique Lamartine, \$1,000,000. C. A. Paquet, J. C. Paquet, J. H. Paquet.

St. Thomas, Ont.—Noble Manufacturing Company, \$100,000. G. Noble, Stratford; W. K. Cameron, C. B. Taylor. Griffin Coal and Ice Company, \$40,000. F. M. Griffin, W. A. McIntyre, Mrs. T. G. Plewes.

Vancouver, B.C.—Van Schmidt, \$50,000. Indian River Gravel Company, \$50,000. Canadian Northwest Steel Company, \$50,000. I.X.L. Laundry, \$25,000. West Canadian Mortgage Company, \$2,000,000. Carter Dewar Crowe Company, \$100,000. Dominion Gas Company, \$200,000. King Footwear Company, \$20,000.

Winnipeg, Man.—Anglo-Canadian Investment Company, \$50,000. C. E. Gordon, G. S. Wickman, J. M. Nichols. Northern Manitoba Townsite Company, \$500,000. G. Anderson, Winnipeg; R. Kerr, St. Larent; J. Dunlop, Portage la Prairie. Canada Floors, \$500,000. M. H. Teskey, R. J. A. Prince, W. Manahan. Manitoba Land and Loan Company, \$500,000. E. B. Eadie, R. Siderfin, D. Wilson. King Speers, \$100,000. R. J. Speers, Wilkie; N. A. MacMurchy, Unity, Sask.; W. S. King, Winnipeg. Continental Grain Company, \$250,000. E. C. Kelly, A. M. Clarke, A. H. Gilmour. Associated Investments, \$100,000. T. M. Ryan, W. Plumm, J. Taylor.

PRESENTATION TO MR. H. C. COX

Mr. H. C. Cox, the new president of the Imperial Life Assurance Company, was dined at the National Club, Toronto, this week by a number of his personal friends amongst the directors, officers and staff of the Canadian Life Assurance Company. There were about twenty present, including Honorable Geo. A. Cox, president; Mr. J. H. Plummer, vice-

H. C. COX,
President of the Imperial Life Assurance Company.

president; Honorable Senator Jaffray, Mr. E. R. Wood and Mr. Alex. Bruce, directors; Mr. E. W. Cox, general manager; Mr. T. G. McConkey, superintendent of agencies; Drs. Grasett and Scadding and a number of other officials.

Mr. J. H. Plummer expressed the regret of the directors of the Canada Life Assurance Company in losing the services of the efficient manager of the company's largest branch. Mr. T. G. McConkey stated that the officers and staff were also sorry at the severance of the connection. Mr. Plummer then made a presentation to Mr. Cox on behalf of those present of a pair of vases.

Mr. Cox, in reply, pointed out that while he had joined another corporation, yet there was room for both companies to develop and grow independently of each other without interference or friction, and he intimated that the sound methods and policy which he had learned under his brother, Mr. E. W. Cox, general manager of the Canada Life, should be applied in connection with the Imperial Life.

The following issues have been listed on the London Stock Exchange:—Canada Cement, £15,000 6's; Rio Tram, 361,492 shares; Sao Paulo Tramway, 90,796 shares.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

St. John, N.B.—October 7.—City Camp Hotel. Loss and origin unknown.

Chatham, Ont.—Mr. J. Williams' barns at Fletcher. Loss and cause unknown.

Quebec, Que.—October 7.—Hospice St. Charles. Loss and origin unknown.

Aylmer, Ont.—October 8.—Mr. J. Wickett's residence. Loss and cause unknown.

Halifax, N.S.—Mr. Bissett's barn. Loss unknown. Origin lightning.

Lakeport, Ont.—October 7.—Mr. C. Cook's barn. Loss unknown. Cause, upset lantern.

Summerside, P.E.I.—September 22.—Mr. Silliphant's barn. Loss \$100. Origin unknown.

Victoria, B.C.—September 29.—Mrs. Knight, 568 Toront Street. Loss \$50. Origin unknown.

Scarboro Township, Ont.—October 4.—Schoolhouse. Loss \$8,000. Origin, supposed incendiary.

Moncton, N.B.—September 29.—Calhoun Lumber Company's mill. Loss \$160,000. Origin unknown.

Tyendinaga Township, Ont.—October 7.—Mr. A. McCormack's residence. Loss and cause unknown.

Vancouver, B.C.—October 4.—Vancouver Lumber Company's dry kiln. Loss \$35,000. Origin, sparks.

Mount Forest, Ont.—October 7.—Elevator damaged. Loss unknown. Origin, supposed sparks from engine.

St. Thomas, Ont.—October 7.—Rudolph and Beggs' brewery. Loss \$1,500; insured. Cause unknown.

Wolsley, Sask.—October 2.—Mr. L. Thompson's residence. Loss \$2,500. Origin, spark from chimney.

Wyoming, Ont.—October 8.—Mr. W. Williams' barn. Loss \$2,000, insurance \$1,200. Cause, probably tramps.

Gardston, Alta.—October 3.—Mr. Stanley Smith's house. Loss \$1,200, partly insured. Origin, supposed incendiary.

East Zorra, Ont.—October 9.—Mr. D. Miller's barn. Loss unknown. Origin, supposed sparks from threshing machine.

Charlottetown, P.E.I.—October 2.—Abegweit Athletic Association's grand stand. Loss unknown. Origin incendiary.

Halifax, N.S.—October 4.—Messrs. T. F. Courtney's building corner, Brunswick and Jacob Streets. Loss and origin unknown.

Winnipeg, Man.—October 7.—Greenhouses owned by Mr. J. T. Riddle, Crescent Lodge, Headingly. Loss \$10,000, insurance \$4,000. Cause unknown.

Winnipeg, Man.—October 7.—196 Donald Street. Loss slight. Cause, upset oil stove. Rear 417 Bannatyne Avenue. Loss slight. Origin, supposed incendiary.

Belleville, Ont.—October 2.—Victoria Hotel stable. Loss \$575. Origin, supposed incendiary.

October 7.—Mr. McLaughlin's garage, West Bridge Street. Loss slight. Cause, gasoline.

Truro, N.S.—October 3.—Mr. Newton Lee's livery stable. Loss \$7,500. Insurance, \$2,000 with Insurance Company of North America, Philadelphia. Origin, supposed defective pipe. Mr. Lewis G. Archibald's furniture stored in stable. Loss \$1,000. Insurance, \$350 with Nova Scotia Insurance Company.

New Westminster, B.C.—September 22.—Mr. Wiggin's residence, Seventh Avenue and 12th Street. Loss slight. Origin, defective chimney. Mr. T. Meredith, 5th Avenue and 6th Street. Loss \$8,000; insured.

September 27.—Mr. E. C. Trane's, Royal Avenue and 6th Street. Loss \$30; insured. Origin, electrical defect.

Woodstock, Ont.—September 28.—Mrs. M. Smith's residence, 73 Riddell Street. Loss \$43. Insured with Economical Company, of Berlin. Origin, lighted match caught curtains.

October 3.—Mr. H. Baldersens' residence, 822 James Street. Loss \$120. Mr. Baldersens succumbed to burns received. Insured with Waterloo Mutual. Origin, smoking in bed.

Toronto.—October 4.—Mr. R. F. Unwin's apartment house, 378 Markham Street. Cause, incendiary. Fire in five places. Loss, building \$350; contents \$210. Insurance, Royal Insurance, \$16,000. Adjusted by Ross and Wright.

October 7.—Royal Templars' Building, Dovercourt and Queen Street. Loss about \$8,000. Insurance with British America Insurance Company.

October 5.—Dominion Brewery, Queen Street East. Loss \$50. No interruption to business.

October 6.—C. Korroff, 509½ Yonge Street. Loss \$993. Insured in Liverpool, London and Globe for \$3,000, and Equity for \$3,300. Cause unknown. Loss adjusted by Messrs. Ross and Wright.

Gatineau Point, Que.—October 7.—Business section. Losses, total \$53,000, less than half only being insured. Mr. Albert Paquin, store and dwelling, \$7,000; Mr. Alphonse Beland, furniture store and dwelling, \$15,000; Mr. Edward Charron, double tenement house, occupied by himself and Emile Lafortune, \$3,000; Mr. J. Diotte, contents of dwelling, shoe store and building owned by Mr. Euclid Charron, \$1,000; Mayor Lafortune, office and dwelling, \$8,000; Mr. T. Charrette, unused brewery building and vacant house, \$2,500; Mr. L. N. Villeneuve, storehouse and contents, \$8,000; Mr. Emile Douray, ice cream parlor and restaurant, \$2,000; Mr. Joseph Douray, blacksmith shop, \$2,500; the Rev. Father Beauchamp, owner of two-story dwelling occupied by Messrs. D. Poyser and Joseph Plouffe, \$3,000. Origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Ridgetown, Ont.—Mrs. Kindree's barn. Loss \$3,000. Insurance, total \$1,800, with Howard Mutual. Cause, supposed incendiary.

Parkhill, Ont.—September 19.—Mrs. J. D. McColl's barn. Loss \$2,500. Insurance with Northern Company, \$750. Origin, lightning.

Sackville, N.B.—September 30.—The insurance on properties affected by fire at Sackville was as follows:

Commercial Union.—Mr. Alexander Ford's hotel, building, \$2,200; furniture, \$1,000; stable, \$500. Captain Peter Hanson building, \$1,800; Mrs. Linnie Hanson's building, \$1,700.

Fidelity Phoenix.—Mr. Ford's hotel, furniture, \$1,500; Mabel Doull building, \$500; Mr. George S. Wry, stock and furniture, \$500.

Hudson Bay Company.—Mr. George F. Estabrook's stock, \$400; Mr. C. G. Steadman's stock, \$350.

British Crown.—Henderson Drug Company, stock \$500.

London Assurance Company.—Messrs. Fawcett Brothers, \$1,000; Sackville Hay and Feed Company, \$800; Mr. W. S. Fraser, \$1,500.

Western Insurance Company.—Henderson drug store, \$1,700.

Nova Scotia Fire Insurance Company.—Various \$1,500. The individual losses reported as follows:—

Captain Peter Hanson, \$12,000; Mr. A. B. Copp, \$1,500; Messrs. Copp and Fawcett, \$1,000; Messrs. Copp and McCord, \$500; Mrs. Charles A. Doull, \$6,000; Mr. C. W. Cahill, \$8,000; Mr. George Wry, \$2,500; Mr. James H. Teare, \$2,000; Messrs. Fawcett Brothers, \$7,000; Mr. Charles Biggs, \$300; Mr. R. G. Henderson, \$4,000; Mr. W. Hibbert Tracey, \$5,000; Mr. Leslie Carey, \$2,500; Quality Cafe, \$500; Mr. George F. Estabrooks, \$200; Mr. Alexander Ford, \$3,000; Tribune Printing Company, \$300; Frost Printing Company, \$500; Mr. William McDonald, \$250.

The Masons, Oddfellows, Royal Arcanum and Sackville Social Club lost heavily. The Oddfellows had some insurance, and the others none.

A party of officers of the Metropolitan Life Insurance Company have been touring the West, having visited Edmonton and other centres. Among them were the following: Mr. J. E. Kavanagh, Dominion superintendent of agencies; Mr. J. B. Edgett, the local superintendent; vice-president Haley Fiske; Mr. Frank O. Ayres, fourth vice-president; Senator Tully, chief solicitor; Dr. Knight, medical director; Mr. W. Stahler, comptroller of finance; Mr. J. B. Claxton, of Montreal. All these officials are on their way to the Calgary convention of the company's Western agents. A strong bid will be made to secure next year's convention for Edmonton.

Mr. G. Cyril Cassels, who for many years has been connected with the Bank of Montreal, is severing his connection with that well-known institution in order to become a member of the international banking house of Messrs. William P. Bonbright and Company. In 1885 Mr. Cassels joined the Bank of Montreal at Toronto, in which branch he served for several years, afterwards being transferred to Halifax, N.S. He was then for some years at the New York office, after which he came to Threadneedle Street, where he has been assistant manager for the last six years. Mr. Cassels leaves for New York on October 12th, per SS. Mauretania, and will remain there for a few months before becoming actively associated as a resident London partner with Mr. William F. Fisher and Lord Fairfax.

MANY INDUSTRIAL BOND ISSUES

Several Important Offerings This Week—Activity of the Market

Several recent announcements indicate the probability of activity in industrial bond offerings. This week two more issues are being made and many are in contemplation. If the demand proves as strong as the tendency to float new issues, the winter market will be without complaint by the bond houses.

At 92½ and interest, \$150,000 more 5% first mortgage 30-year sinking fund gold bonds of the Calgary Power Company, Limited, are on the market, the Royal Securities Corporation making the offering. The issue is to provide for extensions of the company's plant and activities. The company has bonds of \$3,000,000 and a like amount of common stock. Of the former, \$1,849,820 has been issued, and of the stock, \$1,850,000. This company was organized to acquire the properties of the Calgary Power and Transmission Company, Limited, together with additional water rights on the Bow River, and to supply electric light and power to Calgary. Power was first turned on May 1st, 1911, and the net earnings for the first six months from the sale of 3,500 horsepower have been more than sufficient to pay all interest charges. As the demand for power will increase proportionately with the growth of the city it is expected that the company will have no difficulty in selling the entire present capacity of 13,000 horsepower. The following is an estimate of the gross and net earnings from the sale of 13,000 horsepower: Gross earnings, \$300,000; operating expenses, \$50,000; net earnings, \$250,000. The amount required for bond interest is \$92,491.

Riordon Pulp and Paper Company.

The unsold balance, \$500,000, of the \$1,500,000 6 per cent, first mortgage sinking fund bonds of the Riordon Pulp and Paper Company, Limited, are offered this week by Messrs. Murray, Mather and Company, Toronto, and Messrs. N. B. Stark and Company, Montreal. The bonds are issued in coupon form in denominations of \$100, \$500, \$1,000 and \$5,000. The entire issue is repayable at maturity at \$105 per \$100 bond. The net earnings of the company for the past three years average \$226,410, over two and one-half times interest on the present issue of bonds, despite the fact that the Calumet mill was not in operation during the greater part of 1911, as it was being re-built in steel and concrete. With the additions under way and the benefits to be derived from the new capital, the earnings for 1912, according to the estimate of the managing director, will amount to \$300,000, three and one-third times bond interest requirements. The management of the company has been practically continuous for the past 50 years. All the directors are either practical pulp and paper merchants or experienced lumbermen, ensuring the competent supervision of all affairs of the company.

Of the \$2,500,000 bonds authorized, \$1,000,000 are held in the treasury and can be issued only to the extent of two-thirds of the actual cost of extensions and additions to the fixed assets of the company.

Canadian Cottons, Limited.

The Royal Securities Company has purchased \$1,000,000 of the five per cent, first mortgage bonds of the Canadian Cottons, Limited. The company was incorporated in 1892, under the name of the Canadian Colored Cotton Mills Company, Limited. The name of the company was changed in August, 1910, to Canadian Cottons, Limited, and at the same time in order to provide for the acquisition of new properties, the capitalization of the company was increased. \$1,000,000 preferred stock was issued for cash, and the balance of the new stock issued in exchange for properties. The authorized capital of the company is \$4,500,000 6% non-cumulative preference stock and \$3,500,000 common stock, of which there is issued and fully paid \$3,675,000 and \$2,715,000 respectively. Quarterly dividends at the rate of 6% per annum are being regularly paid on the preferred stock.

The bonds form part of a total authorized issue of \$5,000,000, of which \$4,500,000 are outstanding. They are secured by a fixed and specific first mortgage and charge upon all the fixed assets of the company now owned or hereafter acquired.

Commencing July 1st, 1913, a cumulative sinking fund of 1% per annum, payable half-yearly, provides for the redemption of bonds by purchase in the open market at or under 105 and accrued interest, or by drawings at that rate.

The company has adopted a policy of specialization, confining certain mills to certain lines to which they are best adapted, thus saving the necessary expense of continuous changes in the variety and style of the product of the various mills.

An offering of \$125,000 6% first mortgage sinking fund gold bonds of the Dominion Sewer Pipe Company, Limited,

is being made by the Dominion Bond Company. The company operates two properties near Toronto, the sewer pipe factory being at Swansea, just outside of the city limits at the Humber, the site comprising 12½ acres, while the brick plant is in the township of East Flamboro near Watdown Station, where the company has 140 acres of fine clay.

The total assets of the company are \$413,726, nearly three and one-half times the bond issue, while the earnings in 1911 were \$35,856, nearly five times the bond interest. The estimated earnings for 1912, due to enlargements and additions, for which the bond issue is made, are placed at \$65,000, which is more than eight and one-half times the bond interest requirements. A sinking fund of 5% will retire the bonds at \$105.

Northern Ontario Light and Power Company.

A block of the bonds of the Northern Ontario Light and Power Company, Limited, have been underwritten by Messrs. Coates, Son and Company and the British Electric Traction Company, both of London, and Messrs. Hanson Brothers, of Montreal. The bonds will probably be offered for subscription at an early date. The Northern Ontario Light and Power Company was organized in February, 1911, for the purpose of taking over the properties of the Cobalt Power Company, Limited, and its subsidiary companies, and the Cobalt Hydraulic Power Company, Limited. It also acquired the Cobalt Light, Power and Water Company, Limited. The company has an authorized issue of capital stock of \$5,000,000 common and \$2,500,000 6 per cent, cumulative preferred. There is now outstanding \$3,085,000 common and \$1,800,000 preferred. The company owns and operates a hydro-electric plant at Hound Chute Falls, on the Montreal River, about six miles from Cobalt.

The company has taken over the property and assets of the British Canadian Power Company, and formal transfer of the property, it is stated, will take place about the middle of the current month, at which time a meeting will be held by the directors of the British Canadian Company to ratify the sale. The property is to be paid for by \$2,000,000 first mortgage 6 per cent, bonds of the Northern Ontario Light and Power Company, Limited, which are due April 1, 1931. This is a part of an unauthorized issue of \$15,000,000, of which \$2,445,000 are now outstanding.

The following are the earnings of the company for the eight months ended August 31:

Gross earnings	\$33,633	\$24,694	\$188,347
Oper. expenses and taxes	10,478	10,807	92,281
Net earnings	23,155	24,694	188,347
Other income	\$ 206	\$ 116	\$ 1,476
Total income	23,361	24,810	189,823
All charges	\$12,675	\$12,613	\$102,227
Surplus	\$10,686	\$12,197	\$ 87,590

COAL FOR PANAMA CANAL SHIPS

Montreal capitalists, including several of the promoters of the Kingston (Jamaica) Street Railway, are behind a project known as the Port Royal Floating Dry and Coaling Docks, Limited. It is the intention of the company to furnish coal to ships using the Panama Canal, which will pass by Port Royal both ways. As a matter of fact, a steamer coming from Liverpool or New York and going to the Far East or Pacific ports makes the first call for coal at Kingston and her last on the return voyage. It is 5,000 miles to Liverpool, 4,000 to Gibraltar, 1,600 miles to New York, and from Kingston to Colon at the mouth of the canal the distance is but 580 miles.

The intention of this company is to build a first class floating dock in England and then tow it to Jamaica, meantime building the coaling station and work shops on land donated by the government. The government will also give thirty years exclusive franchise, besides the valuable site, will admit all the materials and dock duty free and also take a block of the common stock, paying for the same and allowing the interest to be deferred.

The cost of the enterprise is estimated at \$2,000,000, and it is understood that a year will be required to build the dry-dock and local works. There will be a bond and stock issue.

The number of directors of the Brazilian Traction, Light and Power Company, Limited, has been increased from five to fifteen.

A Dominion license has been issued to the National Union Fire Insurance Company, of Pittsburgh, Pa., for the transaction of tornado insurance in addition to fire insurance, for which it is already licensed. Mr. Henry J. Richmond, Toronto, is the company's chief agent.

BLACK LAKE ASBESTOS REORGANIZATION

Capital Will be Same as That of Old Company—
Majority of Holders Have Agreed

The recent incorporation of the Black Lake Asbestos and Chrome Company, Limited, with a Dominion charter and head office at Toronto, is the first outward sign of the quiet reorganization effected of the Black Lake Consolidated Asbestos Company, Limited. The old company, one of the modern mergers, was capitalized, including bonds, at \$5,500,000, and met financial difficulties. A bondholders' and shareholders' committee was appointed to reconstruct the company. A reorganization committee, Messrs Robert F. Massie, John B. Kay, and Hamilton Cassels, were appointed, and purchased the assets of the old company. A new company, the Black Lake Asbestos and Chrome Company, Limited, was formed, with bonding powers and capitalization as follows:—

Six per cent. income bonds (to be issued bond for bond to holders in the old company)	\$1,250,000
1st mortgage 6% bonds (to be held in treasury) ..	250,000
Preferred stock	1,000,000
Common stock	3,000,000
	\$5,500,000

Capital of Old Company.

The capital stock and bonds of the old company were as follows:—

	Authorized.	Issued.
Bonds	\$1,500,000	\$1,230,500
Preferred stock	1,000,000	1,000,000
Common stock	3,000,000	3,000,000
	\$5,500,000	\$5,230,500

It was also decided to make an assessment of 10% on the bonds, 5% on the preferred shares, and 2% on the common shares of the old company. This assessment was required to be paid to the committee in one instalment on July 15th, 1912, or in four equal instalments (with interest at 6% from July 15 on the deferred instalments) on the 15th of July, September, November and January, 1913.

Have Agreed to Terms.

Holders of the securities of the old company, agreeing to the reorganization, represent the following amounts:—

Bonds	\$1,182,000
Preferred stock	963,000
Common stock	2,780,000
	\$4,925,000

As a result of the assessment on these holders, the new company will obtain the following cash:—From bonds, \$118,200; from preferred stock, \$48,150; and from common stock, \$55,600; total, \$221,950.

The bondholders who do not agree will receive from the trustee their per centage of the sale price of the property.

Low Prices and Labor Problem.

The company's mill at Black Lake has been in continuous operation since the 10th of April last, and, on the whole, the results have been satisfactory and as good as had been expected by the committee. Prices for the product are still very low, but there is reason to expect an improvement in this respect.

The labor problem has been a serious one, as it has been impossible to obtain sufficient men to operate the plant to its full capacity, and in addition the continuous rains have hampered operations very much. The books of the old company have been duly audited by an independent auditor.

New bonds and stock certificates will be issued in place of the securities of the old company as soon as they are received, and the assessments on the old securities have been paid in full. The committee hope that the ultimate results from the operations of the new company will be satisfactory to all concerned.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended October 4th:—Crown Reserve, 35,130; Bailey Cobalt, 43,140; Cobalt Townsite, 58,000; O'Brien, 86,434; La Rose, 153,700; Buffalo, 123,631; Coniagas, 316,783; Beaver, 70,751; Temiskaming, 62,366; total, \$998,448 pounds, or 499 tons. The total shipments since January 1st are now 33,001,452 pounds or 16,500 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

PACIFIC PORT DEVELOPMENT

Private Ownership Versus Railroad Enterprise—Some
Likely Undertakings

Canada's ports on the Pacific will be discussed at some length in a paper prepared for the annual convention of the American Society of Civil Engineers in November by Mr. H. M. Chittenden. He will deal with the largest ports of the Pacific Coast and the influence of the Panama Canal thereon. The British Columbian ports, it will be noted in the course of his paper, particularly Vancouver, are wholly private-ownership ports, and the water-front development is almost exclusively in the hands of the railroads. It is a striking contrast to the great Canadian port of Montreal, which is one of the most progressive public-ownership ports in the world. Not until after the present period of expansion has passed, and public thought, now absorbed in speculative activities, has time to take stock of the situation, is it likely that the problems of port control will be given very serious consideration, he thinks.

The British Columbian ports being still almost exclusively under railroad control and ownership, as far as port facilities are concerned, the rates are privately controlled and the charges absorbed largely by the railroads.

At the Second Narrows.

No comprehensive scheme of development of Vancouver port has been adopted. Special studies have been and are being made of different parts of the harbor, and there are rumors of gigantic development plans by private interests. The Great Northern Railway has a fine new pier under construction and other private improvements are in progress; but there is as yet no general plan, no distinctive scheme of port administration, and no provision of public funds.

The conformation of the harbor and the handicap of tidal fluctuation and currents have suggested an improvement which, though costly, would seem to possess great merit. That is to place a lock and dam across the throat of the harbor at the second Narrows, thus holding the upper part of the Inlet at high tide and making it a fixed-level fresh-water harbor. This would restrict the tidal area to one-third its present extent and would reduce tidal currents in the lower harbor so much as greatly to improve conditions there. It would seem on the face of it that this would be an improvement of great importance to the future of the port.

New Westminster and Victoria.

The fresh-water port of New Westminster is taking active steps in harbor development. It has recently expended \$15,000 on the study of a plan and its presentation and is about to put into effect the one prepared for it by Mr. A. O. Powell, M. Am. Soc. C.E. It comprises wide, marginal streets, routes for railways, the extension of the city quay, and a long waterway in a slough parallel to the river, from which the river is to be excluded at the upper end. A succession of parallel slips, oblique to the axis of the waterway, will develop a berthing space of 7½ miles.

That sometime staid and delightful provincial town of Victoria, more distinctly British than any other port of the Pacific, says Mr. Chittenden, has become infected with the Panama bacillus and is cogitating what it may do to be prepared for the changes which it has been told are about to ensue. No definite plans have as yet been evolved, but among the tentative suggestions are an outer harbor to be protected by a breakwater in front of the present entrance to the inner harbor; and also a development in Oak Bay on the opposite side of town fronting to the eastward.

Studies for the port of Prince Rupert are now in progress under the direction of Mr. Bogue. Prince Rupert city is on an elliptically shaped island about 6 miles long north to south by 4 miles east and west. The "lakes" which separate the island from the mainland in the rear have an area north of the railroad crossing of about 40 square miles. It is not unlikely that the north and south passages will be dammed off and provided with locks, thus converting the lakes into a tideless, fresh-water harbor just at the level of high-tide. While this development is still some distance off, it has such great advantages, in view of the extreme tidal fluctuation in Prince Rupert harbor, that it will probably be realized eventually.

The following companies will apply to the Dominion Parliament for power to increase their capital stock:—Ottawa Light, Heat and Power Company, from \$2,000,000 to \$5,000,000; Ottawa Gas Company, from \$500,000 to \$1,000,000; and Ottawa Electric Company from \$1,500,000 to \$3,000,000.

Application will be made to the Dominion Parliament for an act to incorporate the Canada Hail Insurance Company, with head office at Winnipeg, and power to carry on the business of hail insurance in all its branches. Mr. W. J. Kidd, Ottawa, is solicitor for the applicants.

OGILVIE FLOUR MILLS COMPANY, LIMITED

SUBMITS SATISFACTORY STATEMENT.

For fiscal year ending August 31st, 1912,

Company Showed Net Profits of	-	-	\$521,431.22
Compared with	-	-	481,309.79

in previous year.

Directors elected and officials appointed for ensuing year.

Montreal, October 11.—The eleventh annual general meeting of the shareholders of the Ogilvie Flour Mills Company, Limited, held to-day at the head office of the company, marked the closing of a very successful year. Mr. C. R. Hosmer, the President of the company, presided, and among those present were:—

Mr. C. R. Hosmer; Sir Edward Clouston, Bart.; Sir Montague Allan, C.V.O.; Mr. W. A. Black, Mr. H. S. Holt, Mr. George E. Drummond, Mr. Charles Chaput, Mr. C. R. Black, Mr. W. H. Evans, Mr. F. H. Thompson; Mr. S. A. McMurtry, Treasurer; Mr. G. A. Morris, Secretary.

The President, Mr. C. R. Hosmer, in moving the adoption of the annual statement, submitted the following report:

A balance sheet showing the assets and liabilities of the Company, also profits for the past year, is submitted.

The Company's accounts have been audited by Messrs. Creak, Cushing and Hodgson, chartered accountants.

The Company's various mills, elevators and other properties are being maintained at the highest state of efficiency, and are doing most effective work.

Owing to the growing demand for the Company's products west of Winnipeg and on the Pacific coast, the Company is erecting a flour mill and elevator at Medicine Hat (657 miles west of Winnipeg), where favorable terms have been made with the city, and which should be completed and in operation early next summer.

The Directors regret to record the death in May last of their friend and colleague, your Vice-President and Managing Director, Mr. F. W. Thompson, who had been connected with the Company since 1882. Mr. Thompson's loss was a great one, not only to this Company, but to the community at large, where his marked ability and sterling character were highly appreciated.

Mr. W. A. Black, who has been appointed Vice-President and Managing Director, has been connected with this Company for 28 years.

The usual dividends have been paid during the year on the preferred and common stock.

Mr. W. A. Black, Vice-President and Managing Director, in seconding the report, said:

"With the President, I desire to express on this occasion, my deep feeling of regret and sorrow at the death of our late Vice-President, Mr. F. W. Thompson, to whose energy and devotion to the interests of the Company is so largely due its success, and with whom I had been associated in this business for some 28 years.

"The wheat of the past season has been one of the most difficult we have had to deal with for many years, owing to the small proportion of choice grades of milling wheat, and its irregularity in quality, but with much care and a thorough system in testing and grading, and superior milling methods, we have succeeded in maintaining the high quality of our various brands, so that they have never been more highly esteemed by the home and foreign trade than at the present time.

"As evidence of this, and notwithstanding the especially keen competition resulting from a large addition to the milling capacity of the country during the past year, I am pleased to say our sales show a substantial increase in every Province in the Dominion.

"The financial results, I trust, will prove satisfactory to our shareholders, allowing us to carry forward, after the payment of all charges and dividends, \$76,431.22 to the credit of profit and loss, which makes the total at the credit of that account \$510,483.01.

"The various mills, elevators, warehouses, etc., have been thoroughly gone over and put in first-class condition, and all costs for such have been charged to earnings.

"The President has mentioned the decision to erect another plant at Medicine Hat. Our demand in the West has been more than our Winnipeg mill can properly take care of, but the Medicine Hat mill will put us in an exceptionally strong position for the local trade in Alberta and the Pacific coast, and it is possible the opening of the Panama Canal may make other markets available to us, which can be reached with advantage from the new mill.

"Although harvesting and marketing have been very considerably delayed by rain, I am pleased to say we are assured of a better yield and much higher average quality than in the previous season.

"I desire to mention at this time the loyal support accorded by the staff in furthering the best interests of the Company, and look forward with every confidence to its continued success."

NET PROFITS FOR YEAR.

The balance statement for the year ending August 31st, 1912, showed net profits for the year of \$521,431.22, compared with \$481,309.79 in the previous year.

The net profits added to \$434,051.79, at the balance of profit and loss, August 31st, 1911, brought the total amount available for distribution to \$955,483.01. Of this amount bond interest and dividends on preferred and common stocks required \$445,000, leaving a balance to be carried forward for the year of \$510,483.01.

DIRECTORS AND OFFICERS.

The following gentlemen were elected Directors of the Company for the ensuing year:—

Mr. C. R. Hosmer; Sir Edward Clouston, Bart.; Sir Montague Allan, C.V.O.; Mr. H. S. Holt, Mr. Charles Chaput, Mr. George Drummond, Mr. Shirley Ogilvie, Mr. W. A. Black, Mr. H. W. Norton.

At a subsequent meeting of Directors the following officers were appointed:—

Mr. C. R. Hosmer, President; Mr. W. A. Black, Vice-President and Managing Director; Mr. S. A. McMurtry, Treasurer; Mr. G. Alfred Morris, Secretary; Mr. J. R. W. Papineau, Assistant Secretary; Mr. George M. Heath, General Superintendent; Mr. F. H. Thompson, Superintendent; Mr. R. R. Dobell, Manager (Winnipeg), Mr. George A. Coslett, Manager (Fort William), Mr. Henri Merrill, Sales Manager (Province of Quebec), Mr. J. E. Weekes, Sales Manager (Province of Ontario).

CARL RIORDON, Esq. - - - - - MONTREAL
Managing Director

The Riordon Pulp & Paper Company, Limited, was formed of the Riordon Paper Mills, Limited (established 1859), and G. H. Perley & Co. (established 1899). The Company has 1,184 square miles of timber limits (valued at \$2,055,800) in the Province of Quebec on the Rouge River (a branch of the Ottawa River). The plants are located at Hawkesbury and Merritton, Ontario (pulp and paper), and Calumet, L'Annonciation and St. Faustine, Quebec (lumber). The total annual capacity is 37,500 tons sulphite pulp, 6,000 tons ground wood pulp, 6,000 tons paper and 15,000,000 feet lumber (B. M.)

Net earnings of the Company for the past three years average \$226,410, over two and one-half times interest on the present issue of bonds, despite the fact that the Calumet mill was not in operation during the greater part of 1911, as it was being rebuilt in steel and concrete. With the additions under way and the benefits to be derived from the new capital, the earnings for 1912, according to the estimate of the Managing Director, will amount to \$300,000, three and one-third times bond interest requirements.

The management of the Company has been practically continuous for the past 50 years. All the directors are either practical pulp and paper merchants or experienced lumbermen, ensuring the competent supervision of all affairs of the Company.

Of the \$2,500,000 Bonds authorized, \$1,000,000 are held in the treasury and can be issued only to the extent of two-thirds of the actual cost of extensions and additions to the fixed assets of the Company.

The repayment of the entire issue, either before or at maturity, at 105, is an important feature, assuring an appreciation of five points to purchasers at par.

SPECIAL DESCRIPTIVE CIRCULAR ON REQUEST.

EARNINGS		
Net earnings after providing for all charges, as certified by H. Vigeon & Company, chartered accountants, have been :		\$413,726

1909	\$14,824.	1911	\$35,856.
1910	25,248.	1912 (estimated)	65,000.

(The estimate for 1912 is based on additions and improvements to make which the bonds are issued.)

BONDS

The Bonds of the Company are secured by a mortgage to the National Trust Company, Limited, as Trustee, and constitute an absolute first charge on the properties of the Company, real and personal, now owned or to be acquired hereafter, including patents, trade-marks, profits, rights, privileges and franchises.

SINKING FUND

A Sinking Fund of 5 per cent. per annum, which will become operative in 1915, is calculated to retire the entire issue at maturity.

Beginning in 1915, the Bonds are redeemable for sinking fund purposes as a whole at 105 and accrued interest on any interest date on six weeks' prior notice, or none offering on these terms, by annual drawing at 105 and accrued interest.

PROPERTIES OF THE COMPANY

The properties of the Company include the Sewer Pipe factory at Swansea, just outside the City limits of Toronto, at the Humber, the site comprising 12½ acres; and 140 acres of practically inexhaustible deposits of fine clay in the Township of East Flamboro, near Waterdown Station, where the brick plant is located.

It is estimated that the additions and improvements now under way WILL ADD \$30,000 PER ANNUM to the net earnings of the Company.

SUMMARY

Fixed Assets		\$351,726
Total Assets		413,726

ADVERTISER.—Desires to hear from investment or trust companies who are desirous of obtaining the services of a young man who has served eight years as manager with a leading Canadian Bank. Apply Box 97, The Monetary Times, Toronto.

WANTED.—Contracts from Board Fire Insurance Companies for City of Regina. Excellent connection. Write Cathcart, Price & Boyd, Limited, Regina, Sask.

BANK MANAGER, twenty-six years of age, married, wants position of trust and responsibility, where diligence and use of common sense would be appreciated, and prospects of advancement good. Highest references. Apply Box 99, The Monetary Times, Toronto.

Owing to the demand with which the new stock issued by the Howard Smith Paper Company, Limited, has been taken up by the present controlling interests, a public issue will not be necessary. The authorized capital is \$1,000,000, of which \$800,000 has been issued to and taken up by the directors and their friends.

Forest fires have destroyed considerable quantities of hay in the Peace River district, and owing to the scarcity on the Edson trail hay will fetch probably \$75 per ton this winter, said Mr. R. J. Dinning, of the Merchants Bank, Castor, Alta., who returned recently after a three months' trip through the Grande Prairie and the Peace River country.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

INSTITUTE OF ACTUARIES, STAPLE INN HALL, LONDON

COLONIAL EXAMINATIONS

Notice is Hereby Given:—

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, Winnipeg, and Cape Town, and also in Calcutta, from Monday, 21st April to Saturday, 26th April, 1913, inclusive.
2. That the respective Local Supervisors will fix the hours of the Examinations, and inform the Candidates thereof and of the address at which they will be held.
3. That Candidates must give notice in writing to the Honorary Secretaries in London (England), and pay the prescribed fee of one guinea, not later than 31 January, 1913.
4. That Candidates who have passed Part I of a previous Syllabus will be permitted to take the Third Paper of Part I of the Syllabus dated 16 June, 1908, as a separate Examination, and will not be required to pay an Examination Fee.
5. That Candidates must pay their current annual subscriptions prior to 31 December, 1912.

(By order) L. F. HOVIL, Hon.
R. R. TILT, Secs.

G. CECIL MOORE,
The Imperial Life Assurance Company,
Supervisor in Toronto, Canada.

MAPLE LEAF MILLING COMPANY, LIMITED

DIVIDEND NOTICE.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) has been declared on the Preferred Stock of the Maple Leaf Milling Company, Limited, for the quarter ending October 4th, 1912, payable October 18th, 1912, to shareholders of record of October 4th, 1912. Transfer books will be closed from October 4th to October 17th inclusive.

By order of the Board.

J. CARRICK,
Secretary.

THE CONSUMERS' GAS COMPANY OF TORONTO

The annual general meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors, and for the election of directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on Tuesday, the 29th of October, 1912, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend of one per cent. (1%) has been declared on the ordinary shares in the capital stock of THE MEXICAN LIGHT AND POWER COMPANY, LIMITED, payable on the 15th day of October, 1912, to shareholders of record at the close of business on the 5th day of October, 1912;

THAT the transfer books of the Company for the ordinary shares will be closed from the 7th October to the 15th October, 1912, both days inclusive.

Dividend cheques for shareholders will be payable at par at The Canadian Bank of Commerce, Toronto, Canada, New York City, New York, Mexico City, Mexico, London, England, and its branches.

By Order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 30th September, 1912.

A. E. REA AND COMPANY, OTTAWA, LIMITED

Dividend Notice.

Notice is hereby given that a dividend of one and three-quarters per cent. upon the paid-up preferred capital stock of the Company, has been declared for the current quarter, being at the rate of seven per cent. per annum, and the same will be payable at the office of the Company, or any branch of the Standard Bank of Canada, on and after the 30th day of September next.

By order of the Board.

GEO. A. WANLESS,
Ottawa, September 30, 1912. Secretary-Treasurer.

CANADIAN PACIFIC RAILWAY COMPANY

Issue of \$18,000,000 Ordinary Capital Stock

Special Interest Payment

As intimated in the President's Circular to the Shareholders, dated January 3rd, 1912, an Interest payment at 7% or \$3.18 per share, will be paid on October 15th next, on the first four instalments (\$120) from the due date of each instalment to September 30th, 1912, on the shares of the above New Issue represented by the Certificates of Subscription, to holders of record at close of business August 16th next, who have paid these instalments on or before their respective due dates. Notice is hereby given that this interest payment will be mailed from New York to the registered addresses of holders, or their duly appointed Attorneys, on October 14th, 1912. For the purpose of this payment the Certificate of Subscription books will close August 16th at 3 p.m., and re-open September 16th, 1912.

W. R. BAKER,
Montreal, July 31st, 1912. Secretary.

BRITISH MONEY FOR CANADA

Mr. E. R. Wood, of Toronto, who recently returned from England, gives an instance as to how much better Canadian credit is there than American. Some time ago a leading American railway sold a 5 per cent. debenture issue in London at 85, and thought it was doing a good stroke of business. Shortly afterwards, Sir William Mackenzie appeared on the scene with a similar 5 per cent. debenture proposition, with the right, however, of conversion into common stock in three years. He secured 98 for the debentures.

Sir Thomas Skinner, the London director of the Canadian Pacific Railway and deputy-governor of the Hudson Bay Company, who has been west as far as the coast, says that England loans money cheaper to Canada than to any other nation in the world for the reason that they have unlimited confidence in the resources of the Dominion as well as in the ability of the bankers and business men who are carrying on the affairs of the northern part of the American continent.

The Hudson's Bay Company is advertising for tenders for the construction of its new building in Vancouver.

PORT MANN NOT TO BE OCEAN TERMINUS

Port Mann will be the train assembling centre for the Pacific section, says Sir Donald Mann, at Vancouver. It will be an available centre for the distribution of coal and other freight into the interior, but it will not be our ocean terminus. "We will have our car repair shops and our assembling yards at Port Mann. In all the chief cities of Canada the railways are moving their assembling yards out some distance from the centre of the city. This is being done for several reasons. For one, inside property is too expensive, and another the smoke nuisance caused by shunting has caused many complaints. Most of the yards in Toronto are now five or six miles away from the Union Station. The Grand Trunk has moved its yards out to Mimico and we are moving out also."

The fall meeting of the Actuarial Society of America, of which Colonel W. C. Macdonald, of the Confederation Life Association, is president, will be held at the King Edward Hotel, Toronto, on Thursday and Friday, October 17th and 18th.

MUNICIPAL AND GOVERNMENT BONDS

Edmonton Negotiates Large Loan With Bank—Maturing Dominion Loan Met This Month

Notes to the amount of \$1,000,000 has been given by Edmonton's city treasurer to the Imperial Bank. This is the first step toward securing the loan of that amount from the bank. Ten notes, each for \$100,000, were handed over. Each note is for six months and bears interest at the rate of six per cent. so the present inactive state of the debenture market will cost the city just \$30,000.

The city had to borrow this money because it is impossible at the present time to sell debentures profitably. While it is true that by the end of this month enough tax money would be paid in to put the city in good position financially, the relief would only be temporary.

Macleod and Red Deer Issues.

The sale of Macleod's issue of authorized debentures, to the total of \$336,000, has been arranged in London at the net price of 93½. The news was conveyed in a cable a few days ago, and which confirmed a letter previously sent to Mayor Stedman from Mr. Ben H. Morgan, the English financier, who, by agreement with the council, holds an option on the debentures at that price until October 31. The terms of payment, mentioned in the cable were one-third October 30, one-third November 30, and one-third December 30.

In connection with the issue of \$67,600 Red Deer, Alta., debentures, three bids were received \$63,801, \$62,816 and 90.16 for \$31,500 with an option for two months on the balance at the same price. The successful tenderers wired that they had made a mistake of \$2,000 and that their tender should be reduced that amount. The Red Deer council notified them that they would hold them to their tender and placed the matter in the hands of Messrs. Greene and Payne to take up with them, expecting the transaction will be completed at the tendered price.

Dominion's Maturing Loan.

The arrangements made by the Dominion Minister of Finance for paying the loan maturing on October 1st in England have been carried out through the financial agents of the government. The loan was for \$6,142,220.01 at 4 per cent., and was issued in December of 1907 to cover the balance of an old loan dating back to 1878 and guaranteed by the Imperial Government.

No tenders were received for the issue of \$6,000 6 per cent. bonds of Imperial, Sask. The money was required to build a skating and curling rink.

The Dominion Securities Company, fiscal agents for Victoria, B.C., has disposed of £170,000 of treasury notes at five and one-eighth per cent., being the highest rate of interest paid by the city on short-term loans this year. There is now left over eighty thousand pounds worth of stock of this class of the half million the city desired to float pending such time as the London money market will absorb local debentures at a rate of interest which will not cause the city to lose on the negotiation.

A special meeting of the Saskatoon, Sask., council was recently held for the purpose of consolidating certain of the by-laws that have to do with the expenditures that are being made this year by the city and for which individual by-laws have already been passed by the citizens. The new by-law empowers the council to issue stock to the amount of £570,-166 11s. 10d. which is to be sold in London through the Canadian Agencies, Limited, fiscal agents for the city.

Five offers were received for the \$35,000 5 per cent. 20-year court house debentures of Northumberland County, N.B. As previously noted, the award was made to the Eastern Securities Company, St. John.

DEBENTURES AWARDED

- Herbert S.D., Sask.—\$8,000, to Messrs. Nay & James, Regina.
- Gadsby Village, Sask.—\$2,500, to Messrs. Nay & James, Regina.
- Stafford Village, Sask.—\$2,000, to Messrs. Nay & James, Regina.
- Cudworth, Sask.—\$7,000 6 per cent., to Messrs. Curran Brothers, Regina.
- Acton, Ont.—\$1,668 5 per cent. 20 instalments, part of issue to private individual.
- Bassano, Alta.—\$150,000 5 per cent. 30 instalments, to Mr. H. C. Ulen, Chicago.
- Antelope Park R.M., Sask.—\$6,000 5½ per cent. 20 instalments, to Messrs. Brent, Noxon and Company, Toronto.

The Dominion Gresham Guarantee and Casualty Company has taken over the business of the Sterling Accident and Guarantee Company of Canada. The Gresham is one of the largest of the British insurance companies, and has a good Canadian business.

Mr. A. K. Macdougall has been appointed as provincial manager of the Gresham Life Assurance Company, with offices in the Confederation Life Building. Mr. Macdougall is well known in financial circles, and was for a considerable time connected with the Dominion Bank at its head office, Toronto.

WESTERN CANADA'S CROPS

After a comprehensive and systematic examination of crop conditions in Western Canada, the Canadian Bank of Commerce estimates the wheat yield at 196,000,000 bushels, oats 224,500,000 bushels, barley 49,600,000 bushels, and flax 12,900,000 bushels.

The total value of the grain crops to the producers is estimated by the bank at \$308,000,000.

"In preparing the estimate," the report continues, "the North-West Grain Dealers' Association figures of acreage have been accepted. These differ appreciably from the Government figures, but are probably more nearly correct. The average yield, however, has been calculated upon reports furnished by our own branch managers and the managers of other banks, and these reports cover every district in each of the three Provinces."

For a wheat crop of 196,000,000 bushels from the Western provinces, the country will be thankful. That will be a good harvest in view of the continuous rains. The Monetary Times on August 24th estimated the crop at 185,000,000 bushels. Since that date, conditions have improved materially. The final figures of the 1911 crop show wheat of 181,751,000 bushels.

Unfortunately, there seems little doubt that considerable congestion will occur in the removal of the crop. Sir Donald Mann, vice-president of the Canadian Northern Railway, who has returned east after a trip to the Pacific Coast, says of the thirty-three Western harvests he has seen, there has never been as large a one in the history of the country as the present. It is only fair to the railroads to recall that they have done everything possible to facilitate the crop movement. Locomotive and car foundries have been given sufficient orders to keep plants busy for months ahead, and a large amount of new rolling stock has been delivered

to the railways. The weather must once again be blamed. The rain and storms during the past month prevented the farmers from threshing or harvesting their crops. Therefore, the crops will be shouldered by the railways during a comparatively short period, thus creating a congestion. The best means will be adopted to cope with the situation, but a certain amount of inconvenience will necessarily be experienced.

CALGARY'S MUNICIPAL GOVERNMENT

For some years the city of Calgary has prospered under the commission form of municipal government, and with the approach of the forthcoming elections some changes are likely to be discussed that at the next session of the Provincial legislature application may be made for amendments to the city's charter. The legislative committee of the council is at present deliberating on these proposed changes. Two methods of organization are particularly under review, those of Alderman Samis and Alderman McDougall.

Alderman Samis proposes:—

Initiative—Whereby the people can initiate legislation on petition by a certain proportion of the electors, demanding that stated proposals be immediately adopted by the council or submitted to the people for a vote.

Referendum—Whereby, in addition to referring all money by-laws to the people, a provision that no by-law, ordinance or resolution—except in certain stated cases of emergency—shall become operative for a period of ten days after its passage by the council, on or before the expiration of which a petition of a certain number of the ratepayers shall be sufficient to force the council to abandon the measure or immediately submit it to the people for a vote.

Recall—Whereby upon a certain percentage of the ratepayers petitioning, any elected official can be forced

to face a special election or vacate his office, said election to be deferred six weeks from filing of petition.

The organization would be: The mayor, who is to be also chairman of council and chairman of commissioners. Elected for two years by the city at large, subject to recall; salary, \$5,000 per annum.

Eight aldermen, elected by the city at large, two-year term, four elected each year; salary, \$1,000 per annum, subject to recall.

Commissioner of Public Works, elected from the city at large, four-year term; salary, \$4,000 per annum, subject to recall. To have special jurisdiction over streets, sewers and street cleaning.

Commissioner of Public Safety, similar conditions, to have charge of Police, Fire, Health and Building Departments.

Commissioner of Finances and Public Affairs, to have charge of city clerk, solicitor, engineer, treasurer and purchasing agent.

Commissioner of Public Utilities, to have charge of waterworks, electric light and power, and street railway.

Commissioner of Parks and Boulevards, to have charge of parks and boulevards, athletics and recreations and public markets.

Commissioners responsible to council. All commissioners subject to the same salary and recall. One commissioner elected every year.

City Comptroller, appointed by the council, and responsible to that body alone.

City Auditor, similar conditions.

Municipal bulletin, issued monthly by the city clerk, containing financial reports and full text of all proposed by-laws, ordinances and resolutions of the council, together with brief and explanatory information. Mailed free to every ratepayer. Expense to be met out of current revenue.

Alderman McDougall's plan is to depute the legislative powers to the alderman, with the comptroller and a city auditor as an adjunct. The mayor would be head of the executive, with commissioners over each of two departments only, one having streets, sewers, water, electric lights, street railways, parks and public markets, with engineering control vested in the city engineer. The other commissioner would have police, fire, building and health, the latter including sanitary improvements, hospital and street cleaning. The mayor (chairman of the commissioners) to be also allotted sole jurisdiction over a department, including the city clerk, solicitor, treasurer and purchasing agent. Commissioners to be selected by plebiscite vote as at present.

The "city hall" organization has during the summer of 1912 received some very caustic comment, as must inevitably be the case where the work to be accomplished has so rapidly outgrown the machinery provided to do it.

However, the situation is well in hand, and, with changes to suit the altered conditions, there is every promise that mistakes of the past will be largely avoided. The ratepayers may not throw all the blame upon their representatives and officials, for, when by-laws involving an expenditure of nearly half a million dollars are submitted for approval or rejection, and only 165 votes are cast in a city with 70,000 people, there is an obvious dereliction of duty.

MONTREAL'S IMPROVEMENT TAX

Last year, the city council of Montreal adopted a principle in taxation somewhat foreign to previous custom. It was known as an improvement tax, and by contrast with the other taxes in vogue it was properly named. By this tax, the proprietors on the different streets were made liable for the cost of the paving of their streets, an obligation which is not only essentially just, but is so regarded in, perhaps, the majority of progressive cities in this country. Little comment was occasioned at the time this system was adopted.

It would now seem that practically no attempt has ever been made to put the tax into effect. It was opposed by property holders throughout the city, particularly by those apparently who are speculating on the chance of the market advancing and giving them a good profit. Property holders objected to the tax, claiming they were at a disadvantage compared with those who had purchased property previously, inasmuch as these had obtained their pavements and street improvements out of general taxation, instead of being called upon to pay for them themselves. Talk to this effect was heard before the tax was adopted in the first place, but the council needed the money and so the majority favored the proposal.

The opponents have continued the agitation, and have at last succeeded in having the improvement tax repealed. The civic controllers favor the tax, and the situation stands that way for the present. Several suggestions have been made for a substitute, but so far nothing has come of them. The city council has, in the opinion of many, taken a backward rather than a forward step.

PEAT, INVENTION AND COMMERCE

A report on the utilization of peat fuel for the production of power has just been published by the Department of Mines. It is a record of the experiments conducted at the fuel-testing station at Ottawa during 1910 and 1911 by Mr. B. F. Haanel, B.Sc. This report is enthusiastic regarding the result of these experiments. Describing certain alterations made to the peat gas producer and cleaning system, Mr. Haanel says: "The main difficulty, however, still exists, as in the old form of the producer, namely, the formation of a variety of tar; as a thin liquid when condensed, and as finely divided particles carried in a state of suspension after passing through the cleaning system. This objectionable by-product cannot be obviated in the producer itself, but must be separated out mechanically.

"To accomplish this, the makers of the plant, who designed and carried out the alterations, devised a special addition to the coke scrubber. But this device, as our many tests have shown, failed to accomplish the desired result; hence, the writer (Mr. Haanel), after considerable experimentation, invented a remedial device which completely removes the troublesome matter from the gas. The plant, as it now stands, is an unqualified success"—an inventor's modest statement.

In estimating fuel costs Mr. Haanel assumes that peat with a moisture content of 25 per cent. can be delivered to the producer for \$2 per ton. "In order, however, to take advantage of this, or a lower cost for fuel, the power plant will have to be situated at or near the bog where the peat fuel is manufactured. For small plants this might not prove feasible in many cases; but will prove entirely feasible and practicable when the plants are of large capacity and when the energy developed is transmitted, in the form of electricity, to neighboring towns and villages, for lighting, power and other purposes.

"Since the fuel burned in the producer does not require to be of the best quality," he continues, "the fuel cost may be considerably reduced, since the broken peat bricks and considerable fines—which always occur in the manufacture of peat, and otherwise represent a loss—can be efficiently utilized in the producer. Assuming, however, that peat can be delivered to the plant for \$2 per ton, and that the plant is run with a power factor of 75 per cent. for 3,000 hour, the fuel costs would be \$8.40 per B.H.P. year, including standby losses"

We fear that Mr. Haanel's inventive ardor may be somewhat dampened when peat as a fuel takes any sort of a stand in the commercial arena. Forty years ago *The Monetary Times* reviewed glowing prospectuses of peat companies. A glib company promoter as far back as 1869 stated that railways and steamers were begin-

ning to use peat instead of wood and coal "with the most satisfactory results." When the value of peat as a fuel ever equals the strength of the statements of its value, *The Monetary Times* will become more confident as to its practicability. We do not wish to deprecate the services of Mr. Haanel as an inventor and conductor of experiments, but the commercial value of peat is by no means a determined factor.

MONTREAL HARBOR COMMISSION

The opinion prevails among the shipping interests of Montreal that when the two vacant harbor commissionerships are filled, at least one appointee should be a non-political expert, representative of the maritime interests. That is a sound proposal, and one to which the government might well assent. This particular commissioner should be allowed to retain his post, if general satisfaction were given, whatever other changes might be made in the personnel of the harbor board, especially those due to a change in the rulers at Ottawa.

Major G. W. Stephens is an excellent chairman, and his activities in increasing the facilities of the port should insure his retention of that position. The expert proposed by the shipping interests would be able to give valuable advice to the commission. That would be unusually timely in view of the forthcoming expenditures in improving the ship channel and the port's attractiveness generally.

WHAT CANADA IS DOING WITH BRITISH MONEY

The final sentence of the editorial under this heading in last week's issue of *The Monetary Times* should have read: "If a bad Canadian stock or bond offering is placed before him (the British investor) he will have no difficulty in securing in Canada the correct label for the offering." A typographical error placed an entirely different construction upon the sentence as it was printed before.

FARMERS BANK AND THE POLICE

The investigation of the Toronto detective department in connection with the handling of Farmers Bank papers has proved a farce. The resolution of the police commissioners, as communicated to the press, is as follows:—

"Inspector Duncan's suspension is hereby removed (the police magistrate dissenting to this), he being seconded—or relieved from duties—from to-day, and his salary to cease from November 1st, 1912; he to pay the benefit fund the percentage that he is at present paying per annum, to be paid monthly until thirty years have elapsed from the date he entered the force. On doing this he will become entitled to his pension on the basis of his present salary."

The matters which occasioned the suspension of the Inspector, his conduct of the Bank papers, the conflicting evidence regarding his veracity and reliability, and his evidence before Chief Justice Meredith, are absolutely ignored in the above brief and insufficient statement. That fact is in striking contrast with the stern police discipline of which we read in novels and seldom see exemplified in American life.

If Mayor Geary, one of the two commissioners who agreed to the milk-and-water resolution, handles the duties of his new office of corporation counsel with gloves as delicately pink and soft as those with which

he handled the Duncan episode, the impression will be created that backbone is a disappearing quality.

The Monetary Times takes the first opportunity to congratulate Magistrate Denison upon being the only dissenting voice to the findings, to which we understand he was entirely opposed. The opposition of Col. Denison overshadows in its frankness the significant silence of the remaining commissioners respecting the charges involved.

To complete this vaudevillian investigation, Inspector Duncan has given out a statement in which he says: "I am well pleased with the outcome of this investigation. . . . The commissioners have decided there was nothing in my conduct meriting suspension." Mr. Duncan adds: "I do not think it would be in my own personal interests or in the interests of the citizens of Toronto that I should remain longer in the active service."

The two police commissioners who handed the resolution to the press must have a poor opinion of what the public ought to know at the conclusion of an important inquiry respecting the conduct of important papers in connection with the failure of the Farmers Bank. Indeed, we feel that they will ask for satisfaction.

SMALL CHANGE

Some of those Canadian stocks seem to be Balkanized.

* * * *

Building by-laws apparently do not affect the worst skyscraper, namely, the cost of living.

* * * *

The purchase of the Panama Canal was the only thing lacking in the C.P.R.-buy-P. and O. story.

* * * *

Both war and baseball having affected the stock markets, we shall have to whisper low when near the exchanges.

* * * *

Mr. Hazen, Minister of Marine, would like to see a statue of insurance liberty in the St. Lawrence channel.

* * * *

The Indianapolis dynamiters are said to have planned to blow up the Panama Canal—a case of misdirected enthusiasm while the tolls question awaits explosion.

* * * *

Three new islands have bobbed up in the ocean near Juan Fernandez. They should make a suitable home for certain doubtful promoters and others whose names have had mention in these columns.

* * * *

The features of the literary duel between city auditor Sterling and mayor Geary, Toronto, respecting the conduct of the civic hydro-electric business seem to be the former's thrust at the latter's deficit and the latter's jab at the former's nerve.

* * * *

"The cold, grey light of a failing bank account makes perfectly manifest that cheap insurance is a sin against actuarial science, and the wages of this sin, too, is death." Thus Judge Riddell exploded the imaginary benefits of unscientific principles of fraternal insurance.

* * * *

The value of life insurance has been demonstrated in a curious manner. An eye-witness of the New York Rosenthal crime before consenting to return from London to America insisted that his life be insured for \$10,000, as he considered certain criminals would not desire him to give evidence. The State will bear the cost of the premiums, which under the circumstances were probably high.

CANADA WILL WITHDRAW NEW YORK FUNDS

Financing of Record Wheat Crop and the Position of Our Banks—Experience of Past Years

The autumn requirements of the Canadian banks and their relation to funds in New York, are discussed in the *Financier* of that city by Mr. H. M. P. Eckardt, a frequent contributor to *The Monetary Times*. As Canada's big wheat crop is now assured, he says, it will be worth while to estimate the extent to which the Montreal and Toronto banking institutions will draw upon their funds in New York during the remainder of the year. Some information on this point may be acquired through examining the record of recent years. On September 30, 1911, the Canadian banks had in net bank balances outside Canada (mostly in the form of balances in New York and London banks) \$54,021,108, and in call loans on stocks and bonds in the same two centres, \$93,517,076. Altogether in the outside balances and call loans they had \$147,538,184. Next month this total fell to \$135,364,643; by the end of November it was down to \$132,693,304; and by December 31 it had fallen to \$128,690,692. In the three months the outside fund had been drawn upon to the extent of about \$19,000,000. However, last fall this liquidation occurred nearly altogether in the bank balances—the call loans at the end of December stood at \$92,106,695, only \$1,400,000 less than at the end of September. Speaking broadly about \$10,000,000 were drawn from the New York balances and between seven and eight millions came from London banks.

Gold Movement From New York.

This recall of funds during the fall of 1911 was reflected in November by an important gold movement from New York to Montreal. One bank with headquarters in Montreal imported \$10,000,000 in connection with an issue of securities by Montreal Tramways Company. Altogether in the three months the specie holdings of the Canadian Treasury and of the banks increased \$12,000,000, the increase being due to the gold imports.

In 1910 the last quarter of the year witnessed a more extensive recall of Canadian funds from abroad. At the end of September the total of call loans and balances in New York and London was \$163,772,116. By the end of October the amount had decreased to \$147,551,945—practically the whole of the decrease occurring in the bank balances. A further fall, to \$141,643,630, was seen in November; and the total went down to \$123,072,340 by the end of December. During the quarter the bank balances were drawn upon to the extent of about \$28,000,000, and call loans were cut down \$13,000,000. So far as the bank balances were concerned the Canadian institutions appear to have drawn rather impartially upon London and New York—the latter city having been required to pay \$11,000,000 while the British centre was called on for \$17,000,000.

Loans From Abroad.

Although the movement of funds was much larger in 1910, the transfer of specie incidental thereto was much less important than in 1911. The specie holdings of banks and public treasury in Canada increased only \$3,000,000. So the presumption is that the Canadian banks drew down their balances in the international centres and called in their loans on stock market collateral largely for the purpose of providing the exchange required by their customers for meeting payments due in outside countries.

In 1909 there was scarcely any of the Canadian funds recalled from abroad in the last quarter of the year—the balances in bank and call loans amounting to \$168,752,535 on September 30, and to \$164,345,112 on December 31. There was, however, a movement of about \$5,000,000 gold to Canada. In the last quarter of 1908 also gold moved to Montreal to the extent of about \$5,000,000.

In the December Quarter.

This record shows that in every one of the past four years gold has moved to the Dominion in the December quarter. What are the prospects for 1912? As the September bank statement is not due until about October 20, it is not yet possible to say what is the total of loans and bank balances in London and New York with which the Canadian banks entered the final quarter of this year. On August 31 they had \$162,051,258 available. During July and August they had already been drawing freely upon this fund. The decrease in those two months amounted to nearly \$16,000,000—call loans having been reduced about \$6,000,000 and the bank balances \$10,000,000. It is thought that September saw a further decrease; and it is regarded as almost inevitable that in the current quarter the call loans and balances will undergo contraction.

Seven or eight years ago, when the chartered banks in Canada had a more than ample issue power, it happened not

infrequently that these banks could increase their New York call loans substantially, at the season of the year in which Wall Street was paying highest rates. The currency for crop moving in Canada was supplied almost altogether in the form of bank notes. Through paying out their own notes the banks acquired large amounts of sterling and New York exchange in connection with grain shipments. A part of these funds they might leave in New York until their notes came in for redemption at the end of the year.

Pay Out Dominion Government Notes.

But now-a-days they are obliged to pay out a goodly amount of Dominion Government notes, the loss of which pulls down the cash reserves and causes them to recall funds from New York, probably in the form of gold.

So it is to be anticipated that before the end of the year some gold will be taken for shipment to Montreal. As yet it is too early to estimate the amount with any satisfaction. In connection with the matter of the recall of Canadian funds it is to be remembered that in the past year the Dominion has been importing an immense amount of goods from the United States. The big railway companies, the industrial corporations, etc., will require to provide a vast amount of New York exchange to pay for iron and steel goods, coal, raw cotton, etc., imported by them. It is a question whether the exports of Canadian raw produce will serve to balance this outgo plus the outgo for interest and dividends on Canadian securities held abroad. If the sale of Canadian securities in London is actively resumed all will be comfortable. It is thought that the Canadian municipalities and corporations will be moved to bid higher in interest rates and thus overcome London's recent indisposition to take new securities.

NEW WESTMINSTER BOND SALE

It was noted in a recent issue of *The Monetary Times* that \$2,000,000 4½ per cent. debentures of the city of New Westminster, B.C., had been purchased by Messrs. Stimson & Company, Toronto, and that they had been appointed fiscal agents of the city. We now learn that the actual purchasers of these securities were the British, Foreign and Colonial Corporation, Limited, of London, England, and that that company were also appointed the fiscal agents of the progressive city in British Columbia. Messrs. Stimson & Company acted merely as the intermediaries. The information on this matter previously given by Messrs. Stimson to *The Monetary Times* was evidently done so under a misapprehension of theirs.

This sale was the biggest of the year to date. It is gratifying to know that the British Foreign and Colonial Corporation has been able to absorb such a large block of Canadian municipals despite the present market conditions in London.

LIKELY BANK MERCER

The story that the Bank of Nova Scotia will absorb the Bank of New Brunswick has again been revived, and the general opinion among financial authorities is that such a combination of interests will occur in the comparatively near future. Mr. Richardson, general manager of the former bank, was a visitor to St. John this week. Mr. Payzant, president of the Bank of Nova Scotia, is reported as saying that he hoped the news was true.

The principal accounts of the two banks, according to the August bank statement, are as follows:—

Account.	Bank of New Brunswick.	Bank of Nova Scotia.
Capital authorized	\$1,000,000	\$5,000,000
Capital subscribed	1,000,000	4,312,200
Capital paid up	1,000,000	4,209,940
Amount of Rest fund	1,790,000	7,793,916
Rate per cent. of last dividend declared	13	14
Notes in circulation	963,809	3,935,605
Deposits on demand	1,721,274	29,710,142
Deposits after notice	6,654,186	5,692,214
Total liabilities	9,805,510	53,728,174
Current loans in Canada	8,391,258	30,576,720
Current loans elsewhere		5,236,495
Bank premises	190,867	1,391,545
Total assets	12,692,642	66,454,341
Average amount of specie....	330,987	3,561,632
Average amount of Dominion notes	574,333	4,193,089

During the past week panic conditions were prevalent in Canadian stock exchange circles. Not since 1907 have prices experienced such a decline as occurred at the close of last week, and it is doubtful if even in that memorable year the drop equalled, in any similar period, that which took place in the last three days of the week.

CANADA AND THE PANAMA CANAL

By Fred. W. Field.

XIV.—TRADE WITH AUSTRALIA AND THE ORIENT

(Conclusion.)

We may reasonably hope for an expansion of our trade with other countries as a result of the opening of the Canal. Already negotiations are proceeding between representatives of the Canadian and Australian governments for the drafting of a trade agreement which will be mutually beneficial. Australia has a promising commercial future. Despite a comparatively small population, it has a large average trade per capita, estimated at one hundred times that of the Chinese people. The country is rich in natural resources and in British energy for their development. This results in a high standard of living, a satisfactory average per capita wealth, and the importation of considerable manufactures. The Canal will place our Atlantic ports approximately 3,000 miles nearer Sydney than is the voyage by way of the Cape of Good Hope. The Canal will also bring our ports much nearer to New Zealand than they are by the Good Hope and Australia route.

Our trade with Australia and New Zealand has expanded fairly rapidly during the past few years. Our imports from Australia have increased from \$153,000 in 1902 to \$512,000 in 1911. Canadian exports to that country have changed from \$2,586,000 in the former year to \$3,925,000 in the latter year, only a small proportion being foreign produce. Imports of metals, minerals and their manufactures from Australia last year were valued at \$71,411; hides and skins, \$26,740; canned meats, poultry and game, \$19,705; fresh mutton and lamb, \$122,513; other meats, \$7,235; imports of wool and their manufactures, \$99,623. We also imported butter valued at \$97,917. Some of these figures are striking indications of the growing strength of the demand of the home market. Our principal exports in 1911 to Australia may be tabulated as follows:—

Automobiles and carriages	\$ 325,173
Clothing	39,805
Coal, coke, etc.	153,172
Drugs, dyes, etc.	96,547
Fish	409,502
Gutta percha and manufactures....	45,023
Metals, minerals and manufactures.	1,545,305
Musical instruments	25,709
Paper	435,392
Wood and manufactures	678,053

We also export to Australia smaller quantities of books, breadstuffs, cotton, cotton manufactures, fruits, oils, paints, silk manufactures, spirits, wines, and vegetables.

Trade with New Zealand.

Our imports from New Zealand in 1902 were valued at \$4,180 and in 1911, \$913,608. Canadian exports to that country in the former year were \$353,693 and in the latter year, \$1,004,370. Hides and skins valued at \$658,766; provisions, chiefly butter, valued at \$126,408; wool and their manufactures, \$101,849, were the chief imports from New Zealand. Our principal exports to that country were automobiles and carriages, valued at \$79,871; fish, \$123,094; gutta percha manufactures, \$38,755; leather manufactures, \$21,122; metals, minerals, and manufactures, \$312,174; paper, \$191,159; wood and manufactures, \$124,116. Canada also exported in comparatively small quantities, books, breadstuffs, clothing, cordage, cotton manufactures, drugs, fertilizers, gunpowder, musical instruments, oils, provisions, seeds, and tobacco.

Canada has steamship communication with Australia and New Zealand, both from its Atlantic and

Pacific ports. The coasting trade of Australia centres largely in Sydney and Melbourne. These ports will be brought many days nearer to Eastern Canada by the construction of the Panama Canal. As the Canadian Northern Railway becomes a full-fledged transcontinental it is not unlikely that it will make sailings from Vancouver to Australian ports, and also to Yokohama and Hong Kong. The Canadian Pacific and Grand Trunk companies may also embark upon new enterprises as a result of efforts made to increase trade between Canada and Australia.

Plans at Australasian Ports.

Many important extensions are contemplated on the Australasian side, and these will depend largely upon the result of negotiations between the Dominion and the Commonwealth with reference to the establishment of reciprocal relations. If, as is expected, this desired arrangement is brought about, the Union Steamship Company, of New Zealand, for which a liner that will have the distinction of being the largest registered in Australia is in hand at Clydebank, will, it is expected, order more tonnage. The company's steamers leave Sydney, N.S.W., for Vancouver, via Auckland, N.Z., Fiji and Honolulu, and vice versa, every twenty-eight days, under contract with the Canadian and New Zealand governments. Last year it re-established a direct service between Wellington, N.Z., and San Francisco, via Raratonga and Tahiti—a route on which its recently-acquired fast boat Tahiti, formerly the Port Kingston, of the old West India Direct line, took up the running a few weeks ago—and this service has now been extended to Sydney. The steamers leave each end every twenty-eight days, alternating with the Vancouver liners, thus providing a fortnightly mail service between Australia, New Zealand and Great Britain. An understanding on the question of reciprocity, followed, most probably, by the grant of a subsidy by the Commonwealth, will give an impetus to trade, and necessitate additions to the fleet, and other lines are not overlooking the possibilities of the situation.

Market in Canada for Australia.

Announcement of the formation of a company at Sydney, Australia, with a capital of £50,000, was recently made. It proposes to carry to Vancouver a shipload of Australian exhibits of goods for which Australians hope to find a market in Canada. This is yet another sign of awakening interest in commercial possibilities between the two countries. Some authorities are inclined to think that considerable freight originating in the east, sent overland and consigned to Australia, New Zealand and the Orient, will go direct by steamer through the Panama Canal. The Canal may also divert a certain amount of Oriental trade now coming by way of Vancouver, and which in future would go direct through the new waterway. On the other hand, our Atlantic ports will be placed in a more direct water route to Australasia and the Far East, eliminating the journey around Cape Horn.

The development of our trade with China and Japan is likely to be more slow than with Australia, but none the less sure. Our trade with China has fluctuated considerably, imports therefrom in 1892 totalling \$1,082,000; in 1902, \$489,000; and in 1911, \$685,000. Our exports to China in the same years were valued at \$256,000, \$277,000 and \$529,000, respectively. In 1909 and 1910, Canadian exports to China totalled \$1,022,000 and \$1,250,000, respectively. Our principal imports from China last year were: Bristles, \$11,975; drugs, \$29,433; hides and skins, \$100,612; silk and their manufactures, \$102,767; tea, \$271,259. Other imports were: Rice, carpets, fireworks, fruits, furs, oils, plants and trees, spices, spirits and wines, sugar and vegetables.

Canada's principal exports to China last year were: Coal, \$6,187; wheat flour, \$6,153; cotton manufactures, \$6,508; fish, \$108,616; silver ore, \$288,516; metals, \$18,514; condensed milk and cream, \$41,860; wood and manufactures, \$14,249.

Our trade with Japan is larger than that with China. Last year our total imports therefrom were valued at \$2,424,938, compared with \$1,620,865 ten years ago. Our exports to Japan in 1901 were \$188,683 and in 1911, \$619,989. The principal articles imported to the Dominion from Japan may be tabulated as follows.—

Rice	\$324,802
Brooms and brushes	74,573
Carpets, mats and rugs	53,388
Drugs	42,313
Earthenware and chinaware	90,496
Flax, hemp, jute	69,779
Fruits	115,735
Silk and manufactures	420,543
Tea	759,568

Other imports from Japan were: Baskets, buttons, embroideries, fish, hats and caps, jewelry, oils, paper, pickles, spices, spirits and wines.

Most of the cargoes brought from China and Japan to Vancouver by the vessels of the Blue Funnel Line are consigned to that port to the order of the Chinese and Japanese merchants in business in the city. While that trade will not be diverted by the opening of the Canal, it is not likely to gain any impetus on account of that event.

Development of China.

So far as our Pacific Coast and the Orient are concerned, it would not appear that the Canal will exert any great influence. Aside from that, the fostering of trade with the Far East will build up the terminal cities of British Columbia and develop its natural resources. As the standard of living in the Orient becomes higher our opportunities for trade there will become more numerous. At present the importations into China amount to less than \$400,000,000, a large sum actually, but representing only \$1 per head of a population of 400,000,000. If China, for instance, became an import market only on the same relative scale as Japan, which purchases oversea goods to \$5 per head, its annual buyings would amount to as much as \$2,000,000,000, or about \$125,000,000 more than those of the United Kingdom last year, although Great Britain at present heads the world as an importer. If China actually reached the British and Australian import standard of \$60 per head, the value of merchandise landed yearly at Chinese ports would amount to the huge sum of \$24,000,000,000, or more than the entire trade of the world at the present time. Such a figure is, of course, altogether outside the scope of practical commercial politics for many years to come, but it is distinctly within the scope of China's potentialities, when the character of its population is taken into consideration.

As to the West Indies.

In an interview reported from Montreal in June, Mr. E. J. Chamberlin, president of the Grand Trunk Pacific and Grand Trunk Railway, stated that one year after Montreal and Prince Rupert are united by the Grand Trunk Pacific' rails, or as soon as conditions for carrying through freight are perfected, a Grand Trunk Pacific steamship service will be established between Prince Rupert and a point in the Orient.

The West Indies regard the Panama as a new hope, and Mr. D. M. Christian, writing from Castries, St. Lucia, states that the general opinion in the Islands regarding Panama, in brief, would appear to be: The West Indies, commercially, are ready for Panama. Strategically, they are the key to it, but the lock is out of order, and it rests with the British Government to see that it is in good condition to shut if such a course is ever necessary.

The expansion of trade between Canada and the South American countries has already been discussed in *The Monetary Times* by Hon. John Barrett, Director-General of the Pan-American Union. Altogether, therefore, there appear to be good grounds for the hope that the Panama Canal will help to improve Canada's trade relations in many directions.

CANADIAN BANK INSPECTION

Differences in Banking Systems of Canada and United States—Results of Inspection—Views of Bankers

Since 1890, in which year Canadian banking was virtually placed upon its present basis, the record of bank morality has been concerned in the main with comparatively small banks, with the exception of three cases. Moreover, note-holders have lost nothing, and depositors very small amounts. Since 1865 shareholders in Canadian banks have lost more than \$40,000,000, a record which Canadian financiers seldom mention. These losses occurred for the most part when the country was young and undeveloped, and proved a staggering blow to its commercial enterprises. The burden has been borne by those who risked their capital in the banking business; and it must be confessed the losses have not equalled those in other lines of financial and industrial endeavor. Nevertheless, they have been such that the need of additional safeguards is freely acknowledged.

These facts and opinions are cited by Mr. W. W. Swanson, in a bulletin, on Canadian Bank Inspection, of the Departments of History and Political and Economic Science in Queen's University, Kingston, Ontario. After citing figures showing the growth of Canadian banking and noting some recent failures, Mr. Swanson observes that on the whole, leaders of banking thought in Canada have been opposed to any system of external bank inspection. Nevertheless they stand ready to be convinced of the necessity for a change, and are willing to adopt new measures once it has been proved that these are of advantage. It has long been recognized that no nation contains a body of men more open-minded or better trained in banking theory and practice, or more devoted to the best interests of the nation; so that it may be confidently expected that if any plan of external inspection is ultimately adopted it will receive their firm support. Mr. Swanson continues:—

Salient Features of the System.

Before proceeding to examine the arguments for and against external inspection, it will be well to set forth the salient features of the system at present obtaining in Canada. The most important executive officers, whose duty it is to supervise the business of the banks, are the general managers. These men have reached the positions they hold by sheer force of ability, having for the most part worked their way up from the bottom. They have brains, industry and character; for these make the trinity of qualities necessary to place them where they are. They are conversant with every detail of banking machinery and practice. In a word they are professional bankers, who hold their positions by merit, and merit alone.

The general manager appoints the branch managers, who must conduct their business in conformity with his views.

Years of Banking Experience.

The branches are inspected at irregular intervals by the inspector and his assistants, who make a most searching examination of the books, and examine the discounts and other assets. These men are in receipt of large salaries, and are permanent officials with years of banking experience. They are experts who understand their duties thoroughly and accept their responsibilities seriously.

Over the system as a whole is the board of directors whose chairman is the president of the bank. This body holds meetings at least once a week. The general manager reports on the business of the week, and presents such applications for new credit as seem to require the approval of the board; he also gives to the directors, either orally or in typewritten form, full information with regard to the business of the bank. The recommendations of the manager as to the granting of credits are usually approved and quickly disposed of; and yet it is expected that each director shall give close personal attention to the bank's operations. All extensions of credit are reported by the general manager and must be formally approved by the board. It is expected that each director shall make himself thoroughly conversant with the important operations of the bank, and with its general policy, its cash reserves and the extent and quality of its investments.

Responsibility of General Manager.

The directors are not obliged to rely on the general manager. The chief accountant is expected to corroborate the facts presented, and to disclose the true condition of the bank in case of misrepresentation. In addition, in some of the large banks, the board of directors depend upon a third official whose principal function at the head office is to represent them. And yet, notwithstanding all these precautions, banks have failed in Canada, simply because the directors have not been true to their trust.

The law provides for no publicity with regard to bank affairs beyond the monthly returns to the minister of finance.

These returns are very full and comprehensive, much more so than those required of the banks in the United States. The minister of finance, moreover, may call for supplementary information or "special returns from any bank whenever in his judgment they are necessary to afford a full and complete knowledge of its condition." Unfortunately these returns are not all that they should be as far as their accuracy is concerned. Indeed Mr. McLeod, late general manager of the Bank of Nova Scotia, has gone so far as to state that "they are not worth the paper they are written on." He says:

Where Opinions Differ.

"In the case of the failed banks they have them (the reports) made with every degree of falsification; and there is no check or supervision. When confidence is shaken these facts will become apparent to the public, and will impair confidence rather than help the situation. Our records compiled from bank statements are valueless, on account of the mis-statements by the many banks that have failed."

That is strong indictment; much too strong in the opinion of most bankers. It was directly contradicted at the time it was made by Mr. Coulson, general manager of the Bank of Toronto, who was equally emphatic in asserting that ninety-nine out of every hundred statements were "fairly correct." In any event it cannot be gainsaid that the statements have not been as reliable as the government expects and should insist upon having.

Suggestions for Inspection.

There have been various plans suggested to remedy the admitted defects in the present system of bank inspection. Those which have found most favor are: Inspection by officials selected and appointed by the government; inspection by a board of auditors appointed by the shareholders; and inspection by a board of auditors appointed by the Canadian Bankers' Association. Each of these methods must now be carefully considered.

Undoubtedly the plan which has been most persistently advocated is government inspection along the lines followed in the United States. There, in addition to inspection by government officials, the banks are required to make five reports per annum to the comptroller of the currency. While these reports have had an excellent effect in keeping the banks in a solvent condition, the opinion that they are not made with sufficient frequency is quite prevalent. Moreover, banks arrange their accounts in anticipation of being called upon for statements of their business; although the comptroller is authorized to name dates in the past for which reports shall be given. But if these statements are to serve the best interests of the depositors and the public in general, and if they are to be a real safeguard against illegitimate banking, they must be more complete and definite than they are at present.

Other Items Included.

In addition to the information specified below the following items should be included in these statements: (1) the total amount of assets considered bad or doubtful; (2) the total amount of post due paper held, including all demand paper upon which interest has not been paid for a specified period; (3) the aggregate amount of loans to officers and directors; (4) the total amount of loans on real estate, or on notes secured by real estate as collateral. The reports at present required of national banks must specify:

Resources.	Liabilities.
Overdrafts.	Surplus (Rest).
United States Bonds.	Undivided profits (less expenses).
Stocks, securities, judgments.	Bank notes outstanding.
Banking house and fixtures.	State bank circulation outstanding.
Other real estate and mortgages.	Due to other national banks.
Due from national banks.	Due to state and private banks.
Due from state and private banks.	Due to reserve agents.
Due from reserve agents.	Dividends unpaid.
Checks and other cash items.	Individual deposits.
Exchanges for clearing house.	United States deposits.
Notes of other national banks.	Notes and bills rediscounted.
Money of each kind on hand.	Bills payable.
Five per cent. redemption fund.	Reserved for taxes.
Due from United States treasurer.	Other liabilities.
Aggregate.	Aggregate.

Our Returns Are Better.

In the matter of bank reports, then, Canada has nothing to learn from the United States. Here the returns are more definite, are fuller, and, on the whole, just as accurate. In both countries something more ought to be required than the unsupported statements of bank officials. The reports should be certified by inspectors, and the making of incorrect or false statements made a high penal offence. Both countries, as will appear later, have something to learn from Europe; where all the important banks have regulations, expressed

or implied regarding the publication of reports. Weekly statements showing the movement of the chief accounts, are voluntarily published, without formal requirement, by most of the great banks of Europe.

The inspection of the national banks of the United States is carried on under the direct supervision of the comptroller of the currency, who has ninety inspectors in his service. Each inspector semi-annually visits the banks which are assigned to his care. More frequent examinations are made under special instructions whenever a bank's condition appears to make it necessary. Inspectors have power to examine bank officials under oath. They are remunerated by means of fees which are paid by the banks, the size of the fee depending upon the bank's capital and location.

Did Not Prevent Failures.

This form of inspection has not prevented numerous failures. The ordinary examinations are largely formal; and are of little value in determining the real character of the discounts made, or the soundness of the assets held. The examinations, moreover, are largely conducted by strangers to the localities where the banks are situated; hence, being unfamiliar with business conditions there, and the quality of the paper held, no important information as to the real situation is afforded. It is true that the investigations of the affairs of banks which are about to begin business, or which have failed or suspended, are usually performed in such a way as to disclose the actual condition of the bank. Ordinary examinations, however, are seldom of much value.

They lull stockholders into a false feeling of security which prevents them, and even the directors themselves, from taking that active interest in the bank's affairs which they otherwise would show. The directors suppose that their institution is being watched over by the general government, and so fail to perform the full duty of overseeing the affairs of the bank which has been instructed to their care. The inspection is certainly not as thorough as that which the Canadian and English joint stock banks prescribe for their branches. It should be more comprehensive, and amount to an auditing of the entire business of the bank. Of course this means more than merely balancing the books; it involves a careful examination of the quality of the paper held. Frequent inspection by the directors, and periodical examinations without notice by government officials, together with the watchfulness of corresponding banks and clearing house associations, would do much to improve prevalent banking conditions in the United States. Nevertheless, no matter what system of inspection is followed, main reliance must be placed upon the character and ability of the banks' executive officers.

Under Obligation to Banks.

Inspectors in the United States have too often placed themselves under obligation to the very banks they examine, by arranging loans with them and by accepting "honorariums," as well as by other ill-advised practices. That inspection under such conditions is accurate and impartial is inconceivable. Moreover, the power of appointment rests in the hands of the comptroller of the currency; with the result that politics have played a large part in the selection of examiners. It has been strongly urged that ability and character alone should count; and that each examiner should be selected by civil service examination, and kept in service during the faithful performance of his duty.

The problem of securing properly qualified men, free from the taint of political influence, would be a serious one, if the system were adopted in this country. The Toronto Globe professes to see little danger here, and urges that permanent, capable examiners could be appointed under civil service rules. Auditors or chartered accountants could undoubtedly be so procured; but what is desired is men who, in addition to being able to test the accuracy of the books, are able to judge of the quality and soundness of the assets held. In that regard it would be difficult to appoint a board of government examiners equal in point of ability and experience to the staff at present possessed by each Canadian bank.

Inspection Was Not Difficult.

Moreover, government inspection of banks in the United States has been relatively easy of performance because of the absence of branch banks. Some Canadian banks have hundreds of branches; a complete examination of which would include banks scattered throughout the country from the Atlantic to the Pacific, as well as those in the United States, the West Indies, Mexico and Great Britain. Although most failures in Canada have been "head office" failures, nevertheless an exhaustive examination ought to include the branches as well as the head offices; otherwise hard-pressed, unscrupulous officials could so juggle the accounts of the head office and the branches that the true condition of the bank could be concealed. So that when all these facts are considered there seems not the slightest ground for supposing that Canada has anything to gain from adopting government inspection of banks.

(To be Continued).

Ogilvie Flour Mills Company

Improvement in Milling Trade Returns—Report Analysed—Preparing to Take Advantage of the Panama Canal

Monetary Times Office,
Montreal, October 16th.

The presentation of the statement of earnings of the Ogilvie Flour Mills Company at the annual meeting furnished further evidence of the improvement in the milling trade during the past year. The Ogilvie Company reported net earnings of \$521,431 for the year ending August 31, 1912, this being an increase of \$40,122 over the earnings of a year ago. Bond interest was the same as a year ago, namely, \$105,000, preferred dividends taking \$140,000 and common stock dividends \$200,000, making a total of \$445,000 for these three items. Deducting this from the net, there remained \$76,431, all of which was added to the surplus brought forward at the beginning of the year, and bringing the total surplus to \$510,483.

Comparison of Two Years' Returns.

Following is a comparison of the earnings for the two years:

	Year ending Aug. 31, 1911.	Year ending Aug. 31, 1912.
Net profits	\$481,310	\$521,431
Bond interest	105,000	105,000
	\$376,310	\$416,431
Preference dividends .. \$140,000		\$140,000
Common dividends 200,000		200,000
	340,000	340,000
	\$ 36,310	\$ 76,431
Property reserve \$ 25,000		
Pension fund 10,000		
	35,000	
	\$ 1,310	
Brought forward	432,742	434,052
	\$434,052	\$510,483

It will be seen that, as against an appropriation of \$35,000 for property reserve and pension fund, a year ago, no appropriation is made this year; neither is any appropriation made on account of depreciation of plant, nor for writing off good will or trade marks.

Advances in Value of Land.

As a matter of fact, the Lake of the Woods Milling Company also made no allowance for depreciation of plant and property in its statement a few weeks ago, although the previous year no less than \$143,150 was allowed on this account. However, it wrote off \$100,000 for depreciation of good will and trade marks and thus brought itself out with a deficit of \$25,490 for the year. It would seem, however, that both concerns adopted the plan of not making any appropriation for depreciation of property, this year, the reason for this being possibly that to which the Ogilvie Company made reference a year ago, namely, the increase in the value of the company's holdings of land.

Plant and buildings deteriorate through use and through time, which deterioration is logically a charge against operations each year. If the value of a company's land advances at the same time, this must be treated in another manner than by setting it off against wear and tear due to operations.

New Mill at Medicine Hat.

In the matter of assets and liabilities, the Ogilvie Company shows little or no change in the capital liabilities and very little in the fixed assets, these increasing about \$50,000.

In the current assets, a decrease of \$643,574 is shown, which is more than made up in the decrease in current liabilities amounting to \$671,867. The principal changes on each side are the reduction in stock in trade of \$822,227, on the side of assets, and of \$744,679 in indebtedness to the Bank of Montreal, on the side of liabilities.

Reference was made to the death of the late Mr. F. W. Thompson, general manager of the company, and also to the decision of the directors to erect a new mill at Medicine Hat to take care of the growing market of the West and also to take advantage of the changes which may follow upon the opening of the Panama Canal.

The period set by the Government during which half of the duty should be remitted upon cement imported into Canada, expires on October 31st.

MONTREAL TRAMWAYS AND FRANCO-BELGIAN COMPANY

Tramway Company Will Carry Freight—Franco-Belgian Syndicate to Supply St. Laurent With Water

Monetary Times Office,
Montreal, October 16th.

That the affairs of the Montreal Tramways Company are being conducted in an astute manner is vouched for by the repeated victories the company has been able to score in its negotiations with the city. During the past week, it has scored a victory in the matter of freight-carrying privileges. For years past, the company has desired the privilege of carrying freight on the city streets. The city council, from a position of opposition, gradually came round to a position of willingness, providing the company would pay a sufficient percentage for the privilege. The company had been stopped carrying freight and threatened with fines, in the past, and quite possibly has altogether given up carrying freight for anyone save itself.

A week or so ago, the matter came up in the council once more, and from taking the attitude forbidding the company from carrying freight, the city council adopted rather the attitude of anxiety to have the company carry it, and proposed to grant permission.

To Carry Freight Till December First.

The board of control then entered a protest against such action on the part of the city council, claiming that such privilege might be construed as partaking of franchise rights. This week the council voted in favor of a temporary arrangement, whereby the Tramways Company is empowered to carry freight until December first. No terms are attached. An attempt was made to limit the power so that the company might only carry for the city, but this was defeated, so that for the next two months or so, the company may carry for whom it pleases. The board of control was asked not to make any opposition, inasmuch as it was essential that the company be empowered to carry freight at this period of the year owing to the congestion. The resolutions contained provisions purporting to protect the rights of the city in granting temporary permission to the company for the purposes mentioned.

The Franco-Belgian Syndicate has obtained a majority vote from the St. Laurent parish council in favor of its offer to supply water within the limits of the parish. The syndicate will have to put up \$20,000 within three days as security for carrying out its undertakings. The council is to have a voice in deciding from what source the water is to be taken and the syndicate must also install a filtration plant when called upon to do so.

Other matters which have been laid over for future consideration, are those of the lighting of the town and the providing of a street car system. It is understood that the Franco-Belgian syndicate is anxious to take up with the town the question of lighting.

Twenty-five Year Franchise.

St. Laurent is a town on the Island of Montreal, within a few miles of Montreal and lying not far from the northern entrance to the Canadian Northern Railway tunnel, and consequently close to the new townsite of that company. Being on the island, its street car service is now being provided by the Montreal Tramways Company, while its lighting can be most economically performed by the Montreal Light, Heat and Power Company or the Canadian Light and Power, or subsidiaries thereof.

The franchise, which it has been determined to grant to the Franco-Belgian Syndicate for a water supply, is for twenty-five years.

SASKATOON'S STOCK IN LONDON

A remittance of £70,000 was received by Saskatoon from the fiscal agents in London, for the carrying on the civic business. But already arrangements are all completed for the next issue of the city's stock, which will amount to over \$1,500,000. Following the signing of the consolidating by-law this week by the minister of municipal affairs at Regina, the same has already been sent to the solicitor of the Canadian Agencies. Immediately that he has passed upon them they will be sent to London, and the stock placed on the market there.

Prince Albert, Sask., board of trade has decided to send a representative to the old country to secure such labor as the city requires and if necessary to help to pay the passage of suitable tradesmen.

WORKMEN'S COMPENSATION IN ONTARIO

Mr. N. W. Rowell Addresses Toronto Insurance Institute—Necessity of Department to Deal With Problems

There were two views of Workmen's Compensation—the old and the new, said Mr. N. W. Rowell, K.C., M.P.P., when addressing the Insurance Institute of Toronto on Wednesday night at the opening meeting of the session. The old view was that the employer should only be liable to the employee in case he had done a personal wrong, that the employee had suffered injury through the personal negligence of the employer. The new view was that as a certain number of industrial accidents appeared to be inseparably associated with the conduct of modern industry, the industry should bear the cost of compensating those who suffer from the effects of such accidents, and while the charge

N. W. Rowell, K.C., M.P.P.

fell immediately on the industry it would be added to the cost of production, and ultimately be borne by the community which purchases the products.

Under the present Ontario Act, accidents happening in the course of employment which were not attributable to either the negligence of the employer or employee did not come within the provisions of the act.

Law Must Be Changed.

It had been carefully estimated that under the present act the workmen or their dependents were only entitled to recover compensation for injuries sustained in about twenty per cent. of the total number of case. The act was extensive in its operation. The average workman, rather than run the risk of litigation, was practically compelled to accept a settlement for much less than he was really entitled to get. The law should provide compensation for workmen, not employment for lawyers and insurance companies. The law must be changed.

On Same Basis as Other Employers.

The commissioner Sir William Meredith, appeared to approve of a collective liability system under state supervision, and there was much to be said in favor of this view, but if such a board were appointed it should be non-partisan in its character.

Mr. Wegenast and Mr. Bancroft were to be congratulated on the manner in which they had prepared and presented their views on behalf of the manufacturers and organized labor, respectively, to the Commissioner said Mr. Rowell. It was gratifying to note that there had been substantial unanimity on the broad principles underlying the measure, except on the one question of contribution.

One of the great railways had filed a brief, strongly dissenting from a collective liability system administered by the state. Mr. Rowell had no hesitation in saying that whatever might be the exact form the legislation ultimately took, the railway companies of Canada should stand on the same basis as the other employers of labor similarly situated.

Insurance against sickness, old age, and unemployment, as well as against accident, were other reforms which demanded the earnest attention of the Ontario Legislature, not that Ontario should adopt the same measures as Germany

and Great Britain, but that the same problem here should be studied with a view to adopting measures which would produce the very best results in this country. Ontario should do better than the other countries because it had not the initial difficulties to contend with, and had all the experience of the other countries for aid and guidance.

But to undertake this task a reorganization of the present departments of the Government was required.

Many Problems Attract Attention.

The question of occupational diseases is one that particularly affects the working men and women of the province. We must not only adopt all suitable measures to prevent occupational diseases, but we must make sure that the Workmen's Compensation Act covers such diseases as well as actual injuries. There are the questions of the hours of labor of our working men and our working women; of the minimum wage; of the slums; the housing problem; the high cost of living, and other kindred questions of vital moment to the masses of our people, particularly in our cities and towns, to which our legislature has devoted too little attention.

Need of New Department.

The thorough investigation and consideration of these matters demands the whole time and thought of one of the ministers of the crown, and if we cannot secure by a rearrangement of the existing departments a grouping together of these matters so closely related and so vitally affecting the interests of labor and the public health under one minister, then we should create a new department of labor and public health, and put at the head of it a minister of the crown, in sympathy with these social reforms. We must seek to find solutions for these social problems which will make Ontario not the most backward, but the most progressive, of all the civilized communities of the world, in those forms of social legislation which tend to promote the welfare and increase the comfort and happiness of the masses of the people.

The president, Mr. J. C. Pickett, was in the chair, and delivered an interesting inaugural address. A large number of members were present.

CANADIAN PACIFIC RAILWAY AND ALLAN LINE

The joint stock companies register in Edinburgh of the Allan Line Steamship Company shows that the Royal Trust Company, of Montreal, holds 57,637 shares, the total being 60,639 shares. Sir Montague Allan is registered as holding 500 shares.

It is generally believed that the Allan Line will shortly be absorbed by the Canadian Pacific Railway.

CHAIN OF CREDIT MEN'S ASSOCIATIONS.

"Credit is the capitalization of reputation," said Mr. H. B. Buell at the first general meeting of the season of the eastern division of the Canadian Credit Men's Association held at Toronto on Thursday night, "and where a high state of credit was found there was a high state of civilization. There could be no real commercial success without the essentials of honesty, capital, and ability."

"Any credit that was granted should be given only on a basis of satisfactory specific information, some of the sources of such information being (1) exchange of ledger information; (2) substantial amount of fire insurance—this should be insisted upon or credit should be refused; (3) personal contact; (4) mercantile agencies."

Mr. A. G. Malcolm presided, and referred to the complete chain of Credit Men's Associations across the Dominion, and suggested these might form the basis for a national credit association. The secretary read a wire from Mr. Henry Detchon regarding the affiliation of the British Columbia Association with the Canadian Association and announced that Toronto branch now had a membership of 143.

Montreal credit men also opened their session on Thursday night, when an address was given by the Honorable Minister of Justice.

Port Arthur has sold \$704,614 of its bonds in London.

The Bank of England rate was increased from 4 to 5 per cent. this week.

The annual meeting of the Actuarial Society of America, under the presidency of Colonel W. C. Macdonald, of the Confederation Life Insurance Company, was held in Toronto this week.

At the continued hearing of evidence in relation to the double liability of shareholders of the Farmers Bank at Toronto this week, Mr. G. Pell, of Omagh, Ont., stated he had agreed to take one share of the bank's stock, but he was credited for ten in the books.

VANCOUVER'S AGREEMENT WITH CANADIAN NORTHERN

Other Railway Developments—Fruit and Hops—Visitors to the Pacific Coast

(Staff Correspondence.)

Vancouver, October 14.

The agreement between the city and the Canadian Northern in respect to the railway company occupying a portion of the head of False Creek for their terminals in this city is prominently before the public. A special meeting of the council last week considered the agreement clause by clause, and on Tuesday night the board of trade continued the discussion. A special committee of the board reported in the matter, and the suggestion was made that the railway company be asked to pay \$2,000,000, which, some concluded, was a fair valuation of the land. The meeting was adjourned for one week. The general feeling is that while practically a gift is being made of the land, the establishment of the railway's main port on the Pacific will mean much for Vancouver. The amount to be spent and the conditions imposed will also result in much benefit to the city.

Opinion is diversified also regarding the bridge at Second Narrows. The construction of this bridge has been sanctioned by the Dominion Government and the necessary money is being raised by the municipalities surrounding Burrard Inlet. North Vancouver, is very aggressive in its campaign for a swing span, but more than one speaker has stood out for causeway.

Pacific Great Eastern Acquires Line.

The Pacific Great Eastern and the Howe Sound and Pemberton people has come to terms, whereby the Pacific Great Eastern takes over the latter line, perhaps a score of miles long at the head of Howe Sound. The townsite of Newport was also held as an asset. It looks as if Sir Richard McBride insisted that the Pacific Great Eastern should make some concession. The premier had hoped that long ago there would have been tangible evidence of progress with this line to the north, but hitches have occurred with the Howe Sound and Pemberton Railway Company and West Vancouver and practically no start has been made. The railway company knew it could get a good grade up Seymour Creek, and a more direct route, and was trying to secure a good bargain.

Since this Seymour route has been spoken of, an old-time railway engineer told The Monetary Times of a reconnaissance survey made thirteen years ago of the Seymour Creek Valley for Mr. J. J. Hill, and which goes to show how that that railway builder had great plans for the Pacific coast. Even before the Vancouver, Westminster and Yukon was proposed, over which route the Great Northern now comes into Vancouver, Mr. Hill had his eye on a line from Vancouver to the north, and only money difficulties deterred him from carrying his scheme into effect. He secured the services of a firm of local engineers to run a line through from Burrard Inlet to the Pemberton meadows, when it was ascertained that the route was extremely feasible and with easy grades.

Difficulties in Shipment of Fruit.

Through the lack of adequate transportation or labor, or because of high freight rates, fruit growers in the Okanagan have dumped much into the lake there this season, failing getting it out. The finest tomatoes in Canada are grown in the Okanagan, but they rotted, and fruit, which was a large crop, was not taken care of as it might have been had everything favored shipment. It pays the growers to ship even to the prairie market, rather than to the three cities on the coast, where middlemen favor United States fruit.

The growing of hops is a large industry in the Chilliwack district and around Agassiz, on the main line of the Canadian Pacific Railway about sixty miles east of Vancouver. The industry is mainly in the hands of one or two large companies, but it is a feature in the success of the district. No less than \$127,000 in wages was distributed this year to hop-pickers. Indians gather to harvest this crop, and come from all parts of the southern part of the province, even from the west coast of Vancouver Island and from Nicola in the interior. They are good spenders and the money they earn is soon circulating among the merchants in their respective districts.

Interested in Mortgage Loans.

Several financial men are in Vancouver this week. They include Mr. E. L. Pease, general manager and vice-president of the Royal Bank of Canada, who with Mr. A. J. Brown, K.C., one of the directors, is making a tour of observation through the West; Mr. J. A. Richardson, manager at Montreal of the Imperial Bank of Canada; and a Metropolitan Life Insurance Company party from New York.

NEW BRUNSWICK'S CONDITIONS ARE SATISFACTORY

Premier Flemming on Fruit Farming—Some Pulp and Paper Proposals—Reduced Prices for Power

(Special correspondence.)

St. John, N.B., October 14th.

The general condition of trade and industry throughout the province is very satisfactory. The demand for labor continues to absorb the available supply and complaints are heard both in St. John and other parts of the province of a scarcity of men. This condition seems likely to continue, although there will be some lessening of heavy construction work during the winter.

Improvement in agricultural conditions continues to attract attention. The farm settlement board has received many applications for farms under the ready-made-farm scheme, and expects to locate a large number of such farmers within the next year. As one experiment, they will divide a 400 acre farm in Sunbury County into eight fifty-acre farms, and settle thereon experienced market gardeners from the old country. Much more orchard planting will be done next spring. The Dominion Sheep Breeders' Association has just been conducting a series of sales of pure bred sheep at central points in the province. Premier Flemming on his return recently from British Columbia declared himself more than ever convinced that New Brunswick had more advantages for fruit farming than any province further west.

Power, Pulp and Paper.

The St. John Railway has had its reduced scale of prices for power approved by the public utilities commission and will spend nearly \$50,000 enlarging its plant to meet the expected demand from manufacturers for cheaper power.

The provincial government has signed the deed of transfer to the Grand Falls Company, Limited, of which Sir William Van Horne is president, of the water power and property which it owns at Grand Falls. The company will pay \$60,000 and with this purchase and property it already owns will be in a position to go ahead with the development of the immense water power and the erection of pulp and paper mills. It has secured options on extensive timber areas on the upper St. John River in New Brunswick, Quebec and Maine. It will spend several millions at Grand Falls.

The firm of Messrs. Stetson, Cutler and Company have been negotiating for the pulp mill at Mispec which has been idle for a couple of years. If unable to secure it they will build a mill of their own. Another lumber concern has been getting options on timber lands in New Brunswick with the idea, it is said, of starting pulp and paper mills.

Output of Iron Mines.

The output of the Drummond Iron Mines in Gloucester County this year is about 100,000 tons of ore and they have had difficulty in getting enough vessels to handle their output.

The Minto Coal Company have sunk one shaft in their property in Queens County and are raising coal. Another shaft is nearly completed and others will be sunk.

Two new factories for the manufacture of shoebacks at Fredericton are nearing completion. The Woodstock Woodworking Company, at Woodstock, has re-built its factory and employs 25 men. The Union Foundry Company, at West St. John, is doubling the capacity of its plant, and will have the work completed by next spring.

Completions and Projected Works.

The big new brush factory of T. S. Sims and Company, at St. John, is nearly completed and the firm are now installing some of their plant. Work is progressing on the Canada Brush Company's factory in St. John and on the new automobile factory.

In St. John the reclaiming of 90 acres from the tide to be used as a site for new industries is being advocated. The work would cost \$1,250,000, and it is reported on what seems to be good authority, that if this work were done and another area reclaimed at East St. John, projects involving \$10,000,000 would be carried out.—M.O.M.

Mr. Alfred W. Smithers, chairman of the Grand Trunk Railway Company, strongly urges the relaxation of immigration regulations to permit of the greater accession of labor, the want of which is paralyzing railway and other enterprises in Canada. He says it is quite evident that when men strike who are receiving three dollars and more for ordinary day's labor the time is approaching for suspension until labor is more plentiful.

MARKETS FOR CANADIAN EXPORTERS

Opportunities in Latin America—English Needs—Development of Agriculture in South Africa

Very few apples are grown locally, writes Mr. H. R. Pousette, Canadian trade commissioner at Buenos Aires, although it is stated that the province of Chubut is able to produce some excellent varieties. If this is so there should be a good business for progressive growers provided the transportation charges did not eat up most of the profit. However, be this as it may, Argentina, Brazil and Uruguay, will present a profitable field for many years to come.

New Zealand, Tasmania and the United States have all become alive to the opportunities in South America, and only recently three shippers from the Antipodes were here, making arrangements for a steady trade. Although there is a demand the year round, owing to a scarcity of locally grown fruit, the best months are October, November and December, that being the period when the market is most bare.

Demand for Salmon.

Mr. Pousette also adds: There is a steady demand for canned fish in Argentina, and although the bulk of it comes from Italy and Spain there is also a very fair amount of salmon coming in from the United States, United Kingdom, and Canada, particularly the first named.

The imports of tinned fish for the five years' period ending 1909, reached a total of 6,289,803 kilos or 6,800 short tons. Of this Italy supplied 2,102,419 kilos, Spain 1,749,680 kilos, United States 990,285 kilos, France 500,209, United Kingdom 473,026, Canada 263,256. During the last year of the quinquennium, the United States sold 187,145 kilos, a decrease of 35,459 over 1908, the United Kingdom 126,500 kilos, an increase of 23,414 kilos over the former year, Canada 61,197, which was 48,457 below the previous twelve months. The United States and Canadian packers lost altogether about 84,000 kilos in 1909, against the United Kingdom's gain of 23,414 kilos. No detailed statistics are available later than the last year mentioned.

Prepare for New Trade Route.

No doubt some of the English salmon originated in British Columbia. If this be so, and it certainly was not the product of the United Kingdom, as it is almost all Pacific coast fish, it would seem more practical to sell direct.

South America ought to present a most satisfactory market in every way, to British Columbia shippers, as it is a steady and expanding one.

There are difficulties in the way of transport, but they are no greater than those overcome by the Puget Sound packers, and undoubtedly less than those met by the British concerns. This is a trade which will be advantageously influenced by the Panama canal, so that packers would be well advised, if they were to commence now to prepare for the rearrangement of trade routes, which must take place when the much anticipated opening arrives.

Result of Adverse Weather.

A shortage of turkeys and hay, owing to adverse weather conditions in England, is noted by Mr. J. M. Mussen, Canadian trade commissioner at Leeds, who remarks this should be a favorable opportunity for Canadian exporters.

It is interesting to observe the many uses to which wood by-products are now put as a substitute for materials in use formerly. Wood wool (or fibre), for instance, is now in common use for packing all kinds of goods. It is also used as a substitute for flocks in bedding; for upholstering and also as a substitute for straw for stable purposes.

Wood flour which is made chiefly from spruce or pine sawdust, is now used as an ingredient in the making of linoleum and explosives.

There is also a certain demand for wood rope made from wood fibre which is used by engineers and iron founders and also by furniture and other packers.

Supplies of these products are obtainable in England and are imported from Norway, Sweden, Belgium and Germany. From inquiries made as to the prospects for Canadian manufacturers some doubt is expressed as to whether the cost of freight from Canada would not prove an obstacle to the trade.

May be of Importance to Canada.

What is regarded as an important contract and likely to be of indirect interest to Canada has been made between the government of South Africa and the Union Castle Steamship Company, for a term of ten years and goes into effect on October 1, 1912, is the report of Mr. E. D. Arnaud, Canadian trade commissioner at Bristol, England.

In order to encourage the agricultural development of the Union of South Africa, and the export of produce therefrom the company undertakes to charge special rates for freight upon homeward bound shipments of produce, and to carry

free of freight pedigree stock exported to South Africa.

It is also agreed that deferred commissions to shippers are to be discontinued after October 1, and on outward shipments primage is reduced from 10 to 5 per cent. In this connection it is interesting to note that Sir Sothern Holland, His Majesty's trade commissioner to South Africa, recently stated in an interview: "In the agricultural implement trades America, Sweden, Germany and Canada are all doing their utmost to secure business."

"The new mail contract, if read between the lines, provides the best possible guarantee as to the future prospects of trade with South Africa. The country could not have expected better treatment for its agricultural industries."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 11th:—Cobalt Lake, 65,200; Cobalt Townsite, 82,400; Buffalo Mines, 65,648; Trethewey, 132,500; McKinley-Darragh, 145,590; La Rose, 148,989; Temiskaming, 59,900; Kerr Lake, 61,100; Millerette, 40,000; Miller Lake O'Brien, 40,000; total 841,327 pounds, or 420.6 tons. The total shipments since January 1st are now 33,842,779 pounds, or 16,921 tons.

In 1904 the camp produced 158 tons, valued at \$316,217; in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

SHORTAGE OF CATTLE

"The advent of the wheat farmer has gradually forced out the cattle rancher, until there are scarcely half a dozen large ranches left, says Mr. Vere C. Brown, superintendent of Western branches of Canadian Bank of Commerce, upon his return from a Western trip. And the prophecy of 'Pat' Burns in a published letter about three years ago is being only too amply fulfilled. The supply of beef cattle in the prairie provinces has now been depleted to a point where there are not sufficient animals for our own requirements, and the month of February or March next will witness Australian and New Zealand cattle being unloaded at the Vancouver wharves, for the Western packing houses. This is a most deplorable condition especially in view of the immense areas in the West which are admirably adapted for mixed farming. For a remedy of this serious situation we will now be dependent on what can be accomplished in the direction of an extension of the mixed farming movement, and progress in this direction is lamentably slow. Under the most favorable conditions it would take five or six years to remedy the cattle shortage and some strong and concerted action on the part of the provincial government, the railways, banks and farmers' associations is urgently called for.

FIRES IN CHURCHES

Superintendent F. J. Stewart of the New York Board of Fire Underwriters has issued the following warning regarding the safeguards against fires in churches, clubs and public buildings:

"The frequent fires each year due to defective heating and lightning apparatus, suggest the importance of a special warning at this particular season, when many heating equipments are being put into service after disuse since spring. We respectfully solicit your co-operation in our efforts to reduce the fire waste in churches, clubs and other buildings, such as rectories, assembly halls, schools, colleges, hospitals, asylums and charitable institutions. In this connection, we ask that you have all heating equipments carefully inspected, in order that any repairs, if needed, may be made before the advent of cold weather. In like manner, all lighting systems should be inspected and repaired. Systematic care of motors, fuel, packing materials, paint and general refuse is also essential.

"The temporary use of motion picture machines in churches, clubs and assembly halls constitutes a serious increase in the normal fire hazard of such places, owing chiefly to the exceedingly inflammable nature of the films most commonly employed. A permit should invariably be obtained in advance for the use of motion picture machines in order to comply with the law, as well as the terms of the fire insurance policy. Our experts on the subject of heating and lighting apparatus will call occasionally to inspect your equipments and offer suggestions, if any seem warranted, or they will be sent to any church, club or other property upon request made of us for that purpose. We bespeak for our inspectors your hearty co-operation in these matters of mutual interest, which involve the protection of life and property against fire."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Mines.—Hollinger's dividend amounts to three per cent., to be paid every four weeks. The first payment is to be made November 2nd to shareholders of record October 25th.

Halifax Electric Railway.—A despatch from Halifax stated that the majority of the shareholders of Halifax Electric Railway stock are accepting the offer of 160 a share made by the Montreal syndicate.

Cape Breton Coal, Iron and Railway Company.—The Cape Breton Coal, Iron and Railway Company intends appointing the Electric and General Investment Company as trustees for its issue of special first mortgage gold bonds, in place of the present individual trustees.

Quebec Railway Company.—The Quebec Railway statement of earnings for the month of August shows an increase of \$13,230 in gross earnings, but net a falling off of \$52. This is explained as due to the company charging up under operating expenses considerable sums devoted to improvements on the system which will later add materially to revenue. The statement for the month follows:—

	1912.	1911.	Inc.
Total earnings from operation..	\$163,882	\$150,652	\$13,230
Operating expenses	79,479	66,196	13,282
Net earnings from operation..	\$ 84,402	\$ 84,455	\$ *52

*Decrease.

Quebec Central Railway.—At the annual meeting of the Quebec Central Railway, Mr. Edward Dent, president of the road, stated that the past year had been a satisfactory one, and that the ensuing year promised to be equally so. He stated the company was pleased with the development of traffic from the new extension. It anticipates an increase in wages amounting to over \$35,000, and that there will be considerable expenditure in increasing the siding accommodation. He said there would also be big capital expenditures when the new bridge at Quebec is completed, in opening up branch lines to meet the competition in fast train services.

Resolutions confirming the agreement with the Canadian Pacific Railway were adopted. Manager Walsh declared the Canadian Pacific Railway was thoroughly satisfied with the arrangements.

Hudson Bay Company.—The land sales of the Hudson's Bay Company in the September quarter reveal a great improvement. Sales of farm lands are returned at 19,400 acres for £85,500, in comparison with 14,600 acres for £54,800 for the corresponding period, while town lots yielded no less than £209,100, as against £37,700 in 1911. Receipts totalled £130,900, as against £68,700. How the six months' results to date compare will be seen from the following table:—

	Six months to Sept. 30th,	
	1911.	1912.
Farm lands { acres	24,100	37,800
{ amount	£ 88,900	£ 162,500
Town lots	£ 70,700	£1,158,200
Total receipts	£178,000	£ 485,000

The increase in the sales of town lots is without parallel, while the gain in the total receipts amounts to £307,000.

Quebec and Saguenay Railway Company.—Application for the appointment of a sequestrator to take charge of this company's affairs was made to the Lieutenant-Governor-in-Council of Quebec province by Mr. G. A. Campbell, K.C., on behalf of Messrs. O'Brien and Doheny, contractors who are suing for \$850,000 for work done in connection with the enterprise. The application has been made in order that no creditors who have obtained judgment against the company may obtain any undue priority in payment.

The Quebec Railway, Light, Heat and Power Company, Limited, own the stock and bonds of the Quebec and Saguenay Railway. The holders of the first issue of the Quebec Railway are entitled to rank in preference to the holders of the subsequent issues upon the securities which were pledged under the original deed of trust to The Montreal Trust Company.

Consolidated Mining and Smelting Company.—A 4 per cent. distribution of profits was declared by the directors of the Consolidated Mining and Smelting Company, and was confirmed at the annual meeting of shareholders. The dividend will be paid October 17 to shareholders of record on

the books October 12. It was explained by president W. D. Matthews that this dividend was for no stated period. No fixed dividend policy was adopted for the future, Mr. Matthews explaining that dividends would be declared as it was considered that the earnings warranted.

After referring to the various troubles experienced by the company during the year, Mr. Matthews stated that the company had come through them well, and was now in a better position than ever before. He recalled his advice of a year ago to shareholders not to dispose of their stock, and he said he hoped they would still hold their stock now that it would give them a return.

All the reports were adopted without a question on the part of the shareholders. Mr. Matthews expressed appreciation of the staff of officers of the company. A resolution was passed changing the company's year to end September 30, instead of June 30, and fixing the date for the annual meetings at the third Tuesday in December.

The former directors were elected, and at a subsequent meeting the board re-elected the existing officers.

The Consolidated Mining & Smelting Company of Canada, Limited, ore receipts at Trail smelter for week ending October 3rd, and from July 1st, to date, in tons:—

Company's Mines—	Week ending October 3.	July 1 to date.
Centre Star	2,871	43,611
Le Roi	1,011	10,914
Sullivan	845	8,072
St. Eugene	62	380
Richmond-Eureka	..	383
Molly Gibson	..	778
No. 1	..	153
Other mines	1,415	17,359
Total	6,204	81,650

British Canadian Lumber Corporation.—The following is a statement of operations of British Canadian Lumber Corporation, Limited:—

	Sept., 1912.	Year to Date.
Lumber—	Feet.	Feet.
Manufactured	6,243,767	44,924,182
Sold	4,169,001	36,905,873
Shingles—		
Manufactured	..	..
Sold	2,956,750	22,047,050
Lath—		
Manufactured	1,417,700	9,575,000
Sold	841,550	8,774,050
Average sale price for manufactured lumber at Vancouver, \$17.44 per M.		

Kerr Lake Mining Company.—Kerr Lake Mining Company has declared the regular quarterly dividend of 25 cents per share, payable December 16th to stock of record November 30th.

For the year ended August 31st, 1912, the company reported net profits of \$769,175. This compares with \$937,379 in 1911, \$1,108,220 in 1910, and \$1,129,047 in 1909.

Following table gives the amount of dividends paid by the company to August 31st, 1912:—

Year.	Amount.
1912	\$ 690,000
1911	1,200,000
1910	990,000
1909	480,000
1908	360,000
1907	210,000
1906	90,000
Total	\$4,020,000

The gross production from all ores for the year ended August 31st amounted to 1,885,495 ounces, as compared with 2,388,420 ounces the preceding year, or a decrease of approximately 500,000 ounces. The difference is accounted for by the reduction made by the smelting works for losses and in the way of treatment charges.

The cost of production follows:—

	Cents.
Mining and development cost.....	12 10-100
Shipment and treatment charges.....	5 55-100
Administration and general	0 65-100
Total	18 30-100

The increase in cost over last year is due chiefly to the greater amount of development work per ton of ore mined, and larger proportion of low-grade mill rock handled.

There was a total of 8,481 feet of development work done during the year up to August 31st.

At present the mill is being operated at the rate of 30 tons a day. It is the intention of the company to increase the output to forty-five tons a day upon the completion of additions to the mill which are now in progress.

St. Lawrence Flour Mills Company.—The annual meeting of the St. Lawrence Flour Mills Company, Limited, was held recently and was well attended. The balance sheet showed net profits for the year of \$62,319, which the shareholders considered satisfactory in view of the fact that it covered the first year of the company's business, which is generally recognized to have been a most difficult one for millers.

The directors reported that the capacity of the mill had been recently increased by 400 barrels, bringing it up to 2,500 barrels daily.

Sympathetic reference was made to the death during the year of Mr. Victor E. Beauvais, the late secretary of the company.

Prospects for the coming year were regarded as encouraging. The old board of directors were re-elected as follows:—Mr. G. A. Grier, president; Mr. T. Williamson, vice-president; Lieutenant-Colonel A. E. Labelle, managing director; Sir Rodolphe Forget, M.P.; Mr. C. J. Fleet, K.C. Mr. A. E. Gagnon was elected secretary and Dr. S. Thornton, treasurer.

MONTREAL ACCOUNTANTS

The annual meeting of the association of accountants in Montreal was held on Tuesday at the board of trade. The annual report showed that a successful year, financially and otherwise, had been passed. The following officers were elected: president, Mr. James G. Ross; first vice-president, Mr. A. K. Fisk; second vice-president, Mr. A. C. Stead; secretary-treasurer, Mr. F. W. Sharp; council, Messrs. John Hyde, A. W. Stevenson, David S. Kerr and John Paterson.

In the evening an informal dinner was held at the Montreal Club, and was well attended by the members and their friends.

DECREASE IN LABOR DISPUTES

An improvement is shown in labor conditions in regard to disturbances through industrial disputes during September. The Department of Labor records the fact that there were 21 disputes in existence during the month, a decrease of 21 as compared with the previous month, though an increase is still maintained over the corresponding month of last year. Ten disputes in all commenced during September, the most important of which were those of coal miners on Vancouver Island and carpenters at Moose Jaw. The former involved a cessation of work on the part of about 3,000 miners employed in the Cumberland and Lady-smith coal mines, and was not terminated at the end of September; that of carpenters at Moose Jaw affected 450 workers, but was not of long duration. About 5,000 employees were thrown out of work by disputes in existence during September.

DEBENTURES AWARDED

Strongfield Village.—\$2,000, to Messrs. Nay and James, Regina.

Tisdale Village.—\$1,500, to Messrs. Nay and James, Regina.

Round Valley R.M.—\$5,000, to Messrs. Nay and James, Regina.

Montreal Protestant Schools.—\$66,000, to Montreal City and District Savings Bank.

Hawarden, Sask.—\$4,000 7 per cent. 10 years, to Messrs. Curran Brothers, Regina.

Acton, Ont.—\$8,500 5 per cent. 20 years, to Messrs. C. H. Burgess and Company, Toronto.

Stornoway Station, Sask.—\$4,000 6 per cent. 20 years, to Messrs. B. K. Thompson and Company, Winnipeg.

Fort Francis, Ont.—\$15,229 6 per cent. 30 instalments, to Messrs. C. H. Burgess and Company, Toronto.

Lambton County, Ont.—\$16,000 4½ per cent. 10 instalments, to Messrs. W. A. Mackenzie and Company, Toronto.

Montreal Protestant Schools.—\$500,000 4 per cent. (making a total of \$834,000), to Royal Securities Company, Montreal.

Melfort, Sask.—\$25,000 6 per cent. 30-year school debentures, (in addition to those reported last week), to Messrs. G. A. Stimson and Company, Toronto.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Lethbridge, Alta.—Lethbridge ratepayers endorsed a skating rink by-law.

South Vancouver, B.C.—At a cost of \$15,300, a school site will be purchased by the school board.

Fredericton, N.B.—Tenders are asked for \$5,000 4 per cent. bonds. G. R. Perkins, city treasurer.

North Vancouver, B.C.—The electors passed two by-laws for a total amount of \$58,000 for streets, &c.

Winnipeg, Man.—By-laws to raise \$1,000,000 for schools, &c., will be submitted for ratification in December.

Swan River, Man.—Until November 1st for \$4,000 6 per cent. 20-year debentures. B. E. Rothwell, secretary.

Rosetown, Sask.—On October 31, the burgesses of Rosetown, Sask., will vote on hospital and electric by-laws.

Forest, Ont.—Until October 26th for \$20,000 5 per cent. 30-year electric light plant debentures. R. Karr, town clerk.

Herbert, Sask.—The village has been authorized to borrow \$9,000 for permanent improvements. D. J. Wiens, secretary-treasurer.

Milden, Sask.—The village has been authorized to borrow \$4,000 for permanent improvements. C. T. Carnie, secretary-treasurer.

Waldheim, Sask.—The village has been authorized to borrow \$2,000 for permanent improvements. J. D. Buller, secretary-treasurer.

Brownlee, Sask.—The village has been authorized to borrow \$6,000 for permanent improvements. W. J. Wallace, secretary-treasurer.

Rosthern, Sask.—Ratepayers have carried the by-law authorizing the expenditure of \$10,000 upon cement sidewalks and crossings which were constructed this summer.

Pleasant Valley Rural Municipality, No. 258, Sask.—The municipality has been authorized to borrow \$12,000 for permanent improvements. W. B. Van Alstyne, McGee.

Emerald Rural Municipality, No. 277, Sask.—The municipality has been empowered to borrow \$20,000 for permanent improvements. S. G. Thorne, secretary-treasurer.

Rapid City, Man.—On October 23rd the ratepayers will vote on a by-law to issue \$12,000 debentures for electric light and power works. C. Gordon Murray, clerk and treasurer.

Mariposa Rural Municipality, No. 350, Sask.—The municipality has been empowered to borrow \$15,000 for permanent improvements. A. M. Carlile, Kerrobert, secretary-treasurer.

Rural Municipality of Golden West, No. 95, Sask.—The municipality has been authorized to borrow \$12,000 for permanent improvements. E. Mott, Glenada, secretary-treasurer.

Strathmore, Alta.—Until November 1st for \$5,000 15-year 6 per cent. cement sidewalk, and \$15,000 6 per cent. 10-year plank sidewalk debentures. M. E. Sly, secretary-treasurer.

North Battleford, Sask.—Until October 21st for \$100,000 5¼ per cent. 30-year high school debentures. H. W. Dixon, secretary-treasurer. (Official advertisement appears on another page.)

Watrous, Sask.—Until November 1st for \$83,000 5½ per cent. 40-year waterworks and sewer construction debentures. Joseph Gaye, secretary-treasurer. (Official advertisement appears on another page.)

Duncan, B.C.—Until December 1st for \$65,000 5 per cent. 25-year electric light and power; \$25,000 5 per cent. 25-year waterworks; \$15,000 5 per cent. 15-year schools; \$10,000 5 per cent. 10-year streets debentures. James Greig, C.M.C.

West Vancouver, B.C.—Until October 29th for \$100,000 5 per cent. 20-year ferry, and \$75,000 5 per cent. 50-year road debentures. G. H. Peake, C.M.C., Hollyburn P.O., West Vancouver. (Official advertisement appears on another page.)

Melville, Sask.—Until November 11th for \$55,000 5 per cent. 40-year town hall; \$6,000 5 per cent. 6-year mill loan; and \$43,300 5 per cent. 30-year debentures. Fred H. Clarkson, secretary-treasurer. (Official advertisement appears on another page.)

Wetaskiwin, Alta.—Until October 30th for \$16,000 5 per cent. 50-year waterworks and sewers; \$23,000 5 per cent. 20-year electric light; \$6,445.06 5 per cent. 20-year concrete walks; \$2,060.41 5 per cent. 30-year sewers; and \$810.56 6 per cent. 7-year plank walk debentures. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

CANADA IS NINTH MARITIME NATION

Vessels Show Increase in Number and Tonnage—List of Principal Ports—Nearly Fifty Thousand Employed

Now that the practicability of the Hudson Bay route together with the probabilities of the effects of the Panama Canal are occupying so much attention, the following statistics of Canada's shipping and its ports will be of interest.

The total number of vessels on the Canadian register for the year ended December 31, 1911, was 8,088, measuring 70,446 tons, being an increase of 184 vessels and 19,517 tons over 1910. There were 3,444 steamers, with a gross tonnage of 588,741, included in the list, which, at an assumed average value of \$30 a ton for the net registered tonnage, represents \$23,113,380. New vessels built and registered in Canada numbered 339, representing 27,736 tons net register, which, estimated at \$45 a ton, gives \$1,148,120 for new vessels. During the year 279 vessels were removed from the register. It is estimated that 41,447 men and boys, inclusive of the masters of the vessels, were employed on Canadian registered vessels during 1911.

Canada Occupies Ninth Position.

The number and tonnage of vessels, according to provinces, are as follows:

	Sailing ships & steamships	Steamships	Gross tonnage of steamships	Net tonnage of sailing ships & steamships
Ontario	2,014	1,472	255,628	236,877
Quebec	1,511	490	128,523	193,682
Nova Scotia	2,105	296	35,916	142,631
British Columbia ..	1,227	873	112,511	122,264
New Brunswick	966	200	39,890	55,872
P. E. Island	149	20	4,407	9,683
Manitoba	96	86	8,348	6,373
Yukon district	15	3	3,132	2,708
Saskatchewan	5	4	381	356
Totals	8,088	3,444	588,741	77,044

In a list showing the net registered tonnage of the shipping of the various maritime nations of the world, Canada appears as the ninth.

Ports of Registry.

Of the vessels which were removed from the Canadian register during 1911, 21 were sold to foreigners, 37 were wrecked, 15 stranded, 12 lost, 78 broken up, 10 abandoned at sea, 3 sunk in collision, 12 foundered, 31 burnt, 2 condemned, 31 reported out of existence, 2 dismantled, 17 were transferred to Newfoundland, and 8 to Barbadoes.

Ports of registry are distributed as follows:—Ontario, 38; Nova Scotia, 21; New Brunswick, 7; Quebec, 6; British Columbia, 4; Prince Edward Island, Manitoba, Saskatchewan and Yukon territory, one each.

East and West.

The ports having a net tonnage of 10,000 and over, are as follows:—

	Vessels.		Net tonnage.
	Sailing.	Steam.	
Montreal	803	297	141,274
Victoria, B.C.	325	203	65,350
Toronto	352	285	57,513
Vancouver, B.C.	686	531	45,573
Quebec, Que.	618	158	45,097
St. John, N.B.	330	105	39,953
Ottawa	390	253	31,014
Windsor, N.S.	72	15	24,161
Lunenburg, N.S.	332	30	22,743
Kingston, Ont.	208	139	22,092
Halifax, N.S.	433	100	21,765
Midland, Ont.	30	24	16,214
Parrsboro, N.S.	87	7	15,659
Hamilton, Ont.	40	37	14,930
Collingwood, Ont.	78	73	14,059
Yarmouth, N.S.	310	38	13,624
Port Arthur, Ont.	80	55	11,159
S.S. Marie, Ont.	69	59	10,318

Increases Shown in Number and Tonnage.

The vessels built and added to the register during 1911, according to provinces, were as follows:—

	Vessels.	Tonnage.
Ontario	42	10,086
British Columbia	98	7,781
Nova Scotia	136	5,340
Quebec	30	2,726
Manitoba	3	902

	Vessels.	Tonnage.
New Brunswick	25	774
Saskatchewan	1	66
Prince Edward Island	4	61
Totals	339	27,736
Totals, 1910	294	22,283

MR. HOLT TO MANAGE ROYAL TRUST COMPANY

Mr. A. E. Holt has become manager of the Royal Trust Company in succession to Mr. Robertson, who has retired on account of ill-health. Mr. Holt was born at Quebec in 1868, and is a son of the late Mr. Justice Holt, of that city, who died in 1879. The family moved to Montreal in 1884, when Mr. Holt entered the service of the Bank of Montreal. In 1899, the general manager of the bank, Mr. Clouston, now Sir Edward Clouston, accepted for the first time the presidency of the Canadian Bankers' Association, and about the

A. E. HOLT,
Who Has Become Manager of the Royal Trust Company.

same time the Royal Trust Company was organized under the auspices of the bank. A new position of secretary to the general manager was created, and Mr. Holt was selected to fill it. He acted as secretary to the Canadian Bankers' Association for about a year, when Mr. Knight, the present occupant of the position, was appointed to it, as Mr. Holt's other duties were becoming too onerous for him to continue in it, and he had only occupied it temporarily pending a permanent appointment.

He continued to hold both the secretaryship to the general manager and the trust company secretaryship for about three years, when the trust company had grown to an extent which rendered it necessary to divide the duties, so he was appointed assistant manager, and now, manager of the company. He was succeeded as secretary to the general manager of the Bank, by Mr. Doble, now president of the Royal Securities Corporation.

Mr. Holt is well known and generally respected and takes to his new position the good wishes of numerous friends. His experience in financial spheres ensures the continued success of the company.

Argument was heard before the Dominion Railway Commissioners recently in the application of the International Paper Company, of New York, and a large number of Canadian firms to have the railways justify their recent increase of approximately 1½c. from Ontario, Quebec and New Brunswick points to New York State on pulpwood. The Canadian Pacific Railway, Grand Trunk and Canadian Northern were represented and urged that the new rate was a substitution for a blanket rate which had originally covered a very large territory. On account of the extra haul a line through Richmond, Quebec, had been taken as a dividing point and rates increased beyond that, the advance chiefly affecting American mills. Warning has been given shippers so as to allow them to take the increase into their contracts. The pulpwood interests, on the other hand, urged that the present rates are high enough.

STATISTICS HAVE ANCIENT ORIGIN

Data Were Originally Collected for Purposes of Government, to Ascertain a Nation's Fighting Strength
—Modern Uses and Adaptations

BY JAMES HEDLEY.

The average man usually considers statistics a modern thing, dating from, say one, or at most two centuries ago. It is true that only within fifty years has the use of statistics been so perfected as to have become a science, but a long time has elapsed since data began to be collected for purposes of government. Facts and figures were got together to prepare for the building of the pyramids; and fifteen centuries later Rameses II. took a census of all the lands of Egypt in order to apportion them among his subjects.

Moses numbered the Children of Israel, to learn their fighting strength, probably about 1500 B.C., and King David took another census, about 1018 B.C. for like purposes. The Chinese Government had a description of its provinces compiled as early as 1200 B.C., and Sycurgus divided the Greek territory of his day for levying taxes assigning to the Spartans 9,000 portions and to the Lacedæmonians 30,000 portions of Laconia. Rome did a like thing; while Charlemagne, William the Conqueror and Frederick Second of Germany, enumerated in their day the persons and property of their domains. These steps were taken for administrative work or plans for war.

To Encourage Trade and Industry.

Coming down to the Middle Ages such statistics were more regularly collected, not only because they were needed in preparation for war but because in the world's progress it was deemed necessary to encourage trade and industry. Extensive enquiry was made by Philip Second of Spain in 1575 A.D. concerning the districts presided over by prelates and corregidores; while Sully, in the beginning of the 17th century, prepared for his master, Henry of Navarre, a statement of the financial and military resources of France. Louis XIV., too, required reports on the state of the country from each of his general intendants at its close.

The country which first made a systematic collection of statistical data at stated times in modern days was Prussia. The first Frederick William began in 1719 to gather reports about population, occupations, houses, holdings, taxes, &c., at first semi-annually but later at intervals of three years. Frederick the Great, too, was a firm believer in the value of statistical information, and much enlarged the scope of such inquiries, to include ages, deaths and their causes, agriculture, trade, shipping.

Decennial Census is American Product.

That the idea of the modern decennial census is an American product, is claimed by Willford I. King, M.A., of the University of Wisconsin, in his recent book on the "Elements of Statistical Method." It was first applied to that country in 1790. Great Britain adopted a similar plan of enumeration in 1801. Germany, France and other nations in turn adopted the principle of decennial censuses, succeeding years usually seeing them more elaborate. Even China has her modern census, which was first taken in 1911.

Comparative statistics were first compiled in the sixteenth century by German and Italian authors, who were followed by France in the seventeenth. Since then numerous statistical dictionaries have appeared, which are deficient in accuracy because of the lack of uniform inquiries. As long ago as 1661 a London man, Captain Grannt, made the first recorded analytical study in the field of vital statistics.

First Complete Life Table.

Shortly afterward, a Breslau German, Caspar Neumann, did some good by dissipating notions of superstition about the necessary fateful significance of the ages seven and nine in the lives of children. This he did by collecting records from the parish registers of his neighborhood of 5,869 deaths. These figures were made by the celebrated scientist, Edmund Halley, the basis of the first complete life table of which we have knowledge. A curious belief of the very ingenious German, Peter Johann Sussmilch, was that, dealing with the ratio between births and deaths, the fact that the death rate was larger in the city than in the country, he interpreted to mean that in the cities luxury and vice flourished, hence bringing down the wrath of God. Laplace, Fourier, and later the Belgian Quetelet, made extensive statistical studies in the realms of astronomy and meteorology. Enquiring also into the moral, social and physical characteristics of men and the nature of plants, Quetelet made the surprising discovery that similar results were obtained from each and every variety of phenomena observed. Lists of crimes, suicides, accidents, when collated seemed to him to prove that man's actions are

governed wholly by the mathematical law of chance or probability, for he showed that all kinds of human acts occurred with marked regularity.

Method of First Importance.

This, he believed, proved man to be the product of his environment—society to be responsible for the individual. Sir F. W. Herschel and Buckle, the historian, agreed with him, and almost doubted the existence of free will. The Italian school of scientists and many German statisticians, however, did not accept this view without question.

It was found necessary, however, in the progress of scientific enquiry, to adopt more elaborate methods, and with the opening of the nineteenth century, when statistical data were becoming more plentiful, the matter of method became of first importance. Bruno, Hildebrand's governmental statistics, and those of Carl Knies in 18th century were greatly improved upon by others in the 19th. It had been found that refined scientific enquiries could not be conducted by the crude and cumbersome machinery suited only to simpler problems. This term, "statistics," was at first applied to the general political and geographic information collected. It was a German professor, Gottfried Acherwall, who earliest organized this economic knowledge into a logical whole and called it statistics, deriving the term from the Italian word "statist," meaning statesman. This man has often been called the father of Statistics.

Wealth of Nations.

It was Adam Smith who first really segregated political economy as a separate science when he published "The Wealth of Nations," and "this work was soon followed by the teachings and writings of Stewart, Malthus, Ricardo, Say, Sartorius, Jacob and Kraus. Within the last forty years the pure theory of statistics has had remarkable growth. Succeeding F. J. Mone, in 1824, and Ernst Engel, in 1861, such men as August Meitzen, Francis Edgeworth, Francis Galton, E. L. Thorndike, Karl Pearson, G. Udny Yule, and C. B. Davenport, in the field of biological statistics, and M. Jacques Bertillon, Arthur L. Bowley, R. H. Hooker, Thomas S. Adams, and Warren Persons in the field of economics, have aided in advancing the theory far beyond its former bounds."

ENGLISH CEMENT COMBINE IN CANADA

It is generally thought that the Associated Portland Cement Manufacturers' Company, which is building a branch plant in British Columbia, will erect further establishments elsewhere in the Dominion. The report of this company for the year ended June 30th, 1912, shows that labor troubles affected earnings. The profits for the twelve months totalled £334,800, compared with £397,600 in the previous year. By curtailing the sums written off against various internal accounts, a net profit of £146,000 is reported, or about £4,200 less than for 1910-11. There has been set aside against repairs and renewals a sum of £106,400, the corresponding amount twelve months ago having been £120,000, and after meeting the preference dividend and again transferring £25,000 to general reserve and depreciation fund, there remains to be carried forward £37,800, or £7,600 less than was brought into these accounts. The outlook for the current year is said to be good.

AMERICAN SHIPBUILDING COMPANY'S CANADIAN PLANT

The company's plant at Port Arthur is referred to in the annual report of the American Shipbuilding Company for the year ended June 30th, 1912. That plant is stated to be in full operation, with contracts for steamers that will keep it busy for the next six to eight months, with additional negotiations pending. It is also well employed in dry dock and repair work. A considerable part of its equipment has been completed and is in operation, and its permanent machine shop, joiner shop and power plant are well under way toward completion.

The surplus of the company for the fiscal year was 0.36 per cent. on the common stock as against 1.1 per cent. in 1911. There was a balance of \$580,699 as compared with \$637,228 in the previous year. During the year up to the close of navigation, in 1911, marine business continued very dull and discouraging to the vessel interests; but the opening of navigation this year was more encouraging, and at the end of the company's fiscal year there was a fair revival in business.

The company has built and completed twelve vessels and has now under construction nineteen, among them a side wheel passenger steamer, larger than the one built last year, and which, when completed, will be the equal in type, construction and finish to anything afloat on inland waters.

CHARTERS GRANTED NEW COMPANIES

Number One Hundred and Fifteen This Week—Largest Has Capital of Three Million Dollars

With a capitalization of \$18,419,000 there were 115 companies which received charters this week. Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capital.
New Brunswick	6	\$619,000
Quebec	18	2,446,000
Ontario	22	6,890,000
Manitoba	12	1,415,000
Saskatchewan	15	2,879,000
Alberta	33	2,590,000
British Columbia	9	1,580,000
	115	\$18,419,000

The largest companies this week are as follows:—

Abitibi Pulp and Paper Mills, Toronto....	\$3,000,000
Investment Corporation of Regina, Regina	2,000,000
Municipal Realities, Montreal	1,000,000
Rochester Mines, Toronto	1,000,000
York Ontario Silver Mines, Cobalt	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Liberty, Sask.**—Liberty Beach Company, \$25,000.
- Camrose, Alta.**—Harris Dairy Products, \$100,000.
- Strome, Alta.**—Strome Athletic Association, \$3,000.
- Neville, Sask.**—Trader's Elevator Company, \$25,000.
- Wycliffe, B.C.**—Staples Securities Company, \$400,000.
- Macleod, Alta.**—Macleod Face Brick Company, \$100,000.
- Lethbridge, Alta.**—Lethbridge Laundry Company, \$75,000.
- Redlow, Alta.**—Beaver Lodge Industrial Company, \$10,000.
- Invermere, B.C.**—Invermere Contracting Company, \$50,000.
- Imperial, Sask.**—Imperial Land and Security Company, \$10,000.
- Vonda, Sask.**—Vonda Farming and Industrial Company, \$200,000.
- Eckville, Alta.**—Eckville and Gilby Co-operative Company, \$10,000.
- Grouard, Alta.**—Northern Realty and Investment Company, \$10,000.
- Nelson, B.C.**—Fritz-Stelner Brewing and Malting Company, \$100,000.
- Aylesbury, Sask.**—Aylesbury Farmers' Elevator & Trading Company, \$10,000.
- Cobalt, Ont.**—York Ontario Silver Mines, \$1,000,000. W. H. Garvey, J. A. Rowland, N. Tytler.
- Brandon, Man.**—News Publishing Company, \$40,000. A. C. Fraser, J. F. Kilgour, R. McQueen.
- Sault Ste. Marie, Ont.**—Algoma Fruit Growers, \$40,000. C. T. Adams, C. V. Plummer, T. J. Wilcox.
- St. Guillaume d'Upton, Que.**—Syndicat d'Upton, \$50,000. Z. Beauregard, O. Belhumeur, J. DesRosiers.
- Berlin, Ont.**—Twin City Athletic Association, \$40,000. H. A. Hagen, W. M. O. Lochead, A. J. Roos.
- Meaford, Ont.**—Georgian Bay Elevator Company, \$100,000. G. W. Mason, F. C. Carter, C. F. French.
- Port Arthur, Ont.**—Lakeside Lumber Company, \$100,000. C. Sorensen, W. F. Langworthy, A. J. McComber.
- Perth, N.B.**—Victoria Specialty Company, \$4,500. J. F. Johnstone, H. E. Blakslee, Miss A. P. Armstrong.
- Vancouver, B.C.**—Vancouver Spring Doubletree Company, \$50,000. Maritim Motor Car Company, \$50,000.
